6. By unanimous written consent dated June 26, 1991, the Board of Trustees authorized applicant's officers to terminate the trust agreement pursuant to which applicant was created, and thereafter applicant's existence as a trust was terminated. Applicant represents that California law imposes no requirement as to terminating the trust agreement.

7. Applicant has no assets, debts, or liabilities, nor any securityholders. There are no securityholders of applicant to whom a distribution in complete liquidation of their interests has not been made.

8. Applicant has not, within the last 18 months, transferred any of its assets to a separate trust, the beneficiaries of which were or are securityholders of applicant.

9. Applicant is not a party to any litigation or administrative proceeding.

10. Applicant is not now engaged, and does not propose to engage, in any business activity other than that needed to wind-up its affairs.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-18572; 811-4361]

Lazard Special Equity Fund, Inc.; Notice of Application

February 26, 1992.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANT: Lazard Special Equity Fund, Inc.

RELEVANT ACT SECTIONS: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company.

FILING DATE: The application was filed on January 22, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on March 23, 1992, and should be accompanied by proof of service on applicant in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC'c Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, One Rockefeller Plaza, New York, New York 10020.

FURTHER INFORMATION CONTACT: James M. Curtis, Staff Attorney, at (202) 504-2406, or Nancy M. Rappa, Branch Chief, at (202) 272-3030 (Office of Investment Company Regulation, Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end diversified management investment company that is organized as a corporation under the laws of Maryland. On July 24, 1985, applicant registered under the Act and filed a registration statement pursuant to section 8(b) of the Act. Applicant also filed a registration statement under the Securities Act of 1933 to register an indefinite number of shares of applicant's common stock. Applicant's registration statement was declared effective on January 8, 1986, and applicant commenced its initial public offering on January 16, 1986.

2. On August 19, 1991, applicant's board of directors approved an Agreement and Plan of Reorganization among applicant, The Lazard Funds, Inc., and Lazard Freres & Co. (the "Agreement"). Applicant mailed to its shareholders proxy materials dated November 11, 1991 relating to the proposed reorganization. At a special meeting of shareholders held on December 17, 1991, applicant's shareholders approved the Agreement.

3. On January 1, 1992, pursuant to the Agreement, applicant transferred all its assets and liabilities to The Lazard Funds, Inc., an open-end diversified management investment company, for the account of its newly-created series, the Special Equity Portfolio. Each full and fractional share of common stock issued and outstanding on December 31, 1992 was exchanged for an equal number of full and fractional shares of the common stock of the Special Equity Portfolio. The exchange of applicant's assets for the equivalent interest in the Special Equity Portfolio constituted an exchange at fair market value. No brokerage fees were paid in connection with the reorganization.

4. All expenses in connection with the reorganization, including the costs of preparing, printing, and mailing the related proxy material to applicant's shareholders, related legal fees, and governmental filing fees, will be paid by Lazard Freres & Co., applicant's former investment adviser and the investment adviser to the Special Equity Portfolio. Such expenses total approximately $160,000.

5. As of December 31, 1991, applicant had 7,357,773 shares of common stock outstanding with a net asset value of $15.14 per share and an aggregate net asset value of $111,395,334.

6. Applicant retains no security holders, assets, or liabilities. Applicant is not a party to any litigation or administrative proceeding. Applicant is not now engaged, nor does it intend to engage, in business activities other than those necessary for the winding up of its affairs.

7. Applicant filed Articles of Transfer with the Maryland State Department of Assessments and Taxation (the "Department") on December 23, 1991, and such Articles of Transfer became effectiver on January 1, 1992. Applicant plans to file Articles of Dissolution with the Department.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[File No. 22-21691]

Application and Opportunity for Hearing; Public Service Electric and Gas Company

February 28, 1992.

Notice is hereby given that Public Service Electric and Gas Company ("Company"), a New Jersey corporation, has filed an application pursuant to section 304(c)(1) of the Trust Indenture Act of 1939 ("Act") for the Securities and Exchange Commission ("Commission") to order an exemption from the provisions of section 316(a)(1) of the Act for certain First and Refunding Mortgage Bonds ("Bonds") under an indenture dated as of August 1, 1924, as amended by the Supplemental Indenture dated as of March 1, 1942 between the Company and Fidelity Union Trust Company (now First Fidelity Bank, National Association, New Jersey) as Trustee ("Indenture"), which will be supplemented by a separate supplemental indenture providing for each series of Bonds to be dated the first day of the month in which each such series of Bonds is issued.

Section 304(c)(1) of the Act provides in part that the Commission shall exempt from one or more provisions of the Act any security issued or proposed to be issued under an indenture under which securities (as defined in that section) are outstanding if and to the extent the Commission finds that compliance with such provisions, through the execution of a supplemental indenture or otherwise would require by reason of the provisions of such indenture or of any other indenture or agreement made prior to enactment of the Act, or the provisions of any applicable law, the consent of holders of securities outstanding under such indenture or agreement.

The Company alleges:

(1) One or more series of Bonds are proposed to be issued under the Indenture pursuant to a registration statement under the Securities Act of 1933 ("1933 Act"). The Bonds will be registered under the 1933 Act and the Indenture, as supplemented, will be qualified under the Act.

(2) The Indenture provides that upon an Event of Default (as defined therein) holders of 25 percent of the outstanding Bonds may require the Trustee to (a) accelerate the maturity of the Bonds, and (b) take other action for the protection of the holders. The Indenture also permits 10 percent of the holders of the outstanding Bonds to require the Trustee to investigate compliance by the Company with conditions precedent in connection with authentication of Bonds or withdrawal of cash, or in connection with the release of mortgaged property. The holders of Bonds have vested rights in these provisions under the Indenture, and such rights cannot be abrogated or changed without their consent.

(3) Pursuant to Rule 4c-4 under the Act, the Company has waived a hearing and requested that the Commission decide this application without a formal hearing on the basis of such application and other information and documents as the Commission shall designate as part of the record.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application which is on file in the Offices of the Commission's Public Reference Section, File Number 22–21691, 450 Fifth Street, NW., Washington, District of Columbia 20549.

Notice is further given that any interested persons may, not later than March 24, 1992 request in writing that a hearing be held on such matter stating the nature of his interest, the reasons for such request and the issues of law or fact raised by such application which he desires to controvert, or he may request a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, District of Columbia 20549. At any time after said date, the Commission may issue an order granting the application, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

DEPARTMENT OF STATE

[Public Notice 1580]

Shipping Coordinating Committee Subcommittee on Safety of Life at Sea, Working Group on Carriage of Dangerous Goods; Meeting

The Working Group on Carriage of Dangerous Goods of the Subcommittee on Safety of Life at Sea (SOLAS) will conduct an open meeting at 9:30 a.m. on March 20, 1992, in room 2415, at U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593–0001. The purpose of the meeting is to report the actions and decisions of the 43d Session of the Subcommittee on Carriage of Dangerous Goods (CDG) of the International Maritime Organization (IMO) which was held January 27–31, 1992, at IMO Headquarters in London and to begin planning for the 44th Session tentatively scheduled to be held October 19–23, 1992. The agenda items include:

a. Decisions of other IMO Bodies

b. Adoption of Amendments to the International Maritime Dangerous Goods (IMDG) Code

c. Amendments to section 13 of the General Introduction to the IMDG Code to cover transport in tanks of solid dangerous substances including molten substances in solidified form, and the transport of dangerous substances under heated conditions

d. Revision of section 21 of the General Introduction—Controlled Temperature Requirements

e. Development of criteria for stowage and segregation requirements

f. Development of criteria for the hermetic sealing of receptacles, packages and Intermediate Bulk Containers

g. Amendments to the Emergency Procedures for Ships Carrying Dangerous Goods and the Medical First Aid Guide for Use in Accidents involving Dangerous Goods

h. Implementation of Annex III of the Marine Pollution Convention (MARPOL 73/78), as amended, and amendments to the IMDG Code to cover pollution aspects (including immersion testing of packages for marine pollutants)

i. Carriage of dangerous goods on vehicle decks of passenger ships

j. Requirements for hazardous ships' stores

k. Transboundary movement-of wastes by sea

l. Stowage and segregation in open-top container ships

m. Relations with other organizations

n. Requirements for carriage of irradiated nuclear fuel

o. Marking of explosives for detectability

p. Reports on incidents involving dangerous goods or marine pollutants in packaged form on board ships or in port areas

q. Dangerous goods in passengers baggage and cars

r. Carriage of dangerous goods documentation

s. Updating of the Recommendations on the Safe Transport, Handling and Storage of Dangerous Goods in Port Areas

t. Review of existing ships' safety standards

u. Review of the Hazardous and Noxious Substances (HNS) Working Group Reports—Draft HNS Convention

v. Night signals on ships carrying dangerous goods

w. Planning for the 44th Session of CDG

Members of the public may attend this meeting up to the seating capacity of the room. Interested persons may seek information by writing: Commander K. J. Eldridge, U.S. Coast Guard (G–MTH–1), 2100 Second Street, SW., Washington, DC 20593–0001 or by calling (202) 267–1577.

Dated: February 25, 1992.

Bruce Carter,

Acting Chairman, Shipping Coordinating Committee.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Intent to Rule on Application to Impose a Passenger Facility Charge (PFC) at Charlottesville-Albemarle Airport, Charlottesville, VA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose a PFC at Charlottesville—Albermarle Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

DATES: Comments must be received on or before April 3, 1992.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Washington Airports District Office, 101 West Broad Street, suite 300, Falls Church, Virginia 22046.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Bryan O. Elliott, Director of Aviation, Charlottesville-Albermarle Airport Authority at the following address: 201 Bowen Loop, Charlottesville, Virginia 22901.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the Charlottesville-Albermarle Airport Authority under § 158.23 of part 158.

FOR FURTHER INFORMATION CONTACT: Mr. Robert B. Mendez, Manager, Washington Airports District Office, 101 West Broad Street, suite 300, Falls Church, Virginia 22046, (703) 285–2570. The application may be received in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose a PFC at Charlottesville-Albemarle Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

On February 18, 1992, the FAA determined that the application to impose a PFC submitted by Charlottesville-Albermarle Airport Authority was substantially complete within the requirements of § 158.25 of part 158. The FAA will approve or disapprove the application, in whole or in part, no later than June 11, 1992.

The following is a brief overview of the application. *Level of the proposed PFC:* $2.00. *Proposed charge effective date:* July 1, 1992. *Proposed charge expiration date:* April 30, 1994. *Total estimated PFC revenue:* 402,059.00. *Brief description of proposed project(s):* Reimburse Authority for its share of FY 1992 Master Plan Update.

Relocate Parallel Taxiway "A" (1450' × 50').

General Aviation South Taxiway/Ramp.

Airport Rescue and Firefighting (ARFF) Vehicle.

Snow Equipment Storage Building.

Snow Removal Equipment.

Aircraft Rescue and Firefighting Training Facility.

Land Acquisition.

Class or classes of air carriers which the public agency has requested not be required to collect PFCs: Air Taxi/Commercial Operators filing FAA Form 1800–31 and foreign air carriers.

Any person may inspect the application in person at the FAA office listed above under "**FOR FURTHER INFORMATION CONTACT**" and at the FAA Regional Airports office located at: Fitzgerald Federal Building, John F. Kennedy International Airport, Jamaica, New York 11430.

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Charlottesville-Albermarle Airport Authority.

Louis P. DeRose,

Manager, Airports Division, Eastern Region.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: February 27, 1992.

The Department of the Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer, listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, room 3171, Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

INTERNAL REVENUE SERVICE

OMB Number: 1545–0045.

Form Number: IRS Form 976.

Type of Review: Extension.

Title: Claim for Deficiency Dividends Deductions by a Personal Holding Company, Regulated Investment Company, or Real Estate Investment Trust.

Description: Form 976 is filed by corporation that wishes to claim a deficiency dividend deduction. The deduction allows the corporation to eliminate all or a portion of a tax deficiency. IRS uses Form 976 to determine if shareholders have included amounts in gross income.

Respondents: Businesses or other for-profit.

Estimated Number of Respondents/Recordkeepers: 500.

Estimated Burden Hours Per Respondent/Recordkeeper:

Recordkeeping—5 hours, 44 minutes.

Learning about the law or the form—47 minutes.

Copying, assembling, and sending the form to IRS—55 minutes.

Frequency of Response: On occasion.

Estimated Total Reporting/Recordkeeping Burden: 3,730 hours.

Clearance Officer: Garrick Shear (202) 535–4297, Internal Revenue Service, room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.

OMB Reviewer: Milo Sunderhauf (202) 395–6880, Office of Management and Budget, room 3001, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports Management Officer.

Organization and Functions of the Office of the Assistant Secretary (Domestic Finance)

Date: February 26, 1992.

1. *Purpose.* This directive describes the organization and functions of the Office of the Assistant Secretary (Domestic Finance).

2. *The Assistant Secretary (Domestic Finance)* reports through the Under Secretary for Finance and the Deputy Secretary to the Secretary. The incumbent is responsible for the following functions.

a. Advises and assist the Secretary and Deputy Secretary of the Treasury and the Under Secretary for Finance on debt management, Federal financing affairs, financing of non-Federal sectors of the economy, and general financing markets policy.

b. Exercises policy direction and control over Treasury's activities that relate to:

(1) The Federal Financing Bank;

(2) The development of legislative and administrative policies and principles for Federal credit programs;

(3) The determination of interest rates for various Federal borrowing, lending, and investment purposes under pertinent statutes;

(4) Treasury's role as prescribed by the Government Securities Act of 1986;

(5) Staff work on the substance of proposed legislation relating to the general activities and regulation of private financial intermediaries;

(6) The Secretary's direct responsibilities related to the Oversight Board of the Resolution Trust Corporation, the Office of Thrift Supervision, and the Office of Comptroller of the Currency; and

(7) Treasury activities relating to other Federal regulatory agencies.

c. Manages the Office of Synthetic Fuels Projects.

3. *Organization Structure.* The Assistant Secretary (Domestic Finance) supervises the Deputy Assistant Secretary (Federal Finance), the Deputy Assistant Secretary (Financial Institutions Policy), the Deputy Assistant Secretary (Corporate Finance), and the Director, Office of Synthetic Fuels Projects.

4. *The Deputy Assistant Secretary (Federal Finance)* supervises the following organizations: the Office of Government Financing, the Office of Market Finance, and the Office of Federal Finance Policy Analysis.

a. *The Office of Government Financing* is responsible for the following functions.

(1) Provides the Assistant Secretary (Domestic Finance) with technical assistance and background briefings on matters related to Government financing.

(2) Provides analyses of Federal credit program principles and standards and legislative and other proposals related to Government borrowing, lending, and investment activities to assure consistency with Treasury policies.

(3) Provides actuarial and mathematical analyses and computations as required for Treasury market financing, the Federal Financing Bank, the U.S. Savings Bonds program, and other Government agencies.

(4) Supports the data collection, processing, computer programming, and automated equipment requirements of this and the other offices under the Assistant Secretary (Domestic Finance).

(5) Develops policy for, and administers the operations of, the Federal Financing Bank.

b. *The Office of Market Finance* is responsible for the following functions.

(1) Provides the Assistant Secretary (Domestic Finance) with technical assistance and economic analyses on matters related to Treasury debt management policy, marketing of Treasury and Federally-related securities, and regulating the Government securities market.

(2) Analyzes current economic and securities market conditions and maintains data on allotments of Treasury securities in auctions and ownership of Treasury securities.

(3) Monitors the volume of funds raised and supplied in the credit markets and prepares flow-of-funds projections.

(4) Provides financial analysis and other technical assistance to support policy development in the area of Government-related entities, including Government-sponsored enterprises.

(5) Coordinates and approves market borrowing of Federal agencies and Government-sponsored agencies.

(6) Determines interest rates, including pricing of late payments or prepayments, to be used in Federal borrowing and lending programs.

C.The Office of Federal Finance Policy Analysis provides the Assistant Secretary (Domestic Finance) with analyses, evaluation, and technical assistance with respect to economic and financial developments, problems, and proposals in the areas of Treasury financing, public debt management, and related economic matters which include:

(1) regulatory issues involving the Government securities markets, futures markets, and related markets;

(2) alternative financing techniques;

(3) clearing and settlement issues;

(4) proposed changes in tax provisions that may affect the market for Treasury securities; and

(5) foreign investment in Treasury securities.

5. The Deputy Assistant Secretary (Financial Institutions Policy) supervises the Office of Financial Institutions Policy and the Office of Thrift Institutions Oversight and Policy.

a. *The Office of Financial Institutions Policy* is responsible for the following functions.

(1) Coordinates the Department's legislative efforts with regard to financial institutions, other than thrift institutions, and legislation affecting the agencies of the Federal Government that regulate financial institutions, other than thrift institutions.

(2) Reviews regulations, testimony, policy statements, and other issuances of the Office of the Comptroller of the Currency prior to their release.

(3) Provides staff support to carry out the Department's responsibilities regarding the Securities Investor Protection Corporation, Farm Credit Assistance Board, and the Pension Benefit Guarantee Corporation.

(4) Coordinates the Department's legislative and other efforts with regard to securities markets legislation and corporate financial activities.

b. *The Office of Thrift Institutions Oversight and Policy* is responsible for the following functions.

(1) Provides the Assistant Secretary (Domestic Finance) with assistance related to legislative initiatives regarding the thrift industry.

(2) Provides support to the Secretary in the role as Chairman of the Oversight Board for the Resolution Trust Corporation.

(3) Reviews regulations, testimony, policy statements, and other issuances of the Office of Thrift Supervision prior to their release.

(4) Manages special projects, such as congressionally mandated, interagency and Treasury studies related to thrift and other financial institutions.

6. *The Deputy Assistant Secretary (Corporate Finance)* supervises the Office of Corporate Finance, which is responsible for the following functions.

a. Coordinates the Department of the Treasury's legislative efforts with regard to corporate financial and economic activities, and securities and capital markets issues. Manages and coordinates interagency review of the insurance industry.

b. Monitors trends in the international market which impact the ability of U.S. business, financial institutions, and capital markets to compete effectively in the global economy, including:

(1) Coordinating the Department of the Treasury's response on legislation in these areas; and

(2) Providing the Assistant Secretary (Domestic Finance) with analyses and evaluations in the development of Department of the Treasury initiatives.

7. *The Office of Synthetic Fuels Projects* is responsible for the functions described in Treasury Directive (TD) 11–01, "Office of Synthetic Fuels Projects," dated August 6, 1986.

8. *Coordination of Legislative and Regulatory Matters.*

a. Nothing in this directive shall be interpreted to apply to the conduct of the congressional relations program as described in Treasury Directive (TD) 27–09.

b. The legislative and regulatory functions assigned in this directive shall be subject to the requirements of TD 28–01 and TD 28–02.

9. *Cancellation.* Treasury Directive 27–07, "Organization and Functions of the Office of the Assistant Secretary (Domestic Finance)," dated October 31, 1989, is superseded.

10. *References.*

a. TD 11–01, "Office of Synthetic Fuels Projects."

b. TD 13–01, "Delegation of Authority to Assistant Secretary (Domestic Finance) to Implement the Government Securities Act of 1986."

c. TD 27–09, "Organization and Functions of the Office of the Assistant Secretary (Legislative Affairs)."

BILLING CODE 4810-25-C

DEPARTMENT OF TREASURY

Internal Revenue Service

Acid Rain Program: Allowance System

AGENCY Internal Revenue Service, Treasury.

ACTION: Notice; solicitation for comments.

SUMMARY: This notice solicits public comments on the federal income tax consequences of the sulfur dioxide emission allowances program of title IV of the Clean Air Act of 1990.

DATES: Written comments must be received by April 3, 1992.

ADDRESSES: Written comments should be addressed to Internal Revenue Service, P.O. Box 7604, Benjamin Franklin Station, Attn: CC:CORP:T:R (IA–Branch 5), Room 5228, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Kathryn K. Nunzio, (202) 377–9589 (not a toll-free number).

SUPPLEMENTARY INFORMATION: Title IV of the Clean Air Act can be found at 42 U.S.C. section 7651 *et seq.* The Environmental Protection Agency's proposed regulations concerning this act can be found at 56 FR 63001, December 3, 1991.

The Service is currently studying the tax consequences of the emission allowances program of Title IV of the Clean Air Act of 1990.

The Service reqeusts comments on certain tax issues arising from the program which have been identified for study. The Service is particularly interested in the views of the utilities that will be affected by the program. The specific issues are:

(1) How are the costs of acquiring emission allowances treated for Federal tax purposes?

(2) What costs, if any, are included in the tax basis of an allowance?

(3) Is the cost of acquiring emission allowances an indirect cost of producing property under section 263A?

(4) Can allowances be depreciated under section 167?

(5) When and how would a taxpayer recover its basis in an emission allowance in each of the following circumstances:

(a) a utility uses an emission allowance during a year;

(b) a utility sells or exchanges an emission allowance;

(c) a purchaser of an emission allowance which is not a utility sells or exchanges the allowance; and

(d) an emission allowance becomes worthless?

(6) What is the character of any gain or loss realized in situations (b)-(d) set forth in paragraph 5 above?

(7) Is an exchange of emission allowances a taxable event? If so, are allowances issued in different years like kind property under section 1031?

(8) Is a penalty paid to the Environmental Protection Agency for emissions in excess of allowances deductible under section 162(a)?

(9) Will a secondary market be established for trading forward or futures contracts on emission allowances?

(10) What is the likely accounting treatment of emission allowances? For example, will separate accounts be established for allowances held for use in electricity production and for allowances held for investment?

(11) What are the tax consequences of participation in the Environmental Protection Agency's emission allowance program by taxpayers that are eligible to opt into the program pursuant to 42 U.S.C. section 7651i?

The Service invites interested parties to comment on any or all of these issues, and to identify other related issues that should be considered as part of this project. In order to provide timely guidane about these issues, the Service requests responses from interested parties within 30 days of the date of this notice.

Glenn R. Carrington,

Assistant Chief Counsel (Income Tax and Accounting).

Sunshine Act Meetings

Federal Register
Vol. 57, No. 43
Wednesday, March 4, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 3:15 p.m. on Friday, February 28, 1992, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider matters relating to the Corporation's corporate activities.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Director T. Timothy Ryan, Jr., Director (Office of Thrift Supervision), concurred in by Vice Chairman Andrew C. Hove, Jr., Mr. Stephen R. Steinbrink, acting in the place and stead of Director Robert L. Clarke (Comptroller of the Currency), and Chairman William Taylor, that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(6), (c)(9)(B), and (c)(10) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2), (c)(6), (c)(9)(B), and (c)(10)).

The meeting was held in the Board Room of the FDIC Building located at 550—17th Street, N.W., Washington, DC.

Dated: March 2, 1992.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

Corrections

Federal Register
Vol. 57, No. 43
Wednesday, March 4, 1992

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 357

[Docket No. 82N-0166]

RIN 0905-AA06

Orally Administered Drug Products for Relief of Symptoms Associated With Overindulgence in Food and Drink for Over-the-Counter Human Use; Tentative Final Monograph

Correction

In proposed rule document 91-30427, beginning on page 66742, in the issue of Tuesday, December 24, 1991, make the following correction:

On page 66742, in the second column, in the third full paragraph, the last sentence was printed incorrectly and should read "Final agency action on this matter will occur with the publication at a future date of a final monograph, which will be a final rule establishing a monograph for these drug products".

BILLING CODE 1505-01-D

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1910

RIN 1218-AB20

Process Safety Management of Highly Hazardous Chemicals; Explosives and Blasting Agents

Correction

In rule document 92-3917 beginning on page 6356 in the issue of February 24, 1992, make the following corrections:

1. On pages 6356 through 6417 the date at the top of each page should read "February 24, 1992".

2. On page 6403, in the second column, in the second paragraph from the bottom of the page, insert "3." before the amendatory instuction.

§ 1910.119 [Corrected]

3. On the same page, in the third column, in § 1910.119(b), in the last paragraph, in the fourth line, "spark-producing" was misspelled.

4. On page 6404, in the third column, in § 1910.119(e)(1)(i), in the first line, "50" should read "25".

5. On the same page, in the same column, in § 1910.119(e)(1)(iii), in the first line, "than" was misspelled.

6. On the same page, in the same column, in § 1910.119(e)(1)(v), in the fifth line, "The" should read "These".

7. On page 6405, in the first column, in § 1910.119(e)(3)(iii), in the first line, "Engineering" was misspelled; and in the third line, "interrelationships" was misspelled.

8. On the same page, in the same column, in § 1910.119(f)(1), in the fourth line, "safety" should read "safely".

Appendix A to § 1910.119 [Corrected]

9. On page 6407, in the second column, in the table, the entry for Carbonyl Fluoride was incomplete. Following the entry for Carbonyl Fluoride, insert "353-50-4" in the second column of the table; and insert "2500" in the third column of the table.

Appendix C to § 1910.119 [Corrected]

10. On page 6412, in the second column, in the second full paragraph, "operations." should read "operation."

11. On page 6416, in the 3d column, in the 2d full paragraph, in the 15th line, "affective" should read "affected".

Proclamation 6407—Year of the American Indian, 1992

Federal Register
Vol. 57, No. 43
Wednesday, March 4, 1992

Presidential Documents

Title 3—

The President

Proclamation 6407 of March 2, 1992

Year of the American Indian, 1992

By the President of the United States of America

A Proclamation

Half a millennium ago, when European explorers amazed their compatriots with stories of a New World, what they actually described was a land that had long been home to America's native peoples. In the Northeast part of this country and along the Northwest coast, generations of tribes fished and hunted; others farmed the rich soils of the Southeast and Great Plains, while nomadic tribes roamed and foraged across the Great Basin. In the arid Southwest, native peoples irrigated the desert, cultivating what land they could. Each tribe formed a thriving community with its own customs, traditions, and system of social order.

The contributions that Native Americans have made to our Nation's history and culture are as numerous and varied as the tribes themselves. Over the years, they have added to their ancient wealth of art and folklore a rich legacy of service and achievement. Today we gratefully recall Native Americans who helped the early European settlers to survive in a strange new land; we salute the Navajo Code Talkers of World War II and all those Native Americans who have distinguished themselves in service to our country; and we remember those men and women of Indian descent—such as the great athlete, Jim Thorpe and our 31st Vice President, Charles Curtis—who have instilled pride in others by reaching the heights of their respective fields. We also celebrate, with special admiration and gratitude, another enduring legacy of Native Americans: their close attachment to the land and their exemplary stewardship of its natural resources. In virtually every realm of our national life, the contributions of America's original inhabitants and their descendants continue.

During 1992, we will honor this country's native peoples as vital participants in the history of the United States. This year gives us the opportunity to recognize the special place that Native Americans hold in our society, to affirm the right of Indian tribes to exist as sovereign entities, and to seek greater mutual understanding and trust. Therefore, we gratefully salute all American Indians, expressing our support for tribal self-determination and assisting with efforts to celebrate and preserve each tribe's unique cultural heritage.

The Congress, by Public Law 102–188, has designated 1992 as the "Year of the American Indian" and has authorized and requested the President to issue a proclamation in observance of this year.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim 1992 as the Year of the American Indian. I encourage Federal, State, and local government officials, interested groups and organizations, and the people of the United States to observe this year with appropriate programs, ceremonies, and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this second day of March, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and sixteenth.

George Bush

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

Rules and Regulations

Federal Register
Vol. 57, No. 44
Thursday, March 5, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 573

[Docket No. 84F-0345]

Food Additives Permitted in Feed and Drinking Water of Animals; Poly(2-Vinylpyridine-Co-Styrene)

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of poly(2-vinylpyridine-co-styrene) as a coating agent in the preparation of rumen-stable, abomasum-dispersible nutrients for beef cattle. The agency is taking this action in response to a petition sponsored by Rhone-Poulenc Nutrition Animale. (The petition was originally filed by Eastman Chemical Division, Eastman Kodak Co.)

DATES: Effective March 5, 1992; written objections and requests for a hearing by April 6, 1992.

ADDRESSES: Submit written objections to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Woodrow M. Knight, Center for Veterinary Medicine (HFV-226), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301-295-8731.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of October 26, 1984 (49 FR 43111), FDA announced that a food additive petition (FAP 2197) had been filed by Eastman Chemical Division, Eastman Kodak Co., P.O. Box 511, Kingsport, TN 37662, proposing that the food additive regulations in 21 CFR part 573 be amended to provide for the safe use of poly(2-vinylpyridine-co-styrene) as a coating agent in the preparation of rumen-stable, abomasum-dispersible nutrient products for beef cattle. The sponsor of FAP 2197 is currently Rhone-Poulenc Nutrition Animale, 20, Avenue Raymond Aron, 92165 Antony Cedex-France.

When the petition was filed, the environmental assessment was not placed on display. For this reason, FDA subsequently published in the **Federal Register** of October 31, 1991 (56 FR 56079), a notice of availability of the environmental assessment for public examination and comment. No comments were received in response to that notice.

FDA has evaluated the data and information in the petition and other relevant material. The agency concludes that 21 CFR part 573 should be amended to provide for the safe use of poly(2-vinylpyridine-co-styrene) as set forth below.

In accordance with § 571.1(h) (21 CFR 571.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Veterinary Medicine (address above) by appointment with the contact person listed above. As provided in § 571.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Any person who will be adversely affected by this regulation may at any time on or before April 6, 1992, file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 573

Animal feeds, Food additives.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 573 is amended as follows:

PART 573—FOOD ADDITIVES PERMITTED IN FEED AND DRINKING WATER OF ANIMALS

1. The authority citation for 21 CFR part 573 continues to read as follows:

Authority: Secs. 201, 402, 409 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 342, 348).

2. New § 573.870 is added to Subpart B to read as follows:

§ 573.870 Poly(2-vinylpyridine-co-styrene).

The food additive poly(2-vinylpyridine-co-styrene) may be safely used as nutrient protectant in feed for beef cattle when used in accordance with the following conditions:

(a) The additive meets the following specifications:

Component/property	Limitation
Inherent viscosity	1.0 deciliter per gram.[1]
Styrene moiety	40 percent maximum.
2-Vinylpyridine moiety	60 percent maximum.

Component/property	Limitation
Residual styrene	200 parts per billion maximum.
Residual 2-vinylstyrene	200 parts per billion maximum.
Heavy metals such as lead.	<10 parts per million.
Arsenic	<3 parts per million.

[1] Inherent viscosity of a 0.25 percent (weight/volume) solution in dimethylformamide.

(b) The additive is used in the manufacture of rumen-stable, abomasum-dispersible nutrient(s) for beef cattle such that the maximum use of the additive from all sources does not exceed 5.1 grams per head per day. The additive may be used to protect the following nutrients:

(1) *Methionine.* The resulting product must contain a maximum of 10 percent poly(2-vinylpyridine-co-styrene) by weight and a minimum of 55 percent methionine by weight. The coated methionine must be established through in vitro tests to be at least 90 percent rumen-stable, of which at least 90 percent is subsequently dispersible under abomasal conditions.

(2) *Methionine and lysine.* The resulting product must contain a maximum of 10 percent poly(2-vinylpyridine-co-styrene) by weight and a minimum of a combined total of 55 percent methionine and lysine by weight. The coated methionine and lysine must be established through in vitro tests to be at least 90 percent rumen-stable, of which at least 90 percent is subsequently dispersible under abomasal conditions.

(c) *Label and labeling.* To ensure safe use of the additive, the label and labeling of the additive and of any feed additive supplement, feed additive concentrate, feed additive premix, or liquid feed supplement prepared therefrom, shall bear, in addition to the other information required by the Federal Food, Drug, and Cosmetic Act, the following:

(1) The name of the additive.

(2) A statement of the concentration of poly(2-vinylpyridine-co-styrene) in any product or mixture.

(3) Adequate directions for the use of the rumen-stable, abomasum-dispersible nutrient(s) products.

(4) The following statement: "Warning: Maximum use of poly(2-vinylpyridine-co-styrene) from all sources is not to exceed 5.1 grams per head per day."

Dated: February 28, 1992.

Richard H. Teske,

Deputy Director, Center for Veterinary Medicine.

BILLING CODE 4160-01-M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

28 CFR Part 0

Redelegation of Functions; Delegation of Authority to Drug Enforcement Administration Official

AGENCY: Drug Enforcement Administration (DEA), DOJ.

ACTION: Final rule.

SUMMARY: The Administrator of the Drug Enforcement Administration, United States Department of Justice, is amending the Appendix to subpart R of these regulations to redelegate certain functions and authority which were vested in him by the Anabolic Steroids Control Act of 1990.

EFFECTIVE DATE: March 5, 1992.

FOR FURTHER INFORMATION CONTACT: Gene R. Haislip, Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, Washington, DC 20537. Telephone number: (202) 307-7165.

SUPPLEMENTARY INFORMATION: The Anabolic Steroids Control Act of 1990, Title XIX, of the Crime Control Act of 1990, (ASCA), Public Law 101-647 placed anabolic steroids in Schedule III of the Controlled Substances Act (CSA) (21 U.S.C. 801, et seq.) effective February 27, 1991. The ASCA provides relief from certain regulatory requirements imposed on Schedule III substances for steroid products which do not contribute to the drug abuse problem. The products which are afforded such special treatment under the CSA are those which are expressly intended for administration through implants to cattle or other nonhuman species and are approved for such use by the Secretary of Health and Human Services and other products which, because of their concentration, preparation, mixture, or delivery system, have no significant potential for abuse.

The Attorney General has delegated his functions under the CSA to the Administrator of the Drug Enforcement Administration. See, 21 U.S.C. 871(a) and 28 CFR 0.100(b). Pursuant to this delegation, the Administrator of DEA has promulgated final regulations regarding the procedures by which these products would be identified. These regulations were published at 56 FR 42935 on August 30, 1991, and became effective on September 30, 1991. See, 21 CFR 1308.25, 1308.26, 1308.33, and 1308.34.

The Attorney General has authorized the Administrator to redelegate any of his functions under the CSA to any of his subordinates. See, 28 CFR 0.104. To further enhance the enforcement of the ASCA and these attendant regulations, the Administrator is further delegating to the Deputy Assistant Administrator, Office of Diversion Control, the authority to exclude or exempt certain eligible products containing anabolic steroids from certain regulatory aspects of the CSA, except that any final order following a contested proposed rulemaking shall be issued by the Administrator of DEA.

The Administrator certifies that this action will have no impact upon entities whose interests must be considered under the Regulatory Flexibility Act (5 U.S.C. 601). Pursuant to sections 1(a)(3) and 1(b) of E.O. 12291, this action is not a major rule and relates only to the organization of functions within DEA. Accordingly, it has not been reviewed by the Office of Management and Budget and does not require certification under E.O. 12778. This action has been analyzed in accordance with E.O. 12616. It has been determined that this matter has no federalism implications which would warrant the preparation of a federalism assessment.

List of Subjects in 28 CFR Part 0

Authority delegations (Government Agencies), Organization and functions (Government Agencies).

For the reasons set forth above, and pursuant to the authority vested in the Administrator of the Drug Enforcement Administration by 28 CFR 0.100 and 0.104, and 21 U.S.C. 871, title 28 of the Code of Federal Regulations, part 0, appendix to subpart R, Redelegation of Functions, is amended as follows:

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

1. The authority citation for part 0 continues to read as follows:

Authority: 5 U.S.C. 301, 2303; 8 U.S.C. 1103, 1427(g); 15 U.S.C. 644(k); 18 U.S.C. 2254, 3621, 3622, 3624, 4001, 4041, 4042, 4044, 4082, 4201 et seq., 4241 et seq., 6003(b); 21 U.S.C. 871, 876(a), 881(d), 904, 965; 22 U.S.C. 263a, 1621-1645o, 1622 note; 28 U.S.C. 509, 510, 515, 524, 542, 543, 552, 552a, 569; 31 U.S.C. 1108; 50 U.S.C. App. 2001-2017p; Pub. L. 91-513, sec. 501; E.O. 11919; E.O. 11267; E.O. 11300.

2. The appendix to subpart R is amended as follows:

Appendix to Subpart R—Redelegation of Functions

a. Section 7 is amended by revising paragraph (g) to read as follows:

Sec. 7. Promulgation of Regulations

* * * * *

(g) The following sections of part 1308: §§ 1308.21 and 1308.22 relating to excluded nonnarcotic substances; §§ 1308.23 and 1308.24 relating to exempt chemical preparations; §§ 1308.25 and 1308.26 relating to excluded veterinary anabolic steroid implant products; §§ 1308.31 and 1308.32 relating to exempted prescription products; and §§ 1308.33 and 1308.34 relating to exempt anabolic steroid products, except that any final order following a contested proposed rulemaking shall be issued by the Administrator of DEA.

* * * * *

Dated: February 27, 1992.

Robert C. Bonner,

Administrator of Drug Enforcement.

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Parts 1910 and 1926

[Docket No. H-033d]

RIN 1218-AA26

Occupational Exposure to Asbestos, Tremolite, Anthophyllite and Actinolite

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Extension of partial stay and amendment of final rule.

SUMMARY: The Occupational Safety and Health Administration (OSHA) is hereby extending the partial administrative stay of the revised final standards for occupational exposure to asbestos, tremolite, anthophyllite and actinolite for general industry (29 CFR 1910.1001) and construction (29 CFR 1926.58), insofar as they apply to occupational exposure to non-asbestiform tremolite, anthophyllite and actinolite. The current partial stay, originally set to expire on April 21, 1987 and extended until February 28, 1992 is being further extended until May 30, 1992 to allow OSHA to complete supplemental rulemaking limited to the issue of whether non-asbestiform tremolite, anthophyllite and actinolite should continue to be regulated in the same standard as asbestos, or should be treated in some other way. OSHA also is making minor conforming amendments to notes to the affected standards.

DATES: *Effective Date:* February 28, 1992. The partial stay of 29 CFR 1910.1001 and 1926.58 is extended until May 30, 1992.

FOR FURTHER INFORMATION CONTACT: James F. Foster, Director of Information and Consumer Affairs, Occupational Safety and Health Administration, U.S. Department of Labor, room N-3647, 200 Constitution Avenue, NW., Washington, DC 20210, Telephone (202) 523-8151.

SUPPLEMENTARY INFORMATION: In June 1986, OSHA issued revised standards governing occupational exposure to asbestos, tremolite, anthophyllite and actinolite for general industry and construction which were to be effective on July 21, 1986. (See 51 FR 22612 et. seq., June 20, 1986).

On October 17, 1986, OSHA published a partial stay of the revised standards insofar as they apply to occupational exposure to non-asbestiform tremolite, anthophyllite and actinolite, in order to enable the Agency to review new submissions raising questions about the appropriateness of regulating these minerals in the revised asbestos standards, and to allow sufficient time to reopen the rulemaking record and conduct supplemental rulemaking proceedings limited to this issue (51 FR 37002).

OSHA extended the stay until July 21, 1988 in a notice published on April 30, 1987 (52 FR 15722), until July 21, 1989, in a notice published on July 20, 1988 (53 FR 27345), and again until November 30, 1990, in a notice published on July 21, 1989 (54 FR 30704).

The last extension was issued in order to allow OSHA sufficient time to conclude rulemaking on whether and how to regulate the non-asbestiform minerals at issue.

Subsequently, on February 12, 1990 OSHA published a notice of proposed rulemaking (55 FR 4938) to amend the asbestos standards (29 CFR 1910.1001, 1926.58) to remove non-asbestiform tremolite, anthophyllite and actinolite from their scope.

Public hearings were held in Washington, DC, May 8-14, 1990. At the close of the hearings, the Administrative Law Judge set the following deadlines for participants to send material to OSHA: June 28, 1990 for the submission of additional information and July 23, 1990 for submission of comments, summations and briefs.

After the close of the post-hearing comment periods, the American Thoracic Society (ATS) submitted a report to the record concerning the health risks of non-asbestiform tremolite, actinolite and anthophyllite (Ex. 525). The Agency set an additional period, later extended to December 14, 1990, to enable the public to submit written comments and analyses on all issues raised in the ATS report. (See 55 FR 40677, 55 FR 46958).

The Agency has evaluated the rulemaking record to determine whether it supports the proposal to remove the non-asbestiform minerals from the scope of the asbestos standards. To date, the record consists of 526 exhibits, 24 comments, transcripts of the five day rulemaking hearing, and additional submissions relating to the ATS report.

Because of the size of the record and the complexity of the issues, the Agency's review of the rulemaking record had taken longer than anticipated. Additional time will be needed to complete the inter-departmental review process. The formulation of a final regulatory determination is now expected to be completed by May 30, 1992. Thus, an extension of the stay until May 30, 1992 is necessary to conclude the rulemaking on the regulation of non-asbestiform tremolite, anthophyllite and actinolite.

As was the case with the initial partial stay, the 1972 standard governing occupational exposure to asbestos (redesignated 29 CFR 1910.1101) will remain in effect to the extent of the stay during the period of the extension.

The full text of the stay with respect to these non-asbestiform minerals was published in the October 17, 1988 **Federal Register** (51 FR 37002).

With respect to the extension of the partial stay, OSHA finds that advance notice and opportunity for comment are impractical and unnecessary within the meaning of 5 U.S.C. 553 in view of the limited duration of the extension and the continued applicability of the 1972 standard (29 CFR 1910.1101) to cover the gaps in coverage created by the partial stay.

The minor amendments to the notes to 29 CFR 1910.1001, 1910.1101, and 1926.58, similarly are made without advance notice and opportunity for comment. OSHA finds such process unnecessary and impracticable in that the changes merely reference the extension of the stay and restate the applicability of the 1972 standard. No evidentiary issues are involved.

List of Subjects in 29 CFR Parts 1910 and 1926

Asbestos, Occupational safety and health.

Authority and Signature

This document was prepared under the direction of Gerard F. Scannell, Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210.

It is issued pursuant to sections 4, 6(b), 6(c) and 8(g) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 653, 655, 657), section 107 of the Contract Work Hours and Safety Standards Act (Construction Safety Act) (40 U.S.C. 333), the Longshore and Harbor Workers Compensation Act (33 U.S.C. 941), 29 CFR part 1911, Secretary of Labor's Order No. 1–90 (55 FR 9033), as applicable.

Signed at Washington, DC, this 28th day of February 1992.

Dorothy L. Strunk,

Acting Assistant Secretary of Labor.

Amended Standards

Part 1910 of title 29 of the Code of Federal Regulations is hereby amended as follows:

PART 1910—[AMENDED]

1. The authority citation for subpart Z of part 1910 continues to read as follows:

Authority: Sections 6 and 8, Occupational Safety and Health Act, 29 U.S.C. 655, 657; Secretary of Labor's Orders Nos. 12–71 (36 FR 8754), 8–76 (41 FR 25059), 9–83 (48 FR 35736) or 1–90 (55 FR 9033) as applicable; and 29 CFR part 1911.

All of subpart Z issued under section 6(b) of the Occupational Safety and Health Act, 29 U.S.C. 655(b), except those substances listed in the Final Rule Limits columns of Table Z–1–A, which have identical limits listed in the Transitional Limits columns of Table Z–1–A, Table Z–2 or Table Z–3. The latter were issued under section 6(a) (29 U.S.C. 655(a)).

Section 1910.1000, the Transitional Limits columns of Table Z–1–A, Table Z–2, and Table Z–3 also issued under 5 U.S.C. 553. Section 1910.1000, Tables Z–1–A, Z–2 and Z–3 not issued under 29 CFR 1911 except for the arsenic, benzene, cotton dust, and formaldehyde listings.

Section 1910.1001 also issued under section 107 of Contract Work Hours and Safety Standards Act, 40 U.S.C. 333.

Section 1910.1002 not issued under 29 U.S.C. 655 or 29 CFR part 1911; also issued under 5 U.S.C. 653.

Section 1910.1003 through 1910.1018 also issued under 29 CFR 653.

Section 1910.1025 also issued under 29 U.S.C. 653 and 5 U.S.C. 553.

Section 1910.1028 also issued under 29 U.S.C. 653.

Section 1910.1043 also issued under 5 U.S.C. 551 et seq.

Section 1910.1045 and 1910.1047 also issued under 29 U.S.C. 653.

Section 1910.1048 also issued under 29 U.S.C. 653.

Sections 1910.1200, 1910.1499 and 1910.1500 also issued under 5 U.S.C. 553.

§ 1910.1001 [Amended]

2. Section 1910.1001 is hereby amended by revising the note after appendix H to § 1910.1001 to read as follows:

Note: Pursuant to an administrative stay effective July 21, 1986, published on October 17, 1986 (51 FR 37002), extended to July 21, 1988 (52 FR 15722), to July 21, 1989 (53 FR 27345), to November 30, 1990 (54 FR 30704), to August 31, 1991 (55 FR 50685) to February 28, 1992 (56 FR 43699), and to May 30, 1992 (57 FR _____), enforcement of this section is stayed as it applies to non-asbestiform tremolite, anthophyllite and actinolite. During the period and to the extent of this stay, the 1972 standard governing occupational exposure to asbestos (redesignated as 29 CFR 1910.1101) will remain in effect.

3. Section 1910.1101 is hereby amended by revising the note preceding § 1910.1101(a) to read as follows:

§ 1910.1101 Asbestos.

Note: This section applies in lieu of the revised standards governing occupational exposure to asbestos, tremolite, anthophyllite and actinolite (29 CFR 1910.1001; 29 CFR 1926.58), during the period and to the extent that the revised standards have been partially stayed. (See 51 FR 37002, October 17, 1986; 52 FR 15722, April 30, 1987; 53 FR 27345; July 20, 1988; and 54 FR 30704, July 21, 1989; and 55 FR 50865; December 10, 1990; 56 FR 43699, September 4, 1991; and 57 FR _____, March _____, 1992, for a description of the stay).

Part 1926 of the Code of Federal Regulations is hereby amended as follows:

PART 1926—[AMENDED]

Subpart D—[Amended]

4. The authority citation for subpart D of part 1926 continues to read as follows:

Authority: Secs. 4, 6 and 8, Occupational Safety and Health Act of 1970, (29 U.S.C. 653, 655, 657) Section 107, Contract Work Hours and Safety Standards Act (Construction Safety Act), 40 U.S.C. 333, and Secretary of Labor's Orders 12–71 (36 FR 8754), 8–76 (41 FR 25059), 9–83 (48 FR 35736) or 1–90 (55 FR 9033), as applicable. Sections 1926.55(c) and 1926.58 also issued under 29 CFR part 1911.

§ 1926.58 [Amended]

5. Section 1926.58 is hereby amended by revising the note at the end of the section to read as follows:

Note to § 1926.58—Pursuant to an administrative stay effective July 21, 1986, published October 17, 1986 (51 FR 37002), extended to July 21, 1988 (at 52 FR 1577, April 30, 1987), to July 21, 1989 (53 FR 27345, July 20, 1988) to November 30, 1990 (54 FR 30704; July 21, 1989), to August 31, 1991, (55 FR 50685, December 10, 1990), and to February 28, 1992 (56 FR 43699, September 4, 1991), and to May 30, 1992 (57 FR _____), enforcement of this section is stayed as it applies to non-asbestiform tremolite, anthophyllite and actinolite. During the period and to the extent of this stay, the 1972 standard governing occupational exposure to asbestos (redesignated as 29 CFR 1910.1101) will remain in effect.

BILLING CODE 4510–26–M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 155

[DoD Directive 5220.6]

Defense Industrial Personnel Security Clearance Program; Correction

AGENCY: Office of the Secretary of Defense, DoD.

ACTION: Final rule; correction.

SUMMARY: On February 14, 1992 (57 FR 5383), the Department of Defense published a final rule, "Defense Industrial Personnel Security Clearance Program". This document corrects the effective date for 32 CFR part 155. The correction is made to inform persons that the cases that have already begun must be completed in accordance with the legal authority under which they were initiated.

FOR FURTHER INFORMATION CONTACT: Mr. L. Schachter, telephone (703) 696–4598.

Accordingly, the effective date for 32 CFR part 155 is corrected as follows:

EFFECTIVE DATE: This document is effective March 16, 1992. Those cases in which a statement of reasons has been issued prior to the effective date of March 16, 1992 shall be concluded in accordance with 32 CFR part 155 in the July 1, 1991 edition of the Code of Federal Regulations.

Dated: February 27, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810–01–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGDS–92–003]

Drawbridge Operation Regulations; Bohemia River, Cayots, MD

AGENCY: Coast Guard, DOT.

ACTION: Final rule—revocation.

SUMMARY: This amendment removes the regulations for the bridge across the Bohemia River, mile 4.0, Cayots, Maryland, because the bascule bridge has been removed. A notice of proposed rulemaking has not been issued for this regulation because removal of the bridge eliminates all need for regulation.

DATES: This final rule becomes effective on March 5, 1992.

FOR FURTHER INFORMATION CONTACT: Ann B. Deaton, Bridge Administrator, Fifth Coast Guard District, at (804) 398–6222.

SUPPLEMENTARY INFORMATION:

Drafting Information

The drafters of this notice are Linda L. Gilliam, Project Officer, and LT Monica L. Lombardi, Project Attorney.

Discussion of Final Rule

The bascule bridge across the Bohemia River, mile 4.0 in Cayots, Maryland, was replaced by a high level fixed bridge along the same alignment. The existing bridge has been removed making it necessary to revoke 33 CFR 117.545. This action has no economic consequences. It merely revokes regulations for a swing bridge that no longer exists.

Regulatory Evaluation

This action is considered non-major under Executive Order 12291 and non-significant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). Since there is no economic impact, a full regulatory evaluation is unnecessary.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), the U.S. Coast Guard must consider whether final rules will have a significant economic impact; on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632). Because no notice of proposed rulemaking is required under 5 U.S.C. 553, this action is exempt from the Regulatory Flexibility Act (5 U.S.C. 605(b)). Nevertheless, the Coast Guard certifies that this action will not have a significant economic impact on a substantial number of small entities.

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environmental

This rulemaking has been thoroughly reviewed by the Coast Guard and it has been determined to be categorically excluded from further environmental documentation in accordance with section 2.B.2.g.(5) of Commandant Instruction M16475.1B. A Categorical Exclusion Determination statement has been prepared and placed in the rulemaking docket.

BILLING CODE 4510–14–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 1 and 5

[GEN Docket No. 90–217; FCC 92–57]

Establishment of Procedures to Provide a Preference to Applicants Proposing an Allocation for New Services

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action establishes a deadline for the submission of pioneer's preference requests, clarifies certain aspects of the pioneer's preference rules and, under certain circumstances, permits an innovative party to claim a pioneer's preference for a new communications service or technology without filing a petition for rule making. The objective of the action is to refine the Commission's pioneer's preference rules to encourage parties to come forward with innovative proposals for new communications services and technologies. The action is taken in response to five petitions for reconsideration of the Commission's Report and Order in this proceeding (56 FR 24011; May 28, 1991), as well as on the Commission's own motion.

EFFECTIVE DATE: April 6, 1992, except that the amendment to 47 CFR 1.402[c) shall be effective March 5, 1992.

FOR FURTHER INFORMATION CONTACT: Rodney Small, telephone (202) 653–8116.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Final Rule in General Docket 90–217, FCC 92–57, adopted February 13, 1992, and released February 26, 1992.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Reference Center (room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452–1422, 1114 21st Street, NW., Washington, DC 20036.

Summary of Final Rule

1. In the Report and Order in this proceeding, the Commission promulgated rules that govern extension of preferential treatment in its licensing processes to parties proposing rule changes associated with the development of new communications services and technologies. Under the pioneer's preference procedures, a party granted such a preference is effectively guaranteed a license because it is permitted to file a license application without being subject to competing applications. This process is intended to ensure that parties who develop innovative services or technologies and successfully pursue authorization of such innovations in proceedings before the Commission have an opportunity to benefit directly from their efforts.

2. In the Report and Order, the Commission stated that it would award a pioneer's preference to a party that demonstrates that it has developed an

innovative proposal that leads to the establishment of a communications service not currently provided or a substantial enhancement to an existing service, provided that the rules for the new or existing service follow from the proposal and lend themselves to the grant of a preference and a license to the innovating party. The Commission also stated in the Report and Order that a party seeking a pioneer's preference would be required to file a request for a preference and a separate petition for rule making requesting either that spectrum be allocated for its proposed new service, or that the rules be amended to accommodate its proposed new technology in an existing service.

3. The Commission stated that in most cases it anticipated that a preference applicant would perform an experiment to provide sufficient information for the Commission to make its determination regarding award of the preference. However, it said that an experiment will not be required as a prerequisite to obtaining a preference and that, when an experiment is not preformed, it will require the petitioner to accompany its preference request with a demonstration of the technical feasibility of the new service or technology. The Commission noted that when an experiment had been undertaken and a preference subsequently awarded, the geographic area of the experiment would be a logical location for a license in the authorized service. It emphasized, however, that it would allow a preference recipient to select any one service area for which the recipient desires a licensing preference based upon the definition of licensed service area adopted for the new service. The Commission said that generally it would not award a nationwide preference or a preference for more than a single geographic area.

4. The Commission further stated in the Report and Order that an initial determination of entitlement to a pioneer's preference would be made at the time a notice of proposed rule making (NPRM) was issued proposing rules for a new service or modifications to rules in an existing service. Finally, the Commission stated that no preference would be awarded in proceedings in which an NPRM addressing a new service or technology had been issued prior to release of the pioneer's preference Report and Order.

5. Petitions for reconsideration of the Report and Order were filed by the National Association of Broadcasters (NAB), Strother Communications, Inc. (SCI), Ellipsat Corporation (Ellipsat), TV Answer, Inc. (TV Answer), and United Parcel Service, Inc. (UPS). NAB requests that the Commission clarify the criteria that are necessary to qualify for a pioneer's preference. NAB also contends that the preference should be at most comparative rather than a guarantee of a license, and that a showing of technical feasibility in lieu of an experiment be deemed insufficient justification for awarding a preference. SCI requests clarification of the showing necessary to receive an initial determination that a preference is warranted and also recommends that in some services preferences for more than one geographic area be granted. Ellipsat contends that an innovative party should be permitted to claim a pioneer's preference for a new communications service or technology without filing a petition for rule making. TV Answer argues that issuance of an NPRM should not preclude the award of a preference in proceedings in progress when the preference rules were adopted. UPS argues the same and goes further, requesting that for in-progress proceedings even the issuance of a Report and Order and acceptance of applications not preclude the award of a preference.

6. The Commission is granting in part Ellipsat's petition for reconsideration to repeal the requirement of filing a petition for rule making to be eligible for a pioneer's preference, denying the other four petitions, and clarifying certain aspects of the pioneer's preference rules. With respect to NAB's concerns about the specificity of the preference standard, the Commission believes that it is necessary to make the standard for a pioneer's preference as specific as possible to provide guidance to innovators and financial institutions as to when a preference might be granted. However, the standard must be somewhat flexible in order to be applicable to the various types of proceedings in which it might be used. To enunciate an inflexible standard would narrow the scope of the preference to such an extent that some genuinely innovative proposals would not qualify. Such a standard would undermine the Commission's goal in this proceeding of encouraging the development of innovative proposals for new radio services and technologies.

7. With regard to NAB's contention that the preference should be comparative rather than a guarantee of a license, the Commission originally considered and rejected this argument in the Report and Order. A weighted preference would provide no assurance to the innovative party that it would, in fact, receive a license. As stated in the Report and Order, any approach that would permit an innovator to be foreclosed from a license by another party would undermine the value of the preference and thereby fail to accomplish its public interest purpose. Consequently, the Commission affirms that the preference will be dispositive.

8. Finally, with regard to NAB's concerns about a technical showing, the Commission continues to believe that while performance of an experiment generally will be extremely beneficial, it should not be required as a prerequisite to obtaining a preference. The Commission disagrees with NAB that requiring only a technical showing means that a preference could be based on mere speculation that a technology might work and result in technically inferior services. The Commission intends to analyze technical showings as rigorously as the results of experiments to ensure that a preference applicant's proposed new service or technology is viable and worthy of a preference.

9. Regarding SCI's request to clarify the initial determination that must be made before a preference is awarded, the Commission finds that a preference applicant must have at least commenced its experiment and reported to the Commission preliminary results in order to be eligible for award of a conditional preference. If the applicant conducts an experiment to demonstrate the technical feasibility of its proposal, the results of that experiment will be one of the major components that the Commission will use in determining whether a tentative preference is warranted. If no experimental results are available, the Commission would not have the information needed to award a tentative preference. Accordingly, the Commission will not award a tentative preference to an applicant that has not submitted a demonstration of technical feasibility nor commenced an experiment and reported to the Commission at least preliminary results.

10. With regard to SCI's concerns regarding preferences in more than one service area, the Commission continues to believe that in general a preference in one service area is sufficient to encourage innovators to submit preference requests. In any particular proceeding, however, the Commission may choose to award a nationwide preference or a preference for more than one service area if there is a compelling reason to do so.

11. With respect to Ellipsat's contentions about the necessity of a preference applicant filing a rule making petition, the Commission believes that grant of a pioneer's preference will almost always be associated with a rule change. Accordingly, the Commission is denying Ellipsat's request to eliminate the requirement for parties filing an application for a pioneer's preference to also submit an associated petition for rule making. However, as alternatively suggested by Ellipsat, the Commission will entertain requests for waiver of the petition for rule making requirement in those cases in which a rule change in fact would not be required. In such an instance, the Commission will require the applicant to submit: (1) A pioneer's preference request that includes the information specified in § 1.402(a) of the Rules except for the petition for rule making; (2) a request for waiver of the rule making petition requirement of § 1.402(a) that specifically explains how or why no rule change is necessary to accommodate the new technology or service within the requested bands; and (3) a license application in the desired service. Should the waiver request be denied, the requesting party will have 30 days from denial or until the deadline for filing pioneer's preference requests, whichever is later, to perfect its pioneer's preference request by filing a petition for rule making. This preserves a party's rights to be considered for a pioneer's preference request even if it incorrectly interpreted the rules and believed a petition was not necessary in a particular case.

12. The Commission also observes that there is a corollary issue regarding the necessity of a preference applicant filing a rule making petition for a new service or technology that is already under consideration by the Commission in an existing proceeding. The Commission notes that in some situations several parties may independently be exploring similar new communications services or technologies. Requiring each of these parties to file its own rule making petition unnecessarily burdens both them and the Commission. Therefore, when a new spectrum-based service or technology is under consideration by the Commission in an existing proceeding that has not reached the NPRM stage, and a party that has not filed a rule making petition believes that it is the pioneer of that service or relevant technology, the Commission will not require that it file a rule making petition. Such an applicant will be required to meet all other pioneer's preference filing requirements.

13. With respect to TV Answer's and UPS's contentions regarding in-progress proceedings, the Commission notes that the objectives of the Commission's pioneer's preference policy are to encourage present and future innovators to submit proposals to the Commission that otherwise would not have been submitted; to decrease regulatory uncertainty for the innovator; and to encourage investors to provide financial support. The Commission's rationale for imposing a deadline at the NPRM issuance stage for receipt of preference request is that until it makes a proposal, an innovator may submit a rule making petition or preference request that may become the basis for the proposal, but after the NPRM is released the nature of the proposed new service or technology essentially is defined.

14. The Commission observes that in the proceedings with which they are concerned, both UPS and TV Answer filed petitions for rule making well in advance of the initiation of the pioneer's preference proceeding and that both NPRMs at issue were released in advance of the issuance of the pioneer's preference Report and Order. The timing of these events makes clear that neither UPS nor TV Answer filed their proposals in anticipation of receiving a pioneer's preference or otherwise relied upon any possibility of receiving a preference. The Commission disagrees with TV Answer that a preference should be available at the Report and Order stage in proceedings in which NPRMs were issued before the pioneer's preference rules were adopted. In proceedings that reached the NPRM stage before the pioneer's preference policy was adopted, a preference is not needed to encourage submission of the new service or technology to the Commission for consideration. Morever, with regard to UPS's arguments, if a Report and Order also had been adopted and license applications filed before the preference rules became effective, a preference is even more obviously unnecessary to encourage the new service or technology or to help with financing.

15. The Commission therefore affirms its earlier decision to not award preferences in proceedings in which NPRMs had been issued prior to the effective date of the pioneer's preference rules. The Commission recognizes that prior to adoption of the pioneer's preference policy there may have been innovators who may have merited preferences. The goal, however, is not to reward past innovators, but to encourage future technological innovation and new services by encouraging present and future innovators to submit proposals to the Commission that would otherwise not be submitted.

16. Finally, the Commission observes that under the current rules, a pioneer's preference request may be filed at any time prior to release of an NPRM in a rule making proceeding that addresses a new spectrum-using service or technology. This policy can lead either to delays in the Commission's consideration of an NPRM or additional administrative action if a preference request is filed immediately before the NPRM's scheduled consideration or immediately after its adoption. Upon further consideration of the appropriate time for terminating the acceptance of preference requests, the Commission finds it administratively desirable to impose a deadline for such requests on a specific date prior to the time the Commission considers an NPRM. This change will provide the Commission sufficient time to consider the pioneer's preference requests in advance of consideration of an NPRM in a rule making proceeding. The Commission will give public notice of a deadline at least 30 days in advance to permit innovators planning to file preference requests the opportunity to do so. This change will permit sufficient time to evaluate all preference requests more efficiently and fairly without adversely impacting innovative parties.

Ordering Clauses

17. Accordingly, *It Is Ordered That* The petition for reconsideration filed by Ellipsat Corporation *Is Granted* To the extent indicated herein and otherwise *Denied,* and *that* The petitions for reconsideration filed by the National Association of Broadcasters, Strother Communications, Inc., TV Answer, Inc., and United Parcel Service, Inc. *Are Denied. It Is Further Ordered That* Under the authority contained in 47 U.S.C. 154(i), 157(a), 303(g), and 303(r), parts 1 and 5 of the Commission's Rules *Are Amended* as specified below, effective 30 days after publication in the **Federal Register,** except that the amendment to 47 CFR 1.402(c) shall be effective upon publication in the **Federal Register.**[1]

List of Subjects

47 CFR Part 1

Administrative practice and procedure.

[1] The amendment to § 1.402(c) relates to a matter of agency procedure or practice, and is therefore exempt from the 30-day publication requirement of 5 U.S.C. 553(d). We order it effective upon **Federal Register** publication to prevent delay in the Commission's consideration of pioneer's preference requests in existing proceedings.

47 CFR Part 5

Experimental radio services (other than broadcast), Radio.

Rule Changes

Parts 1 and 5 of title 47 of the Code of Federal Regulations are amended as follows:

PART 1—PRACTICE AND PROCEDURE

1. The authority citation for part 1 continues to read as follows:

Authority: Secs. 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303; implement, 5 U.S.C. 552, unless otherwise noted.

2. Section 1.402 is revised to read as follows:

§ 1.402 Pioneer's preference.

(a) When filing a petition for rule making pursuant to § 1.401 of this part that seeks an allocation of spectrum for a new service or that, by use of innovative technology, will substantially enhance an existing service, the petitioner may also submit a separate request that it be awarded a pioneer's preference in the licensing process for the service. Alternatively, if in an existing proceeding in which a notice of proposed rule making has not yet been adopted the Commission is addressing the new service or technology for which an applicant seeks a pioneer's preference, the applicant need not file a rule making petition but only a preference request. Each preference request must contain pertinent information concerning a description of the service to be provided, the applicant's plan for implementing the service, the frequencies it proposes to use, and the area for which the preference is sought, and must address any conflicting licensing rules, showing how these rules should or should not apply. The applicant must demonstrate that it (or its predecessor-in-interest) has developed the new service or technology; *e.g.*, that it (or its predecessor-in-interest) has developed the capabilities or possibilities of the technology or service or has brought them to a more advanced or effective state. The applicant must accompany its preference request with either a demonstration of the technical feasibility of the new service or technology or an experimental license application, unless an experimental license application has previously been filed for that new service or technology. If the applicant files or has filed an experimental license application, it must specify the area in which it intends to conduct its experiment and whether that is the area for which the preference is sought. In determining in its discretion whether to grant a pioneer's preference, the Commission will consider whether the applicant has demonstrated that it (or its predecessor-in-interest) has developed an innovative proposal that leads to the establishment of a service not currently provided or a substantial enhancement of an existing service. Additionally, the preference will be granted only if rules, as adopted, are a reasonable outgrowth of the proposal and lend themselves to the grant of a preference.

(b) A party that believes that it can implement a new technology or service without a rule change may request a waiver of § 1.402(a) to permit it to file a pioneer's preference request without filing a petition for rule making. The waiver request must explain how or why no rule change is necessary to accommodate the new technology or service within the requested spectrum, and should be accompanied by a license application in the desired service. If the waiver request is denied, a party will have 30 days or until the deadline for filing pioneer's preference requests, whichever is later, to perfect its pioneer's preference request by filing a petition for rule making.

(c) Pioneer's preference requests relating to a specific new spectrum-based service or technology that will be considered by the Commission will not be accepted after a specified date prior to the Commission's consideration of a notice of proposed rule making that addresses the service or technology. This date will be announced by public notice at least 30 days in advance.

(d) An initial determination on a request for a pioneer's preference will be made at the time of the adoption, if any, of a notice of proposed rule making addressing the new service or technology proposed in the request. A final determination on a request for a pioneer's preference and its scope will be made at the time of the adoption, if any, of a report and order adopting new rules. If awarded, the pioneer's preference will provide that the preference applicant's application for a construction permit or license will not be subject to mutually exclusive applications.

(e) Any interested person may file a statement in support of or in opposition to a request for pioneer's preference, and a reply to such statements, subject to filing deadlines that shall be published in the "Public Notice" issued pursuant to § 1.403. Statements on pioneer's preference requests must be filed separate from, and not part of, any comments on an associated petition for rule making.

(f) In the event of a conflict between this rule and any rule for a particular service that provides for the filing and consideration of competing applications, this rule shall prevail.

3. Section 1.403 is revised to read as follows:

§ 1.403 Notice and availability.

All petitions for rule making (other than petitions to amend the FM, Television, and Air-Ground Tables of Assignments) meeting the requirements of § 1.401 will be given a file number and, promptly thereafter, a "Public Notice" will be issued (by means of a Commission release entitled "Petitions for Rule Making Filed") as to the petition, file number, nature of the proposal, and date of filing. If a petition for rule making includes a request for a pioneer's preference, that request will be separately listed in the Public Notice with a separate file number. If a pioneer's preference request is not accompanied by a petition for rule making, it will be given a file number and a "Public Notice" will be issued (by means of a Commission release entitled "Requests for Pioneer's Preference Filed") as to the preference request, file number, and date of filing. Petitions for rule making and pioneer's preference requests are available at the Commission's Dockets Reference Center (1919 M Street NW., room 239, Washington, DC).

PART 5—EXPERIMENTAL RADIO SERVICES (OTHER THAN BROADCAST)

1. The authority citation for part 5 continues to read as follows:

Authority: Secs. 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply sec. 301, 48 Stat. 1081, as amended; 47 U.S.C. 301.

2. Section 5.207 is revised to read as follows:

§ 5.207 Experiments performed in conjunction with pioneer's preference applications.

An applicant for a pioneer's preference pursuant to § 1.402 may file an experimental license application for a limited geographical area, generally including no more than one Metropolitan Statistical Area. In order to be eligible for a tentative preference award at the time of a notice of proposed rule making in a proceeding addressing a new service or technology, the experimental applicant must have commenced its experiment and reported to the Commission at least preliminary results, unless it has also submitted an acceptable showing of technical feasibility.

Federal Communications Commission.

BILLING CODE 6712-01-M

47 CFR Part 63

[CC Docket No. 91-273; FCC 92-58]

Notification by Common Carriers of Service Disruptions

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This Report and Order (R&O) adds § 63.100 to the Commission's rules to require that any local exchange or interexchange common carrier that operates transmission or switching facilities and provides access service or interstate or international telecommunications service, promptly notify the Commission of any outage which potentially affects 50,000 of more customers on any facilities owned or operated by the carrier, if the outage continues for 30 or more minutes. The rule is essentially the same as that proposed in the Notice of Proposed Rulemaking (NPRM) in this matter 56 FR 48504, September 25, 1991. As we stated in that NPRM, recent incidents of common carrier service disruptions demonstrate the inadequacy of the Commission's informal mechanisms for gathering from selected carriers information about network outages. Section 63.100 establishes a systematic means for the Commission to monitor major telephone service outages throughout the nation on a real time basis with a view to enhancing service reliability. The information provided by carriers will, among other things, assist the Commission in better determining whether particular technology, equipment or other changes may threaten service reliability.

EFFECTIVE DATE: April 6, 1992.

FOR FURTHER INFORMATION CONTACT: Abraham A. Leib, Chief, Domestic Services Branch, Domestic Facilities Division, Common Carrier Bureau (202) 634-1816.

SUPPLEMENTARY INFORMATION: The R&O and supporting file are available for inspection and copying during the hours of 9 a.m. to 4:30 p.m. in the Commission's Dockets Branch, room 239, 1919 M St., NW., Washington, DC, or copies may be purchased from the Commission's duplicating contractor, Downtown Copy Center, 1114 21st St. NW., Washington, DC 20036, (202) 452-1422. The R&O will be published in the FCC Record.

OMB Review

The following collection of information contained in the final rule has been submitted to the Office of Management and Budget (OMB) for approval. Expedited review and approval of the reporting requirement by March 19, 1992 has been requested.

Title: Amendment of part 63 of the Commission's Rules to Provide for Notification by Common Carriers of Service Disruptions.

OMB Number: 3060-0484.

Action: Final, revised collection.

Respondents: Businesses or others for profit.

Frequency of Response: On occasion and other. Initial report to be delivered to Commission within 90 minutes of the local exchange or interexchange common carrier's knowledge that the service outage potentially affects 50,000 or more customers on any facilities owned or operated by the carrier; final report required 30 days thereafter.

Estimated Annual Burden: 56 responses; 2.3 hours per response; 129 hours total. These estimates are the same as contained in the Commission's request to OMB which accompanied the NPRM. The information to be furnished is generally gathered by carriers after outage events, so providing it to the Commission should not be burdensome. See 5 CFR part 1320 (53 FR 16618, May 10, 1988).

Public reporting burden for the collection of information is estimated as above. These estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collections of information. Send comments regarding these burden estimates or any other aspect of the collections of information, including suggestions for reducing the burden, to the Federal Communications Commission, Information and Records Management Branch, room 416, Paperwork Reduction Project, Washington, DC 20554, and to the Office of Management and Budget, Paperwork Reduction Project (Project number 3060-0484), Washington, DC 20503.

Needs and Uses: Part 63 of the Commission's rules, 47 CFR part 63, is amended by adding § 63.100 to provide for the collection of information which we believe is essential to our mission of ensuring that the public is protected from major disruptions to telephone services. While telephone services provided by carriers have generally been good, the nation has experienced several widespread outages during the last two years which have been of great public concern. Currently, there is no requirement that carriers inform the Commission of major outages when they occur. Rule § 63.100 (set forth below) requires that any local exchange or interexchange common carrier that operates transmission or switching facilities and provides access service or interstate or international telecommunications service, promptly notify the Commission of any outage which potentially affects 50,000 or more customers on any facilities owned or operated by the carrier, if the outage continues for 30 or more minutes. That Initial Service Disruption Report, containing specified information about the outage, shall be followed within 30 days by a Final Service Disruption Report providing all available information about the outage including any information not contained in the carrier's initial report. The Commission will thereby become aware of significant outages at the earliest possible time so that we may monitor developments, serve as a source of information for the public, encourage and, where appropriate, assist in dissemination of information to those affected, and take immediate steps, as needed. Additionally, after analyzing the information submitted, the Commission will determine what, if any, other action is required.

Analysis of Proceeding

This summarizes the Commission's R&O in the matter of Amendment of part 63 of the Commission's Rules to Provide for Notification by Common Carriers of Service Disruptions, CC Docket 91-273, FCC 92-58, adopted February 13, 1992 and released February 27, 1992. The proceeding was initiated by the Commission's NPRM in CC Docket 91-273, FCC 91-285, adopted September 16, 1991 and released September 19, 1991, 6 FCC Rcd 5531 (1991), (56 FR 48504, September 25, 1991). In the NPRM, the Commission expressed concern over the number of recent incidents in which the introduction of new technology into the telecommunications infrastructure has led to service disruptions, and the fact that it currently has no systematic way by which to become informed quickly of significant service disruptions and is unable to determine whether certain kinds of technology or equipment threaten service reliability.

The NPRM sought comment on the Commission's proposal to add § 63.100 to the rules to require written notification by any facilities-based

common carrier that provides access service or that provides interstate or international telephone service that experiences an outage of 30 or more minutes which affects 50,000 or more customers or 50,000 or more voice grade equivalent circuits. Carriers would be required to notify the Commission within 90 minutes of the commencement of any such service outage. An Initial Service Disruption Report, in a prescribed format, would be served on the Commission's Monitoring Watch Officer, on duty 24 hours a day, by facsimile or other record means delivered to Commission headquarters. Thirty days after the service disruption, the carrier would file with the Chief, Common Carrier Bureau, a Final Service Disruption Report, providing all available information on the incident, including any information not contained in its Initial Service Disruption Report.

Twenty-six comments and twenty-one reply comments to the NPRM were filed. The Commission carefully considered all comments and has amended its proposed rule to incorporate some of the recommendations of commenters. Moreover, the proposed customer threshold of 50,000 customers which is being adopted as an interim step, and other matters such as separate thresholds for reporting outages affecting major airports or 911 services, were referred to the Commission's newly created Network Reliability Council whose initial meeting was February 27, 1992. The Council was asked to study these issues and to submit its final report within 60 days from the release date of the Report and Order.

The collection of information provided for in § 63.100 of the rules is essential to the mission of the FCC and is intended to protect the public from major disruptions to telephone services. Telephone services provided by carriers have generally been good; however, the nation has experienced several widespread outages during the last two years. We believe it important to have a systematic means by which to monitor major telephone service outages throughout the nation on a timely basis, but the reports currently received, while useful, do not provide information on a real-time basis. Telephone service outages have been of enormous public concern, in part because they have such a widespread public impact. The public is entitled to full and forthcoming explanations of these events. The Commission's purposes in requiring notification, therefore, are: To become aware of significant outages at the earliest possible time so that we may monitor developments; to serve as a source of information for the public, to encourage and, where appropriate, to assist in dissemination of information to those affected; to take immediate steps, as needed, and after analyzing the information submitted, to determine what, if any, other action is required.

The information to be furnished by carriers pursuant to § 63.100 is normally collected by them, the collection burden has been minimized, and the Commission estimates that the total annual reporting and recordkeeping burden that will result from each collection of information is the same as that reported to OMB with the Commission's NPRM.

Ordering Clauses

Accordingly, *It is Ordered*, That, pursuant to authority contained in sections 1, 4(i), 4(j), 201–205, 218 and 403 of the Communications Act of 1934, as amended, part 63 of the Commission's Rules and Regulations *is amended* as set forth below, effective 30 days after publication in the **Federal Register**. Carriers are, of course, free to begin compliance with its provisions immediately.

It is Further Ordered, That, the Secretary shall cause a summary of this Report and Order to be published in the **Federal Register** which shall include a statement describing how members of the public may obtain the complete text of this Commission decision. The Secretary shall also provide a copy of this Report and Order to each state utility commission.

It is Further Ordered, That, this proceeding is terminated.

Secretary.

Rule Changes

Title 47 of the Code of Federal Regulations, part 63, is amended as follows:

PART 63—EXTENSION OF LINES AND DISCONTINUANCE, REDUCTION, OUTAGE AND IMPAIRMENT OF SERVICE BY COMMON CARRIERS; AND GRANTS OF RECOGNIZED PRIVATE OPERATING AGENCY STATUS

The authority citation for part 63 is revised to read as follows:

Authority: Sections 1, 4(i), 4(j), 201–205, 218 and 403 of the Communications Act of 1934, as amended, 47 U.S.C. secs. 151, 154(i), 154(j), 201–205, 218 and 403, unless otherwise noted.

2. The title of part 63 is revised to read as follows:

3. The undesignated heading appearing before §§ 63.60–63.90 is revised to read as follows:

Discontinuance, Reduction, Outage and Impairment

4. Section 63.100 is added under the newly revised heading, Discontinuance, Reduction, Outage and Impairment, to read as follows:

§ 63.100 Notification of service outage.

(a) Any local exchange or interexchange common carrier that operates transmission or switching facilities and provides access service or interstate or international telecommunications service, that experiences an outage which potentially affects 50,000 or more of its customers on any facilities which it owns or operates, must notify the Commission if such service outage continues for 30 or more minutes. Satellite carriers, cellular carriers, and competitive access providers are exempt from this reporting requirement. Notification must be served on the Commission's Monitoring Watch Officer, on duty 24 hours a day in the FCC headquarters building in Washington, DC, or on a secondary basis it may be served on the Commission's Watch Officer on duty at the FCC's facility at Grand Island, Nebraska. The notification must be by facsimile or other record means delivered within 90 minutes of the carrier's knowledge that the service outage potentially affects 50,000 or more customers, if the outage continues for 30 or more minutes. Notification shall identify a contact person who can provide further information, the telephone number at which the contact person can be reached, and what information is known at the time about the service outage including:

(1) The date and estimated time of commencement of the outage;

(2) The geographic area affected;

(3) The estimated number of customers affected;

(4) The types of services affected (*e.g.*, interexchange, local, cellular, 911 emergency services);

(5) The duration of the outage, *i.e.*, time elapsed from the estimated commencement of the outage until restoration of full service;

(6) The estimated number of blocked calls during the outage;

(7) The apparent or known cause of the incident, including the name and type of equipment involved and the specific part of the network affected;

(8) Methods used to restore service; and

(9) The steps taken to prevent recurrences of the outage.

The report shall be captioned Initial Service Disruption Report. Lack of any of the above information shall not delay the filing of this Report. Not later than thirty days after the outage, the carrier shall file with the Chief, Common Carrier Bureau, a Final Service Disruption Report providing all available information on the service outage, including any information not contained in its Initial Service Disruption Report.

(b) As used in this section:

(1) *Outage* is defined as a significant degradation in the ability of a customer to establish and maintain a channel of communications as a result of failure in a carrier's network.

(2) *Customer* is defined as a user purchasing telecommunications service from a common carrier.

47 CFR Part 73

[MM Docket No. 91-260; RM-7788]

Television Broadcasting Services; Eureka Springs, AR

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allots UHF television Channel 34+ to Eureka Springs, Arkansas, as that community's first local television broadcast service, in response to a petition for rule making filed on behalf of New Life Evangelistic Center. See 56 FR 46762, September 16, 1991. Coordinates used for Channel 34 at Eureka Springs are 36–24–12 and 93–44–12.

Although the Commission has imposed a freeze on TV allotments or applications therefor in specified metropolitan areas, pending the outcome of an inquiry into the uses of advanced television systems (ATV) in broadcasting, this proposal is not affected thereby. With this action, the proceeding is terminated.

EFFECTIVE DATE: April 13, 1992.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 91–260, adopted February 20, 1992, and released March 2, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452–1422, 1714 21st Street, NW., Washington, DC 20036.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 646

[Docket No. 911063-2008]

RIN 0648-AD57

Snapper-Grouper Fishery of the South Atlantic

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues this final rule to implement Amendment 5 to the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region (FMP). This final rule (1) implements a limited entry program for the wreckfish sector of the snapper-grouper fishery consisting of transferable percentage shares of the annual total allowable catch (TAC) of wreckfish and annual individual transferable quotas (ITQs) based on application of a person's percentage shares to the TAC; (2) requires a dealer to obtain a dealer permit to receive wreckfish; (3) removes the 10,000-pound (4,536-kilogram) trip limit for wreckfish; (4) requires that wreckfish be off-loaded from fishing vessels only between 8 a.m. and 5 p.m.; (5) reduces the occasions when 24-hour advance notice must be made to NMFS Law Enforcement of off-loading of wreckfish; and (6) makes other minor modifications and clarifications to the regulations. In addition, Amendment 5 (1) revises the lists of problems in the snapper-grouper fishery and objectives of the FMP; and (2) specifies the procedure for the initial distribution of percentage shares of the wreckfish TAC. The intended effect of this rule is to manage the wreckfish sector of the snapper-grouper fishery so that its long-term economic viability will be preserved.

EFFECTIVE DATES: April 6, 1992, except that §§ 646.4, 646.7(d) and 646.10(a) are effective March 5, 1992.

FOR FURTHER INFORMATION CONTACT: Peter J. Eldridge, 813-893-3161.

SUPPLEMENTARY INFORMATION: Snapper-grouper species are managed under the FMP prepared by the South Atlantic Fishery Management Council (Council), and its implementing regulations at 50 CFR part 646, under the authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act).

The background and rationales for the measures in this final rule are contained in the proposed rule (56 FR 57302, November 8, 1991) and in Amendment 5 to the FMP, the availability of which was announced in the **Federal Register** (56 FR 50551, October 7, 1991), and are not repeated here.

Comments and Responses

Only one comment was received during the public comment period.

Comment: A seafood dealer was opposed to the ITQ system because he believed that "free-loaders" will sell their percentage share to others. The dealer supported a 10,000-pound limit per boat, a spawning closure, and the present quota system. He recommended keeping the fishery open to all for at least another year, if not indefinitely.

Response: The wreckfish resource belongs to all Americans and under the Magnuson Act the U.S. government must optimize the yield from the fishery. Yield can be optimized only by prevention of recruitment overfishing and minimizing the costs of fishing operations and management of the resource. Very little is known concerning the potential long-term yield that can be taken from the wreckfish resource. However, it is known that wreckfish are long-lived and the fishery is concentrated in a small

area; hence, vulnerability to recruitment overfishing is increased. Also, the catch-per-day of wreckfish has declined somewhat during the second half of the 1991-92 fishing season, which suggests a conservative approach to management of this fishery. The Council and NMFS restricted harvests in 1991 to minimize the possibility of recruitment overfishing and to reduce costs of fishing. The ITQ system will limit access to the fishery and regulate catches to minimize the possibility of recruitment overfishing. Many major U.S. fisheries along the Atlantic coast are suffering depletion or recruitment failure due to unlimited entry. An unlimited entry system provides little incentive to conserve resources and often results in ineffective management due to pressures of special interest groups on managers. Consequently, resources decline, fishing costs escalate, and consumers are forced to rely on imported fish due to the scarcity of domestic species. The Council and NMFS believe that the ITQ system for wreckfish will prevent resource depletion and result in optimal benefits to the Nation as required by the Magnuson Act.

Changes from the Proposed Rule

Minor changes are made in the permits and fees section (§ 646.4) to emphasize that a vessel permit is valid for the specified vessel, rather than for any vessel owned or operated by a qualifying owner or operator, to conform the section to current usage, and for clarity.

The recordkeeping and reporting requirements for permitted vessels and for dealers (§ 646.5 (a) and (c)) are reorganized for clarity.

Several references in the prohibitions (§ 646.7) are corrected.

Additional specificity is added to the description of the wreckfish ITQ system (§ 646.10) to conform with the forms designed for the shareholders' certificates and the ITQ coupons.

Effective Dates

The wreckfish fishery is closed through April 15, 1992, because of the spawning season closure. Effective management of the wreckfish fishery when the fishery opens on April 16, 1992, requires implementation of portions of this final rule as soon as possible. Verification of eligibility requires the following steps: (1) Receipt and verification of catch records from fishermen; (2) initial determination and notification of allocation of percentage shares; (3) a 30-day appeal process to confirm initial distribution of percentage shares; (4) notification of final allocation; and (5) distribution of permits and coupons to fishermen. Thus, immediate effectiveness of §§ 646.4, 646.7(d), and 646.10(a) of this rule is required for adequate time to implement the ITQ system and to distribute applications for vessel and dealer permits for wreckfish, process the applications, and issue the permits. In addition, during the spawning season closure, wreckfish fishermen and dealers are not adversely affected by immediate effectiveness of portions of this rule. Accordingly, the Assistant Administrator for Fisheries, NOAA (Assistant Administrator), finds that there is good cause not to delay for 30 days the effective date of §§ 646.4, 646.7(d), and 646.10(a) of this rule.

The proposed rule announced that the procedures for the initial allocation of percentage shares would begin when the Secretary of Commerce (Secretary) approved Amendment 5. The Secretary approved Amendment 5 on January 2, 1992. Accordingly, wreckfish fishermen have been advised of the required documentation to be submitted to substantiate their eligibility for and the amount of percentage shares. The general statement of the required documentation, contained in the proposed rule, has been supplemented by more specific letters to owners/operators of vessels with permits to fish for wreckfish and by news release. To be considered for an initial allocation of percentage shares, an application must be submitted to the South Atlantic Fishery Management Council, Southpark Building, suite 306, One Southpark Circle, Charleston, SC 29407-4699, postmarked not later than February 14, 1992. It is anticipated that the initial notifications of percentage shares will be completed by February 28, and that the Application Oversight Committee will consider requests from persons wishing to contest the initial allocations by March 20, 1992. Strict adherence to this schedule is essential to ensure that the ITQ system is fully implemented when the wreckfish fishery opens on April 16, 1992.

Classification

The Secretary of Commerce determined that Amendment 5 is necessary for the conservation and management of the snapper-grouper fishery and that it is consistent with the Magnuson Act and other applicable law.

The Assistant Administrator determined that this final rule is not a "major rule" requiring the preparation of a regulatory impact analysis under E.O. 12291.

The Council prepared a regulatory impact review (RIR) for Amendment 5, which concludes that this final rule will have overall net economic benefits. These benefits were summarized in the proposed rule and are not repeated here.

The General Counsel of the Department of Commerce has certified to the Small Business Administration that this final rule will not have a significant economic impact on a substantial number of small entities for reasons described in the preamble to the proposed rule.

The Council prepared an environmental assessment (EA) that discusses the impact on the environment as a result of this rule. Based on the EA, the Assistant Administrator concluded that there will be no significant impact on the human environment as a result of this rule.

The Council determined that this rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management programs of Florida, South Carolina, and North Carolina. Georgia does not participate in the coastal zone management program. These determinations were submitted for review by the responsible state agencies under section 307 of the Coastal Zone Management Act. South Carolina and North Carolina agreed with the determination. Florida did not respond during the statutory time period; therefore, state agency agreement with the consistency determination is inferred.

Amendment 5 requires a new, one-time collection-of-information to initiate the limited entry program for wreckfish, and this final rule contains two new collection-of-information requirements and revises three existing requirements subject to the Paperwork Reduction Act. The new and revised collections have been approved by the Office of Management and Budget and the following OMB control numbers apply: (1) Submission of information for the initial allocation of wreckfish percentage shares (new)—0648-0263; (2) applications for dealer permits for dealers who receive wreckfish (new)—0648-0205; (3) reports of transfer of percentage shares in the wreckfish fishery (new)—0648-0262; (4) submission of vessel trip reports and wreckfish ITQ coupons (revised)—0648-0016; (5) submission of dealer reports and ITQ coupons (revised)—0648-0013; and (6) providing 24-hour notice preceding the landing of wreckfish (revised)—0648-0016. The public reporting burdens for these collections of information are estimated to average 240, 15, 15, 10, 20, and 3 minutes, respectively, per response, including the time for reviewing instructions, searching

existing data sources, gathering and maintaining the data needed, and completing and reviewing the collections of information. This final rule restates the already approved collection of information on applications for vessel permits to distinguish between permits for snapper-grouper, excluding wreckfish, and permits for wreckfish (OMB Control No. 0648–0205), with a public reporting burden estimated to average 15 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding these burden estimates or any other aspect of these collections of information, including suggestions for reducing the burdens, to Edward E. Burgess, NMFS, 9450 Koger Boulevard, St. Petersburg, FL 33702 and to the Office of Information and Regulatory Affairs, OMB, Washington, DC 20503 (attention: NOAA Desk Officer).

This final rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under E.O. 12612.

List of Subjects in 50 CFR Part 646

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: March 2, 1992.

Michael F. Tillman,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set forth in the preamble, 50 CFR part 646 is amended as follows:

PART 646—SNAPPER-GROUPER FISHERY OF THE SOUTH ATLANTIC

1. The Authority citation for part 646 continues to read as follows:

Authority 16 U.S.C. 1801 *et seq.*

2. Section 646.4 is revised to read as follows:

§ 646.4 Permits and fees.

(a) *Applicability*—(1) *Annual vessel permits for snapper-grouper, excluding wreckfish.* (i) For a person aboard a vessel to be eligible for exemption from the bag limits specified in § 646.23(b); to engage in a directed fishery for tilefish in the EEZ; or to use a sea bass trap in the EEZ north of Cape Canaveral, Florida, a vessel permit for snapper-grouper, excluding wreckfish, must be issued to the vessel and be on board. A vessel with longline gear and more than 200 pounds (90.7 kilograms) of tilefish aboard is considered to be in a directed fishery for tilefish. It is a rebuttable presumption that a fishing vessel with more than 200 pounds of tilefish aboard harvested such tilefish in the EEZ.

(ii) A vessel permit for snapper-grouper, excluding wreckfish, may be obtained by a qualifying owner or operator of a charter vessel or headboat. However, a person aboard such vessel must adhere to the bag limits when the vessel is operating as a charter vessel or headboat.

(iii) For a vessel owned by a corporation or partnership to be eligible for a vessel permit for snapper-grouper, excluding wreckfish, the earned income qualification specified in paragraph (b)(2)(vii) of this section must be met by, and the statement required by that paragraph must be sumbitted by, an officer or shareholder of the corporation, a general partner of the partnership, or the vessel operator.

(iv) For a vessel using or possessing a sea bass trap in the EEZ, in addition to the vessel permit for snapper-grouper, excluding wreckfish, a color code and a trap identification tag for each such trap must be obtained from the Regional Director.

(v) A vessel permit for snapper-grouper, excluding wreckfish, issued upon the qualification of an operator is valid only when that person is the operator of the vessel.

(2) *Annual vessel permits for wreckfish.* For a person aboard a fishing vessel to fish for wreckfish in the EEZ, possess wreckfish in or from the EEZ, off-load wreckfish from the EEZ, or sell wreckfish in or from the EEZ, a vessel permit for wreckfish must be issued to the vessel and be on board.

(3) *Annual dealer permits for wreckfish.* A dealer who receives a wreckfish must obtain an annual dealer permit. To be eligible for such permit, an applicant must possess a valid state wholesaler's license in the state where he operates and is required to have a physical facility at a fixed location in that state.

(b) *Application for a vessel permit for snapper-grouper, excluding wreckfish.* (1) An application for a vessel permit for snapper-grouper, excluding wreckfish, must be submitted and signed by the owner (in the case of a corporation, a qualifying officer or shareholder; in the case of a partnership, a qualifying general partner) or operator of the vessel. The application must be submitted to the Regional Director at least 30 days prior to the date on which the applicant desires to have the permit made effective.

(2) A permit applicant must provide the following information:

(i) A copy of the vessel's U.S. Coast Guard certificate of documentation or, if not documented, a copy of its state registration certificate;

(ii) The vessel's name and official number;

(iii) Name, mailing address including zip code, and telephone number of the owner of the vessel;

(iv) Name, mailing address including zip code, and telephone number of the applicant, if other than the owner;

(v) Social security number and date of birth of the applicant and the owner (if the owner is a corporation, the employer identification number, if one has been assigned by the Internal Revenue Service);

(vi) If a sea bass trap will be used,

(A) The number, dimensions, and estimated cubic volume of the traps that will be used;

(B) The applicant's desired color code for use in identifying his or her vessel and buoys; and

(C) A statement that the applicant will allow an authorized officer reasonable access to his or her property (vessel, dock, or structure) to examine traps for compliance with these regulations;

(vii) A sworn statement by the applicant certifying that, during one of the 3 calendar years preceding the application,

(A) More than 50 percent of his or her earned income was derived from commerical, charter, or headboat fishing; or

(B) His or her gross sales of fish were more than $20,000; or

(C) For a vesssel owned by a corporation or partnership, the gross sales of fish of the corporation or partnership were more than $20,000;

(viii) Documentation supporting the statement of income, if required under paragrpah (b)(3) of this section;

(ix) Any other information concerning vessel and gear characteristics requested by the Regional Director; and

(x) Any other information that may be necessary for the issuance or administration of the permit.

(3) The Regional Director may require the applicant to provide documentation supporting the sworn statement under paragraph (b)(2)(vii) of this section before a permit is issued. Such required documentation may include copies of appropriate forms and schedules from the applicant's income tax return. Copies of income tax forms and schedules are treated as confidential, but may be released to and verified by the Internal Revenue Service.

(c) *Application for a vessel permit for wreckfish.* (1) An application for a vessel permit for wreckfish must be submitted and signed by a wreckfish shareholder. (See § 646.10 for information on wreckfish shareholders.) If the wreckfish shareholder is a corporation, an officer or shareholder of the corporation must sign the application; if the wreckfish shareholder is a partnership, a general partner must sign the application. The application must be submitted to the Regional Director at least 30 days prior to the date on which the wreckfish shareholder desires to have the permit made effective.

(2) An applicant must provide the following information:

(i) A copy of the vessel's U.S. Coast Guard certificate of documentation or, if not documented, a copy of its state registration certificate;

(ii) The vessel's name and official number;

(iii) Name, mailing address including zip code, telephone number, social security number, and date of birth of the wreckfish shareholder (if the wreckfish shareholder is a corporation, the employer identification number if one has been assigned by the Internal Revenue Service);

(iv) Name, mailing address including zip code, telephone number, social security number, and date of birth of the owner of the vessel, if other than the wreckfish shareholder (if the vessel owner is a corporation and is other than the wreckfish shareholder, the employer identification number, if one has been assigned by the Internal Revenue Service);

(v) If the wreckfish shareholder is not the vessel owner, as shown on the vessel's U.S. Coast Guard certificate of documentation or, if not documented, on the state registration certificate, a sworn statement by the wreckfish shareholder certifying that the vessel owner or operator is an employee, contractor, or agent of the shareholder;

(vi) Documentation supporting the sworn statement of paragraph (c)(2)(v) of this section, if required under paragraph (c)(3) of this section;

(vii) Any other information concerning vessel and gear characteristics requested by the Regional Director; and

(viii) any other information that may be necessary for the issuance or administration of the permit.

(3) The Regional Director may require the wreckfish shareholder to provide documentation supporting the sworn statement under paragraph (c)(2)(v) of this section before a permit is issued. Such required documentation may include copies of appropriate forms and schedules from the shareholder's income tax return; articles of incorporation for a corporate-owned vessel; a partnership agreement for a partnership-owned vessel; a lease on the vessel for which a permit is requested; or an employment or other contract, or agency agreement that demonstrates an agency, employment, or contract relationship between the wreckfish shareholder and the vessel owner or operator. Copies of income tax forms and schedules and other required documentation are treated as confidential, but may be released to and verified by the Internal Revenue Service or other appropriate authorities.

(f) *Application for an annual dealer permit for wreckfish.* (1) An application for a dealer permit for wreckfish must be submitted and signed by the dealer or an officer of a coporation acting as a dealer. The application must be submitted to the Regional Director at least 30 days prior to the date on which the applicant desires to have the permit made effective.

(2) A permit applicant must provide the following information:

(i) A copy of each state wholesaler's license held by the dealer;

(ii) Business name, address including zip code of the business office, and employer identification number, if one has been assigned by the Internal Revenue Service;

(iii) A list, by state where licensed, of each physical facility at a fixed location where the business receives or stores fish.

(iv) Name, official capacity in the business, mailing address including zip code, telephone number, social security number, and date of birth of the applicant.

(v) Any other information that may be necessary for the issuance or administration of the permit.

(e) *Fees.* A fee is charged for each permit application submitted under paragraph (b), (c), or (d) of this section and for each sea bass trap identification tag required under § 646.6(d).

The amount of the fee is calculated in accordance with the procedures of the NOAA Finance Handbook for determining the administrative costs of each special product or service. The fee may not exceed such costs and is specified with each application form. The appropriate fee must accompany each application.

(f) *Issuance.* (1) The Regional Director will issue a permit at any time to an applicant if the application is complete; in the case of an application for a vessel permit for snapper-grouper, excluding wreckfish, the applicant meets the earned income requirement specified in paragraph (b)(2)(vii) of this section; and, in the case of an applicant for a vessel permit for wreckfish, a wreckfish shareholder is the owner of the vessel, or the vessel owner or operator is an employee, contractor, or agent of the shareholder, as certified in the statement specified in paragraph (c)(2)(v) of this section. An application is complete when all requested forms, information, and documentation have been received and the applicant has submitted all applicable reports specified at § 646.5.

(2) Upon receipt of an incomplete application, the Regional Director will notify the applicant of the deficiency. If the applicant fails to correct the deficiency within 30 days of the date of the Regional Director's letter of notification, the application will be considered abandoned.

(g) *Duration.* A permit remains valid for the period for which it is issued unless revoked, suspended, or modified pursuant to subpart D of 15 CFR part 904. In addition, a vessel permit for wreckfish remains valid only when a wreckfish shareholder is an owner of the permitted vessel, or the vessel owner or operator is an employee, contractor, or agent of the shareholder, as certified in the statement specified in paragraph (c)(2)(v) of this section.

(h) *Transfer.* (1) A vessel permit specified in paragraph (b) or (c) of this section is not transferable or assignable. A person purchasing a permitted vessel who desires to conduct activities for which a permit is required must apply for a permit in accordance with the provisions of paragraph (b) or (c) of this section. The application must be accompanied by a copy of a signed bill of sale.

(2) A dealer permit for wreckfish specified in paragraph (d) of this section may be transferred upon sale of the dealer's business. Information on the original application that is changed as a result of the sale must be reported to the Regional Director within 15 days of any such change.

(i) *Display.* A vessel permit specified in paragraph (b) or (c) of this section must be carried on board the vessel and such vessel must be identified as provided for in § 630.6. A dealer permit specified in paragraph (d) of this section must be available on the dealer's premises. The operator of a vessel or a dealer must present the permit for inspection upon request of an authorized officer.

(j) *Sanctions and denials.* A permit issued pursuant to this section may be revoked, suspended, or modified, and a permit application may be denied, in accordance with the procedures governing enforcement-related permit sanctions and denials found at subpart D of 15 CFR part 904.

(k) *Alteration.* A permit that is altered, erased, or mutilated is invalid.

(l) *Replacement.* A replacement permit may be issued. An application for a replacement permit will not be considered a new application. A fee, the amount of which is stated with the application form, must accompany each request for a replacement permit.

(m) *Change in application information.* The owner or operator of a vessel with a permit for snapper-grouper, excluding wreckfish, the wreckfish shareholder of a vessel with a permit for wreckfish, or a dealer with a permit must notify the Regional Director within 15 days after any change in the application information required by paragraph (b), (c), or (d) of this section. The permit is void if any change in the information is not reported within 15 days.

3. In § 646.5, paragraphs (a) and (c) are revised to read as follows:

§ 646.5 Recordkeeping and reporting.

(a) *Permitted vessels.* (1) The owner or operator of a vessel for which a permit for snapper-grouper, excluding wreckfish has been issued, as required by § 646.4(a)(1), and that is selected by the Science and Research Director; and

(2) The wreckfish shareholder under § 646.10 or operator of a vessel for which a permit for wreckfish has been issued, as required by § 646.4(a)(2)—must maintain a daily logbook form for each fishing trip on a form available from the Science and Research Director. Among other things, the logbook forms provide a record of fishing locations, time fished, fishing gear used, numbers of each species caught, and numbers of each species discarded. Logbook forms must be submitted to the Science and Research Director postmarked not later than the third day after sale of the fish off-loaded from a trip. If no fishing occurred during a month, a report so stating must be submitted in accordance with instructions provided with the forms.

* * * * *

(c) *Dealers.* (1) A person who receives fish in the snapper-grouper fishery by way of purchase, barter, or trade that were harvested from the EEZ off the South Atlantic states or from adjoining state waters and who is selected by the Science and Research Director; and

(2) A dealer who has been issued an annual dealer permit for wreckfish, as required by § 646.4(a)(3)—must provide information on receipts of such fish and prices paid, by species, to the Science and Research Director at monthly intervals, or more frequently if requested.

* * * * *

4. In § 646.6, paragraph (a) introductory text is revised to read as follows:

§ 646.6 Vessel and gear identification.

(a) *Official number.* A vessel for which a permit has been issued under § 646.4 must display its official number—

* * * * *

5. Section 646.7 is revised to read as follows:

§ 646.7 Prohibitions.

In addition to the general prohibitions specified in § 620.7 of this chapter, it is unlawful for any person to do any of the following:

(a) Engage in a directed fishery for tilefish in the EEZ or use a sea bass trap in the EEZ north of Cape Canaveral, Florida, aboard a vessel that does not have a vessel permit for snapper-grouper, excluding wreckfish, as specified in § 646.4(a)(1).

(b) Fish for wreckfish in the EEZ, possess wreckfish in or from the EEZ, off-load wreckfish from the EEZ, or sell wreckfish in or from the EEZ aboard a vessel that does not have a vessel permit for wreckfish, as specified in § 646.4(a)(2).

(c) As a dealer, receive wreckfish without a dealer permit for wreckfish, as specified in § 646.4(a)(3).

(d) Falsify information specified in § 646.4(b)(2), (c)(2), or (d)(2) on an application for a permit.

(e) Fail to display a permit, as specified in § 646.4(i).

(f) Falsify or fail to maintain, submit, or provide information required to be maintained, submitted, or provided, as specified in § 646.5(a) through (d).

(g) Fail to make fish in the snapper-grouper fishery, or parts thereof, available for inspection, as specified in § 646.5(e)(1).

(h) Fail to make available records of off-loadings, purchases, barters, or sales of wreckfish, as specified in § 646.5(e)(2); or fail to make available individual transferable quota (ITQ) coupons, as specified in § 646.10(c)(8).

(i) Falsify or fail to display and maintain vessel and gear identification, as specified in § 646.6(a) through (e).

(j) Possess an ITQ coupon not issued to him or, if received by transfer, without all required sale endorsements properly completed thereon, as specified in § 646.10(c)(3).

(k) Possess wreckfish on board a fishing vessel in an amount exceeding the total of the ITQ coupons on board the vessel, or without a vessel permit, or without a logbook form for recording the fishing trip, as specified in § 646.10(c)(4).

(l) Fail to sign and date the "Fisherman" part of ITQ coupons or fail to submit such coupon parts with the record of the fishing trip, as specified in § 646.10(c)(5).

(m) Fail to give a dealer the "Fish House" part of ITQ coupons, or transfer a wreckfish to a dealer who does not hold a permit, as specified in § 646.10(c)(6).

(n) Receive a wreckfish from a vessel that does not have a vessel permit for wreckfish, as specified in § 646.10(c)(7).

(o) Fail to receive the "Fish House" part of ITQ coupons from a fisherman; fail to enter the permit number of the vessel from which the wreckfish were received, the date of receipt, and the dealer's permit number on such parts; fail to sign such parts; or fail to submit such parts with the dealer report, as specified in § 646.10(c)(7).

(p) Possess a fish in the snapper-grouper fishery smaller than the minimum size limit, as specified in § 646.21(a)(1).

(q) Sell, purchase, trade, or barter, or attempt to sell, purchase, trade, or barter fish in the snapper-grouper fishery smaller than the minimum size limit, as specified in § 646.21(a)(2).

(r) Possess a fish in the snapper-grouper fishery without its head and fins intact, as specified in § 646.21(b).

(s) Operate a vessel with fish in the snapper-grouper fishery aboard that are smaller than the minimum size limits, do not have head and fins intact, or are in excess of the cumulative bag limit, as specified in § 646.21(c) and § 646.23(e).

(t) Transfer wreckfish at sea, as specified in § 646.21(d)(1).

(u) Off-load a wreckfish at a time not authorized or without prior notification, as specified in § 646.21(d)(3) and (d)(4).

(v) Harvest or possess a jewfish or Nassau grouper in or from the EEZ or fail to release a jewfish or Nassau grouper taken in the EEZ, as specified in § 646.21(e) and (f).

(w) During the wreckfish spawning-season closure or a wreckfish quota closure, harvest or possess on board a vessel wreckfish in or from the EEZ; off-load wreckfish from the EEZ; sell, purchase, trade, or barter wreckfish in or from the EEZ; or attempt any of the foregoing, as specified in § 646.21(g) and § 646.24(b).

(x) During the greater amberjack and mutton snapper spawning seasons, exceed the bag limits for those species, as specified in § 646.21(h) and (i).

(y) Fish with poisons or explosives or possess on board a fishing vessel any dynamite or similar explosive substance, as specified in § 646.22(a).

(z) Use a fish trap in the EEZ, or use a sea bass trap in the EEZ south of Cape Canaveral, Florida, as specified in § 646.22(b) and (c)(1).

(aa) When using or possessing a sea bass trap north of Cape Canaveral, Florida, possess fish in the snapper-grouper fishery exceeding the limits, as specified in § 646.22(c)(2).

(bb) Use or possess in the EEZ north of Cape Canaveral, Florida, a sea bass trap that does not conform to the requirements for degradable openings and mesh sizes specified in § 646.22(c)(3) and (c)(4).

(cc) Pull or tend another person's sea bass trap except as specified in § 646.22(c)(5).

(dd) Aboard a vessel that possesses or uses a crustacean trap in the EEZ, possess fish in the snapper-grouper fishery exceeding the limits, as specified in § 646.22(d).

(ee) Use trawl gear in a directed snapper-grouper fishery in the EEZ between Cape Hatteras, North Carolina, and Cape Canaveral, Florida, as specified in § 646.22(e)(1).

(ff) Transfer at sea any fish in the snapper-grouper fishery from a vessel with trawl gear aboard to another vessel, or receive at sea any such fish, as specified in § 646.22 (e)(2) and (e)(3).

(gg) Use an entanglement net to fish for fish in the snapper-grouper fishery in the EEZ; or, aboard a vessel that fishes in the EEZ on a trip with an entanglement net on board, possess fish in the snapper-grouper fishery exceeding the limits, as specifed in § 646.22(f).

(hh) Use a longline to fish for fish in the snapper-grouper fishery in the EEZ where the charted depth is less than 50 fathoms (91.5 meters) or without a vessel permit on board, as required by § 646.4 (a)(1) or (a)(2); or, aboard a vessel with a longline on board that fishes on a trip in the EEZ where the charted depth is less than 50 fathoms (91.5 meters) or without such required vessel permit on board, possess fish in the snapper-grouper fishery exceeding the limits, as specified in § 646.22(g)(1).

(ii) Fish for wreckfish with a bottom longline; or possess a wreckfish aboard a vessel that has a longline aboard, as specified in § 646.22(g)(2).

(jj) Exceed the bag and possession limits, as specified in § 646.23 (a) through (c).

(kk) Transfer at the sea fish in the snapper-grouper fishery subject to bag limit, as specifed in § 646.23(f).

(ll) Use prohibited or unauthorized fishing gear in a special management zone, as specifed in § 646.26 (b) and (c).

(mm) Interfere with, obstruct, delay, or prevent by any means an investigation, search, seizure, or disposition of seized property in connection with enforcement of the Magnuson Act.

6. A new § 646.10 is added to subpart A to read as follows:

§ 646.10 Wreckfish individual transferable quota (ITQ) system.

(a) *Percentage shares.* (1) In accordance with the procedure specified in the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region, as amended, a person will be assigned initial percentage shares of the annual total allowable catch (TAC) of wreckfish. Each person will be notified by the Regional Director of his or her initial percentage shares and shareholder certificate number.

(2) All or a portion of a person's percentage shares may be transferred to another person. Transfer of shares must be reported on form available from the Regional Director. The Regional Director will confirm, in writing, each transfer of shares. The effective date of each transfer is the confirmation date provided by the Regional Director. The confirmation date will normally be not later than 3 working days after receipt of a properly completed transfer form. A fee is charged for each transfer of shares. The amount of the fee is calculated in accordance with the procedures of the NOAA Finance Handbook for determining the administrative costs of each special product or service provided by NOAA to non-Federal recipients. The fee may not exceed such costs and is specifed with each transfer form. The appropriate fee must accompany each transfer form.

(b) *Lists of wreckfish shareholders and permitted vessels.* Annually on or about March 1, the Regional Director will provide each wreckfish shareholder with a list of all wreckfish shareholders and their percentage shares, reflecting share transactions on forms received through February 15. Annually by April 15, the Regional Director will provide each dealer who holds a dealer permit for wreckfish, as required by § 646.4(a)(3), with a list of vessels for which wreckfish permits have been issued, as required by § 646.4(a)(2). Annually by April 15, the Regional Director will provide each wreckfish shareholder with a list of dealers who have been issued dealer permits for wreckfish, as required by § 646.4(a)(3). From April 16 through January 14, updated lists will be provided when required. Updated lists may be otained at other times or by a person who is not a wreckfish shareholder or wreckfish dealer permit holder by written request to the Regional Director.

(c) *Individual transferable quotas.* (1) Annually, as soon after March 1 as the TAC for wreckfish for the fishing year that commences April 16 is known, the Regional Director will calculate each wreckfish shareholder's ITQ. Each ITQ is the product of the wreckfish TAC, in whole weight, for the ensuing fishing year, the factor for converting whole weight to eviscerated weight, and each wreckfish shareholder's percentage share, reflecting share transactions reported on forms received by the Regional Director through February 15. Thus, the ITQs will be in terms of eviscerated weight of wreckfish.

(2) The Regional Director will provide each wreckfish shareholder with ITQ coupons in various denominations, the total of which equals his ITQ, and a copy of the calculations used in determining his ITQ. Each coupon will be coded to indicate the initial recipient.

(3) An ITQ coupon may be transferred from one wreckfish shareholder to another by completing the sale endorsement thereon (i.e., the signature and shareholder certificate number of the buyer). An ITQ coupon may be possessed only by the shareholder to whom it has been issued, or by his employee, contractor, or agent, unless the ITQ coupon has been transferred to another shareholder. An ITQ coupon that has been transferred to another shareholder may be possessed only by the shareholder whose signature appears on the coupon as the buyer, or by his employee, contractor, or agent, and with all required sale endorsements properly completed.

(4) Wreckfish may not be possessed on board a fishing vessel—

(i) In an amount exceeding the total of the ITQ coupons on board the vessel;

(ii) That does not have on board a vessel permit for wreckfish, as required by § 646.4(a)(2); or

(iii) That does not have on board logbook forms for that fishing trip, as required by § 646.5(a).

(5) Prior to termination of a trip, a signature and date signed must be affixed in ink to the "Fisherman" part of ITQ coupons in denominations equal to the eviscerated weight of the wreckfish on board. The "Fisherman" part of each such coupon must be separated from the coupon and submitted with the logbook forms required by § 646.5(a) for that fishing trip.

(6) The "Fish House" part of each such coupon must be given to the dealer to whom the wreckfish are transferred in amounts totalling the eviscerated weight of the wreckfish transferred to

that dealer. A wreckfish may be transferred only to a dealer who holds a dealer permit for wreckfish, as required by § 646.4(a)(3).

(7) A dealer may receive a wreckfish only from a vessel for which a vessel permit for wreckfish has been issued, as required by § 646.4(a)(2). A dealer must receive the "Fish House" part of ITQ coupons in amounts totalling the eviscerated weight of the wreckfish received; enter the permit number of the vessel from which the wreckfish were received, enter the date the wreckfish were received, enter the dealer's permit number, and sign each such "Fish House" part; and submit all such parts with the dealer reports required by § 646.5(c).

(8) An owner or operator of a vessel and a dealer must make available to an authorized officer all ITQ coupons in his or her possession upon request.

7. In § 646.21, paragraph (d) is revised to read as follows.

§ 646.21 Harvest limitations.

* * * * *

(d) *Wreckfish limitations.* (1) A wreckfish taken in the EEZ may not be transferred at sea, regardless of where the transfer takes place; and a wreckfish may not be transferred in the EEZ, regardless of where the wreckfish was taken.

(2) A wreckfish possessed by a fisherman or dealer shoreward of the outer boundary of the EEZ or in an Atlantic coastal state will be presumed to have been harvested from the EEZ unless accompanied by documentation that it was harvested from other than the EEZ.

(3) A wreckfish may be off-loaded from a fishing vessel only between 8 a.m. and 5 p.m., local time.

(4) If a wreckfish is to be off-loaded at a location other than a fixed facility of a dealer who holds a dealer permit for wreckfish, as required by § 646.4(a)(3), the wreckfish shareholder or the vessel operator must advise the NMFS Law Enforcement Office, Southeast Area, St. Petersburg, FL, telephone (813) 893–3145, of the location not less than 24 hours prior to off-loading.

Proposed Rules

Federal Register
Vol. 57, No. 44
Thursday, March 5, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Ch. I

Public Meeting for Special Review of NRC Regulations

AGENCY: Nuclear Regulatory Commission.

ACTION: Notification of date and location for public meeting.

SUMMARY: On February 24, 1992, the NRC published in the **Federal Register** (57 FR 6299) an announcement regarding a program for a Special Review of NRC Regulations. The announcement indicated that, as part of the special review by NRC's Committee to Review Generic Requirements, a public meeting will be held in the Washington, DC area. An all-day meeting will be held at the Hyatt Regency Bethesda in Bethesda, Maryland on March 27, 1992. Details regarding the agenda of the meeting will be published in a subsequent notice prior to the meeting. In order to allow for appropriate arrangements for participants, pre-registration for the meeting by March 24, 1992, is encouraged. Prospective participants can pre-register by mailing the following information to the contact: (1) Name; (2) Title; (3) Organization; (4) Address; and (5) Telephone number. Room reservations should be made directly with the hotel.

DATES: Public Meeting is scheduled for March 27, 1992.

ADDRESSES: Public meeting will be held at the Hyatt Regency Bethesda, 1 Bethesda Metro Center, Bethesda, Maryland 20814. Telephone (301) 657–1234.

Pre-registrations should be mailed to Moni Dey, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

FOR FURTHER INFORMATION CONTACT: For logistics of the meeting contact Moni Dey, Office of Nuclear Regulatory Research, Nuclear Regulatory Commission, Washington, DC 20555. (301) 492–3730.

Dated at Rockville, Maryland, this 27th day of February 1992.

For the Nuclear Regulatory Commission.

Brian W. Sheron,

Director, Division of Systems Research, Office of Nuclear Regulatory Research.

BILLING CODE 7590–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Chapter I

Petition for Rulemaking; Summary of Petitions Received

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for rulemaking received; extension of comment period.

SUMMARY: This notice announces extension of the comment period of a petition for rulemaking which proposes to allow the owner of an older Part 91 aircraft of simple design to restore and perform maintenance on an aircraft that is thereafter inspected by an airworthiness and powerplant inspector or an airworthiness inspector, as appropriate.

DATES: Comments on this petition must identify the petition docket number involved. The FAA will accept late filed comments as long as they do not delay the rulemaking action.

ADDRESSES: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC–10), Petition Docket No. 26574, 800 Independence Avenue, SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC–10), room 915–G, FAA Headquarters Building (FOB–10A), 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–3132.

SUPPLEMENTARY INFORMATION: In the October 25, 1992, issue of the **Federal Register** (55 FR 55241), the Federal Aviation Administration (FAA) published a summary of a petition for rulemaking filed by Tim Greene. The petitioner proposes to allow the owner of an older part 91 aircraft of simple design to restore and perform maintenance on an aircraft that is thereafter inspected by an airworthiness and powerplant inspector or an airworthiness inspector, as appropriate. The public was advised that comments had to be received on or before December 24, 1991. To afford the public the opportunity of having more time in which to submit comments, the FAA will accept late filed comments as long as they do not delay the rulemaking process.

Issued in Washington, DC, on February 21, 1992.

Denise D. Castaldo,

Manager, Program Management Staff.

BILLING CODE 4910–13–M

14 CFR Chapter I

[Summary Notice No. PR–92–2]

Petition for Rulemaking; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for rulemaking received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for rulemaking (14 CFR part 11), this notice contains a summary of certain petitions requesting the initiation of rulemaking procedures for the amendment of specified provisions of the Federal Aviation Regulations and of denials or withdrawals of certain petitions previously received. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before May 4, 1992.

ADDRESSES: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-10), Petition Docket No. 26726, 800 Independence Avenue, SW., Washington, DC 20591.

The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-10), room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-3132.

FOR FURTHER INFORMATION CONTACT: Angela M. Washington, Office of Rulemaking (ARM-1), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-5571.

This notice is published pursuant to paragraphs (b) and (f) of § 11.27 of part 11 of the Federal Aviation Regulations (14 CFR part 11).

Issued in Washington, DC, on February 21, 1992.

Denise D. Castaldo,

Manager, Program Management Staff.

Petitions for Rulemaking

Docket No.: 26726.

Petitioner: Harold Shevers.

Regulations Affected: 14 CFR 91.205(d)(3).

Description of Petition: Petitioner would amend the Federal Aviation Regulations (FAR) to add a provision that would permit the substitution of an electrically driven non-tumbling attitude instrument (with slip-skid indicator), in small airplanes with vacuum or pneumatically driven attitude instruments, in place of the traditional electrically driven rate-of-turn (with slip skid indicator) instrument.

Petitioner's Reason for the Request: The petitioner believes that this change, which should be an optional method of compliance with FAR § 91.205(d), would enhance safety by presenting the pilot with direct attitude information in the event of a failure of either the vacuum pump or the vacuum or pneumatically driven attitude instrument.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 92-NM-19-AD]

Airworthiness Directives; Aerospatiale Model SN 601 Corvette Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes the adoption of a new airworthiness directive (AD) that is applicable to Aerospatiale Model SN 601 Corvette series airplanes. This proposal would require repetitive eddy current inspections of the fuselage skin sheets, and modification of any cracked parts, if necessary. A terminating action is also provided, which, if accomplished, would eliminate the need for repetitive inspections. This proposal is prompted by reports of corrosion on the fuselage skin panels. The actions specified by the proposed AD are intended to prevent structural failure of the fuselage and associated decompression of the passenger cabin.

DATES: Comments must be received by April 28, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-19-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Aerospatiale, 316 Route de Bayonne, 31060 Toulouse, Cedex 03, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Gary Lium, Aerospace Engineer, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-1112; fax (206) 227-1320.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92-NM-19-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-19-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

Discussion

The Direction Générale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, recently notified the FAA that an unsafe condition may exist on certain Aerospatiale Model SN 601 Corvette series airplanes. The DGAC advises that cases have been reported of corrosion on the fuselage skin panels in the area between frames 17 and 19. Corrosion has occurred on airplanes that have accumulated more than 18,200 landings. If uncorrected, this condition could result in structural failure of the fuselage and associated decompression of the passenger cabin.

Aerospatiale has issued Corvette Service Bulletin 53-24, dated January 25, 1991, which describes procedures for repetitive eddy current inspections of the skin panels on the right outer side of the fuselage on the wing root.

Aerospatiale has also issued Corvette Service Bulletin 53-15, dated January 22, 1991, which describes procedures for installation of a doubler and corresponding brackets on the right outer side of the fuselage on the wing root (Modification 1399). When accomplished, this modification would eliminate the need for repetitive eddy current inspections of the skin panels.

The DGAC classified these service bulletins as mandatory and issued French Airworthiness Directive 91-100-014(B) in order to assure the continued airworthiness of these airplanes in France.

This airplane model is manufactured in France and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the DGAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the DGAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require repetitive eddy current inspections, and modification of corroded parts, if necessary. A terminating action is also provided, which, if accomplished, would eliminate the need for repetitive inspections. The actions would be required to be accomplished in accordance with the service bulletins described previously.

The FAA is not proposing to mandate the terminating action, because the skin panels are easily accessible; cracking is easily detectable; and the consequences of the cracking are not likely to be catastrophic.

The FAA estimates that 1 airplane of U.S. registry would be affected by this proposed AD, that it would take approximately 3 work hours per airplant to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $165.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106 (g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Aerospatiale: Docket 92-NM-19-AD.

Applicability: Model SN 601 Corvetter series airplanes, on which Modification 1399 has not been accomplished; as listed in Aerospatiale Corvette Service Bulletins 53-15, dated January 22, 1991, and 53-24, dated January 25, 1991; certified in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent structural failure of the fuselage and associated decompression of the passenger cabin, accomplish the following:

(a) Prior to the accumulation of 18,200 landings, or within 100 landings after the effective date of this AD, whichever occurs later, inspect the skin panels between Frame FR17 and FR19, on the right side below stringer 11, to detect cracks, using an eddy current procedure, in accordance with Aerospatiale Corvette Service Bulletin 53-24, dated January 25, 1991.

(b) If no cracks are found as a result of the inspection required by paragraph (a) of this AD, repeat the repetitive eddy current inspection thereafter at intervals not to exceed 7,300 landings.

(c) If any crack is found as a result of any inspection required by this AD, prior to further flight, install Modification 1399, in accordance with Aerospatiale Corvette Service Bulletin 53-15, dated January 22, 1991.

(d) Installation of Modification 1399, in accordance with Aerospatiale Corvette Service Bulletin 53-15, dated January 22, 1991, constitutes terminating action for the requirements of this AD.

(e) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Standardization Branch, ANM-113.

(f) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on February 25, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 92-NM-17-AD]

Airworthiness Directives; Aerospatiale Model ATR42 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to revise an existing airworthiness directive (AD), applicable to all Aerospatiale Model ATR42 series airplanes, that currently requires modification or replacement of certain fuselage and wing structural components. This action would provide alternative methods for accomplishing certain of those modification and replacement requirements. This proposal is prompted by an evaluation of recently developed methods for modification and replacement of the subject structural components. The actions specified by the proposed AD are intended to prevent failure to the structural components of the fuselage and wing.

DATES: Comments must be received by April 28, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-17-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from

Aerospatiale, 316 Route de Bayonne, 31060 Toulouse, Cedex 03, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Gary Lium, Aerospace Engineer, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; telephone (206) 227-1112; fax (206) 227-1320.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowlege receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92-NM-17-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-17-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

Discussion

On November 27, 1989, the FAA issued AD 89-25-12, Amendment 39-6414 (54 FR 50343, December 6, 1989), to require modification or replacement of certain fuselage and wing structural components. That action was prompted by reports of cracking discovered during full-scale fatigue testing of a Model ATR42 airframe, which was conducted by the manufacturer. The requirements of that AD are intended to prevent failure of the structural components of the fuselage and wing.

Since the issuance of that AD, the FAA has conducted an evaluation of recently developed methods for accomplishing the modification and replacement requirements in the existing AD. The FAA has determined that these new methods for modifying the wing and reinforcing the frame structure provide an acceptable level of safety, and may be used as an alternative method of complying with certain requirements of the existing AD.

Aerospatiale has issued the following revisions to the service bulletins that are currently referenced in AD 89-25-12:

Service bulletin No.	Revision level	Date	Description
ATR42-53-0031	2	May 31, 1990	Installation of oversized fasteners and radius fillers in bulkhead to prevent fatigue cracks.
	3	Feb. 19, 1991	
ATR42-53-0042	1	Apr. 22, 1991	Reinforcement of the frame structure to improve fatigue life of frame 26.
ATR42-57-0010	2	Apr. 16, 1991	Modification of wing box lower surface skin panel joints to improve fatigue strength.
ATR42-57-0021	2	Sept. 25, 1990	Installation of oversized fasteners on outer wing box spars.
	3	Apr. 10, 1991	
	4	Aug. 26, 1991	
ATR42-57-0027	3	Mar. 27, 1991	Reinforcement of structure of center wing box; adds one airplane to effectivity.
	4	Aug. 13, 1991	
	5	Oct. 22, 1991	

These revised versions of the service bulletins provided clarifying and alternative procedures for accomplishing the modification and reinforcement methods described in earlier versions of the bulletins. The Direction Generale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, classified these service bulletins as mandatory and issued French Airworthiness Directive 89-017-017(b)R2 in order to assure the continued airworthiness of these airplanes in France.

This airplane model is manufactured in France and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the DGAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the DGAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would revise AD 89-25-12 to continue to require modification or replacement of certain fuselage and wing structural components. However, certain of the required actions would be permitted to be accomplished in accordance with the revised service bulletins described previously. The revised service bulletins have been included in the proposed rule as additional appropriate sources of service information.

The FAA estimates that 16 airplanes of U.S. registry would be affected by this proposed AD. The entire cost of the required modifications and replacements would be borne by the manufacturer; therefore, there is no cost impact of the AD on U.S. operators.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES**".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows: Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13, amendment 39-6414 (54 FR 50343, December 6, 1989), is revised to read as follows:

Aerospatiale: Docket 92-NM-17-AD. Revises AD 89-25-12, Amendment 39-6414.

Applicability: Model ATR42 airplanes, certificated in any category.

Compliance: Required prior to the accumulation of 10,000 landings, or within the next 300 landings after January 12, 1990 (the effective date of AD 89-25-12, amendment 39-6414), whichever occurs later, unless accomplished previously.

To prevent failure of the structural components of the fuselage and wing, accomplish the following:

(a) For airplane Serial Numbers 003 through 151, inclusive: Reinforce fuselage frame 26 in accordance with Aerospatiale Service Bulletin ATR42-53-0042, dated May 3, 1989; or Revision 1, dated April 22, 1991.

(b) For airplane Serial Numbers 003 through 032, inclusive; 034; and 035: Reinforce the fuselage secondary frames in accordance with Aerospatiale Service Bulletin ATR42-53-0023, Revision 2, dated May 25, 1989.

(c) For airplane Serial Numbers 003 through 059, inclusive: Perform a cold expansion of the outer wing lower skin attach fastener holes in accordance with Aerospatiale Service Bulletin ATR42-57-0010, Revision 1, dated May 20, 1989; or Revision 2, dated April 15, 1991.

(d) For airplane Serial Numbers 003 through 071, inclusive: Reinforce fuselage frames 24 and 28 in accordance with Aerospatiale Service Bulletin ATR42-53-0004, Revision 4, dated July 25, 1989.

(e) For airplane Serial Numbers 003 through 084, inclusive; 086; 087; and 089 through 093, inclusive: Perform a cold expansion of attach holes and reinforce wing/fuselage junction fittings in accordance with Aerospatiale Service Bulletin ATR42-53-0031, Revision 1, dated May 20, 1989; or Revision 2, dated May 31, 1990; or Revision 3, dated February 19, 1991.

(f) For airplane Serial Numbers 003 through 119, inclusive: Perform a cold expansion of the wing front and rear spar attach holes in accordance with Aerospatiale Service Bulletin ATR42-57-0021, Revision 1, dated May 20, 1989; or Revision 2, dated September 25, 1990; or Revision 3, dated April 10, 1991; or Revision 4, dated August 28, 1991.

(g) For airplane Serial Numbers 003 through 151, inclusive: Replace the wing center box, in accordance with Aerospatiale Service Bulletin ATR42-57-0027, Revision 2, dated July 6, 1989; or Revision 3, dated March 27, 1991; or Revision 4, dated August 23, 1991; or Revision 5, dated October 22, 1991.

(h) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Standardization Branch, ANM-113.

(i) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on February 25, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

NATIONAL LABOR RELATIONS BOARD

29 CFR Part 103

Implementation of Supreme Court's Decision in Communications Workers of America v. Beck

AGENCY: National Labor Relations Board (NLRB).

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The National Labor Relations Board (NLRB) is publishing an advance notice of proposed rulemaking relating to its implementation of the Supreme Court's decision in *Communications Workers of America* v. *Beck*, 487 U.S. 735 (1988). The Board is publishing this advance notice of proposed rulemaking to seek timely comments and suggestions from the public, labor organizations, employer groups, and other interested organizations on how labor organizations subject to the jurisdiction of the National Labor Relations Act can best fulfill their statutory obligations under the *Beck* decision.

DATES: All responses pursuant to this notice must be received on or before April 30, 1992.

ADDRESSES: All responses should be sent to: Office of the Executive Secretary, 1717 Pennsylvania Avenue, NW., room 701, Washington, DC 20570. Telephone (202) 254-9430.

FOR FURTHER INFORMATION CONTACT: John C. Truesdale, Executive Secretary, Telephone: (202) 254-9430.

SUPPLEMENTARY INFORMATION: In *Communications Workers* v. *Beck*, 487 U.S. 735 (1988), the Supreme Court held that "Section 8(a)(3), like its statutory equivalent, Section 2, Eleventh of the RLA, authorizes the exaction of only those fees and dues necessary to 'performing the duties of an exclusive representative of the employees in dealing with the employer on labor-management issues.'" (at 762-763)

The Board is of the opinion that the articulation of certain of a labor organization's statutory duties under the *Beck* decision may best be achieved through the use of section 553 ("informal") rulemaking under the Administrative Procedure Act (APA). Before commencing such an undertaking, however, the Board wishes to receive the views of interested parties on this subject. Responses may be directed to any relevant topic, including but not limited to (1) the substantive issues that should be addressed in an administrative rulemaking proceeding, and (2) the manner in which such a proceeding should be structured.

Dated, Washington, DC, February 27, 1992.

By Direction of the Board.

National Labor Relations Board.

John C. Truesdale,

Executive Secretary.

[FR Doc. 92-4936 Filed 3-4-92; 8:45 am]

BILLING CODE 7545-01-M

29 CFR Part 103

Codification of Standardized Remedial Provisions in Board Decisions Regarding Offers of Reinstatement, Make-Whole Remedies, Computation of Interest, and Posting of Notices

AGENCY: National Labor Relations Board.

ACTION: Notice of proposed rulemaking.

SUMMARY: The National Labor Relations Board (NLRB) proposes to amend its rules to incorporate certain remedial provisions frequently appearing in Board decisions. These provisions are as follows: Offers of reinstatement, make-whole remedies, computation of interest, and the posting of notices. By merely citing these rules in future decisions, Board opinions will be shortened considerably. Additionally, the Board proposes to implement, in proposed Rule 103.103, a requirement that all interest awarded on backpay and other monetary awards be compounded daily.

DATES: Comments must be received on or before April 30, 1992.

ADDRESSES: Comments should be sent to: Office of the Executive Secretary, 1717 Pennsylvania Avenue, NW., room 701, Washington, DC 20570. Telephone: (202) 254–9430.

FOR FURTHER INFORMATION CONTACT: John C. Truesdale, Executive Secretary, Telephone: (202) 254–9430.

SUPPLEMENTARY INFORMATION:

I. General Remedial Language

There is, at present, standard remedial language utilized by the Board in many of its decisions and orders, as well as in the decisions and proposed orders of the Board's administrative law judges. See, e.g., *F. W. Woolworth Co.*, 90 NLRB 289 (1950) and *New Horizons for the Retarded*, 283 NLRB 1173 (1987). Such language encompasses rules for valid offers of reinstatement, make-whole remedies, computation of interest, and the posting of notices. By adopting this proposal to set forth such language in the proposed §§ 103.101, 103.102, 103.103, and 103.104 of the Board's rules, and utilizing references to these rules in future decisions providing for reinstatement with backpay and posting of notices, the remedy sections of decisions and orders will be simplified and shortened considerably.

For example, utilizing these proposed rules, the remedy section and the order in a discrimination case issued by the Board would need to provide only:

Offer [employee's name(s)] reinstatement and make the employee whole, with interest, as provided in §§ 103.101, 103.102 and 103.103 of the Board's Rules and Regulations.

Similarly, as to posting, an order would need to provide only:

Post at its facility in [location] copies of the attached notice as provided in § 103.104 of the Board's Rules and Regulations.

II. Compound Interest on Backpay Awards

The Board also proposes to require in § 103.103 that interest on backpay and other monetary awards be compounded daily. The Board has unquestionably broad authority pursuant to section 10(c) of the Act, 29 U.S.C. 160 (c), to fashion remedies which will effectuate the policies of the Act. In *F.W. Woolworth*, 90 NLRB 289 (1950), the Board changed the backpay calculation procedure to a quarterly system rather than calculating backpay from the date of discharge until the date of the award. This change significantly altered monetary amounts due aggrieved parties. It was affirmed by the Supreme Court in *NLRB* v. *Seven-Up Bottling Co.*, 344 U.S. 344 (1953).

In *Isis Plumbing & Heating Co.*, 138 NLRB 716 (1962), the Board awarded interest on backpay and other monetary awards. This was done after 28 years of awarding backpay without interest. The award of interest was upheld by the courts as within the broad remedial authority of the Board to fashion remedies to effectuate the Act. See, e.g., *NLRB* v. *George E. Light Boat Storage, Inc.*, 373 F.2d 762, 766 (5th Cir. 1967); *Philip Carey Manufacturing Co.* v. *NLRB*, 331 F.2d 720, 729–731 (6th Cir.) cert denied 379 U.S. 888 (1964).

Similarly, in *Florida Steel Corp.*, 231 NLRB 651 (1977), the Board altered its rate of interest from the prior 6-percent rate to the sliding interest scale utilized for over and underpayment of federal taxes. The change was upheld by the courts. See, e.g., *NLRB* v. *Warren L. Rose Castings, Inc.*, 587 F.2d 1005 (9th Cir. 1978) enforcing 231 NLRB 912 (1977); *NLRB* v. *Woodline, Inc.*, 577 F.2d 463 (8th Cir. 1978) enforcing 231 NLRB 863 (1977). In *New Horizons for the Retarded*, 283 NLRB 1173 (1987), the Board Modified its interest rate calculations for periods after December 31, 1986. This change was also upheld by the courts. See, E.G., *NLRB* v. *Joyce Western Corp.*, 873 F.2d 128 (6th Cir. 1989), enforcing in relevant part 286 NLRB 592 (1987); *NLRB* v. *Don's Olney Foods, Inc.*, 870 F.2d 1279 (7th Cir. 1989).

In *Phelps Dodge Corp.* v. *NLRB*, 313 U.S. 177, 198–200 (1941), the Court Stated,

> The remedy of back pay, it must be remembered, is entrusted to the Board's discretion; it is not mechanically compelled by the Act. And in applying its authority over back pay orders, the Board has not used stereotyped formulas but has availed itself of the freedom given it by Congress to attain just results in diverse, complicated situations* * *. The Board has a wide discretion to keep the present matter within reasonable bounds through flexible procedural devices.* * *

Additionally, the court stated in *Phelps Dodge* that "Attainment of a great national policy * * * must not be confined within narrow cannons for equitable relief deemed suitable by chancellor in ordinary private controversies." Id. at 188. This broad language thus makes it clear that the common law rule against interest compounding set forth in *Cherokee Nation* v. *United States*, 270 U.S. 476, 490–491 (1925), cannot be held to confine the Board's excercise of its remedial discretion.

Using its broad discretion to fashion remedial orders, the Board, therefore, is authorized to compound interest daily. Furthermore, we find that significant purposes are served by our doing so. The Board properly seeks, through its remedies, to compensate discriminatees for the delay in their receipt of wages—in particular, to offset, at least partially, the reduction in value of delayed payments to discriminatees resulting from inflation during the backpay period. The Board is also interested in promoting prompt payment of legal obligations. A formula incorporating daily compounding of interest will serve these purposes even more effectively than the current simple interest rule.

In federal court litigation, the award of interest and compounding thereof is controlled by statute. Since October 1, 1982, daily compounding of post-judgment interest has been mandated by a statute "on any money judgment in a civil case recovered in a district court." 28 U.S.C. 1961. Prejudgment interest awards are left to the discretion of the judge as is the decision on whether to compound such interest. See, e.g., *Dynamics Corp. of America* v. *U.S.*, 766 F.2d 518, 520 (Fed. Cir. 1985); *Gyromat Corp.* v. *Champion Spark Plug Co.*, 735 F.2d 549, 556–557 (Fed. Cir. 1984); *Parson* v. *Kaiser Aluminum Chemical Corp.*, 727 F.2d 473, 478 (5th Cir.), cert. denied, 467 U.S. 1243 (1984). The Board notes that the federal courts routinely authorize pre-judgment interest in FLSA cases not only to compensate for delay in receiving backpay (an indebtedness arising from a statutory obligation) but also to remedy the competitive disadvantage caused to lawful competitors. See, e.g., *Brock* v. *Richardson*, 812 F.2d 121, 126–127 (3d Cir. 1987) (quoting *Isis Plumbing*); *Donovan* v. *Sovereign Security, Ltd.*, supra, 726 F.2d at 57–58; *Usery* v. *Associated Drugs, Inc.*, 538 F.2d 1191, 1194 (5th Cir. 1976). Indeed, when amending 28 U.S.C. 1961, Congress required daily compounding of post-judgment interest. Congress was animated by a concern for compensating the plaintiff "and avoiding unjust enrichment of the defendant." S. Rep. No. 97–275 at 30 (Nov. 18, 1981) reprinted at 1982 U.S. Code Cong. & Admin. News at 40. In addition, the EEOC seeks daily compounded interest in back-pay awards for discriminatees.

Based upon the above authority the Board proposes to require the daily compounding of interest on backpay and other monetary awards.

III. Proposed Retrospective Application of Compound Interest Rule

Retroactive application of a daily compounding of interest rule finds support both in an analysis based on a balancing of the positive and negative effects of retroactive application and in the Board's general practice.

Under the Supreme Court's balancing test for retroactivity of government statutes and rules, "[t] he propriety of retroactive application is determined by balancing any ill effects of retroactivity against "the mischief of producing a result which is contrary to a statutory design or to legal and equitable principles.' " *SEC* v. *Chenery Corp.*, 332 U.S. 194, 203 (1947), quoted in *John Deklewa & Sons*, 282 NLRB 1375, 1389 (1987), enforced sub nom, *Iron Workers Local 3* v. *NLRB*, 843 F.2d 770 (3d Cir), cert denied, 488 U.S. 109 (1988). Because interest on backpay is a statutory obligation intended to compensate the discriminatee for illegal action taken against him or her, retroactive application to cases involving violations that occurred before the effective date of the proposed rule will not interfere with a vested or contractual right. Moreover, daily compounding of interest is not contrary to the statute or to legal and equitable principles. On the contrary, for the very reasons that justify the authority to compound, the result is perfectly compatible with the statutory design and legal and equitable principles.

In *Deluxe Metal Furniture Co.*, 121 NLRB 995 (1958), the Petitioner asked the Board to apply any new contract bar principles which it might adopt in futuro. The Board rejected this request stating,

> * * * in establishing revisions of precedent there is always the likelihood that such revisions will bring about a different result in some pending proceeding than would have obtained under a prior policy or procedure. This is true not only of the case in which such revisions are first announced and applied, but also with respect to any other case which has not yet been decided, because it has not reached the Board's level or is at one of the other stages of the administrative process such as the hearing. Thus, to adopt these revisions of contract-bar policy and then allow the instant proceeding as an exception without permitting a similar exception to all pending cases would be inequitable. To establish an in futuro rule for all pending cases would create an administrative monstrosity. The judicial practice of applying each pronouncement of a rule of a law to the case in which the issue arises and to all pending cases in whatever stage is traditional and, we believe, the wiser course to follow.

Id. at 1006–1007. The Baord has consistently followed this practice in making remedial changes. In *F.W. Woolworth Co.*, 90 NLRB 289 (1950), after setting forth the quarterly method for computation of back pay, the Board required the employer therein to produce its records for expeditious complaince. Id. at 294. In *Isis Plumbing & Heating Co.*, 138 NLRB 716 (1962), the Board altered its 28-year practice of not awarding interest. The employer therein was ordered to pay interest. Id. at 720–721. Similarly, in *Florida Steel Corp.*, 231 NLRB 651 (1977), after adopting the sliding interest scale, the Board ordered the employer therein to pay interest in accordance with the new standard. Id. at 652. The Board also noted that the then 7-percent rate on the sliding scale would apply "to pending cases for backpay and other monetary awards accruing in periods prior to the issuance of this Decision, in which the 'adjusted prime interest rate' as used by the (IRS) is calculating interest on tax payments was at least 7 percent." Id. at n. 12. Retroactive application of a daily compound interest rule is thus consistent with this general practice.

Accordingly, the Board proposes to apply the new compound interest rule to all cases pending in every stage before the Board in which the Board has not yet issued or adopted a remedial order. In applying the rule to pending cases, we intend that interest be compounded daily for all quarters for which compensation is awarded. In *New Horizons for the Retarded*, supra, the Board specified a particular date separating backpay periods covered by the *Florida Steel* interest formula and those covered by the new interest formula, but this dividing line simply reflected the effective date of the new IRS interest rate rule to which the Board's *New Horizons* formula is linked. There is no external event requiring a similar dividing line here.

As required by the Regulatory Flexibility Act, it is hereby certified that this rule will not have a significant impact on small business entities.

List of Subjects in 29 CFR Part 103

Administrative practice and procedure, Labor management relations.

For the reasons set forth above, it is proposed to amend 29 CFR part 103, Subpart F—Remedial Orders, to read as follows:

PART 103—[AMENDED]

1. The authority citation for 29 CFR part 103 continues to read as follows:

> **Authority:** Section 6, National Labor Relations Act, as amended (29 U.S.C. 151, 156), and section 553 of the Administrative Procedure Act (5 U.S.C. 500, 553).

Subpart F [Amended]

2. In Subpart F—Remedial Orders, §§ 103.101, 103.102, 103.103, and 103.104 are added to read as follows:

§ 103.101 Offers of reinstatement.

Unless otherwise provided in a Board order, the requirement that an employer offer an employee reinstatement means that the employer is required to offer the employee immediate and full reinstatement to the employee's former job, or if that job no longer exists, to a substantially equivalent position, without prejudice to the employee's seniority or any other rights or privileges previously enjoyed.

§ 103.102 Make-whole remedies.

Unless otherwise provided in a Board order:

(a) In cases involving unlawful discrimination, the requirement that an employee be made whole means that the employee shall receive backpay for any loss of earnings and other benefits suffered as a result of the discrimination against him. Backpay shall be computed in the manner set forth in *F.W. Woolworth Co.*, 90 NLRB 289 (1950), with interest as provided in § 103.103 below.

(b) In cases involving unlawful repudiation of a collective-bargaining agreement, unlawful failure to apply the terms of a collective-bargaining agreement, or unlawful unilateral changes in terms and conditions of employment, the requirement that unit employees be made whole means the following:

(1) All employees in the bargaining unit shall receive backpay for any loss of earnings and other benefits suffered as a result of the unlawful action. Backpay shall be computed in the manner set forth in *Ogle Protection Service*, 183 NLRB 682 (1970), enfd. 444 F.2d 502 (6th Cir. 1971), with interest as provided in Section 103.103 below.

(2) All delinquent fringe benefit contributions shall be paid. If benefit funds are involved, any additional amounts due the funds shall be computed in accordance with the criteria set forth in *Merryweather*

Optical Co., 240 NLRB 1213, 1216 fn. 7 (1979). In addition, the employer shall reimburse all employees in the bargaining unit for any expenses ensuing from the failure to make the required contributions, as set forth in *Kraft Plumbing and Heating*, 252 NLRB 891, fn. 2 (1980), enfd. 661 F.2d 940 (9th Cir. 1981), with the interest as provided in Section 103.103 below.

§ 103.103 Computation of interest.

The requirement that interest be paid means that interest shall be computed in the manner set forth in *New Horizons for the Retarded*, 283 NLRB 1173 (1987), and compounded daily.

§ 103.104 Posting of a notice.

The notice-posting requirement means that copies of the notice attached to the Order and marked "Appendix" shall be posted at the specified facility or facilities. If the Order is enforced by a Judgment of a United States Court of Appeals, the words in the notice reading "POSTED BY ORDER OF THE NATIONAL LABOR RELATIONS BOARD" shall read "POSTED PURSUANT TO A JUDGMENT OF THE UNITED STATES COURT OF APPEALS ENFORCING AN ORDER OF THE NATIONAL LABOR RELATIONS BOARD. Copies of the notice, on forms provided by the Regional Director, after being signed by the Respondent's authorized representative, shall be posted by the Respondent immediately upon receipt and maintained for 60 consecutive days in conspicuous places including all places where notices to employees are customarily posted. Reasonable steps shall be taken by the Respondent to ensure that the notices are not altered, defaced, or covered by any other material.

Dated February 28, 1992 by direction of the Board.

National Labor Relations Board.

Joseph E. Moore,

Acting Executive Secretary.

30 CFR Parts 58 and 72

RIN 1219-AA74

Advance Proposed Rulemaking for Permissible Exposure Limit for Diesel Particulate; Extension of Comment Period

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice to extend period for public comment.

SUMMARY: Due to requests from the public, the Mine Safety and Health Administration (MSHA) is extending the period for public comment regarding its advance notice of proposed rulemaking for a permissible exposure limit for diesel particulate.

DATES: Written comments on the advance notice of proposed rulemaking for diesel particulate must be received on or before July 10, 1992.

ADDRESSES: All comments must be sent to: Mine Safety and Health Administration, Office of Standards, Regulations, and Variances, room 631, 4015 Wilson Boulevard, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, Director, Office of Standards, Regulations, and Variances, MSHA phone (703) 235-1910.

SUPPLEMENTARY INFORMATION: On January 6, 1992, MSHA published in the **Federal Register** an advance notice of proposed rulemaking (57 FR 500) regarding the development of a possible regulatory action to establish a permissible exposure limit for diesel particulate. The comment period was scheduled to end on April 5, 1992. In response to requests from the public, MSHA is extending the time for commenting on this advance notice of proposed rulemaking to July 10, 1992. All interested parties are encouraged to submit comments prior to that date.

Dated: February 28, 1992.

William J. Tattersall,

Assistant Secretary for Mine Safety and Health.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[OAQPS # CA-14-6-5341; FRL-4112-1]

Approval and Promulgation of Implementation Plans, California State Implementation Plan Revision; San Joaquin Valley Unified Air Pollution Control District, Kern County Air Pollution Control District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: EPA is proposing to approve revisions to the California State Implementation Plan (SIP) adopted by the San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD) and the Kern County Air Pollution Control District (KCAPCD) on April 11, 1991 and May 6, 1991, respectively. The California Air Resources Board submitted these revisions to EPA on May 30, 1991. The revisions concern the adoption of SJVUAPCD's Rule 460.2, Motor Vehicle and Mobile Equipment Refinishing Operations, and KCAPCD's Rule 410.4A, Motor Vehicle and Mobile Equipment Refinishing Operations. Both rules are new rules which control the emission of volatile organic compounds (VOCs) from non-assembly line motor vehicle and mobile equipment coating operations. EPA is proposing to approve these revisions under section 110(k)(3) as meeting the requirements of section 110(a) and part D of the Clean Air Act, as amended (CAA).

DATES: Comments must be received on or before April 6, 1992.

ADDRESSES: Comments may be mailed to:

Esther Hill, Northern California, Nevada and Hawaii Rulemaking Section (A-5-4), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105.

Copies of the rule revisions and EPA's evaluation report of each rule are available for public inspection at EPA's Region 9 office during normal business hours. Copies of the submitted rule revisions are also available for inspection at the following locations:

California Air Resources Board, Stationary Source Division, Rule Evaluation Section, 1219 "K" Street, Sacramento, CA 95814.

San Joaquin Valley Unified Air Pollution Control District, 1745 West Shaw, Suite 104, Fresno, CA 93711.

Kern County Air Pollution Control District, 2700 M Street, Suite 275, Bakersfield, CA 93301.

FOR FURTHER INFORMATION CONTACT:

Doris Lo, Northern California, Nevada and Hawaii Rulemaking Section (A-5-4), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105, Telephone: (415) 744-1187; FTS: 484-1187.

SUPPLEMENTARY INFORMATION:

Background

On March 3, 1978, EPA promulgated a list of ozone nonattainment areas under the provisions of the Clean Air Act, as amended in 1977 (1977 Act), that included the following eight air pollutions control districts (APCDs): Fresno County APCD, Kern County APCD,[1] Kings County APCD, Madera County APCD, Merced County APCD, San Joaquin County APCD, Stanislaus County APCD, and Tulare County APCD. 43 FR 8964, 40 CFR 81.305. Because these areas were unable to meet the statutory attainment date of December 31, 1982, California requested, and EPA approved, an extension of the attainment date to December 31, 1987.[2] 1977 CAA section 172(a)(2). On May 26, 1988, EPA notified the Governor of California that the above district's portions of the California State Implementation Plan (SIP) were inadequate to attain and maintain the ozone standard and requested that deficiencies in the existing SIP be corrected (EPA's SIP-Call). On November 15, 1990, the Clean Air Act Amendments of 1990 were enacted. Pub. L. 101-549, 104 Stat. 2399, codified at 42 U.S.C. 7401-7671q. In amended section 182(a)(2)(A), Congress statutorily adopted the requirement that nonattainment areas fix their deficient reasonably available control technology (RACT) rules for ozone and established a deadline of May 15, 1991 for states to submit corrections of those deficiencies.

On March 20, 1991, the San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD) was formed. The SJVUAPCD has authority over the San Joaquin Valley Air Basin which includes all of the above eight counties except for the Southeast Desert Air Basin portion of Kern County. Thus, Kern County Air Pollution Control District (KCAPCD) still exists, but only has authority over the Southeast Desert Air Basin portion of Kern County.

Section 182(a)(2)(A) applies to pre-amendment section 107 non-attainment areas that were again designated nonattainment upon enactment and classified as marginal or above under section 181(a)(1) by operation of law. Such areas must adopt and correct RACT rules pursuant to pre-amended section 172(b) as interpreted in pre-amendment guidance.[3] EPA's SIP-Call used that guidance to indicate the necessary corrections for specific nonattainment areas. APCDs found in the San Joaquin Valley Air Basin (now collectively known as the SJVUAPCD) were subject to the RACT fix-up requirement and the May 15, 1991 deadline.[4] KCAPCD was subject to EPA's SIP-Call, but was not subject to the RACT fix-up requirement and the May 15, 1991 deadline.[5]

The State of California submitted many revised RACT rules for incorporation into its SIP on May 30, 1991, including the rules being acted on in this notice. This notice addresses EPA's proposed action for SJVUAPCD's Rule 460.2, Motor Vehicle and Mobile Equipment Refinishing Operations, and KCAPCD's Rule 410.4A, Motor Vehicle and Mobile Equipment Refinishing Operations. These submitted rules were found to be complete on July 10, 1991 pursuant to EPA's completeness criteria set forth in 40 CFR part 51 appendix V[6] and are being proposed for approval into the SIP.

Rules 460.2 and 410.4A both control the emission of volatile organic compounds (VOCs) from the coating of motor vehicle and mobile equipment refinishing operations. VOCs contribute to the production of ground level ozone and smog. SJVUAPCD's Rule 460.2 and KCAPCD's Rule 410.4A are new rules which were adopted to meet EPA's SID-Call and the section 182(a)(2)(A) CAA requirement.

EPA Requirements

In determining the approvability of a VOC rule, EPA must evaluate the rule for consistency with the requirements of the CAA, EPA regulations and EPA policy. These requirements are found in section 110 and part D of the CAA, 40 CFR part 51 (Requirements for Preparation, Adoption, and Submittal of Implementation Plans), and in the guidance referred to in footnote 3. In general, these requirements and guidance documents have been set forth to ensure that VOC rules are fully enforceable and strengthen or maintain the SIP.

Summary of Rule Provisions

SJVUAPCD's Rule 460.2 and KCAPCD's Rule 410.4A both apply to the coating and refinishing operations of non-assembly line vehicles (i.e., not original equipment manufacturers). The rules categorize these vehicles as Group I Vehicles and Group II Vehicles and Equipment. Group I Vehicles include passenger cars, large/heavy duty truck cabs and chassis, light and medium duty trucks and vans, and motorcycles. Group II Vehicles and Equipment include buses and mobile equipment (which includes, but is not limited to, truck bodies, truck trailers, utility bodies, camper shells, mobile cranes, bulldozers, street cleaners, golf carts and implements of husbandry). Operations exempt from the requirements of these rules include touch-up coating operations, graphic arts operations and the coating of radiators.

The following VOC content coating limits are contained in both rules and apply to Group I Vehicles and Group II Vehicles and Equipment where color match is required [expressed as grams of VOC/liter (or pounds of VOC/gallon) of coating applied, excluding water and exempt compounds]:

	Effective 7/1/91	Effective 1/1/93	Effective 1/1/95
Pretreatment Wash Primer	780 (6.5)	780 (6.5)	420 (3.5)
Precoat	780 (6.5)	780 (6.5)	420 (3.5)
Primer/Primer Surfacer	720 (6.0)	340 (2.8)	250 (2.1)
Primer Sealer	720 (6.0)	420 (3.5)	340 (2.8)
Topcoat	720 (6.0)	600 (5.0)	420 (3.0)
Metallic/Iridescent Topcoat	720 (6.0)	600 (5.0)	540 (4.5)

For Group II Vehicles and Equipment where color match is not required, the following VOC content coating limits [expressed as grams of VOC/liter (or pounds of VOC/gallon) of coating applied, excluding water and exempt compounds] apply:

---

[1] At that time, Kern County included portions of two air basins: the San Joaquin Valley Air Basin and the Southeast Desert Air Basin. The San Joaquin Valley Air Basin portion of Kern County was designated as nonattainment, and the Southeast Desert Air Basin portion of Kern County was designated as unclassified. See 40 CFR 81.305 (1991).

[2] This extension was not requested for Kern County. Thus, Kern County's attainment date remained December 31, 1982.

[3] Among other things, the pre-amendment guidance consists of those portions of the proposed Post-1987 ozone and carbon monoxide policy that concern RACT, 52 FR 45044 (November 24, 1987); "Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations, Clarification to Appendix D of November 24, 1987 **Federal Register** Notice" (Blue Book) (notice of availability was published in the **Federal Register** on May 25, 1988); and the existing control technique guidelines (CTGs).

[4] The San Joaquin Valley Air Basin was redesignated nonattainment and classified as serious by operation of law pursuant to sections 107(d) and 181(a) on November 15, 1990. See 56 FR 56694 (November 6, 1991).

[5] KCAPCD was not subject to the RACT fix-up requirement and the May 15, 1991 deadline because the Southeast Desert Air Basin portion of Kern County was not a pre-enactment nonattainment area, and thus, was not automatically designated nonattainment on November 15, 1990. (See section 107(d)) However, the KCAPCD is still subject to the requirements of EPA's SIP-Call because the SIP-Call included all of Kern County. The substantive requirements of the SIP-Call are the same as those of the statutory RACT fix-up requirement.

[6] EPA has since adopted completeness criteria pursuant to section 110(k)(1)(A) of the amended Act. See 56 FR 42216 (August 26, 1991). These will replace the completeness criteria currently seet forth in 40 CFR part 51., appendix V.

	Effective 7/1/91	Effective 1/1/93	Effective 1/1/95
Pretreatment Wash Primer	780 (6.5)	780 (6.5)	420 (3.5)
Precoat	780 (6.5)	780 (6.5)	420 (3.5)
Primer	340 (2.8)	340 (2.8)	250 (2.1)
Topcoat	420 (3.5)	420 (3.5)	340 (2.8)
Metallic/ Iridescent Topcoat	650 (5.4)	420 (3.5)	420 (3.5)
Extreme Performance	750 (6.2)	750 (3.2)	420 (3.5)
Camouflage	420 (3.5)	420 (3.5)	420 (3.5)

The rules also contain further requirements for coating application methods, surface preparation and cleanup, prohibition of sale, prohibition of specification, compliance statements, extreme performance coatings, specialty coatings, recordkeeping and test methods.

EPA Proposal

EPA has evaluated SJVUAPCD's Rule 460.2 and KCAPDC's Rule 410.4A for consistency with the CAA, EPA regulations and EPA policy and has found that both rules meet the applicable EPA requirements and policies. Furthermore, the adoption of these rules should lead to more emission reductions. Thus, EPA is proposing to approve Rules 460.2 and 410.4A under section 110(k)(3) as meeting the requirements of section 110(a) and part D of the CAA.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Regulatory Process

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

This action has been classified as a table 2 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). EPA has submitted a request for a permanent waiver for table 2 and table 3 SIP revisions. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

47 CFR Part 73

[MM Docket No. 89–590, RM–7071; RM–7855]

Radio Broadcasting Services; Sumter, Orangeburg and Columbia, SC

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests further comments on a petition filed by Gamecock City Broadcasting, Inc., seeking the reallotment of Channel 267C from Sumter to Columbia, South Carolina, and the modification of Station WWDM's license accordingly, and the counterproposal filed by Radio South Carolina, Inc., requesting the reallotment of Channel 294C1 from Orangeburg to Columbia, and the modification of Station WTCB(FM)'s license accordingly. See 55 FR 883, published January 10, 1990. Both parties seek the reallotment of their stations to a community within an Urbanized Area from communities outside such areas.

DATES: Comments must be filed on or before April 20, 1992, and reply comments on or before May 5, 1992.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Richard F. Swift, Esq., Tierney & Swift, 1200—18th Street, NW., suite 210, Washington, DC 20036 (Counsel to Gamecock City Broadcasting, Inc.) and Merrick C. Hayes, Esq., Hayes, Schneider, Hammer & Miles, 202 North Center Street, Bloomington, Illinois 61701–1162 (Counsel to Radio South Carolina).

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Request for Supplemental Information, MM Docket No. 89–590, adopted February 20, 1992, and released March 2, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452–1422, 1714 21st Street, NW., Washington, DC 20036.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

[MM Docket No. 92–31, RM–7908]

Radio Broadcasting Services; East Ridge, TN

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition by Sattler Broadcasting Inc., licensee of Station WJRX(FM), Channel 300A, East Ridge, Tennessee, seeking the substitution of Channel 300C3 for Channel 300A at East Ridge and the modification of its license for Station WJRX(FM) to specify operation on the higher powered channel. Channel 300C3 can be allotted to East Ridge in compliance with the Commission's minimum distance separation requirements with a site restriction of 21.8 kilometers (13.6 miles) northwest to accommodate Sattler's desired site. The coordinates for Channel 300C3 at East Ridge are 35–06–31 and 85–24–28. In accordance with Section 1.420(g) of the Commission's Rules, we will not accept competing expressions of interest in use of Channel 300C3 at East Ridge or require the petitioner to demonstrate the availability of an additional equivalent class channel for use by such parties.

DATES: Comments must be filed on or before April 20, 1992, and reply comments on or before May 5, 1992.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Judicial Review; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of a meeting of the Committee on Judicial Review of the Administrative Conference of the United States. The meeting will be held at 9:30 a.m., on Tuesday, March 17, 1992, at Wilmer, Cutler & Pickering, Conference Room 8E2, 2445 M Street NW., Washington, DC 20037.

The Committee will meet to discuss a study by Harold Krent, Assistant Professor at the University of Virginia Law School, of the operation of the Equal Access to Justice Act and a study by Peter Schuck, Yale Law School Professor, and Theodore Wang, San Francisco Lawyers' Committee for Urban Affairs, of immigration law in the courts during the 1980's.

For further information concerning this meeting, contact Mary Candace Fowler, Office of the Chairman, Administrative Conference of the United States, 2120 L Street NW., suite 500, Washington, DC. (Telephone: 202–254–7065.)

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify the Office of the Chairman at least one day in advance. The committee chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting. Any member of the public may file a written statement with the committee before, during, or after the meeting. Minutes of the meeting will be available on request.

Dated: February 27, 1992.

Jeffrey S. Lubbers,

Research Director.

[FR Doc. 92–5059 Filed 3–4–92; 8:45 am]

BILLING CODE 6110–01–M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

Meeting Scheduled for the National Organic Standards Board

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice of National Organic Standards Board Meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act (Pub. L. 92–463), as amended the Agricultural Marketing Service announces a forthcoming meeting of the National Organic Standards Board (NOSB).

DATES: March 23–25, 1992, 1 p.m. to 5 p.m. on March 23, 9 a.m. to 5 p.m. on March 24, and (9 a.m. to 12 noon on March 25, at the Marriott Crystal Gateway, 1700 Jefferson Davis Highway, Arlington, Virginia.

ADDRESSES: Room 104A at USDA, 12th & Independence Avenue and at the Marriott Crystal Gateway.

FOR FURTHER INFORMATION CONTACT: Dr. Harold S. Ricker, Staff Director, National Organic Standards Board, Room 4006, South Building, P.O. Box 96456, Washington DC 20090–6456. Telephone: (202) 720–2704.

SUPPLEMENTARY INFORMATION: Section 2119 of Title XXI—Organic Certification of the Food, Agriculture, Conservation, and Trade Act of 1990 (Fact Act), Public Law 101–624, as amended, requires establishment of a National Organic Standards Board. The purpose of the board is to assist in the development of standards for substances to be used in organic production and to advise the Secretary on any other aspects of the implementation of title XXI of the Fact Act. The Act also calls for a meeting of the board to be held within 60 days after the appointments of members to the board. Secretary Madigan announced the appointment of 14 individuals to the NOSB on January 24, 1992. The purpose of this notice is to announce the dates and location of the first meeting.

Purpose and Agenda

The purpose of the meeting is to begin the process of developing the national organic certification program. The meeting will begin with an orientation for the board, including discussions of the scope and requirements mandated by the Act. The board will also begin to assess priorities for its work and possibly develop committees to work on various aspects of the program. It is likely that discussions will focus on the development of the organic livestock program, a process for accreditation of certifiers and the National List of approved and prohibited substances for organic production and handling. A final agenda will be available on March 9. Persons requesting a copy should contact Mrs. Tilli Fox at the above address or telephone number.

Type of Meeting

The meeting will be open to the public, although seating will be limited. Written comments should be forwarded to Dr. Harold S. Ricker at the above address or FAXED to (202) 690–0338.

Dated: February 28, 1992.

Kenneth C. Clayton,

Deputy Administrator, Marketing Programs.

[FR Doc. 92–5071 Filed 3–4–92; 8:45 am]

BILLING CODE 3410–02–M

Office of the Secretary

Radio and Television Broadcast Use Fee Advisory Committee; Establishment and Nominations

AGENCY: Office of the Secretary, USDA.

ACTION: Notice; request for nominations and comments.

SUMMARY: In response to the Conference Report accompanying the Fiscal Year 1992 Appropriations Act, the Secretaries of Agriculture and of the Interior have agreed to establish an advisory committee to review and report on how to establish rental fees for radio and television broadcast uses which are authorized on National Forest System and public lands. The committee would be established for a 6-month period and report its findings. Nominations to serve on the committee and comments on categories of membership and duties of the committee are requested.

DATES: Nominations for membership on the Committee and comments must be received in writing by March 20, 1992.

ADDRESSES: Send nominations for membership on the Committee and comments to Cy Jamison (WO320), Director, Bureau of Land Management, USDI, 1849 C Street, NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Brent Handley, Lands Staff, Forest Service, USDA (202) 205–1264, or Dave Cavanaugh, Lands and Realty Branch, Bureau of Land Management, USDI, (202) 208–5441.

SUPPLEMENTARY INFORMATION: Pursuant to the Federal Advisory Committee Act (5 U.S.C. appendix), notice is hereby given that the Secretaries of Agriculture and the Interior intend to establish the Radio and Television Broadcast Use Fee Advisory Committee, hereafter referred to as Committee. The purpose of this Committee is to advise the Secretaries of Agriculture and the Interior on appropriate methods of determining fair market value for radio and television bradcast uses authorized on lands managed by the Forest Service and Bureau of Land Management.

The Secretaries have determined that the work of the Committee is in the public interest and relevant to the duties of the Department of Agriculture and Department of the Interior. The duties include the management of communications site uses on National Forest System and public lands, under the provisions of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.). No other advisory committee or agency of the Department of Agriculture or Department of the Interior is performing the tasks that will be assigned to the Committee.

The Committee, including the Chair, shall consist of 9 members as follows:

1. One member representing each of the following:

a. Radio and television broadcasters authorized to use lands administered by the Forest Service or Bureau of Land Management;

b. Radio or television broadcasters who primary broadcast facilities are located on leased private lands;

c. Radio or television translators;

d. State, County or local governments;

e. Managers of communications sites;

f. Individual or respresentatives of an organization knowledgeable of methodologies for determining market value;

g. Public other than the individuals or groups mentioned above.

2. A representative of the USDA, and

3. A representative of the USDI.

Members appointed to the Committee shall be qualified to provide input and data necessary to contribute to the purpose and duties of the Committee. Persons with experience and knowledge in the methods of determining fair market value will be given preference for appointment. A member of the Lands Staff, USDA Forest Service, will serve as the Executive Secretary of the Committee.

The duties of the Committee are to: (1) Review and report on the use of appraisals to establish fair market rental fees for radio and television broadcast uses on lands administered ty the Forest Service and Bureau of Land Management; (2) review and report on reasonable options for establishing fair market rental fees for radio and television broadcast uses; and (3) to review and report on the appropriateness of waivers or reductions in rental fees for radio and television broadcast uses based on requirements for licensing under the Communications Act of 1934 and within the authority of the Federal Land Policy and Management Act of 1976.

The Secretaries invited those individuals, organizations and interest groups affiliated with the categories listed above to nominate individuals for membership on the Committee. Nominations should describe and document the proposed member's qualifications for membership to the Committee. The Secretaries seek a diverse group of members representing a broad spectrum of persons interested in the management of National Forest System and public lands.

Equal opportunity practices will be followed in all appointments to the Committee. To ensure that the recommendations of the Committee have taken into account the needs of the diverse groups served by USDI and USDA, membership should include, to the extent practicable, individuals with demonstrated ability to represent minorities, women, and persons with disabilities.

Done in Washington, DC, this 28th day of February, 1992.

Charles R. Hilty,

Assistant Secretary for Administration.

[FR Doc. 92–5117 Filed 3–4–92; 8:45 am]

BILLING CODE 3410–11–M

Animal and Plant Health Inspection Service

[Docket No. 92–016]

Receipt of Permit Applications for Release Into the Environment of Genetically Engineered Organisms

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that 7 applications for permits to release genetically engineered organisms into the environment are being reviewed by the Animal and Plant Health Inspection Service. The applications have been submitted in accordance with 7 CFR part 340, which regulates the introduction of certain genetically engineered organisms and products.

ADDRESSES: Copies of the applications referenced in this notice, with any confidential business information deleted, are available for public inspection in room 1141, South Building, United States Department of Agriculture, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. You may obtain a copy of these documents by writing to the person listed under For Further Information Contact.

FOR FURTHER INFORMATION CONTACT: Mary Petrie, Program Specialist, Biotechnology, Biologics, and Environmental Protection, Biotechnology Permits, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, room 850, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436–7612.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340, "Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which are Plant Pests or Which There is Reason to Believe Are Plant Pests," require a person to obtain a permit before introducing (importing, moving interstate, or releasing into the environment) into the United States certain genetically engineered organisms and products that are considered "regulated articles." The regulations set forth procedures for obtaining a permit for the release into the environment of a regulated article, and for obtaining a limited permit for the importation or interstate movement of a regulated article.

Pursuant to these regulations, the Animal and Plant Health Inspection Service has received and is reviewing the following applications for permits to release genetically engineered organisms into the environment:

Application No.	Applicant	Date received	Organism	Field test location
92-022-01	Pioneer Hi-Bred International, Incorporated.	01-22-92	Soybean plants genetically engineered to express a methi-onine-rich seed storage protein gene from Brazeil nut.	Champaign County, Illinois; Polk County, Iowa; Salinas County, Missouri; Henry County, Ohio.
92-022-02	Pioneer Hi-Bred International, Incorporation.	01-22-92	Corn plants genetically engineered to express transcriptional activators that act as dominant negative inhibitors of gene expression.	Polk County, Iowa.
92-022-03	Pioneer Hi-Bred International, Incorporated.	01-22-92	Corn plants genetically engineered to express wheat germ agglutinin for resistance to European corn borer.	Polk County, Iowa.
92-022-04	Calgene, Incorporated	01-22-92	Tomato plants genetically engineered to express an anti-sense poly-galacturonase (PG) gene, a cytokinin production gene, and ethylene regulation genes, all of which are involved in ripening.	Solano, San Diego, and San Joaquin Counties, California.
92-027-01 (renewal of permit #90-365-02, issued on 04-02-91).	Upjohn Company	01-27-92	Cantaloupe and squash plants genetically engineered to express the coat protein genes of cucumber mosaic virus (CMV), papaya ringspot virus (PRV), watermelon mosaic virus 2 (WMV2), and zucchini yellow mosaic virus (ZYMV) for resistance to these viruses.	Kern and San Benito Counties, California; Worth County, Georgia; Kalamazoo County, Michigan.
92-027-02 (renewal of permit #90-365-03, issued on 04-02-91).	Upjohn Company	01-27-92	Cantaloupe and squash plants genetically engineered to express the coat protein genes of cucumber mosaic virus (CMV), papaya ringspot virus (PRV), watermelon mosaic virus 2 (WMV2), and zucchini yellow mosaic virus (ZYMV) for resistance to these viruses.	Worth County, Georgia.
92-028-01	Purdue University	01-28-92	Tomato plants genetically engineered to express an antisense pectin methylesterase (PME) chimeric gene to increase the soluble solid content.	Tippecanoe County, Indiana.

Done in Washington, DC, this 28th day of February 1992.

Robert Melland,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 92-5118 Filed 3-4-92; 8:45 am]

BILLING CODE 3410-34-M

Forest Service

Angostura Diversity Unit Vegetation Management Plan; Carson National Forest; Taos County, NM; Intent To Prepare an Environmental Impact Statement

The Department of Agriculture, Forest Service will prepare an Environmental Impact Statement for a proposal to accomplish vegetative management objectives through timber harvest and/or prescribed fire.

The Carson National Forest Land and Resource Management Plan has been prepared. One of the management decisions in the plan was a proposal to harvest timber within the Angostura Diversity Unit to meet resource objectives outlined in the Carson Forest Plan.

A range of timber harvest alternatives will be considered. One of these alternatives will include deferring timber harvest at this time. Other alternatives will consider timber harvest ranging from 4 million board feet to 8 million board feet. Alternative locations for road construction to accomplish timber harvest will be considered.

The Forest Supervisor of the Carson National Forest is the official responsible for deciding if vegetative management is desirable for the area and, if so, which vegetative treatment alternative will be implemented. The Forest Supervisor may decide to (1) defer action (select the no action alternative), or (2) implement one of the action alternatives. The action alternatives will include the following decisions: (1) degree and design of vegetative management activities, and (2) location and design of transportation system needed to harvest and remove timber, and (3) timing and duration of management activities.

This environmental impact statement will be tiered to the Carson Forest Plan Environmental Impact Statement (EIS), and Record of Decision (ROD), dated March 2, 1986. This document discusses alternative long-term land uses and the environmental, economic, and social effects of implementing these land uses.

Intensive scoping to determine pertinent issues relating to the proposal have been ongoing since the beginning of the analysis in 1989. Scoping has been accomplished formally through meetings, open houses and correspondence. Scoping will continue, in the same manner if and when it is determined that such additional scoping opportunities are desirable and beneficial. Dates and locations of future scoping opportunities will be made available to interested parties as they are planned. Written comments regarding issues relating to the proposal are encouraged and will be accepted anytime throughout the preparation of the draft environmental impact statement and within 45 days after publication of the draft environmental impact statement in the **Federal Register**.

Preliminary issues which have been identified are as follows:

Water Quality
Water Flow Timing
Old Growth
Soil Productivity
Threatened, Endangered, and Sensitive (TES) Species
Road Location and Management
Habitat Capability for Deer, Elk, Bear, Turkey
Developed and Dispersed Recreation Opportunity
Visual Quality
Socioeconomic Impacts Upon Local Communities
Economic Efficiency
Timber Productivity
Forest Ecosystem Diversity

The estimated date for filing the draft environmental impact statement is July 1992. The estimated date for filing the final environmental impact statement is May 1993.

The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**.

The Forest Service believes it is important to give reviewers notice at this early stage of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* versus *NRDC, 435 U.S. 519, 553 (1978).* Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon* versus *Hodel,* 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.* versus *Harris,* 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. (Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.).

Written comments and suggestions concerning the scope of the analysis should be sent to Leonard A. Lindquist, Forest Supervisor, Carson National Forest, P.O. Box 558, Taos, New Mexico 87571, by April 15, 1992.

Questions about the proposed action should be directed to Joe B. Hudson, Camino Real Ranger District, P.O. Box 68, Penasco, New Mexico 87553, phone 505-587-2255.

Dated: February 27, 1992.

Leonard A. Lindquist,

Forest Supervisor.

[FR Doc. 92-5130 Filed 3-4-92; 8:45 am]

BILLING CODE 3410-11-M

Southwestern Region, Arizona, New Mexico, West Texas, and Oklahoma; Legal Intent To Prepare an Environmental Impact Statement

AGENCY: Forest Service, USDA.

ACTION: Notice.

SUMMARY: The Southwestern Region of the Forest Service in concert with the U.S. Fish and Wildlife Service is proposing to develop a conservation strategy for Mexican spotted owl (*Strix occidentalis lucida*). A conservation strategy is needed to ensure that continued existence of Mexican spotted owls is not jeopardized by management activities on National Forest Land. The conservation strategy will be implemented on the eleven national forests in Arizona and New Mexico by each Forest Supervisor as management activities are planned.

DATES: Comments concerning the scope of the analysis (issues, preliminary alternatives, etc) should be received in writing by March 16, 1992.

ADDRESSES: Send written comments to USDA Forest Service; Southwestern Region; 517 Gold Avenue, SW.; Albuquerque, NM 87102; ATTN: Keith Fletcher.

FOR FURTHER INFORMATION CONTACT: Contact Keith Fletcher, Wildlife Staff Unit; (505) 842-3267.

SUPPLEMENTARY INFORMATION: The Forest Service in concert with the U.S. Fish and Wildlife Service is planning a develop a conservation strategy for Mexican spotted owls (*Strix occidentalis lucida*).) Mexican spotted owls are presently being considered for listing as a threatened or endangered species. A conservation strategy is needed to conserve and manage owl habitat so that continued existence of the species is assured while providing management guidelines for carrying out other national forest multiple use activities within owl habitat. Management activities within owl habitat are presently being guided by interim guidelines.

The Regional Forester, Southwestern Region, will be the responsible official and will decide on the conservation strategy to be implemented on the eleven national forests in the region. The Forest Service will be the lead agency and the U.S. Fish and Wildlife Service, Arizona Game and Fish Department, and New Mexico Department of Game and Fish will be cooperating agencies.

Preliminary issues are: Whether or not Mexican spotted owls are adequately protected under present guidelines and effects of the strategy on other wildlife, other multiple uses, local economies, and biodiversity. Tentative alternatives include continuing current guidelines, having no guidelines, ecologically based strategy, and total prohibition of activity in owl habitat.

Many public comments have been received concerning Mexican spotted owl management over the last several years and form the backbone for scoping activities for this process. No additional scoping activities are planned before the draft environmental impact statement is issued. Once the draft has been issued, public hearings will be scheduled in several locations throughout the Region. The hearings will be conducted jointly by the Forest Service and the U.S. Fish and Wildlife Service. A hearing schedule and list of locations will be published later.

It is expected that the draft environmental impact statement will be available approximately April 1992, and the environmental impact statement will be available approximately June 1992.

The comment period on the draft environmental impact statement will be 45 days from the date of the Environmental Protection Agency's notice of availability appears in the **Federal Register.** It is very important that those interested in this proposed action participate at that time. To be the most helpful, comments on the draft environmental impact statement should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed (see Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3).

In addition, Federal court decisions have established that reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alters an agency to the reviewers' position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC,* 435 US 519, 553 (1978). Environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final environmental impact statement. *City of Angoon* v. *Hodel,* (9th Circuit, 1986) and *Wisconsin Heritages, Inc.* v. *Harris,* 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). The reason

for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final.

Dated: February 20, 1992.

Robert H. Bye,

Acting Deputy Regional Forester, Southwestern Region.

[FR Doc. 92-5103 Filed 3-4-92; 8:45 am]

BILLING CODE 3410-11-M

North Salmon Timber Sale and Other Resource Projects, Siskiyou National Forest, Coos and Curry Counties, OR

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: Notice is hereby given that the Forest Service, USDA, will prepare an environmental impact statement (EIS) for a Forest Service proposal to implement a timber sale and other resource management projects. Implementation of the proposal would require entry into a designated roadless area on the Powers Ranger District, Siskiyou National Forest. The specific projects include: (1) Harvest of timber from a timber sale and development of associated road systems: (2) development of a rock material source; and (3) miscellaneous projects related to prescribed burning, wildlife enhancement, biodiversity maintenance and road closures.

The proposal area is located approximately 9 air miles southwest of Powers, Oregon, in the Middle Fork of the Sixes River drainage and the South Fork of the Coquille River drainage of the Powers Rangers District, Siskiyou National Forest. Projects would be implemented in accordance with direction in the Siskiyou National Forest Land and Resource Management Plan.

The agency gives notice that the enviornmental analysis process is underway. Interested and potentially affected persons, along with local, State and other Federal agencies, are invited to participate and contribute to the environmental analysis. The Siskiyou National Forest invites written input regarding the issues specific to the proposed actions.

DATES: Written input concerning issues with this Forest Service proposal must be received by April 10, 1992.

ADDRESSES: Submit written input to: District Ranger, Powers Ranger District, Powers, Oregon 97466.

FOR FURTHER INFORMATION: Direct questions about the Proposed Action and EIS to Charlie Possee, Project Leader, Powers Ranger District, Powers, Oregon 97466 (Telephone: (503) 439-3011).

SUPPLEMENTARY INFORMATION: The purpose of the Proposed Action is to implement management direction and projects identified in the March 1989 Siskiyou National Forest Land and Resource Management Plan (Forest Plan). This project EIS will be tiered to the Forest Plan EIS, which provides goals, objectives, standards and guidelines for the various activities and land allocations on the Forest. The Proposed Action would be located in Management Areas 14 (General Forest) and 11 (Riparian). The following Proposed Actions are derived from two key elements in the Forest Plan: (1) The capital investment opportunities (appendix B), and (2) the ten-year action plan (appendix C).

The Proposed Action

The North Salmon Timber Sale, scheduled for offering in Fiscal Year 1993, would harvest approximately 5.8 million board feet (MMBF) in old growth and mature timber types. Douglas fir, Port-Orford-cedar, and Western hemlock are the dominant tree species. Proposed harvest methods and harvest acreage include: (1) Clearcut harvest with reserve trees, 55 acres. Old growth reserve trees would be grouped within the harvest boundary to provide structural biodiversity. (2) Shelterwood harvest with reserve trees, 95 acres. Old growth reserve trees would be retained in order to provide habitat for old growth dependent species, such as the Northern Spotted Owl, in the shortest possible period of time (40-60 years). The overstory would be retained through the following rotation. (3) Clearcut harvest, 4 acres. Two small wildlife openings would be created with this harvest.

Skyline yarding and shovel logging systems would be used to harvest the timber. There would be 3.1 miles of new road construction and 1.09 miles of reconstruction in order to provide access to the timber. These roads would be closed year-round after harvest is completed. Seasonal haul restrictions, gate closures, and vehicle washing would be implemented during logging in order to reduce the spread of Port-Orford-cedar root disease (*Phytophthora lateralis*) spores to uninfected Port-Orford-cedar stands within the sale area. One existing rock material source would be developed.

The harvest areas, with the exception of the wildlife openings, would be prescribed burned in a manner designed to meet the objectives of wildlife and biodiversity. The wildlife openings would be broadcast burned after harvest.

Other resource and wildlife projects would include forage seeding of the created wildlife openings; wildlife tree topping; analysis and possible Management Area reclassification of unique botanical and wildlife sites, which includes an existing pond; enhancement of existing wet areas; landing rehabilitation and planting of wildlife forage vegetation; placement of structures for cavity nesting birds and mammals, and possible inclusion of the sale area in an administrative study to access the effects of the shelterwood prescription on wildlife species which use old-growth habitat.

The potential for the presence of Pacific yew exists. If harvested, the yew bark would be utilized for taxol production.

Stands proposed for harvest are located within section 19, Township 32 South, Range 12 West; and within section 24, Township 32 South, Range 13 West (Willamette Meridian). The Proposed Action would enter the northern portion of the 9,354 acre Copper Mountain Roadless Area (Forest Plan # 6171). This proposal would have the effect of reducing the roadless area by 410 acres.

Public input will be used to determine significant issues with the Proposed Action. These issues will in turn be used to develop alternatives to the Proposed Action. The No Action Alternative will be analyzed. A previous Environmental Assessment was completed for the North Salmon Timber Sale in 1990. A Decision Notice was not signed. The Proposed Action for this EIS is a result of the analysis performed for the previous Environmental Assessment for the North Salmon Timber Sale.

The Forest Service is seeking input from individuals, organizations, and local, State and Federal agencies who may be interested in or affected by the Proposed Action. Other avenues for public participation include commenting on the draft EIS, and public meetings to be held during key points of the EIS process.

A mailing list will be compiled during the analysis. Interested individuals and agencies may have their names added to this list at any time by submitting a request to: Charlie Possee, North Salmon Project Leader, Powers Ranger District, Powers Oregon 97466. The Freedom of Information Act (FOIA) governs the disclosure of each Federal Government mailing list. Under provisions of the FOIA, the names and addresses of persons on these lists will be released upon request, unless the request falls within one of the FOIA exemptions.

The draft EIS is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review and commenting by December, 1992. At that time, EPA will publish a notice of availability of the draft EIS in the **Federal Register**. The comment period on the draft EIS will be 45 days from the date the EPA notice of availability appears in the **Federal Register**.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft EIS should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft EIS or the merits of the alternatives formulated and discussed in the statement. (Reviewer may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points).

The Forest Service believes it is important to give reviewers notice at this early stage because of several court rulings related to public participation in the environmental review process. First, reviewers of a draft EIS must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft EIS stage but that are not raised until after completion of the final EIS may be waived or dismissed by the courts. *City of Angoon* v. *Hodel*, 803 F. 2d. 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.* v. *Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final EIS.

After the 45 day comment period ends on the draft EIS, the comments will be analyzed and considered by the Forest Service in preparing the final EIS. The final EIS is scheduled to be completed by April 1993. In the final EIS, the Forest Service is required to respond to the comments received. The responsible official is the Forest Supervisor. The responsible official will consider the comments, responses, and environmental consequences, discussed in the EIS and applicable laws, regulations, and policies in making a decision regarding this proposal. The responsible official will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to review under 36 CFR part 217.

Dated: February 21, 1992.

J. Michael Lunn,

Forest Supervisor.

BILLING CODE 3410-11-M

DEPARTMENT OF COMMERCE

Bureau of Export Administration

Materials Technical Advisory Committee; Partially Closed Meeting

A meeting of the Materials Technical Advisory Committee will be held March 26, 1992, 10:30 a.m., Herbert C. Hoover Building, room 1617-M, 14th Street and Constitution Avenue NW., Washington, DC. The Committee advises the Office of Technology and Policy Analysis with respect to technical questions which affect the level of export controls applicable to materials or technology.

Agenda: General Session

1. Opening Remarks by the Chairman & Commerce Representative.
2. Introduction of Members and Visitors.
3. Presentation of Papers or Comments by the Public.
4. Review of Proliferation Control Regimes and Controls.
5. Discussion and Assignments to Determine if all Producing Countries are Members of the Control Regime.

Executive Session

6. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control programs and strategic criteria related thereto.

The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting. However, in order to facilitate distribution of public presentation materials to the Committee members, the Committee suggests that you forward your public presentation materials two weeks prior to the meeting to the below listed address: Ms. Ruth D. Fitts, U.S. Department of Commerce/BXA, Office of Technology & Policy Analysis, 14th & Constitution Avenue NW., Room 1621, Washington, DC 20230.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on April 12, 1990, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, that the series of meetings or portions of meetings of the Committee and of any Subcommittee thereof, dealing with the classified materials listed in 5 U.S.C. 552(c)(1) shall be exempt from the provisions relating to public meetings found in section 10(a)(1) and (a)(3), of the Federal Advisory Committee Act. The remaining series of meetings or portions thereof will be open to the public. A copy of the Notice of Determination to close meetings or portions of meetings of the Committee is available for public inspection and copying in the Central Reference and Records Inspection Facility, room 6628, U.S. Department of Commerce, Washington, DC. For further information or copies of the minutes call Ruth D. Fitts, 202-377-4959.

Dated: February 28, 1992.

Betty A. Ferrell,

Director, Technical Advisory Committee Unit, Office of Technology and Policy Analysis.

BILLING CODE 3510-DT-M

MCTL Implementation Technical Advisory Committee; Partially Closed Meeting

A meeting of the MCTL Implementation Technical Advisory Committee will be held March 25, 1992 at 9:30 a.m., in the Herbert C. Hoover Building, room 1092, 14th Street and Constitution Avenue, NW., Washington, DC. The Committee advises the Office of Technology and Policy Analysis in the implementation of the Militarily Critical Technologies List (MCTL) into the Export Administration Regulations as needed.

Agenda: General Session

1. Opening Remarks by the Chairman.
2. Introduction of Members and Visitors.
3. Presentation of Papers or Comments by the Public.
4. Non-proliferation Export Control Regimes.
5. MITAC Working Group Reports:

Restructuring Export Controls.
Nuclear Suppliers Groups (NSG) Dual Use Regime.
TAC Utilization.

Executive Session

6. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control programs and strategic criteria related thereto.

The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting. However, in order to facilitate distribution of public presentation materials to the Committee members, the Committee suggests that you forward your public presentation materials two weeks prior to the meeting to the below listed address: Ms. Ruth D. Fitts, TAC Unit/EA/BXA, Room 1621, U.S. Department of Commerce, 14th & Constitution Avenue NW., Washington, DC 20230.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on December 26, 1990, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, that the series of meetings or portions of meetings of the Committee and of any Subcommittee thereof, dealing with the classified materials listed in 5 U.S.C. 552b(c)(1) shall be exempt from the provisions relating to public meetings found in section 10 (a)(1) and (a)(3), of the Federal Advisory Committee Act. The remaining series of meetings or portions thereof will be open to the public.

A copy of the Notice of Determination to close meetings or portions of meetings of the Committee is available for public inspection and copying in the Central Reference and Records Inspection Facility, room 6628, U.S. Department of Commerce, Washington, DC. For further information or copies of the minutes call Ruth D. Fitts, 202–377–4959.

Dated: February 28, 1992.

Betty A. Ferrell,

Director, Technical Advisory Committee Unit, Office of the Deputy Assistant Secretary for Export Administration.

BILLING CODE 3510–DT–M

International Trade Administration

Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of opportunity to request administrative review of antidumping or countervailing duty order, finding, or suspended investigation.

Background

Each year during the anniversary month of the publication of an antidumping or countervailing duty order, finding, or suspension of investigation, an interested party as defined in section 771(9) of the Tariff Act of 1930 may request, in accordance with §§ 353.22 or 355.22 of the Commerce Regulations, that the Department of Commerce ("the Department") conduct an administrative review of that antidumping or countervailing duty order, finding, or suspended investigation.

Opportunity to request a review

Not later than March 31, 1992, interested parties may requests administrative review of the following orders, findings, or suspended investigations, with anniversary dates in March for the following periods:

Antidumping duty proceedings	Period
Australia: Canned Bartlett Pears (A–602–039)	03/01/91–02/29/92
Canada: Iron Construction Castings (A–122–503)	03/01/91–02/29/92
Canada: Certain Fresh Cut Flowers (A–122–604)	03/01/91–02/29/92
Chile: Standard Carnations (A–337–602)	03/01/91–02/29/92
Colombia: Certain Fresh Cut Flowers (A–301–602)	03/01/91–02/29/92
Ecuador: Certain Fresh Cut Flowers (A–331–602)	03/01/91–02/29/92
Finland: Rayon Staple Fiber (A–405–071)	03/01/91–02/29/92
France: Brass Sheet and Strip (A–427–602)	03/01/91–02/29/92
Israel: Oil Country Tubular Goods (A–508–602)	03/01/91–02/29/92
Italy: Certain Valves and Connections of Brass, for Use in Fire Protection Systems (A–475–401)	03/01/91–02/29/92
Italy: Brass Sheet and Strip (A–475–601)	03/01/91–02/29/92
Japan: Ferrite Cores (of the Type used in Consumer Electronic Products) (A–588–016)	03/01/91–02/29/92
Japan: Stainless Steel Butt-Weld Pipe Fittings (A–588–702)	03/01/91–02/29/92
Japan: Television Receivers, Monochrome and Color (A–588–015)	03/01/91–02/29/92
Sweden: Brass Sheet and Strip (A–401–601)	03/01/91–02/29/92
Taiwan: Light-Walled Welded Rectangular Carbon Steel Tubing (A–583–803)	03/01/91–02/29/92
Thailand: Certain Circular Welded Carbon Steel Pipes and Tubes (A–549–502)	03/01/91–02/29/92
The Federal Republic of Germany: Brass Sheet and Strip (A–428–602)	03/01/91–02/29/92
The Peoples Republic of China: Chloropicrin (A–570–002)	03/01/91–02/29/92
Suspension Agreements	
Brazil: Frozen Concentrated Orange Juice (C–351–005)	01/01/91–12/31/91
Thailand: Certain Yarn Products (C–549–401)	01/01/91–12/31/91
Countervailing Duty Proceedings	
Argentina: Leather Wearing Apparel (C–357–001)	01/01/91–12/31/91
Argentina: Certain Apparel (C–357–404)	01/01/91–12/31/91
Brazil: Certain Castor Oil Products (C–351–029)	01/01/91–12/31/91
Brazil: Cotton Yarn C–351–037)	01/01/91–12/31/91
Canada: Standard Carnations (C–122–603)	01/10/91–12/31/91
Chile: Standard Carnations (C–337–601)	01/01/91–12/31/91
France: Brass Sheet and Strip (C–427–603)	01/01/91–12/31/91
Iran: In-Shell Pistachios (C–507–501)	01/01/91–12/31/91
Israel: Oil Country Tubular Goods (C–508–601)	01/01/91–12/31/91
Mexico: Certain Textile Mill Products (C–201–405)	01/01/91–12/31/91
Netherlands: Standard Chrysanthemums (C–421–601)	01/01/91–12/31/91
New Zealand: Carbon Steel Wire Rod (C–614–504)	01/01/91–12/31/91

Antidumping duty proceedings	Period
Pakistan: Cotton Shop Towels (C–535–001)	01/01/91–12/31/91
South Africa: Ferrochrome (C–791–001)	01/01/91–12/31/91
Thailand: Certain Apparel (C–549–401)	01/01/91–12/31/91
Turkey: Certain Welded Carbon Steel Pipe and Tube (C–489–502)	01/01/91–12/31/91

In accordance with § 353.22(a) of the Commerce regulations, an interested party may request in writing that the Secretary conduct an administrative review of specified individual producers or resellers covered by an order, if the requesting person states why the person desires the Secretary to review those particular producers or resellers. If the interested party intends for the Secretary to review sales of merchandise by a reseller (or a producer if that producer also resells merchandise from other suppliers) which was produced in more than one country of origin, and each country of origin is subject to a separate order, then the interested party must state specifically which reseller(s) and which countries of origin for each reseller the request is intended to cover.

Seven copies of the request should be submitted to the Assistant Secretary for Import Administration, International Trade Administration, room B–099, U.S. Department of Commerce, Washington, DC 20230. Further, in accordance with § 353.31 of the Commerce Regulations, a copy of each request must be served on every party on the Department's service list.

The Department will publish in the **Federal Register** a notice of "Initiation of Antidumping (Countervailing) Duty Administrative Review", for requests received by March 31, 1992.

If the Department does not receive by March 31, 1992, a request for review of entries covered by an order or finding listed in this notice and for the period identified above, the Department will instruct the Customs Service to assess antidumping or countervailing duties on those entries at a rate equal to the cash deposit of (or bond for) estimated antidumping or countervailing duties required on those entries at the time of entry, or withdrawal from warehouse, for consumption and to continue to collect the cash deposit previously ordered.

This notice is not required by statute, but is published as a service to the international trading community.

Dated: February 27, 1992.

Roland L. MacDonald,

Acting Deputy Assistant Secretary for Compliance.

[FR Doc. 92–5161 Filed 3–4–92; 8:45 am]

BILLING CODE 3510–DS–M

Minority Business Development Agency

Business Development Center Applications: San Juan, PR

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: In accordance with Executive Order 11625, the Minority Business Development Agency (MBDA) is soliciting competitive applications under its Minority Business Development Center (MBDC) program to operate an MBDC for approximately a 3 year period, subject to Agency priorities, recipient performance and the availability of funds. The cost of performance for the first Budget period (12 months) is estimated as $386,421 in Federal funds, and a minimum of $68,192 in non-Federal (cost sharing) contribution, from August 1, 1992 to July 31, 1993. Cost-sharing contributions, may be in the form of cash contributions, client fees, in-kind contributions or combinations thereof. The MBDC will operate in the San Juan, Puerto Rico SMSA geographic service area.

The funding instrument for the MBDC will be a cooperative agreement. Competition is open to individuals, non-profit and for-profit organizations, state local governments, American Indian tribes and educational institutions.

The MBDC program is designed to provide business development services to the minority business community for the establishment and operation of viable minority business. To this end, MBDA funds organizations that can identify and coordinate public and private sector resources on behalf of minority individuals and firms; offer a full range of management and technical assistance; and serve as a conduit of information and assistance regarding minority business.

Applications will be evaluated initially by regional staff on the following criteria: The experience and capabilities of the firm and its staff in addressing the needs of the business community in general and, specifically, the special needs of minority businesses, individuals and organizations (50 points); the resources available to the firm in providing budiness development services (10 points); the firm's approach (techniques and methodologies) to performing the work requirements included in the application (20 points); and the firm's estimated cost for providing such assistance (20 points). An application must receive at least 70% of the points assigned to any one evaluation criteria category to be considered programmatically acceptable and responsive. The selection of an application for further processing by MBDA will be made by the Director based on a determination of the application most likely to further the purpose of the MBDC program. The application will then be forwarded to the Department for final processing and approval, if appropriate. The Director will consider past performance of the applicant on previous Federal awards.

MBDCs shall be required to contribute at least 15% of the total project cost through non-Federal contibutions. To assist them in this effort, MBDCs may charge client fees for management and technical assistance (M&TA) rendered. Based on a standard rate of $50 per hour, MBDCs will charge client fees at 20% of the total cost for firms with gross sales of $500,000 or less, and 35% of the total cost for firms with gross sales of over $500,000.

MBDCs performing satisfactorily may continue to operate after the initial competitive year for up to 2 additional budget periods. MBDCs with year-to-date "commendable" and "excellent" performance ratings may continue to be funded for up to 3 or 4 additional budget periods, respectively. Under no circumstances shall an MBDC be funded for more than 5 consecutive budget periods without competition. Periodic reviews culminating in year-to-date quantitative and qualitative evaluations will be conducted to determine if funding for the project should continue. Continued funding will be at the discretion of MBDA based on such factors as an MBDC's performance, the availability of funds and the Agency priorities.

Awards under this program shall be subject to all Federal and Departmental regulations, policies, and procedures applicable to Federal assistance awards.

In accordance with OMB Circular A–129, "Managing Federal Credit Programs," applicants who have an outstanding account receivable with the

Federal Government may not be considered for funding until these debts have been paid or arrangements satisfactory to the Department of Commerce are made to pay the debt.

Applicants are subject to Governmentwide Debarment and Suspension (Nonprocurement) requirements as stated in 15 CFR part 26.

The departmental Grants Officer may terminate any grant/cooperative agreement in whole or in part at any time before the date of completion whenever it is determined that the MBDC has failed to comply with the comditions of the grant/cooperative agreement. Examples of some of the conditions which can cause termination are failure to meet cost-sharing requirements; unsatisfactory performance of MBDC work requirements; and reporting inaccurate or inflated claims of client assistance or client certification. Such inaccurate or inflated claims may be deemed illegal and punishable by law.

On November 18, 1988, Congress enacted the Drug-Free Workplace Act of 1988 (Pub. L. 100–690, title V, subtitle D). The statute requires contractors and grantees of Federal agencies to certify that they will provide a drug-free workplace. Pursuant to these requirements, the applicable certification form must be completed by each applicant as a precondition for receiving Federal grant or cooperative agreement awards. False information on the application can be grounds for denying or terminating funding.

"Certification for Contracts, Grants, Loans, and Cooperative Agreements" and SF–LLL, the "Disclosure of Lobbying Activities" (if applicable) is required in accordance with section 319 of Public Law 101–121, which generally prohibits recipients of Federal contracts, grants, and loans from using legislative Branches of the Federal Government in connection with a specific contract, grant or loan.

15 CFR part 28 is applicable and prohibits recipients of Federal contracts, grants, and cooperative agreements from using appropriated funds for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with a specific contract, grant, or cooperative agreement. Form CD–511, "Certifications Regarding Debarment, Suspension and Other Responsibility Matters; Drug-Free Workplace Requirements and Lobbying" and, when applicable, the SF–LLL, "Disclosure of Lobbying Activities," are required.

CLOSING DATE: The closing date for application is April 13, 1992. Applications must be postmarked on or before April 13, 1992.

Proposals will be reviewed by the Atlanta Regional Office. The mailing address for submission is:

ADDRESSES: Carlton Eccles, Regional Director, Atlanta Regional Office, Minority Business Development Agency, The Summit Building, 401 West Peachtree Street, NW., room 1930, Atlanta, Georgia 30308–3516.

FOR FURTHER INFORMATION CONTACT: John F. Inglehart, Regional Director, New York Regional Office at (212) 264–3263.

SUPPLEMENTARY INFORMATION: Anticipated processing time of this award is 120 days. Executive Order 12372 "Inter-Governmental Review of Federal Programs" is not applicable to this program. Questions concerning the preceding information, copies of application kits and applicable regulations can be obtained at the above New York address.

11.800 Minority Business Development
(Catalog of Federal Domestic Assistance)

Dated: February 28, 1992.

John F. Iglehart,

Regional Director, New York Regional Office.

[FR Doc. 92–5102 Filed 3–4–92; 8:45 am]

BILLING CODE 3510–21–M

DEPARTMENT OF DEFENSE

Office of the Secretary

Department of Defense Wage Committee; Closed Meetings

Pursuant to the provisions of section 10 of Public Law 92–463, the Federal Advisory Committee Act, notice is hereby given that a meeting of the Department of Defense Wage Committee will be held on Tuesday, April 7, 1992; Tuesday, April 14, 1992; Tuesday, April 21, 1992; and Tuesday, April 28, 1992, at 2 p.m. in room 800, Hoffman Building #1, Alexandria, Virginia.

The Committee's primary responsibility is to consider and submit recommendations to the Assistant Secretary of Defense (Force Management and Personnel) concerning all matters involved in the development and authorization of wage schedules for federal prevailing rate employees pursuant to Public Law 92–392. At this meeting, the Committee will consider wage survey specifications, wage survey data, local wage survey committee reports and recommendations, and wage schedules derived therefrom.

Under the provisions of section 10(d) of Public Law 92–463, meetings may be closed to the public when they are "concerned with matters listed in 5 U.S.C. 552b." Two of the matters so listed are those "related solely to the internal personnel rules and practices of an agency" (5 U.S.C. 552b. (c)(2)), and those involving "trade secrets and commercial or financial information obtained from a person and privileged or confidential" (5 U.S.C. 552b. (c)(4)).

Accordingly, the Deputy Assistant Secretary of Defense (Civilian Personnel Policy/Equal Opportunity) hereby determines that all portions of the meeting will be closed to the public because the matters considered are related to the internal rules and practices of the Department of Defense (5 U.S.C. 552b. (c)(2)), and the detailed wage data considered were obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 U.S.C. 552b(c)(4)).

However, members of the public who may wish to do so are invited to submit material in writing to the chairman concerning matters believed to be deserving of the Committee's attention.

Additional information concerning this meeting may be obtained by writing the Chairman, Department of Defense Wage Committee, room 3D264, the Pentagon, Washington, DC 20310.

L.M. Bynum,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810–01–M

DEPARTMENT OF EDUCATION

National Assessment Governing Board; Meeting

AGENCY: National Assessment Governing Board; Education.

ACTION: Notice of partially-closed meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of forthcoming meetings of the National Assessment Governing Board and its committees. This notice also describes the functions of the Board. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend the open portions of the meeting.

DATES: March 4, 5, and 6, 1992.

TIME: March 4, 1992—Subject Area Committee #2—3 p.m. to 5 p.m. (open); Design and Analysis Committee—3 p.m. to 5 p.m. (open); Nominations Committee—6 p.m. to 7 p.m. (closed); Reporting and Dissemination/ Achievement Levels Joint Committee—5 p.m. to 6 p.m. (open); Executive Committee—7 p.m. to 10 p.m. (open). March 5, 1992—Full Board—8:30 a.m., until approximately 5 p.m. (open). March 6, 1992—Full Board—8:30 a.m. to 11:30 a.m. (closed); 11:30 a.m. to 12 noon (open); 12 noon, until adjournment, at approximately 1:30 p.m. (open).

LOCATION: The Madison Hotel, 15th and M Streets, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Roy Truby, Executive Director, National Assessment Governing Board, U.S. Department of Education, 1100 L Street, NW., suite 7322, Washington, DC, 20005–4013.

TELEPHONE: (202) 357–6938.

SUPPLEMENTARY INFORMATION: The National Assessment Governing Board (NAGB) is established under section 406(i) of the General Education Provisions Act (GEPA) as amended by section 3403 of the National Assessment of Educational Progress Act (NAEP Improvement Act), title III–C of the Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988 (Pub. L. 100–297); (20 U.S.C. 1221e–1).

The Board is established to advise the Commissioner of the National Center for Education Statistics on policies and actions needed to improve the form and use of the National Assessment of Educational Progress, and develop specifications for the design, methodology, analysis and reporting of test results. The Board also is responsible for selecting subject areas to be assessed, identifying the objectives for each age and grade tested, and establishing standards and procedures for interstate and national comparisons. On March 4, five committees will be in session. The Subject Area Committee #2 will meet from 3 p.m. to 5 p.m. to review and discuss recommendations from the 1994 match contract with the College Board. The Design and Analysis Committee will meet from 3 p.m. to 5 p.m. to review the status of studies on NAEP scaling and methods, and student motivation being conducted by the Technical Review Panel (TRP) and discuss preliminary findings.

The Nominations Committee will meet in closed session from 6 p.m. until 7 p.m. The Committee will review and discuss the personal qualifications and experience of nominees for upcoming Board vacancies. Discussion of such information will touch upon matters that would constitute a clearly unwarranted invasion of personal privacy if conducted in open session, and will relate solely to the internal personnel rules and practices of an agency. Such matters are protected by exemptions (2) and (6) of section 552b(c) of title 5 U.S.C.

The Reporting and Dissemination and Achievement Levels Committees will meet in joint session from 5 p.m. until 6 p.m., to review data from the evaluation of the utility of the 1990 NAEP mathematics achievement levels. A survey was conducted to "users" of the achievement levels information to determine the utility of this new NAEP reporting method. Also, on March 4, the Executive Committee will meet in open session from 7 p.m. until 10 p.m. to review the NAEP budget and to discuss and make a determination of non-mandated subjects to be assessed in future NAEP activities. On March 5, the full Board will meet in open session from 8:30 a.m. until 10:30 a.m. The agenda for the morning session includes a presentation by the Superintendent, District of Columbia Public Schools, and a briefing on the final report submitted by the National Council on Standards and Testing. During the period from 10:30 a.m. to 12:30 p.m., there will be meetings of the Subject Area Committee #1, Achievement Levels, and the Reporting and Dissemination Committees. Beginning at 12:30 p.m. and concluding at approximately 5 p.m., the Board will hear reports from several educational agencies: (1) The National Academy of Education on the NAEP Trial Assessment; (2) The College Board on the recommended 1994 math framework; (3) The Educational Testing Service on the Second International Assessment of Educational Progress; and (4) the National Standards Project and the National Academy of Sciences on the progress toward the development of content standards in U.S. and World History, and in science. The March 6 session of the full Board meeting will be devoted to committee reports beginning at 9 a.m. All reports, with the exception of the Nominations Committee, will be conducted in open session. The Nominations Committee will present its report to the full Board from 11:30 a.m. to 12 noon. This period of the committee reports will be closed to the public to permit the members to vote on nominees to be recommended to the Secretary for appointment to the Board. The Board will review and discuss the personal qualifications and experience of nominees for the upcoming Board vacancies. Discussion of such information will touch upon matters that would constitute a clearly unwarranted invasion of personal privacy if conducted in open session, and will relate solely to the internal personnel rules and practices of an agency.

Such matters are protected by exemptions (2) and (6) of section 552(c) of title 5 U.S.C. From 12 noon until adjournment, at approximately 1:30 p.m., the meeting will be open.

A summary of the activities at the closed sessions and related matters, which are informative to the public and consistent with the policy of section 5 U.S.C. 552b, will be available to the public within 14 days after the meeting. Records are kept of all Board proceedings and are available for public inspection at the U.S. Department of Education, National Assessment Governing Board, 1100 L Street, NW., suite 7322, Washington, DC, from 8:30 a.m. to 5 p.m.

Dated: February 28, 1992.

Diane Ravitch,

Assistant Secretary and Counselor to the Secretary.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Finding of No Significant Impact; U.S. Advanced Battery Consortium

AGENCY: Department of Energy.

ACTION: Public Notice of a Finding of No Significant Impact (FONSI) for Environmental Assessment (EA) of the Cooperative Agreement Between the U.S. Department of Energy and the U.S. Advanced Battery Consortium (DOE/EA–0551)

SUMMARY: On September 27, 1991, the Department of Energy (DOE) determined that no environmental impact statement was required for the proposed cooperative agreement based on the subject EA and issued a FONSI. For information purposes, the FONSI is reprinted herein. Based on the analysis presented in the EA, DOE has determined that the proposed action is not a major Federal action significantly affecting the quality of the human environment, within the meaning of the National Environmental Policy Act (NEPA) of 1969. Therefore, preparation of an Environmental Impact Statement is not required and DOE is issuing this FONSI.

ADDRESS: Copies of the EA are avilable form: Mr. John J. Brogan, Director, Office of Propulsion Systems (CE–32), Room 5G–030, U.S. Department of Energy, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585,

telephone (202) 586-1477 and 1-800-472-2756 or the Freedom of Information Reading Room IE-190 (same address), telephone (202) 586-6020, hours 9 a.m. to 4 p.m.

FOR FURTHER INFORMATION CONTACT: Ms. Carol Borgstrom, Director, Office of NEPA Oversight (EH-25), room 3E-080, U.S. Department of Energy, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, telephone (202) 586-4600 or (1-800) 472-2756.

SUPPLEMENTARY INFORMATION: The U.S. Department of Energy (DOE) proposes to participate in a 4-year cooperative agreement with the United States Advanced Battery Consortium (USABC) to 50/50 cost-shared Federal funding with the consortium in the research and development (R&D) of advanced batteries ultimately intended for use in electric vehicles. These advanced battery development projects to be conducted by the battery industry are expected to provide battery systems with the necessary technical, economic, operational, environmental, and health and safety information that would support potential widespread commercialization of electric vehicles. Efficient, durable, and safe batteries that provide acceptable vehicle operating ranges are essential for market acceptance of electric vehicle technology in sufficient quantities to justify commercialization. Widespread commercialization would result in two major benefits: reduced atmospheric emissions associated with internal combustion engine vehicles and reduced dependence on petroleum in the transportion sector, thereby enhancing the national energy security.

The majority of the activities associated with the proposed action would take place within existing industry laboratory facilities. DOE's participation would include coordinating independent evaluation and R&D support on fundamental technology problems at DOE laboratories including Argonne National Laboratory, Idaho National Engineering Laboratory, Sandia National Laboratory and Lawrence Berkeley Laboratory. Although the exact role of DOE laboratories has not been finalized, current planning is to utilize the laboratories for testing of cells and battery modules as well as providing some research and development support in specific technology areas that are undefined at this time. Test vehicles equipped with advanced batteries would be studied to assess their performance and to ensure their compliance with applicable Federal motor vehicle safety standards promulgated by the Department of Transportation in regulations found in 49 CFR part 571. Batteries would be tested by industry in a fleet of roughly 100 vehicles. Each vehicle would be driven from 10,000 to 15,000 miles on public and private roads during a one year test period. Potential environmental damage associated with a traffic accident would be minimal due to the limited number of vehicles under test and the small quantities of battery materials involved. Further, the possibility of traffic accidents would be lessened due to the limited number of test vehicles operating with these advanced batteries and the fact that the vehicles, in most cases, would be driven by trained drivers and technicians. Based on previous experience in conducting fleet tests of this nature no unusual accidents or occurrences are expected from the operation of the test fleet.

No undisturbed ecosystems would be affected, and there would be no effect on cultural or archeological resources. No effluent discharges or atmospheric emissions are anticipated during the proposed action. Batteries and their associated materials would be stored, handled, transported and disposed of in agreement with all applicable laws and regulations, including those of the U.S. Environmental Protection Agency (EPA), the U.S. Department of Transportaion (DOT) and the Occupational Safety and Health Administration (OSHA) requirements, as well as DOE internal guidance.

Description of Proposed Action

DOE proposes to participate in a four year cooperative agreement with the USABC to cost-share with the consortium in R&D of advanced batteries ultimately intended for use in electric vehicles. The level of funding over the entire four year period is projected to be $263 million, one half of which would be provided by the Federal Government. The initial Phase I agreement is for the remainder of the calendar year 1991 only, at a cost of $14.1 million (50 percent cost-shared by DOE). During this period, the R&D activities for each candidate technology will be more specifically defined in detailed Program Plans to be submitted by the Consortium for review and approval by DOE. This will allow for a more thorough environmental assessment to be prepared to cover the balance (Phase II) of the four year program. If necessary, the Department will have an opportunity for further NEPA review of specific R&D activities to be undertaken in Phase II. The Program Plans would define the number of cells, modules, and batteries to be built for test and evaluation in Phase II, including information on the specific materials and amounts of materials to be involved. Phase II is scheduled for initiation at the beginning of calendar year 1992.

The USABC is a partnership formed by the three largest domestic automobile manufacturers. The consortium is supported by major investor-owned electric utilities and the Electric Power Research Institute (EPRI). Other associate partners include battery developers from the private sector.

The private sector would be responsible for developing and ultimately commercializing the technology. DOE was given the responsibility to conduct R&D of batteries for electric vehicles by the Electric and Hybrid Vehicle Research, Development and Demonstration Act of 1976 (Pub. L. 94-413). The proposed action is consistent with DOE activities described in Electric and Hybrid Vehicles Program: 14th Annual Report to Congress for Fiscal Year 1990 (Office of Transportation Technologies, DOE/CE 0305P, April 1991).

Further, advanced battery technology R&D is consistent with the objectives of the National Energy Strategy (NES) released in February 1991. The commercialization of electric vehicles that would result from the successful development of these advanced battery technologies would serve to reduce the transportation sector's near-total reliance on oil and have the added benefit of lowering the rates of emissions into the environment, particularly in urban areas, where automobiles are linked directly to air quality problems.

The strategy for achieving the USABC objectives includes pursuing both mid- and long-term advanced battery technologies. Mid-term technologies, which would include nickel metal hydride, sodium sulfur, and zinc air batteries, are expected to be developed and available in the mid 1990s. Long-term technologies under consideration include lithium polymer and lithium iron disulfide batteries. Long-term technologies would be aimed at producing electric vehicles that are equivalent in cost and performance to today's internal combustion engine vehicles. However, because of the early stage of development of these long range battery technologies, they would not be available at the end of the 4-year time span of the proposed action. Prototype models would be available for laboratory evaluation only.

Under the non-action alternative, no advanced battery technology R&D projects would receive joint Government/industry support. Private sector development and demonstration of advanced battery technologies would continue, but at a significantly reduced pace and on a more limited set of technologies. Widespread commercialization of these technologies would be delayed or may never be achieved, and the transportation sector's current near-total reliance on oil would not be relaxed. Environmental benefits associated with electric vehicles utilizing advanced battery technologies would not be realized. These benefits include significant reduction in carbon monoxide, unburned hydrocarbons, particulates, and nitric oxides.

Alternative technologies, including advanced heat engines, fuel cells, and alternative fuels, are being studied under separate programs of the Department. Section 6 of Public Law 94-413 specifically authorizes the Department to conduct R&D into energy storage technologies, including batteries.

Determination

Based on the analysis presented in the environmental assessment, DOE has determined that the proposed action is not a major Federal action significantly affecting the quality of the human environment within the meaning of NEPA of 1969. Therefore, preparation of an environmental impact statement is not required and the Department is issuing this finding of no significant impact.

For further information on the Advanced Battery program, contact Mr. John Brogan at the address listed above.

J. Michael Davis,

Assistant Secretary, Conservation and Renewable Energy.

BILLING CODE 6450-01-M

Office of Environment, Safety and Health

Environment, Safety and Health Advisory Committee; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. No. 92-463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: Environment, Safety and Health Advisory Committee

Date and Time: Friday, April 3, 1992, 9 a.m.

Place: U.S. Department of Energy, Forrestal Building, Room 1E-245, 1000 Independence Avenue, SW, Washington, DC 20585.

Note: To obtain badge at front desk it will be necessary to have a picture I.D. (i.e. Driver's License, Passport, or Company I.D.). All visitors will be escorted at all times for security reasons.

Contact: Lisa Kardell, U.S. Department of Energy, Office of Environment, Safety and Health (EH-50), Washington, DC 20585, Telephone:202/586-1986.

Purpose of the Committee: To provide advice and guidance to the Department of Energy on matters relating to environment, safety and health at DOE facilities.

Purpose of the Meeting: To convene the first meeting of the Committee, to provide briefings and orientation to the members, and to consider future tasks.

Tentative Agenda:

—Call to order by the Honorable Kristine Gebbie, Secretary of Health, Washington State Department of Health, Chairperson of the Environment, Safety and Health Advisory Committee.
—Remarks by Chairperson Gebbie.
—Remarks by Paul L. Ziemer, Assistant Secretary for Environment, Safety and Health, U.S. Department of Energy.
—Briefing and orientation on DOE's environment, safety and health program.
—Discussion of future tasks.
—Discussion of any other business properly brought before the Committee.
—Public comment - 10-minute rule.
—Adjournment.

Public Participation: The meeting is open to the public. The Chairperson is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Lisa Kardell at the address or telephone number listed above. Requests must be received at least five days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda. Persons wishing to attend the public meeting should provide their names and social security numbers to (202) 586-1988 by March 27 to arrange for visitor passes to the Forrestal Building.

Transcript: Available for public review and copying at the Public Reading Room, room 1E-190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC., between 9 a.m. and 4 a.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC., on March 2, 1992.

Marcia Morris,

Deputy Advisory Committee Management Officer.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Project No. 1403-004 California]

Pacific Gas and Electric Co.; Errata to Availability of Environmental Assessment

February 27, 1992.

The Notice issued February 28, 1992 should read as follows:

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for new license for the existing Narrows Project, located at the Corps of Engineers' Upper Narrows debris dam on the Yuba River, near Mooney Flat in Nevada County, California, and has prepared an Environmental Assessment (EA) for the project. In the EA, the Commission's staff has analyzed the environmental impacts of the project and has concluded that relicensing the project would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, room 3104, of the Commission's offices at 941 North Capitol Street, NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. ST92-1671-000 through ST92-2083-000]

United Gas Pipe Line Co.; Self-Implementing Transactions

February 27, 1992.

Take notice that the following transactions have been reported to the Commission as being implemented pursuant to part 284 of the Commission's regulations, sections 311 and 312 of the Natural Gas Policy Act of 1978 (NGPA) and section 5 of the Outer Continental Shelf Lands Act.[1]

The "Recipient" column in the following table indicates the entity receiving or purchasing the natural gas in each transaction.

[1] Notice of a transaction does not constitute a determination that the terms and conditions of the proposed service will be approved or that the noticed filing is in compliance with the Commission's regulations.

The "part 284 Subpart" column in the following table indicates the type of transaction.

A "B" indicates transportation by an interstate pipeline on behalf of an intrastate pipeline or a local distribution company pursuant to § 284.102 of the Commission's regulations and section 311(a)(1) of the NGPA.

A "C" indicates transportation by an intrastate pipeline on behalf of an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.122 of the Commission's regulations and section 311(a)(2) of the NGPA.

A "D" indicates a sale by an intrastate pipeline to an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.142 of the Commission's Regulations and section 311(b) of the NGPA. Any interested person may file a complaint concerning such sales pursuant to § 284.147(d) of the Commission's Regulations.

An "E" indicates an assignment by an intrastate pipeline to any interstate pipeline or local distribution company pursuant to § 284.163 of the Commission's regulations and section 312 of the NGPA.

A "G" indicates transportation by an interstate pipeline on behalf of another interstate pipeline pursuant to § 284.222 and a blanket certificate issued under § 284.221 of the Commission's regulations.

A "G–S" indicates transportation by interstate pipelines on behalf of shippers other than interstate pipelines pursuant to § 284.223 and a blanket certificate issued under § 284.221 of the Commission's regulations.

A "G–LT" or "G–LS" indicates transportation, sales or assignments by a local distribution company on behalf of or to an interstate pipeline or local distribution company pursuant to a blanket certificate issued under § 284.224 of the Commission's regulations.

A "G–HT" or "G–HS" indicates transportation, sales or assignments by a Hinshaw Pipeline pursuant to a blanket certificate issued under § 284.224 of the Commission's regulations.

A "K" indicates tansportation of natural gas on the Outer Continental Shelf by an interstate pipeline on behalf of another interstate pipeline pursuant to § 284.303 of the Commission's regulations.

A "K–S" indicates transportation of natural gas on the Outer Continental Shelf by an intrastate pipeline on behalf of shippers other than interstate pipelines pursuant to § 284.303 of the Commission's regulations.

Lois D. Cashell,
Secretary.

BILLING CODE 6717-01-M

[Docket No. JD92-04110T California-1]

California; NGPA Determination by Jurisdictional Agency Designating Tight Formations

February 27, 1992.

Take notice that on February 24, 1992, the California Division of Oil and Gas (California) submitted the above-referenced notice of determination pursuant to 271.703(c)(3) of the Commission's regulations, that the Lower Reef Ridge Shale Zone and the Basal Reef Ridge/Upper Antelope Shale Zone in the Lost Hills Field, Kern County, California, qualify as tight formations under section 107(b) of the Natural Gas Policy Act of 1978 (NGPA). The area of application for both formations underlie the same lands described as follows:

Township 27 South, Range 21 East, Mt Diablo Base Meridian

Sections 22, 26, and 36—All

Section 25—All that portion lying westerly of the west line of the California Aqueduct, as described in the "Lis Pendens" dated May 12, 1965, and recorded May 12, 1965, in Book 3839 at Page 558 of Official Records, Kern County, California

The notice of determination also contains California's findings that the referenced portions of the Lower Reef Ridge Shale Zone and the Basal Reef Ridge/Upper Antelope Shale Zone meet the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TQ92-4-24-000 and TQ92-4-24-001]

Equitrans, Inc; Proposed Changes in FERC Gas Tariff

February 27, 1992.

Take notice that Equitrans, Inc. ("Equitrans") on February 25, 1992, tendered for filing, with a proposed effective date of March 1, 1992, the

following primary revised tariff sheets to its FERC Gas Tariff Original Volume No. 1:

Thirty-Fifth Revised Sheet No. 10
Twenty-Fifth Revised Sheet No. 34

Equitrans also submitted the following alternate tariff sheets:

Alternate Thirty-Fifth Revised Sheet No. 10
Alternate Twenty-Fifth Revised Sheet No. 34

Equitrans states that this filing implements an Out-of-Cycle Purchased Gas Adjustment to (1) correct an inadvertent error in the primary sheets to be effective March 1, 1992 filed by Equitrans on January 30, 1992 in Docket No. TQ92–3–24–000 and accepted by Letter Order issued on February 18, 1992, and (2) more closely reflect Equitrans' experienced cost of gas.

The changes proposed in the primary sheets under Rate Schedule PLS is an increase in the demand cost of $0.4340 per dekatherm ("dth") and a decrease in the commodity cost of $0.6341 per dth. The purchased gas cost adjustment to Rate Schedule ISS is a decrease of $0.5590 per dth for the winter period and $0.5592 per dth for the base period.

These changes are intended to reflect a recent change in the rates of Tennessee Gas Pipeline Company ("Tennessee"). On January 31, 1992, Tennessee moved to place revised rates into effect on February 1, 1992 in Docket No. RP92–203. Equitrans asserts it inadvertently omitted this Tennessee rate change in the PGA rates it previously submitted to become effective on March 1, 1992 in Docket No. TQ92–3–24–000. In addition, this filing reflects an up-date in Equitrans' gas costs.

The alternate tariff sheets are being filed to implement the pending certificate application in Docket No. CP92–109–000 to provide firm Sales Service of up to 50,000 dth per day of natural gas to Texas Eastern Transmission Corporation ("Texas Eastern") during the winter season of November through March for a two-year period. The proposed changes in the alternate filing under Rate Schedule PLS is an increase in the demand cost of $0.4340 per dth and a decrease in the commodity cost of $0.6617 per dth, as well as a change in the Account No. 191 surcharge to reflect additional PLS billing determinants from sales to Texas Eastern in March. The alternate proposed Purchase Gas Adjustment to Rate Schedule ISS is a decrease of $0.5823 per dth for the winter period and $0.5825 per dth for the base period.

Equitrans requests that the Commission grant waivers as needed to permit either the primary or alternate tariff sheets to become effective on March 1, 1992 in lieu of the incorrect sheets filed in Docket No. TQ92–3–24–000.

Equitrans states that a copy of its filing has been served upon its affected customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before March 5, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92–5074 Filed 3–4–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RI92–5–000]

OXY USA Inc.; Independent Producer Change in Rate Schedule

February 27, 1992.

Take notice that on February 24, 1992, OXY USA Inc. (OXY) of Box 300, Tulsa, Oklahoma 74102, filed an independent producer rate change filing pursuant to § 154.94 of the Federal Energy Regulatory Commission's (Commission) regulations. OXY requests that the Commission restore the indefinite pricing provision to its life of lease contract dated August 19, 1946, all as more fully set forth in the filing which is on file with the Commission and open for public inspection.

Under the August 19, 1946 contract, on file with the Commission as OXY's FERC Gas Rate Schedule No. 107, OXY, successor to Cities Service Oil Company (Cities), sells natural gas to Phillips Petroleum Company (Phillips) from wells located in the Hugoton Field, Sherman County, Texas. OXY states that the indefinite pricing provision was deleted from the contract under the duress of the then federal regulation of producer contracts by a contract amendment dated June 16, 1964, executed by Phillips and Cities and accepted by the Commission as Supplement No. 8 to OXY's FERC Gas Rate Schedule No. 107. OXY also states that absent the restoration of the indefinite pricing provision, the "contract" rate would arguably remain at the current minimum rate upon the deregulation of natural gas prices under the Natural Gas Wellhead Decontrol Act of 1989, subject only to a one cent escalation every five years.

Any person desiring to be heard or to make an protest with reference to said filing should on or before March 9, 1992, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in the proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Lois D. Cashell,

Secretary.

[FR Doc. 92–5070 Filed 3–4–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP92–6–003]

Southern Natural Gas Co., et. al.; Petition to Amend

February 28, 1992.

Take notice that on February 24, 1992, Southern Natural Gas Company (Southern), Post Office Box 2563, Birmingham, Alabama 35202–2563, and on February 25, 1992, South Georgia Natural Gas Company (South Georgia), Post Office Box 2563, Birmingham, Alabama 35202–2563, filed in Docket No. CP92–6–003 a joint petition to amend the order issued October 31, 1991, in Docket No. CP92–6–000 pursuant to section 7(b) of the Natural Gas Act so as to reflect the correct amount of remaining contract demand for South Georgia and South Georgia's customer, the City of Dawson (Dawson), all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

It is stated that in ordering Paragraph (C) of the October 31, 1991, Commission order, Southern was authorized to abandon 10,498 Mcf of daily contract demand to South Georgia. It is further stated that the 10,498 Mcf per day of South Georgia's contract demand was generated by accumulating each of nine customer's remaining maximum daily quantities proposed for conversion to firm transportation on South Georgia's system. Southern asserts that subsequent to submission of Docket No. CP92–6–000 and receipts of the requested authorization, Southern discovered that the 1,212 Mcf per day of maximum daily quantities for Dawson was overstated. It is stated that Dawson had already converted 606 of the said 1,212 Mcf of maximum daily quantities to firm transportation service on February 20, 1991. Thus, it is maintained that 606 of the 1,212 Mcf per day of the maximum daily quantities had already been accounted for in other abandonment calculations. Accordingly, Southern requests that the October 31, 1991, order be amended to reflect abandonment of 9,892 Mcf per day for South Georgia under Rate Schedule OCD–2. In addition, South Georgia requests that the October 31, 1991, order be amended to reflect abandonment of 606 Mcf per day for Dawson under Rate Schedule G–2.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before March 9, 1992, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Lois D. Cashell,

Secretary.

[FR Doc. 92–5069 Filed 3–4–92; 8:45 am]

BILLING CODE 6717–01–M

Office of Energy Research

Special Research Grant Program Notice 92–10: Nuclear Engineering Research

AGENCY: Department of Energy (DOE).

SUMMARY: The Office of Energy Research of the Department of Energy (DOE), in keeping with the Special Research Grant Program, 10 CFR part 605, hereby announces its interest in receiving applications for special research grants that will support nuclear engineering research. The restriction of funding to U.S. college and university nuclear engineering programs is in accordance with the recommendation in the Senate Report to the Energy and Water Development Appropriation Act, 1992, Public Law 102–104. The Senate Report citation is: Senate Report 80, 102nd Congress, 1st Session, page 87. The report specifies that college and university nuclear engineering programs shall receive DOE funding to support this program of research. In accordance with 10 CFR part 600.7(b)(1), eligibility for awards under this program is restricted to colleges and universities that have nuclear engineering programs because the purpose of the program is to (1) support basic research in nuclear engineering; (2) assist in developing nuclear engineering manpower; and (3) contribute to strengthening the academic community's nuclear engineering infrastructure.

DATES: To permit timely consideration for award in Fiscal Year 1992, formal applications submitted in response to this Notice should be received no later than 4:30 p.m. Eastern local time, April 20, 1992.

ADDRESSES: Completed formal applications referencing Program notice 92–10 should be submitted to: U.S. Department of Energy, Division of Acquisition and Assistance Management, ER–64, Office of Energy Research, Washington, D.C. 20585. Express mail or courier address is: U.S. Department of Energy, Division of Acquisition and Assistance Management, ER–64, Office of Energy Research, 19901 Germantown Road, Germantown, MD 20874.

FOR FURTHER INFORMATION CONTACT: Dr. Larry Barker, Program Manager, Office of University and Science Education Programs, ER–82, Office of Energy Research, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, D.C 20585, (202) 586–8947.

SUPPLEMENTARY INFORMATION: Applications for special research grants should be directed to state-of-the-art research that contributes to the following areas: applied nuclear sciences, reactor operations and control, reactor neutronics, nuclear thermal hydraulics, nuclear materials, advanced reactor concepts, nuclear propulsion technology for space, waste management and environmental remediation, and heavy water reactor safety research for Westinghouse Savannah River Laboratory. The research to be supported should be innovative and revolutionary, rather than evolutionary. Incremental improvements in technologies related to conventional light water reactor (LWR) technologies or research typically supported by the U.S. Nuclear Regulatory Commission will not be supported. The following information details the areas of research in which this program has an increased interest:

1. Applied nuclear science focuses on research applications of radiation and research reactors, including, but not limited to, improved instrumentation or measurement techniques for health physics or biomedical research, the use of research reactors for fundamental studies, and other innovative applications of nuclear science which support DOE missions and goals.

a. Improved instrumentation for health physics or biomedical applications focuses on the development of dosimetry techniques for monitoring of radiation exposures due to neutrons and other radiation in medical application of radiation sources.

b. The use of research reactors for fundamental studies focuses on the development of novel research capabilities using research reactors for the application of radiation from reactors to probe matter in pursuit of basic knowledge in areas such as condensed matter physics, chemical kinetics, or biotechnology.

c. Other innovative applications of nuclear science which have not been specifically identified elsewhere in this program notice will also be considered for funding if they support DOE missions and goals.

2. Reactor operations and control includes innovative applications of computer systems and computational tools to improvements in the safety and reliability of nuclear reactor operation, including advances in reactor control and instrumentation, and real-time instrumentation to monitor component and system performance.

a. Advances in reactor control and instrumentation includes the application of human factors engineering and/or expert systems to improve monitors and displays for the control room environment and the application of real-time signal analysis and processing to improve fault detection in reactor instrumentation and components.

b. Real-time instrumentation includes, but is not limited to, the monitoring of component performance to optimize component maintenance and to minimize failure, and the development of nuclear or non-nuclear methods to detect in real time the radiation embrittlement of nuclear reactor vessel materials.

3. Reactor neutronics focuses on improvements in reactor computational methodologies in the light of continuing

dramatic improvements in computational hardware, including, but not limited to, improvements in core neutronics, reactor kinetics, radiation transport, fission product behavior, nuclear fuel management and fuel cycle optimization.

4. Nuclear thermal hydraulics focuses on improvements of models and analysis of thermal hydraulic behavior in the nuclear reactor system, including, but not limited to, applications to multiphase flow, convective and conductive heat transport, degraded core cooling and emergency coolant flow.

5. Nuclear materials addresses the application of engineering sciences to improve knowledge of material behavior in a radiation environment typical of nuclear power plants, including, but not limited to, the identification of improved materials for plant life extension, and the modeling of corrosion and erosion is such environments.

6. Advanced reactor concepts focuses on innovative design concepts for improved power reactor performance, including, but not limited to, advanced converter reactors, liquid metal reactors, light water reactors and high temperature gas-cooled reactors.

7. Advanced nuclear propulsion concepts focuses on the development of advanced nuclear propulsion concepts, beyond solid core fission, to support the requirements of planetary exploration of the President's Space Exploration Initiative. Research to be funded will include, but not be limited to, advances in nuclear thermal propulsion (NTP) and nuclear electric propulsion (NEP) concepts.

a. NTP research should address basic theoretical and/or experimental work which supports the development of propulsion concepts which produce a specific impulse greater than 1500 sec. Leading NTP candidates include gas core fission, fusion systems, and antimatter systems, although consideration will be given to any concept which would allow fast transport of manned spacecraft.

Specific areas of interest include, but are not limited to: (1) Plasma/fluid interface mixing; (2) radiation transport (neutronic, thermal, x-ray, gamma ray, pion); (3) fluid dynamics; (4) high temperature materials (behavior, fabrication, and cooling); (5) dense plasma coupling to magnetic fields; (6) antiproton storage; (7) low mass thermal radiators; (8) innovative power convertors; and (9) coupled systems modeling.

b. NEP research should address basic theoretical and/or experimental work which supports the development of propulsion concepts which produce a specific mass less than 3 kg/kW.

Specific areas of interest include but are not limited to: (1) Materials with increased lifetime in plasma discharge environment; (2) acceleration systems with increased efficiency; (3) innovative designs; and (4) coupled systems modeling.

8. Waste management and environmental remediation focuses on the use of innovative nuclear instruments or nuclear techniques to monitor or remediate radioactive or mixed hazardous wastes in soil or water as part of a global effort to improve the environmental quality of a particular federal or commercial site, and includes, but is not limited to, development of active nuclear interrogation techniques for monitoring low-level environmental contaminant *in situ*.

9. Heavy Water Reactor Safety Research for Savannah River Site focuses on innovative concepts to enhance performance and safety of DOE's existing and planned low temperature, low pressure production reactors at the Savannah River Site. Research areas of special interest are severe accident phenomena, thermal-hydraulics, reactor neutronics and human performance.

a. Severe accident phenomena research includes understanding of reactor behavior during and following postulated accidents which go beyond fuel melting, including research in aluminum, fuel melt morphology, interaction of molten uranium/aluminum with water and structural materials, related fission product chemistry, aerosol behavior of lithium and aluminum species, filter design for capture of aerosols and fission products in high volumetric flow condition, and mathematical models of the above processes.

b. Thermal hydraulic research includes improved understanding of the analysis capabilities of the RELAPS and TRAC codes for SRS reactors, including the validation of constitute relations for two-phase thermal hydraulics at near-atmospheric pressure conditions in annular geometry. The research program also covers development of detailed two-phase flow codes for simulation of the thermal-hydraulic precursors to fuel damage. This code development work is supported by experimental investigations of the thermal-hydraulic precursors (heated air-water-steam flows).

c. Reactor neutronics research includes improved numerical methods and modeling strategies in reactor analysis, including resonance calculations, lattice cell calculations, and full reactor static and transient calculations.

d. Human performance research includes improved understanding of operator response during routine and accident situations, including human factors, advanced operator aides and control room design, and the application of robotics in emergency response to improve human performance.

It is anticipated that approximately $2M will be available for grant awards during Fiscal Year 1992, and that awards will range from $50K to $250K per year, with a typical requested project duration of two to three years. However, note that future fiscal year awards will be subject to the availability of appropriated funds. General information about development and submission of applications, eligibility, limitations, evaluations and selection processes, and other policies and procedures, are contained in the OER Special Research Grant Application Kit and Guide available from the U.S. Department of Energy, Office of Energy Research, Office of University and Science Education Programs, ER–80, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–8947. It is specifically requested that the "Detailed Description of Research Work Proposed" section of the application not exceed fifteen double-spaced pages. An abstract of the proposed work consisting of no more than 200 words should be included, along with a description of the scope of the work and an enumeration of the tasks to be performed.

(The Catalog of Federal Domestic Assistance Number for this program is 81.049)

Issued in Washington, DC, on February 26, 1992.

D.D. Mayhew,

Deputy Director for Management, Office of Energy Research.

BILLING CODE 6450–01–M

Office of Fossil Energy

[Docket No. EA–76–B]

Application To Amend Electricity Export Authorization; New England Power Pool

AGENCY: Department of Energy, Office of Fossil Energy.

ACTION: Notice of application.

SUMMARY: The New England Power Pool has applied for a temporary amendment to its existing electricity export authorization in order to test existing electric transmission facilities at the U.S.-Canadian border.

DATES: Comments, protests or requests to intervene must be submitted on or before March 20, 1992.

ADDRESSES: Comments, protests or requests to intervene should be addressed as follows: Office of Coal & Electricity (FE–52), Office of Fuels Programs, Office of Fossil Energy, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

Docket Number EA–76–B should appear clearly on the envelope and on the document contained therein.

FOR FURTHER INFORMATION CONTACT: Xavier Puslowski, (Program Office) 202–586–4708 or Lise Howe (Program Attorney) 202–586–2900.

SUPPLEMENTARY INFORMATION: The construction, connection, operation, and maintenance of facilities at the international border of the United States for the transmission of electrical energy is prohibited in the absence of a Presidential permit pursuant to Executive Order No. 12038. Exports of electricity from the United States to a foreign country also are regulated and require authorization under section 202(e) of the Federal Power Act.

On February 27, 1992, the New England Power Pool (NEPOOL) applied to the Department of Energy (DOE) for a temporary amendment to its existing electricity export authorization in order to test existing High Voltage Direct Current (HVDC) transmission facilities at export levels of up to 2,000 MW. The construction and operation of these facilities were authorized by Presidential Permit PP–76, issued on April 5, 1984, and a subsequent amendment to that permit issued on September 16, 1988.

Under the terms of the existing electricity export authorization issued on August 9, 1985, in Docket No. PP–76EA, NEPOOL is authorized to export up to 725 megawatts (MW) to Hydro-Quebec on a continuous basis. NEPOOL is requesting a temporary amendment to the existing export authorization in order to test the HVDC facilities at export levels up to 2,000 MW for the period March 15 through June 30, 1992. Testing is expected to require exports at levels up to 1,000 MW for approximately 30 hours and exports at levels up to 2,000 MW for approximately 4 hours. Retesting may be required and would be expected to involve up to 7 additional hours at levels up to 1,000 MW and up to 1 additional hour at levels up to 2,000 MW.

PROCEDURAL MATTERS: Any person desiring to be heard or to protest this application should file a petition to intervene or protest at the address provided above in accordance with §§ 385.211 or 385.214 of the Rules of Practice and Procedures (18 CFR 385.211, 385.214).

Any such petitions and protests should be filed with the DOE on or before the date listed above. Additional copies of such petitions to intervene or protests also should be filed directly with: Mark E. Slade, Esquire, New England Electric System, 25 Research Drive, Westborough, MA 01582.

Pursuant to 18 CFR 385.211, protests and comments will be considered by the DOE in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene under 18 CFR 385.214. Section 385.214 requires that a petition to intervene must state, to the extent known, the position taken by the petitioner and the petitioner's interest in sufficient factual detail to demonstrate either that the petitioner has a right to participate because it is a State Commission; that it has or represents an interest which may be directly affected by the outcome of the proceeding, including any interest as a consumer, customer, competitor, or security holder of a party to the proceeding; or that the petitioner's participation is in the public interest.

A final decision will be made on this application after a determination is made by the DOE that the proposed action will not impair the reliability of the U.S. electric power supply system.

Before an authorization can be issued, the environmental impacts of the proposed DOE action (i.e., granting the authorization, with any conditions and limitations, or denying it) must be evaluated pursuant to the National Environmental Policy Act of 1969 (NEPA). The NEPA compliance process is a cooperative, non-adversarial process involving members of the public, state governments and the Federal government. The process affords all persons interested in or potentially affected by the environmental consequences of a proposed action an opportunity to present their views, which will be considered in the preparation of the environmental documentation for the proposed action. Intervening and becoming a party to this proceeding will not create any special status for the petitioner with regard to the NEPA process. Should a public proceeding be necessary in order to comply with NEPA, notice of such activities and information on how the public can participate in those activities will be published in the Federal Register, local newspapers, and public libraries and/or reading rooms in the vicinity of the electric transmission facilities.

Copies of this application will be made available, upon request, for public inspection and copying by the Department of Energy at the address provided above, from 9 a.m. to 4 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on March 3, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

[FR Doc. 92–5206 Filed 3–4–92; 8:45 am]

BILLING CODE 6450–01–M

[Docket No. FE–C&E–92–01PO]

Tucson Electric Power Co.; Amendment to Prohibition Order Granting an Extension in the Schedule of Conversion

AGENCY: Department of Energy; Office of Fossil Energy.

ACTION: Notice of amendment to prohibition order.

SUMMARY: The Office of Fossil Energy (OFE) of the Department of Energy gives notice that it has amended the final prohibition order issued July 15, 1981, to the Tucson Electric Power Company (TEP) by the former Economic Regulatory Administration (46 FR 37960, July 23, 1981). The order was granted under the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301 *et seq*). The amended order grants an extension in the schedule of conversion for TEP's Irvington Generating Station Units 1, 2, and 3 for a period of five years from the currently effective prohibition dates. This action is being taken as a result of changed circumstances regarding the financial feasibility of converting TEP's Irvington Units 1, 2, and 3 to coal as an energy source.

A copy of this amendment is available for inspection and copying in the Office of Fuels Programs Docket Room, room 3F–056. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC on February 28, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

[FR Doc. 92–5159 Filed 3–4–92; 8:45 am]

BILLING CODE 6450–01–M

[FE Docket No. 91-86-NG]

MASSPOWER; Order Granting Authorization to Import and Export Natural Gas, Including LNG, From and to Canada

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of an order granting authorization to import and export natural gas, including LNG, from and to Canada.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting MASSPOWER blanket authorization to import and export up to 20 billion cubic feet of natural gas, cinluding liquefied natural gas, from and to Canada over a two-year term beginning on the date of first delivery.

A copy of this order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, February 28, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[AMS-FRL-4111-9]

Regulation of Fuels and Fuel Additives: Standards for Reformulated Gasoline

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of application for extension of the reformulated gasoline program to New York.

SUMMARY: This notice publishes the application of the Governor of the State of New York to have the prohibition set forth in section 211(k)(5) of the Clean Air Act, as amended, (the Act) applied in that state. Under section 211(k)(6) the Administrator of EPA shall apply the prohibition against the sale of gasoline which has not been reformulated to be less polluting in an ozone nonattainment area upon the application of the governor of the state in which the nonattainment area is located.

DATES: The effective date of the prohibition described herein is January 1, 1995 (see the Supplementary Information section of today's notice for a discussion of the possible delay of this date).

ADDRESSES: Materials relevant to this Notice are contained in Public Docket No. A-91-02. This docket is located in room M-1500, Waterside Mall (ground floor), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. The docket may be inspected from 8:30 a.m. until 12 noon and from 1:30 p.m. until 3 p.m., Monday through Friday. A reasonable fee may be charged by EPA for copying docket materials.

FOR FURTHER INFORMATION CONTACT: Joanne I. Goldhand, U.S. EPA (SDSB-12), Motor Vehicle Emission Laboratory, 2565 Plymouth Road, Ann Arbor, MI 48105. Telephone: (313) 668-4504.

SUPPLEMENTARY INFORMATION:

I. Background

As part of the Clean Air Act Amendments of 1990, Congress added a new subsection (k) to section 211 of the Clean Air Act. Subsection (k) prohibits the sale of gasoline that EPA has not certified as reformulated ("conventional gasoline") in the nine worst ozone nonattainment areas beginning January 1, 1995. To be certified as reformulated a gasoline must comply with the following formula requirements: Oxygen content of at least 2.0 percent by weight; benzene content of no more than 1.0 percent by volume; and no heavy metals (with a possible waiver for metals other than lead). The gasoline must also achieve toxic and volatile organic compound emissions reductions equal to or exceeding the more stringent of a specified formula fuel or a performance standard.

Section 211(k)(10)(D) defines the areas covered by the reformulated gasoline program as the nine ozone nonattainment areas having a 1980 population in excess of 250,000 and having the highest ozone design values during the period 1987 through 1989. Applying those criteria, EPA has determined the nine covered areas to be the metropolitan areas including Los Angeles, Houston, New York City, Baltimore, Chicago, San Diego, Philadelphia, Hartford, and Milwaukee. Under section 211(k)(10)(D) any area reclassified as a severe ozone nonattainment area under section 181(b) is also to be included in the reformulated gasoline program.

Any other ozone nonattainment area may be included in the program at the request of the governor of the state in which the area is located. Section 211(k)(6)(A) provides that upon the application of a governor, EPA shall apply the prohibition against selling conventional gasoline in any area in the governor's state which has been classified under subpart 2 of part D of title I of the Act as a Marginal, Moderate, Serious or Severe ozone nonattainment area.[1] Subparagraph 211(k)(6)(A) further provides that EPA is to apply the prohibition as of the date he "deems appropriate, not later than January 1, 1995, or 1 year after such application is received, whichever is later." In some cases the effective date may be extended for such an area as provided in section 211(k)(6)(B) based on a determination by EPA that there is "insufficient domestic capacity to produce" reformulated gasoline. Finally, EPA is to publish a governor's application in the **Federal Register**. EPA has received and published applications from the governors of Connecticut, Maine, Massachusetts, New Hampshire, Pennsylvania, Rhode Island, and Virginia.

EPA has used the regulatory negotiation process in developing the requirements for reformulated gasoline. A notice of proposed rulemaking was published July 9, 1991 (56 FR 31176). Since that time the regulatory negotiation advisory committee reached consensus on an outline for the reformulated gasoline program. A supplemental notice of proposed rulemaking will be published shortly which describes the consensus of the advisory committee. This supplemental notice will also describe the certification program for reformulated gasoline, the credits program for exceeding certain requirements and the enforcement program, among other elements.

II. The Governor's Requests

EPA received an application from the Hon. Mario M. Cuomo, Governor of New York, for the nonattainment areas in that state to be included in the reformulated gasoline program. His application is set out in full below.

[State of New York Letterhead]

October 28, 1991.

Dear Administrator Reilly:

Pursuant to the requirements of Public Law 101-549, the Clean Air Act Amendments of 1990, section 219(k)(6)(A), I am writing to request that you apply the requirements of Section 219(k)(5) (A) & (B) to all ozone nonattainment areas in New York State.

[1] EPA recently promulgated such designations pursuant to section 107(d)(4) of the Act (56 FR 56694; November 6, 1991).

The use of reformulated gasoline throughout all nonattainment areas of the State is appropriate and necessary in view of the total number of nonattainment areas and the State's inclusion in the Northeast Ozone Transport Region. The use of cleaner fuels is an extremely cost-effective strategy that will assist us in meeting out air quality goals.

In addition to its viability as a control strategy within New York State's nonattainment areas, I am instructing my designees to the Ozone Transport Commission to pursue adoption of this measure, along with other mobile source control strategies, throughout the Ozone Transport Region.

Sincerely,

Mario M. Cuomo,

Governor.

The Honorable William Reilly,
Administrator, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

III. Action

Pursuant to the Governor's letter and the provisions of section 211(k)(6), the prohibitions of subsection 211(k)(5) will be applied to the nonattainment areas in New York classified Marginal or worse beginning January 1, 1995 (unless delayed, as provided above). These include the Albany-Schenectady-Troy area, the Buffalo-Niagara Falls area, the Essex County area, the Jefferson County area, the New York-Northern New Jersey-Long Island area, and the Poughkeepsie area (see 56 FR 56694, 56805 (November 6, 1991)). The application of the prohibitions to these areas cannot take effect any earlier than January 1, 1995 under section 211(k)(5) and cannot take effect any later than January 1, 1995, under section 211(k)(6)(A), unless the Administrator extends the effective date by rule under section 211(k)(6)(B).

Dated: February 12, 1992.

William K. Reilly,

Administrator.

[OPPTS-51789; FRL 4052-2]

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). This notice announces receipt of 19 such PMNs and provides a summary of each.

DATES: Close of review periods:

P 92-469, April 28, 1992.

BILLING CODE 6560–50–F

[OPTS–59304; FRL–4051–4]

Certain Chemicals; Approval of a Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of an application for test marketing exemption (TME) under section 5(h)(1) of the Toxic Substances Control Act (TSCA) and 40 CFR 720.38. EPA has designated this application as TME–92–2. The test marketing conditions are described below.

EFFECTIVE DATES: February 26, 1992. Written comments will be received until March 20, 1992.

ADDRESSES: Written comments, identified by the document control number "[OPPTS–59304]" and the specific TME number "[TME–92–2]" should be sent to: Document Control Officer (TS–790), Confidential Data Branch, Information Management Division, Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E–201, 401 M St., SW., Washington, DC 20460, (202) 260–3532.

FOR FURTHER INFORMATION CONTACT: Paul Matthai, New Chemicals Branch, Chemical Control Division (TS–794), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E–611, 401 M St. SW., Washington, DC 20460, (202) 260–3385.

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use, and disposal of the substances for test marketing purposes will not present an unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present an unreasonable risk of injury to human health and the environment.

EPA hereby approves TME–92–2. EPA has determined that test marketing of the new chemical substance described below, under the conditions set out in the TME application, and for the time period and restrictions specified below, will not present an unreasonable risk of injury to health or the environment. Production volume, use, and the number of customers must not exceed that specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

Inadvertently, notice of receipt of the application was not published. Therefore, an opportunity to submit comments is being offered at this time. The complete nonconfidential document is available in the Public Reading Room NE G004 at the above address between 8 a.m. and 4 p.m., Monday through Friday, excluding legal holidays. EPA may modify or revoke the test marketing exemption if comments are received which cast significant doubt on its finding that the test marketing activities will not present an unreasonable risk of injury.

EPA hereby approves TME–92–2. EPA had determined that test marketing of the new chemical substance described below, under the conditions set out in the TME application, and for the time period and restrictions specified below, will not present an unreasonable risk of injury to health or the environment. Production volume, use, and the number of customers must not exceed that specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

The following additional restrictions apply to TME–92–2:

1. A bill of lading accompanying each shipment must state that the use of the substance is restricted to that approved in the TME.

2. During manufacturing, processing, and use of the substance at any site controlled by the Company, any person under the control of the Company, including employees and contractors, who may be dermally exposed to the substance shall use:

a. Gloves determined by the Company to be impervious to the substance under the conditions of exposure, including the duration of exposure. The Company shall make this determination either by testing the gloves under the conditions of exposure or by evaluating the specifications provided by the manufacturer of the gloves. Testing or evaluation of specifications shall include consideration of permeability, penetration, and potential chemical and mechanical degradation by the PMN substance and associated chemical substances;

b. Clothing which covers any other exposed areas of the arms, legs, and torso; and

c. Chemical safety goggles or equivalent eye protection.

3. The Company must affix a label to each container of the substance or formulations containing the substance. The label shall include, at a minimum, the following statement:

WARNING: Contact with skin may be harmful. Chemicals similar in structure to (insert appropriate name) have been found to cause severe irritation and corrosion to tissue. To protect yourself, you must wear protective gloves, clothing, and goggles.

4. The applicant shall maintain the following records until 5 years after the date they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA:

a. Records of the quantity of the TME substance produced and the date of manufacture.

b. Records of dates of the shipments to each customer and the quantities supplied in each shipment.

c. Copies of the labels affixed to containers of the substance or formulations containing the substance.

d. Copies of the bill of lading that accompanies each shipment of the substance.

e. Copies of any determination under paragraph 2.a. above that the protective gloves used by the Company are impervious to the substance.

T–92–2

Date of Receipt: January 13, 1992.
Close of Review Period: February 26, 1992. The extended comment period will close March 20, 1992.
Applicant: Stonhard, Inc.
Chemical: Adduct of Bisphenol F epoxy with two cycloaliphatic amines.
Use: Corrosion resistant cross–linked epoxy composite lining system.
Production Volume: 7,500 pounds (3410 kilograms).
Number of Customers: One.
Worker Exposure: During manufacturing, (approximately 4 workers), and during processing and use, (approximately 36 workers) are not expected to be exposed either dermally or through inhalation because of the severe irritation and corrosive nature of the TME substance.
Test Marketing Period: Six Months, commencing on first day of manufacture.
Risk Assessment: EPA identified concerns for severe irritation and corrosion to tissues based on data on similar compounds. However, during manufacturing, processing, and use, exposure to workers will be prevented by the use of protective gloves, clothing, and goggles. Therefore, the test market activities will not present an unreasonable risk of injury to health. EPA identified no significant environmental concerns for the test market substance. Therefore, the test market activities will not present an unreasonable risk of injury to the environment.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information come to its attention which casts significant doubt on its finding that the test marketing activities will not present an unreasonable risk of injury to health or the environment.

Dated: February 26, 1992.

John W. Melone,

Director, Chemical Control Division, Office of Pollution Prevention and Toxics.

BILLING CODE 6560–50–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

National Institute of Mental Health; Meetings

Pursuant to Public Law 92-463, notice is hereby given of the meetings of the advisory committees of the National Institute of Mental Health for April 1992.

The initial review groups will be performing review of applications for Federal assistance; therefore, portions of these meetings will be closed to the public as determined by the Administrator, ADAMHA, in accordance with 5 U.S.C. 552b(c)(6) and 5 U.S.C. app. 2 10(d).

Summaries of the meetings and rosters of committee members may be obtained from: Ms. Joanna L. Kieffer, NIMH Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration, Parklawn Building, room 9-105, 5600 Fishers Lane, Rockville, MD 20857 (Telephone: 301–443–4333).

Substantive program information may be obtained form the contacts whose names, room numbers, and telephone numbers are listed below.

Committee Name: Clinical Subcommittee, Mental Health Special Projects Review Committee.
Meeting Date: April 3, 1992.
Place: La Jolla Village Inn, 3299 Holiday Court, La Jolla, CA 92037.
Open: April 3, 8:30–9 a.m.
Closed: Otherwise.
Contact: Gwen Artis, room 9C–18, Parklawn Building, Telephone (301) 443–3944.

Committee Name: Clinical Subcommittee, Mental Health Special Projects Review Committee.
Meeting Date: April 24, 1992.
Place: Strathallan Hotel, 550 East Avenue, Rochester, NY, 14607.
Open: April 24, 8:30–9 a.m.
Closed: Otherwise.
Contact: Frances H. Smith, room 9C–02, Parklawn Building, Telephone (301) 443–4968.

Committee Name: Clinical Subcommittee, Mental Health Special Projects Review Committee.
Meeting Date: April 30, 1992.
Place: Clinic Center Hotel, 2065 East 96th Street, Cleveland, OH 44106.
Open: April 30, 8:30–9:30 a.m..
Closed: Otherwise.
Contact: Gwen Artis, room 9C–18, Parklawn Building, Telephone (301) 443–3944

Dated: February 28, 1992.

Peggy W. Cockrill,

Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

BILLING CODE 4160–20–M

Centers for Disease Control

[Announcement Number 211]

Cooperative Agreements for Preventive Health Services—Tuberculosis Prevention and Control/Elimination and Tuberculosis/Human Immunodeficiency Virus (HIV); Availability of Funds for Fiscal Year 1992

Introduction

The Centers for Disease Control (CDC), the Nation's prevention agency, announces the availability of Fiscal Year 1992 funds for Cooperative Agreements for Tuberculosis (TB) Prevention and Control/Elimination Programs and Human Immunodeficiency Virus (HIV)-Related TB Prevention Activities. These programs are related to TB elimination efforts and are directed to support:

A. Prevention and Control/Elimination programs including:

1. Continuation of currently supported programs directed primarily toward high incidence population groups and selected geographic areas; and

2. Initiation of expanded surveillance, prevention, and control strategies related to TB elimination including:

a. Demonstration of the effectiveness of implementing new and efficient TB screening and prevention endeavors in specific high-risk populations (e.g., prisoners, persons with HIV infection, racial and ethnic minority group members, homeless persons, foreign-born persons, and other high-risk groups),

b. Demonstration of the cost effectiveness of strategies such as providing transportation, food, or other incentives and enablers as an adjunct to the use of outreach workers for directly-observed therapy to ensure that patients adhere to and complete prescribed therapy regimens,

c. Deployment of additional outreach workers representative of high incidence population groups primarily for expanded directly-observed therapy,

d. Development of technical expertise (e.g., through training) in planning, promoting, and carrying out TB elimination strategies,

e. Screening and preventive therapy demonstration projects in 2–3 areas designed to address the serious problem of TB in the inner city in racial and ethnic minority populations, particularly those settling from other parts of the world.

B. HIV-Related TB Epidemiologic Studies to assess the impact of HIV infection and acquired immunodeficiency syndrome (AIDS) on TB; and

C. HIV-Related TB Projects to demonstrate the programmatic effectiveness, safety, and acceptability of preventive therapy in preventing clinical TB among injecting drug users (IDUs), correction inmates, and members of other groups with a high prevalance of tuberculosis infection who are also at high risk for HIV infection who are enrolled in methadone treatment programs or other health care systems designed to provide long-term (at least 6 to 12 months) follow-up.

The Public Health Service (PHS) is committed to achieving the health promotion and diseaae prevention objectives of Healthy People 2000, a PHS-led national activity to reduce morbidity and mortality and improve the quality of life. This announcement is related to the priority areas of Infectious Diseases and HIV Infection. (For ordering a copy of Healthy People 2000, see the section **WHERE TO OBTAIN ADDITIONAL INFORMATION.**)

Authority

This program is authorized by the Public Health Service Act: Section 301(a) (42 U.S.C. 241(a)), as amended; and section 317 (42 U.S.C. 247b). Regulations governing programs for preventive health services are codified at 42 CFR part 51b. Subpart A contains general provisions relating to these programs.

Eligible Applicants

A. TB Prevention and Control/Elimination: Eligible applicants for competing continuation funding are the official public health agencies currently receiving support. Eligible applicants for new competing funding are the official public health agencies of state governments including the Virgin Islands, the Northern Mariana Islands, the Federated States of Micronesia, the Republic of the Marshall Islands, the Republic of Palau, and American Samoa.

B. HIV-Related TB Epidemiologic Studies: Eligible applicants for competing continuation funding are the official public health agencies of state and local governments currently receiving cooperative agreement funds for TB/HIV epidemiologic studies (New York City Department of Health, New Jersey State Health Department, and Florida Department of Health and Rehabilitative Services).

C. HIV-Related TB Prevention Projects: Eligible applicants for competing continuation funding are the official public health agencies of state and local governments currently receiving cooperative agreement funds for TB/HIV activities. Current recipients are located in areas that accounted for 77% of the TB cases reported in the United States during 1990 and 90% of the AIDS cases reported in 1990. Since limited funds are available, priority will be given to those areas that are demonstrating success in reaching program goals and objectives and are cost effectively placing large numbers of high-risk persons on preventive therapy.

Availability of Funds

A. Approximately $15,000,000 is available in Fiscal Year 1992 to fund up to 68 competing Prevention and Control/Elimination cooperative agreements. It is expected that awards will begin on or about April 1, 1992, for a 12-month budget period within a 5-year project period. Funding estimates are subject to change. Continuation awards within an approved project period are made on the basis of satisfactory performance and availability of funds.

1. Approximately $12,500,000 is available to fund up to 46 Prevention and Control/Elimination competing continuation awards for outreach activities necessary for effective prevention and control of TB in high incidence population groups and initiation of expanded TB elimination activities. Awards are expected to range from $50,000 to $1,000,000 with an average award of $260,000.

2. Approximately $1,500,000 is available to fund up to 22 new Prevention and Control/Elimination awards for initiation of TB elimination strategies. Awards are expected to range from $25,000 to $200,000.

3. Approximately $1,000,000 is available to fund up to 3 screening and preventive therapy demonstration projects designed to address the serious problem of TB in the inner city in racial and ethnic minority populations, particularly those settling from other parts of the world.

B. Approximately $400,000 is available to fund up to 3 HIV-related TB epidemiologic studies. It is expected that these awards will begin on or about April 1, 1992, for a 12-month budget period within a 1-year project period. Awards are expected to range from $75,000 to $200,000 with an average award of $130,000. These funds will be available for only 1 year.

C. Approximately $4,500,000 is available to fund up to 25 competing HIV-related TB projects to demonstrate the acceptability, safety, and programmatic effectiveness of isoniazid (INH) therapy among IDUs and other groups at risk for HIV-related TB. It is expected that these awards will begin on or about April 1, 1992, for a 12-month budget period within a 5-year project period. Awards are expected to range from $50,000 to $1,000,000 with an average award of $180,000.

Cooperative agreement funds may be used to support personnel and to purchase equipment, supplies, and services directly related to project activities. Under section 317 of the PHS Act, direct assistance ("in lieu of cash") may be requested. Funds may not be used to supplant state or local funds or for inpatient care.

Purpose

The purpose of these programs is to: (1) Strengthen and ensure TB surveillance and containment, particularly through employment of outreach workers, and support outreach activities necessary for field follow-up and directly-observed therapy in high incidence population groups and selected geographic areas, implement new and efficient TB screening and prevention activities in high-risk populations, demonstrate the effectiveness of incentives and enablers to ensure patient completion of therapy, and enhance technical expertise and plans for carrying out TB elimination strategies; (2) support epidemiologic studies to assess the impact of HIV infection and AIDS on TB; and (3) support projects to examine the programmatic effectiveness, safety, and acceptability of preventive therapy in preventing clinical TB among IDUs and members of other groups with a high prevalence of tuberculous infection who are also at risk for HIV infection and who are enrolled in methadone treatment programs or other health care systems designed to provide long-term (at least 6 to 12 months) follow-up.

Program Requirements

In conducting activities to achieve the purpose of the program, the recipient will be responsible for conducting activities under A. and CDC will be responsible for the activities under B.

A. Recipient Activities

1. Recipients of Funds for Prevention and Control/Elimination

Recipients should collaborate and enter into cooperative programs with other agencies related to the tuberculosis prevention, control, and elimination activities described in this application.

a. Require the reporting of TB cases, suspects, and significant laboratory results by health care providers and laboratories in both the public and private sectors; analyze reporting trends; implement updated public health record systems to monitor the current care status of patients, suspects, contacts, and infected persons at high risk for TB in the community.

b. Carry out detailed epidemiological analyses of trends in TB cases in order to identify and characterize population groups at highest risk for TB in the community.

c. Develop and implement cost-effective, medically and epidemiologically sound patient care practices, public health policies, laws, and regulations. A major policy component should be the implementation of recommended American Thoracic Society (ATS)/CDC treatment and prevention recommendations and Advisory Committee (Now Council) for Elimination of Tuberculosis (ACET) recommendations for elimination of TB.

d. Deploy outreach workers representative of the high incidence TB populations in the community for directly-observed therapy and follow-up of patients.

e. Provide directly-observed drug treatment to patients and use other strategies, e.g., incentives/enablers and individual provider accountability, to ensure completion of therapy for patients who will not or cannot self-administer recommended medications.

f. Provide diagnostic, treatment, and prevention services adapted to the characteristics of TB populations regardless of patients' ability to pay for services.

g. Implement efficient approaches to prevent TB in high-risk groups, e.g., inmates of correctional facilities, persons with HIV infection, racial and ethnic minority group members, foreign-born persons, and other high-risk groups.

h. Conduct evaluations and analyses of unique TB problems related to racial and ethnic minorities, foreign-born persons, HIV infection, and drug resistance.

i. Investigate and analyze TB outbreaks, TB deaths, TB in children, and recurrent TB cases to identify causes of past failures to prevent morbidity and mortality and to design more effective prevention and control actions for the future.

j. Monitor and evaluate the effectiveness of program activities to ensure that state, local, and national objectives are being achieved and that substantial progress is being made toward achieving the Healthy People 2000 objectives. Measures must be established to evaluate the achievement of each project objective and required semi-annual reports submitted to CDC.

k. Develop plans to establish a TB elimination advisory committee with membership including representatives from community groups at highest risk for TB or their health care providers.

2. Recipients of Funds for HIV-Related TB epidemiologic Studies

In cohort studies, determine the risk of developing TB among persons with evidence of both HIV and tuberculous infection according to the amount and type of preventive therapy taken. Applicants need to demonstrate completion of subject enrollment, data and specimen collection, analysis of available data, and the ability to adequately follow enrolled patients. In autopsy studies of IDUs, determine whether IDUs who are HIV positive are more likely to be culture positive for TB than HIV-negative IDUs. Applicants need to demonstrate satisfactory progress in subject enrollment, data and specimen collection, and analysis of available data.

3. Recipients of Funds for HIV-Related TB Prevention Projects

a. Arrange for on-site Mantoux tuberculin skin testing and recording of results in millimeters of induration for, (a) IDUs enrolled in drug treatment programs and (b) other individuals who are at high risk of having both tuberculous and HIV infection who are enrolled in health care programs which are designed to provide long-term (at least 6 to 12 months follow-up).

b. Provide pre-test counseling about the skin test and the need for follow-up and preventive therapy if the skin test is positive.

c. Routinely offer culturally competent and language specific pre- and post-test counseling and voluntary HIV antibody testing to all adults with TB. Persons with positive tuberculin skin test reactions should be routinely assessed for HIV risk factors and, if any of these are present, should be offered counseling and HIV antibody testing.

d. In collaboration with the HIV/AIDS prevention program, establish standards and implement procedures for the confidential notification of sex and needle sharing partners of persons with AIDS and HIV infection. The standards should emphasize: the role of the seropositive person in informing partners; training for seropositive persons in techniques for notifying partners; and, where appropriate, the assistance of health departments in the confidential notification of partners.

e. Ensure that clients with a 5mm or larger tuberculin skin test reaction are evaluated for clinical TB and, if disease

is present, initiate treatment according to current ATS/CDC guidelines. Persons with symptoms suggestive of TB will be referred for evaluation regardless of the skin test reaction.

f. Ensure that clients with a positive skin test and no clinical evidence of TB or medical contraindications are started on 6 to 12 months of uninterrupted daily or biweekly preventive INH therapy. This will include all HIV-seropositive persons with a 5mm or larger skin test reaction regardless of age and all HIV-seronegative (or HIV status unknown) with a 10mm or larger induration regardless of age. An aggressive "case management" approach must be employed to ensure therapy compliance. Monitor clients on preventive therapy at least monthly for compliance and signs and symptoms of possible adverse drug reactions.

g. Provide follow-up for clients who fail to comply with their preventive therapy regimens.

h. Develop a collaborative plan between state/local health department and drug treatment or other health programs to monitor preventive therapy services. The roles of each agency should be specifically defined and letters of support from the other participating health program(s) should be included. The plan should also specify how the confidentiality of patient records will be ensured and should include documentation which permits the use of reporting of the HIV antibody test results for the purpose described in this application.

i. Determine by HIV status the number of TB cases identified during preventive therapy. For patients who have received preventive therapy, determine the number of TB cases occurring during the 2-year period following preventive therapy.

B. Centers for Disease Control

1. Collaborate in the development and improvement of TB case reporting and program management record systems. Assist in the establishment of special surveillance systems and the investigation and analysis of special problems such as multidrug-resistant TB, TB in institutions, and TB in AIDS or HIV-infected populations.

2. Assist in improving program performance through on-site consultation and technical assistance and through provision of training courses, workshops, and materials.

3. Provide consultation and technical assistance in the planning and evaluation of program operations.

4. Provide TB and HIV-related TB medical, epidemiologic, and programmatic assistance.

5. Assist in developing and disseminating public health and medical policies and recommendations for the diagnosis, treatment, and prevention of TB (e.g., ATS/CDC statements and ACET recommendations).

Review and Evaluation Criteria

Each application will be reviewed and evaluated individually according to the following criteria. (Total 100 points)

A. TB Prevention and Control/ Elimination

1. Competing Continuation Applications

a. The extent of the TB problems and adequacy of information supporting the need for assistance. (40 points)

b. The extent to which objectives are specific, measurable, realistic, time-phased, and related to the applicant's plan and the national goal of TB elimination. (20 points)

c. The potential for successful implementation of the proposed methods to accomplish the stated objectives. (20 points)

d. The quality of the plan to evaluate implementation of the methods and assess progress toward achieving the stated objectives. (10 points)

e. The adequacy of progress in implementing methods and achieving objectives set forth in previous applications. (10 points)

2. New Competing Applications

a. The extent of the TB problems and the potential for successful implementation of proposed activities. (50 points)

b. The quality of the proposed plan to address the problems identified. (15 points)

c. The extent to which objectives are provided that are specific, realistic, measurable, cost effective, time-phased, and related to the purpose of this program and the applicant's proposed plan. (15 points)

d. The potential for successful implementation of proposed activities. (20 points)

Priority for funding will be given first to continuation of currently funded programs and second to the initiation of new programs which: meet the above criteria; are deemed feasible, innovative, and cost effective; and are most likely to expedite the elimination of TB.

B. HIV-Related TB Epidemiologic Studies

1. Progress in enrolling patients in cohort, cross-sectional, longitudinal, descriptive, or preventive therapy evaluation studies. (50 points)

2. The extent to which procedures specified in approved protocols have been successfully implemented. (50 points)

C. HIV-Related TB Prevention Projects

1. Progress in achieving program goals and objectives. (50 points)

2. The extent to which the applicant has demonstrated the ability to cost effectively place large numbers of high-risk persons on preventive therapy. (50 points)

Other Requirements

Recipients must comply with terms and conditions included in the document titled Content of HIV/AIDS-Related Written Materials, Pictorials, Audiovisuals, Questionnaires, Survey Instruments, and Educational Sessions in Centers for Disease Control (CDC) Assistance Programs. A copy is available in the application kit. Data collection initiated under these cooperative agreements has been approved by the Office of Management and Budget under OMB No. 0920–0026, "TB Statistics and Program Evaluation," Expiration date June 1993.

Executive Order 12372 Review

Applications are subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs. E.O. 12372 sets up a system for state and local government review of proposed federal assistance applications. Applicants (other than federally-recognized Indian Tribal governments) should contact their state Single Point of Contact (SPOCs) as early as possible to alert them to the prospective applications and receive any necessary instructions on the state process. For proposed projects serving more than one state, the applicant is advised to contact the SPOC for each affected state. A current list of SPOCs is included in the application kit. If SPOCs have any state process recommendations on applications submitted to CDC, they should forward them to Edwin L. Dixon, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE., room 300, Atlanta, GA 30305, no later than 60 days after the application deadline for new and competing awards. CDC does not guarantee to "accommodate or explain" state process recommendations it receives after that date.

Catalog of Federal Domestic Assistance

The Catalog of Federal Domestic Assistance Number is 93.116.

Application Submission and Deadline

The original and two copies of the application (PHS 5161–1) must be submitted to Edwin L. Dixon, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers, for Disease Control, 255 East Paces Ferry Road, N.E., room 300, Atlanta, GA 30305, on or before March 6, 1992.

A. Deadline: Applications shall be considered as meeting the deadline if they are either:

1. Received on or before the deadline date; or

2. Sent on or before the deadline date and received in time for submission to the independent review group. (Applicants should request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks shall not be acceptable proof of timely mailing.)

B. Late Applications: Applications which do not meet the criteria in A.1. or A.2. above are considered late applications. Late applications shall not be considered in the current competition for funding and will be returned to the applicant.

Where to Obtain Additional Information

Information on application procedures may be obtained from Lynn Mercer (Regions I-V) or Eddie Wilder (Regions VI–X), Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE., room 300, Atlanta, GA 30305, (404) 842–6814 (Regions I–V), or (404) 842-6805 (Regions VI–X).

Programmatic technical assistance may be obtained from John J. Seggerson and H. Mack Anders for the TB Prevention and Control/Elimination component and from Harry A. Stern for the two HIV-Related TB components, Division of Tuberculosis Elimination, National Center for Prevention Services, Centers for Disease Control, Atlanta, GA 30333, (404) 639–2508 or FTS 236–2508. Programmatic technical assistance is also available from the appropriate Department of Health and Human Services Regional Office.

Potential applicants may obtain a copy of Healthy People 2000 (Full Report: Stock No. 017–001–00474–0) or Healthy People 2000 (Summary Report: Stock No. 017–001–00473–1) through the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402–9325 (Telephone 202–783–3238).

Dated: February 28, 1992.

Robert L. Foster,

Acting Director, Office of Program Support Centers for Disease Control.

BILLING CODE 4160-18-M

Food and Drug Administration

[Docket No. 92N-0105]

American Therapeutics, Inc.: Proposal To Withdraw Approval of Abbreviated New Drug Application; Opportunity for a Hearing

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is proposing to withdraw approval of an abbreviated new drug application (ANDA) for Danazol Capsules, 200 milligrams (mg), held by American Therapeutics, Inc. (ATI), 73 Carlough Rd., Bohemia, NY 11716. The bases for the proposed withdrawal are (1) the application contains untrue statements of material fact; (2) the drug lacks substantial evidence of effectiveness; and (3) the drug is not shown to be safe.

DATES: Written requests for a hearing by April 6, 1992; data and information in support of the hearing request due by May 4, 1992.

ADDRESSES: A request for hearing, supporting data, and other comments should be identified with Docket No. 92N–0105 and submitted to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Jean Olson, Center for Drug Evaluation and Research (HFD–366), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–295–8041.

SUPPLEMENTARY INFORMATION: In October 1990, FDA began an assessment of the truthfulness and reliability of information contained in ANDA 71–569 for Danazol Capsules, 200 mg, held by ATI. This assessment revealed discrepancies between records retained by ATI and records submitted in the ANDA. These discrepancies indicate that the ANDA contains untrue statements of material fact. In addition, the discrepancies raise serious questions about the reliability and accuracy of the data, including the bioequivalency data, submitted to support approval of the application. Without reliable bioequivalence data, the drug lacks substantial evidence of effectiveness and has not been shown to be safe. Accordingly, the Director of the Center for Drug Evaluation and Research is proposing to withdraw approval of the application listed above.

Proposed Action and Notice of Opportunity for a Hearing

In accordance with the provisions of section 505 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 355), notice is hereby given to the holder of the ANDA listed above and to all other interested persons that the Director of the Center for Drug Evaluation and Research proposes to issue an order under section 505(e) of the act, withdrawing approval of the ANDA listed above, and all amendments and supplements thereto. The Director finds: (1) That the application contains untrue statements of material fact; (2) that the drug lacks substantial evidence of effectiveness; and (3) that the drug is not shown to be safe. In accordance with section 505 of the act and 21 CFR part 314, the applicant is hereby given an opportunity for a hearing to show why approval of the ANDA should not be withdrawn.

An applicant who decides to seek a hearing shall file: (1) on or before April 6, 1992, a written notice of appearance and request for hearing, and (2) on or before May 4, 1992, the data, information, and analyses relied on to demonstrate that there is a genuine and substantial issue of fact to justify a hearing. Any other interested person may also submit comments on this notice. A request for a hearing may not rest upon mere allegations or denials, but must present specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. The procedures and requirements governing this notice of opportunity for a hearing, a notice of appearance and request for a hearing, information and analyses to justify a material hearing, other comments, and a grant or denial of a hearing are contained in 21 CFR 314.200 (except that the limitations imposed by 21 CFR 314.200 (d)(1) and (d)(2) do not apply) and in 21 CFR part 12.

The failure of the applicant to file a timely written notice of appearance and request for hearing, as required by 21 CFR 314.200, constitutes an election by that person not to use the opportunity for a hearing concerning the action proposed, and a waiver of any contentions concerning the legal status of that person's drug product. Any new drug product marketed without an approved new drug application is subject to regulatory action at any time.

All submissions pursuant to this notice of opportunity for hearing are to be filed in four copies. Except for data and information prohibited from public disclosure under 21 U.S.C. 331(j) or 18 U.S.C. 1905, the submissions may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 505 (21 U.S.C. 355)) and under authority delegated to the Director of the Center for Drug Evaluation and Research (21 CFR 5.82).

Dated: February 27, 1992.

Gerald F. Meyer,

Deputy Director, Center for Drug Evaluation and Research.

[FR Doc. 92-5173 Filed 3-4-92; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 92N-0104]

Elkins-Sinn, Inc.; Withdrawal of Approval of 17 Abbreviated New Drug Applications

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of 17 abbreviated new drug applications (ANDA's) held by Elkins-Sinn, Inc., 2 Esterbrook Lane, Cherry Hill, NJ 08003-4099 (Elkins-Sinn). Elkins-Sinn requested that the agency withdraw approval of the applications.

EFFECTIVE DATE: April 6, 1992.

FOR FURTHER INFORMATION CONTACT: Lola E. Batson, Center for Drug Evaluation and Research (HFD-360), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301-295-8038.

SUPPLEMENTARY INFORMATION: Elkins-Sinn requested that the agency withdraw approval of the 17 ANDA's listed in the table in this document. Elkins-Sinn has also, by its request, waived its opportunity for a hearing.

ANDA No.	Drug
15-426	Meprobamate Tablets, 200 and 400 milligrams (mg).
15-499	Meclizine Hydrochloride Tablets, 25 mg.
60-059	Tetracycline Hydrochloride Capsules, 250 mg.
80-003	Nitrofurantoin Tablets, 50 and 100 mg.
80-491	Prednisone Tablets, 5 mg.
80-624	Hydrocortisone Tablets, 20 mg.
80-625	Prenisolone Tablets, 5 mg.
80-836	Cortisone Acetate Tablets, 25 mg.
80-938	Chlorpheniramine Maleate Tablets, 4 mg.
83-145	Reserpine Tablets, 0.1 and 0.25 mg.
83-366	Pentobarbital Sodium Capsules, 100 mg.
83-622	Quinidine Sulfate Tablets, 200 mg.
85-152	Hydrochlorothiazide Tablets, 25 and 50 mg.
85-336	Dimenhydrinate Tablets, 50 mg.
85-479	Vitamin A Palmitate Capsules, 50,000 Units.
85-701	Diphenhydramine Hydrochloride Capsules, 25 and 50 mg.
85-811	Prednisone Tablets, 20 mg.

Therefore, under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), and under authority delegated to the Director of the Center for Drug Evaluation and Research (21 CFR 5.82), approval of the ANDA's listed above, and all amendments and supplements thereto, is hereby withdrawn, effective April 6, 1992.

Dated: February 27, 1992.

Gerald F. Meyer,

Deputy Director, Center for Drug Evaluation and Research.

[Docket No. 92N-0103]

Par Pharmaceutical, Inc.; Withdrawal of Approval of 17 Abbreviated New Drug Applications

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of 17 abbreviated new drug applications (ANDA's) held by Par Pharmaceutical, Inc., One Ram Ridge Rd., Spring Valley, NY 10977 (Par). Par notified the agency in writing that the drug products were no longer marketed and requested that the approval of the applications be withdrawn.

EFFECTIVE DATE: April 6, 1992.

FOR FURTHER INFORMATION CONTACT: Lola E. Batson, Center for Drug Evaluation and Research (HFD-360), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301-295-8038.

SUPPLEMENTARY INFORMATION: Par, the holder of the ANDA's listed in the table in this document, has informed FDA that these drug products are no longer marketed and has requested that FDA withdraw approval of the applications. Par has also, by its request, waived its opportunity for a hearing.

ANDA No.	Drug
70-156	Doxylamine Succinate Tablets, 25 milligrams (mg).
71-328	Haloperidol Tablets, 20 mg.
71-598	Leucovorin Calcium Tablets, 25 mg.
71-600	Leucovorin Calcium Tablets, 5 mg.
72-077	Meclofenamate Sodium Capsules, 50 mg.
72-078	Meclofenamate Sodium Capsules, 100 mg.
87-094	Dipyridamole Tablets, 25 mg.
87-360	Dipyridamole Tablets, 75 mg.
87-650	Dipyridamole Tablets, 50 mg.
87-656	Hydroxyzine Pamoate Capsules, 25 mg.
87-657	Hydroxyzine Pamoate Capsules, 50 mg.
87-658	Hydroxyzine Pamoate Capsules, 100 mg.
89-126	Meprobamate with Aspirin Tablets, 200 mg/325 mg.
89-145	Hydroxyzine Pamoate Capsules, 25 mg.
89-146	Hydroxyzine Pamoate Capsules, 50 mg.
89-764	Thioridazine Hydrochloride Tablets, 150 mg.
89-765	Thioridazine Hydrochloride Tablets, 200 mg.

Therefore, under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) and under authority delegated to the Director of the Center for Drug Evaluation and Research (21 CFR 5.82), approval of the abbreviated new drug application listed above, and all supplements thereto, is hereby withdrawn, effective April 6, 1992.

Dated: February 27, 1992.

Gerald F. Meyer,

Deputy Director, Center for Drug Evaluation and Research.

BILLING CODE 4160-01-M

Health Resources and Services Administration

Advisory Council; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory body scheduled to meet during the month of March 1992:

Name: National Advisory Council on Health Professions Education

Date and Time: March 26-27, 1992, 8:30 a.m.

Place: Conference Room M, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

Open on March 26, 8:30 a.m. to 5 p.m.
Closed for remainder of meeting.

Purpose: The Council advises the Secretary with respect to the administration of programs of financial assistance for the health professions and makes recommendations based on its review of applications requesting such assistance. This also involves advice in the preparation of regulations with respect to policy matters.

Agenda: The open portion of the meeting will cover welcome and opening remarks, report of the Administrator on recent developments in the Agency; an update on developments and activities within the Bureau of Health Professions; a presentation on Public Health discipline; a progress report on activities of the Council on Graduate Medical Education; and a discussion of linkages between education and service.

The meeting will be closed on March 27 for the review of applications for Area Health Education Centers; Predoctoral Training in Family Medicine; Establishment of Department of Family Medicine; Physician Assistant; two-Year Programs; Podiatric Primary Care Residency Training; General Practice Dentistry Residencies; Graduate Programs in Health Administration and Health Career Opportunity Programs.

The closing is in accordance with the provisions set forth in section 552b(c)(6), title 5 U.S.C. Code, and the Determination by the Administrator, Health Resources and Services Administration, pursuant to Public Law 92-463.

Anyone requiring information regarding the subject Council should contact Ms. Wilma J. Johnson, Executive Secretary, National Advisory Council on Health Professions Education, Room 8C-26, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-6880.

Agenda Items are subject to change as priorities dictate.

Dated: March 2, 1992.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA.

[FR Doc. 92-5174 Filed 3-4-92; 8:45 am]

BILLING CODE 4160-05-M

Advisory Council; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory body scheduled to meet during the month of April 1992:

Name: Advisory Committee on Infant Mortality.

Date & Time: April 3, 1992, 9:30 a.m.-4 p.m.

Place: Conference Room 615F, Hubert H. Humphrey Bldg., 200 Independence Ave., SW., Washington, DC 20201

The meeting is open to the public.

Purpose: The Committee provides advice and recommendations to the Secretary on the following: Department programs which are directed at reducing infant mortality and improving the health status of pregnant women and infants; how best to coordinate the variety of Federal, State, local and private programs and efforts that are designed to deal with the health and social problems impacting on infant mortality; and the implementation of the Healthy Start Initiative and other recommendations of the Domestic Policy Council, and infant mortality objectives from Healthy People: 2000: National Health Promotion and Disease Prevention Objectives.

Agenda: During the first meeting of the Committee, the appointed members will be introduced. The Secretary will present his charge to the Committee followed by a review of the Department's infant mortality reduction activities and introduction to the Public Health Service Interagency Committee on Infant Mortality. There will also be a report on the Healthy Start Initiative as well as a discussion of Committee's approach, priorities, and plans for 1992.

Anyone requiring information regarding the Committee should contact Mr. Ronald Carlson, Executive Secretary, Advisory Committee on Infant Mortality, Health Resources and Services Administration, room 14-33, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-2460.

Persons interested in attending any portion of the meeting should contact Ms. Chisun Chu, Public Health Analyst, Office of the Interagency Committee on Infant Mortality, Health Resources and Services Administration, Telephone (301) 443-2204.

Agenda Items are subject to change as priorities dictate.

Dated: March 2, 1992.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA.

BILLING CODE 4160-15-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Salmon District Advisory Council; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting.

SUMMARY: The Salmon District Advisory Council will meet on Wednesday, April 8, 1992, at the new Junior High School building in Challis, Idaho. The meeting will convene at 10 a.m.

SUPPLEMENTARY INFORMATION: The meeting is held in accordance with Public Laws 92-463 and 94-579. The purpose for the meeting is to discuss the Endangered Species Act and its implications for BLM management of the public lands, the status of the Challis Resource Management Plan, and current Salmon District issues.

The meeting is open to the public. Interested persons may make oral statements to the council between 11 a.m. and 11:30 a.m. or file written statements to the Council's consideration. Anyone wishing to make an oral statement must notify the District Manager at the Salmon District Office by April 3, 1992.

Summary minutes to the meeting will be maintained in the District Office and will be available for public inspection and reproduction (during regular business hours) within 30 days following the meeting. Notification of oral statements and requests for summary minutes should be sent to Roy S. Jackson, District Manager, Salmon District BLM, Box 430, Salmon, Idaho 83467.

Dated: February 25, 1992.

Roy S. Jackson,

District Manager.

BILLING CODE 4310-GG-M

[CO-050-4212-14; COC-53609]

Realty Action; Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action, proposed noncompetitive sale of public lands in Clear Creek County, Colorado.

SUMMARY: The following described lands are being considered for disposal by direct sale under section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1713), at no less than the appraised fair market value of $30,350. The lands will not be offered for sale until at least 60 days after the date of this notice.

Sixth Principal Meridian

T.3S., R.73W.,
Section 36: Lots 5, 6, 7 and 8
Containing approximately 5.08 acres.

The lands described are hereby segregated from appropriation under the public land laws, including the mining laws, pending disposition of this action, or 270 days from the date of publication of this notice, whichever occurs first.

The lands will be offered for sale directly to John and Linda Mollard, Robert Ray, Duane and Vivian Parker and Dennis Wamsley; or to designated agents acting for these parties. The purpose of these actions is to resolve longstanding inadvertent occupancy trespasses. The patents, when issued, will contain certain reservations to the United States and will be subject to existing rights-of-way. Details of the

individual sales will be worked out between BLM and the affected parties.

DATES: The comment period ends on or before April 20, 1992.

ADDRESSES: District Manager, Canon City District Office, 3170 East Main Street, Canon City, Colorado 81212. Telephone (719) 275–0631. Comments will be evaluated by the District Manager, who may cancel or modify this realty action and issue a final determination.

FOR FURTHER INFORMATION CONTACT: Priscilla McLain at (303) 239–3719.

Stuart A. Parker,

Acting District Manager.

BILLING CODE 4310–JB–M

[MT–930–4214–10; SDM 80731]

Proposed Withdrawal and Opportunity of Public Meeting; South Dakota

AGENCY: Bureau of Land Management, Interior

ACTION: Notice

SUMMARY: The U.S. Department of Agriculture, Forest Service, has filed an application to withdraw approximately 2 acres of National Forest System land for protection of the old Spokane Mine and millsite in Custer County. This notice closes the land for up to 2 years from location and entry under the United States mining laws. The land will remain open to all other uses which may be made of National Forest System lands.

DATES: Comments and requests for a public meeting must be received by June 3, 1992.

ADDRESSES: Comments and meeting requests should be sent to the Montana State Director, BLM, P.O. Box 36800, Billings, Montana 59107.

FOR FURTHER INFORMATION CONTACT: Sandra Ward, BLM Montana State Office, 406–255–2949.

SUPPLEMENTARY INFORMATION: On February 7, 1992, the U.S. Department of Agriculture filed an application to withdraw the following described National Forest System land from location entry under the United States mining laws, subject to valid existing rights:

Black Hills Meridian

Black Hills National Forest

(A 2-acre parcel within the following described land)

T. 2 S., R. 6 E.,

Sec. 26, S½N½SW¼SW¼SW¼ and N½S½SW¼SW¼SW¼.

The area described contains approximately 2 acres in Custer County.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the Montana State Director, Bureau of Land Management.

Notice is hereby given that an opportunity for a public meeting is afforded in connection with the proposed withdrawal. All interested persons who desire a public meeting for the purpose of being heard on this proposed withdrawal must submit a written request to the State Director within 90 days from the date of publication of this notice. Upon determination by the State Director that a public meeting will be held, a notice of the time and place will be published date in the **Federal Register** at least 30 days before the schedule date of the meeting.

The application will be processed in accordance with the regulations set forth in 43 CFR part 2300.

For a period of 2 years from the date of publication of this notice in the **Federal Register**, the land will be segregated as specified above unless the application is denied or canceled or the withdrawal is approved prior to that date. The temporary uses which may be permitted during this segregative period are those within the statutory authorities pertinent to National Forest System lands and subject to discretionary approval.

Dated: February 26, 1992.

John A. Kwiatkowski,

Deputy State Director, Division of Lands and Renewable Resources.

BILLING CODE 4310–DN–M

Fish and Wildlife Service

Availability of a Draft Environmental Impact Statement on the Proposed Introduction of Pacific Salmonids into the Delaware River Watershed

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: This Notice advises the public and all interested parties that the Fish and Wildlife Service (FWS) has prepared a draft Environmental Impact Statement (EIS) on a proposal by the New Jersey Division of Fish, Game and Wildlife (NJFGW) to seek Federal funding for the introduction of anadromous salmonids into the Delaware River watershed. The draft EIS is available for public review, and comments and suggestions are requested. Proposed is the introduction of anadromous salmonids into a tributary of the Delaware River in New Jersey to determine the feasibility of a hatchery-supported fall/winter recreational fishing opportunity in New Jersey waters. Four alternatives were considered in the draft EIS, with the proposed action being the stocking of 300,000 chinook salmon smolts per year for five years with subsequent monitoring. Other alternatives evaluated include: Introduction of 50,000 coho salmon smolts per year for five years, introduction of 50,000 steelhead smolts per year for five years, and a no action alternative.

DATES: Written comments are requested on or before June 3, 1992. To provide all interested parties with an opportunity to comment on and request information about the draft EIS, two public meetings are planned. Because of the basin-wide interest in this proposed action, public meetings will be held in two different geographic areas: Upper Delaware River on April 23, 1992 at 7 p.m. at the Holiday Inn, Greenville Turnpike, Interstate 84 Exit 1, Port Jervis, New York; and lower Delaware River on April 24, 1992 at 7 p.m. at Mercer County Community College, Communications Building Room 110, 1200 Old Trenton Road, Trenton, New Jersey.

ADDRESSES: Comments should be addressed to Regional Director (Attention: Ronald J. Essig), U.S. Fish and Wildlife Service, One Gateway Center, suite 700, Newton Corner, Massachusetts 02158.

FOR FURTHER INFORMATION CONTACT: Ronald J. Essig, Fishery Biologist, Federal Aid Division, U.S. Fish and Wildlife Service, One Gateway Center, suite 700, Newton Corner, Massachusetts 02158, (617) 965–5100, extension 212.

Individuals wishing copies of the draft EIS should immediately contact the above contact person. Individuals who have previously expressed an interest in a copy will automatically receive a copy. Copies of the draft EIS have been sent to all agencies and organizations who participated in the scoping process. Copies will be available for examination at the FWS Northeast Regional Office in Newton Corner, Massachusetts; NJDFGW offices in Trenton and Lebanon, New Jersey; and county libraries along the Delaware River in Delaware, New Jersey, New York and Pennsylvania.

SUPPLEMENTARY INFORMATION: The U.S. Fish and Wildlife Service, with the New Jersey Division of Fish, Game and Wildlife, has prepared a draft Environmental Impact Statement (EIS) for the introduction of anadromous salmonids to a tributary of the Delaware River in New Jersey. This action is designed to determine the feasibility of a hatchery-supported fall/winter recreational fishing opportunity in New Jersey waters. The draft EIS describes the impacts of the proposed action and three other alternatives on the affected environmental, cultural and recreational resources. The draft EIS also addresses the feasibility of implementing an experimental introduction program based on experiences with other east coast anadromous salmonid programs.

The proposed action identified in the draft EIS consists of stocking 300,000 chinook salmon (*Onchorhynchus tschawytscha*) smolts per year from an acceptable source into the Musconetcong River, with subsequent monitoring. Rearing of chinook would occur at the Charles O. Hayford Fish Hatchery at Hackettstown, New Jersey, and FWS fish health guidelines would be followed. Other alternatives evaluated include: Introduction of 50,000 coho salmon (*O. kisutch*) smolts per year for five years, introduction of 50,000 steelhead (*O. mykiss*) smolts per year for five years, and a no action alternative. Alternatives considered but dismissed include: Atlantic salmon (*Salmo salar*) introduction, shellfish enhancement/introduction, and various freshwater, anadromous and marine finfish species.

Other Government agencies and several members of the general public contributed to the planning and evaluation of the proposal and to the preparation of this draft EIS. The Notice of Intent to prepare this draft EIS was published in the August 3, 1990 **Federal Register**. Scoping meetings were held in Trenton, New Jersey on September 4, 1990 and Port Jervis, New York on September 5, 1990. Public attendance was 32 at the Trenton meeting and 80 at the Port Jervis meeting.

All agencies and individuals are urged to provide comments and suggestions for improving this draft EIS as soon as possible. All comments received by the dates given above will be considered in preparation of the final EIS for this proposed action.

Dated: February 27, 1992.

Ronald E. Lambertson,

Regional Director.

BILLING CODE 4310–70–M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–320]

Certain Rotary Printing Apparatus Using Heated Ink Composition, Components Thereof, and Systems Containing Said Apparatus and Components; Issuance of Limited Exclusion Order

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has issued a limited exclusion order under 19 U.S.C. 1337(d) to prevent the unauthorized importation into the United States of rotary printing apparatus using heated ink composition made or sold by or on behalf of Dato Pack Europa, S.A. of Barcelona, Spain and its successors or assigns, affiliated persons or companies, parents, subsidiaries, or other related business entities, which are covered by claims 1, 2, 3, 4, or 6 of U.S. Letters Patent 4,559,872.

FOR FURTHER INFORMATION CONTACT: Wayne W. Herrington, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone 202–205–3092. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810.

ADDRESSES: Copies of the limited exclusion order, the Commission Opinion relating thereto, and all other nonconfidential documents on the record of the investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., room 112, Washington, DC 20436, telephone 202–205–2000.

SUPPLEMENTARY INFORMATION: On October 23, 1990, Markem Corporation (Markem) filed a complaint with the Commission alleging a violation of section 337 of the Tariff Act of 1930 in the importation and sale of certain rotary printing apparatus using heated ink composition covered by claims 1, 2, 3, 4, or 6 of U.S. Letters Patent 4,559,872, owned by Markem. On November 28, 1990, the Commission published notice of an investigation based on Markem's complaint. 55 FR 49437.

On August 28, 1991, the presiding administrative law judge (ALJ) issued her final initial determination (ID) finding a violation of section 337 in this investigation. The complainant and the respondents petitioned for review of the ID. On October 15, 1991, the Commission issued notice of its decision to review the ID in its entirety.

The Commission solicited written submissions from the parties to the investigation, other Federal agencies, and interested members of the public on the issues under review and on the questions of remedy, the public interest, and bonding. The Commission received submissions from all active parties.

After considering the submissions and examining the record developed during the investigation, the Commission determined that there was a violation of section 337, and that the appropriate remedy for the violation of section 337 was issuance of a limited exclusion order.

The Commission also determined that the public interest considerations listed in subsection (d) of section 337 do not preclude issuance of a limited exclusion order and that while the order is under review by the President pursuant to subsection (j) of section 337, the excluded articles will be entitled to enter the United States under a bond in the amount of 52 percent of the articles' entered value.

The authority for the aforesaid Commission determinations and the limited exclusion order is contained in section 337 of the Tariff Act of 1930, 19 U.S.C. 1337, and in §§ 210.53–.59 of the Commission's Interim Rules of Practice and Procedure.

By order of the Commission.

Kenneth R. Mason,

Secretary.

Issued: February 28, 1992.

[FR Doc. 92–5101 Filed 3–4–92; 8:45 am]

BILLING CODE 7020–02–M

INTERSTATE COMMERCE COMMISSION

[Docket No. AB–1 (Sub-No. 216X)]

Chicago and North Western Transportation Co.; Abandonment Exemption in McHenry County, IL

Decided: March 2, 1992.

Chicago and North Western Transportation Company (CNW) has filed a verified notice under 49 CFR part 1152 subpart F—Exempt Abandonments for an exemption to abandon a 1.2-mile line of railroad between milepost 56.0, near Crystal Lake, and milepost 57.2, at the centerline of State Highway 14, in McHenry County, IL.

CNW has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) any overhead traffic on the line can be rerouted over other lines; and (3) no formal complaint filed by a user of rail service on the line (or a State or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or with any U.S. District Court or has been decided in complainant's favor within the 2-year period. The appropriate State agency has been notified in writing at least 10 days before the filing of this notice.

The verified notice includes a request by McHenry County Conservation District (McHenry), a political subdivision of the State of Illinois, for a notice of interim trail use (NITU), as well as a statement by McHenry of its willingness to assume financial responsibility for the line. CNW indicates its willingness to negotiate with McHenry for interim trail use.

While a request for interim trail use need not be filed until 10 days after the date the notice of exemption is published in the **Federal Register** (49 CFR 1152.29(b)(2)), the provisions of 16 U.S.C. 1247(d) are applicable and all the criteria for imposing interim trail use/rail banking have been met. Accordingly, in light of CNW's willingness to enter into negotiations, a NITU will be issued under 49 CFR 1152.29. The parties may negotiate an agreement during the 180-day period prescribed below. If no agreement is reached within 180 days, CNW may fully abandon the line. See 49 CFR 1152.29(d)(1).

Any other political subdivision, state, or qualified private entity interested in acquiring or using the involved right-of-way for interim trail use/rail banking may file an appropriate request by March 16, 1992. CNW is directed to respond to all such requests. Use of the right-of-way for trail purposes is subject to restoration for railroad purposes.

As a condition to use of this exemption, any employee adversely affected by the abandonment shall be protected under Oregon Short Line R. Co.—Abandonment—Goshen, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on April 4, 1992 (unless stayed). Petitions to stay that do not involve environmental issues,[1] formal expressions of intent to file an offer of financial assistance under 49 CFR 1152.27(c)(2),[2] and trail use/rail banking statements under 49 CFR 1152.29 must be filed by March 16, 1992.[3] Petitions to reopen or requests for public use conditions under 49 CFR 1152.28 must be filed by March 25, 1992, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to CNW's representative: Charles H. Montange, 1400 16th St., NW., #301, Washington, DC 20036.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

CNW has filed an environmental report which addresses environmental or energy impacts, if any, from this abandonment.

The Section of Energy and Environment (SEE) will prepare an environmental assessment (EA). SEE will issue the EA by March 3, 1992. Interested persons may obtain a copy of the EA from SEE by writing to it (room 3219, Interstate Commerce Commission, Washington, DC 20423) or by calling Elaine Kaiser, Chief, SEE at (202) 927–6248. Comments on environmental and energy concerns must be filed within 15 days after the EA becomes available to the public.

Environmental, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

It is Ordered: 1. Subject to the conditions set forth above, CNW may discontinue service, cancel tariffs for this line on not less than 10 day's notice to the Commission, and salvage track and related material consistent with interim trail use/rail banking after the effective date of this notice of exemption and NITU. Tariff cancellations must refer to this notice of exemption and NITU by date and docket number.

2. If an interim trail use/rail banking agreement is reached, it must require the trail user to assume, for the term of the agreement, full responsibility for management of, any liability arising out of the transfer of use (if the user is immune from liability, it need only indemnify CNW against any potential liability), and the payment of any taxes that may be levied against the right-of-way.

3. Interim trail use/rail banking is subject to the future restoration of rail service.

4. If the user intends to terminate trail use, it must send the Commission a copy of this notice of exemption and NITU and request that it be vacated on a specified date.

5. If an agreement for interim trail use/rail banking is reached by the 180th day after publication of this notice, interim trail use may be implemented. If no agreement is reached by the 180th day, CNW may fully abandon the line.

6. Provided no formal expression of intent to file an offer of financial assistance has been received, this notice of exemption and NITU will be effective April 4, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[FR Doc. 92–5110 Filed 3–4–92; 8:45 am]

BILLING CODE 7035–01–M

[1] A stay will be routinely issued by the Commission in those proceedings where an informed decision on environmental issues (whether raised by a party or by the section of Energy and Environment in its independent investigation) cannot be made prior to the effective date of the notice of exemption. See Exemption of Out-of-Service Rail Lines, 5 I.C.C.2d 377 (1989). Any entity seeking a stay involving environmental concerns is encouraged to file its request as soon as possible in order to permit this Commission to review and act on the request before the effective date of this exemption.

[2] See Exempt. of Rail Abandonment—Offers of Finan. Assist., 4 I.C.C.2d 164 (1987).

[3] The Commission will accept a late-filed trail use statement as long as it retains jurisdiction to do so.

DEPARTMENT OF JUSTICE

Extension of Comment Period for Consent Order Pursuant to the Comprehensive Environmental Compensation and Liability Act of 1980

On February 12, 1992, at 57 FR 5172, the Department of Justice published a notice that a proposed consent decree in *United States of America* v. *Kerr-McGee Chemical Corp.*, Civil Action No. 91–C–1396, had been lodged with the United States District Court for the Eastern District of Wisconsin, on December 30, 1991. The proposed consent decree concerns the cleanup of a hazardous waste site in Milwaukee, Wisconsin, by the Defendant.

The Department of Justice has received comments requesting an extension of the thirty day comment period to permit interested parties additional time to review the consent decree and prepare comments. The Department of Justice will extend the comment period for an additional 14-day period, until March 31, 1992. Persons wishing to submit comments should follow the procedures set out in the Notice of Lodging on February 12, 1992, at 57 FR 5172.

John C. Cruden,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

[FR Doc. 92–5122 Filed 3–4–92; 8:45 am]

BILLING CODE 4410–01–M

NATIONAL SCIENCE FOUNDATION

Permit Applications Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of permit applications received under the Antarctic Conservation Act of 1978, Public Law 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act of 1978 at title 45, part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to these permit applications by April 6, 1992. Permit applications may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, room 627, Division of Polar Programs, National Science Foundation, Washington, DC 20550.

FOR FURTHER INFORMATION CONTACT: Charles E. Myers at the above address or (202) 357–7817.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95–541), has developed regulations that implement the "Agreed Measures for the Conservation of Antarctic Fauna and Flora" for all United States citizens. The Agreed Measures, developed by the Antarctic Conservative Parties, recommended establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas as requiring special protection. The regulations established such a permit system to designate Specially Protected Areas and Sites of Special Scientific Interest.

1. *Applicant:* Warren M. Zapol, M.D., Department of Anesthesia, Massachusetts General Hospital, Boston, MA 02114.

Activity for Which Permit Requested: Taking. The applicant is conducting research on the diving physiology of Weddell Seals. Up to 15 sub-adult Weddell Seals will undergo monitoring, anesthesia, arterial and venous catheterization, ultra sonography, aortic catheter and laser myoglobin spectophotometer probe placement. Up to 20 female Weddell Seals will undergo EKG lead placement and be released with microprocessor monitors.

Location: McMurdo Station, Antarctica and surrounding region.

Dates: August 1992–December 1993.

2. *Applicant:* E. Imre Friedmann, Department of Biological Science B–142, Florida State University, Tallahassee, FL 32306–2043.

Activity for Which Permit Requested: Enter Sites of Special Scientific Interest. The applicant requests permission to enter sites of special scientific interest to conduct research on environmental gradients in the McMurdo Dry Valleys. Solar-powered data loggers will be installed. Rock samples will be collected for laboratory work.

Location: Linnaeus Terrace (Site of Special Scientific Interest), Battleship Promontory (Site of Special Scientific Interest), (access to both locations by helicopter).

Dates: January 1993–March 1995.

3. *Applicant:* J.W. Testa and M.A. Castellini, Institute of Marine Science, School of Fisheries and Ocean Sciences, University of Alaska, Fairbanks, AK 99775–1080.

Activity for Which Permit Requested: Taking, Import into U.S.A. (blood samples). The applicant requests permission to take Weddell seals for a study of physiology and population dynamics. Other species may be encountered, and permission is requested to approach and observe, capture and release, and obtain blood samples. The species to be taken are:

Species	Number
Weddell Seals	1500 (capture, tag, release).
Ross Seals	50 (capture, tag, release).
Crabeater Seals	50 (capture, tag, release).
Leopard Seals	50 (capture, tag, release).
Kerguelen Fur Seals	50 (capture, tag, release).
Elephant Seals	50 (capture, tag, release).

Location: Ross Sea, Antarctica.

Date: October 1992–June 1995

Charles E. Myers,

Permit Office, Division of Polar Programs.

BILLING CODE 7555–01–M

Advisory Panel for Archaeometry and Systematic Anthropological Collections; Meeting

The National Science Foundation announces the following meeting:

Name: Advisory Panel for Archaeometry and Systematic Anthropological Collections.

Date and Time: March 23, 1992 9 a.m.–5 p.m.

Place: National Science Foundation, 1800 G Street, NW., room 540–B, Washington, DC 20550.

Type of Meeting: Closed.

Contact Person: Dr. John E. Yellen, Program Director for Anthropology, room 320, National Science Foundation, Washington, DC 20550, Telephone (202) 357–7804.

Purpose of Meeting: To provide advice and recommendations concerning support for research in Systematic Anthropological Collections.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions 4 and 6 of the Government in the Sunshine Act.

Dated: March 2, 1992.
M. Rebecca Winkler,
Committee Management Officer.

BILLING CODE 7555-01-M

Special Emphasis Panel in Astronomical Sciences; Meeting

In accordance with the Federal Advisory Committee Act, Public Law 92-463, as amended, the National Science Foundation announces the following meeting:

Name: Special Emphasis Panel in Astronomical Sciences.

Date & Time: March 26, 1992—1 p.m.-6 p.m.; March 27, 1992—8:30 a.m.-5 p.m.

Place: National Science Foundation, room 536.

Type of Meeting: Closed.

Contact Person: Dr. Penny D. Sackett, Program Director, Education, Human Resources, and Special Programs, Division of Astronomical Sciences, room 615, National Science Foundation, Washington, DC 20550 (202/357-7304).

Purpose of Meeting: To provide the primary disciplinary review of nominations in astronomy to the National Science Foundation's Young Investigator (NYI) Program for FY 1992.

Agenda: Thursday and Friday, March 26 and 27, 1992—The panel will read, review, discuss, and evaluate the NYI astronomy nominations and supporting documentation. After full discussion of each nomination, the panel will prepare its recommendations to the Division of Astronomical Sciences for further consideration of each NYI nomination in astronomy.

Reason for Closing: The nomination being reviewed includes information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the nominations. These matters are within exemptions (4) and (6) of the Government in the Sunshine Act.

Dated: March 2, 1992.
M. Rebecca Winkler,
Committee Management Officer.

Special Emphasis Panel in Cellular Biosciences; Meeting

Name: Special Emphasis Panel in Cellular Biosciences.

Date & Time: March 26-27, 1992, 8:30 a.m. to 5 p.m.

Place: Oxford Room, Ramada Inn Central, 1430 Rhode Island Ave, NW., Washington, DC 20005, (202) 462-7777.

Type of Meeting: Closed.

Contact Person: Dr. Thomas Brady, Program Director, Developmental Biology, room 321, National Science Foundation, Washington, DC 20550.

Purpose of Meeting: To provide advice and recommendations concerning support for N.S.F. Young Investigator applicants for the Division of IBN.

Agenda: Closed—To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data; such as salaries and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of U.S.C. 552b(c), Government in the Sunshine Act.

Dated: March 2, 1992.
M. Rebecca Winkler,
Committee Management Officer.

Special Emphasis Panel in Design and Manufacturing Systems; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting:

Name: Special Emphasis Panel in Design and Manufacturing Systems.

Date and Time: March 26, 1992, 8:30 a.m. to 5 p.m.

Place: Room 1133, National Science Foundation, 1800 G Street, NW., Washington, DC 20550.

Type of Meeting: Closed.

Contact Person: Dr. Suren B. Rao, Program Director, Manufacturing Machines and Equipment Program, or Dr. Bruce M. Kramer, Program Director, Materials Processing and Manufacturing Program, 1800 G St., NW., room 1128, Washington, DC 20550. Telephone: (202) 357-7676.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate Engineering Research Equipment Grant (REG) proposals submitted to the Manufacturing Processes and Equipment Program.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act.

Dated: March 2, 1992.

Special Emphasis Panel in Design and Manufacturing Systems; Notice of Meetings

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation (NSF) announces the following three meetings:

Name: Special Emphasis Panel in Design and Manufacturing Systems

Date & Time: March 24, 1992; 8:30 a.m. to 4 p.m.

Place: NSF, rm. 1243, 1800 G St., NW.

Contact: Dr. Bruce M. Kramer, Program Director, 202-357-7676.

Date & Time: April 20, 1992; 8:30 a.m. to 5 p.m.

Place: NSF, rm. 500-B, 1110 Vermont Ave., NW.

Contact: Dr. F. Hank Grant, Program Director, 202-357-5167.

Date & Time: April 22, 1992; 8:30 a.m. to 5 p.m.

Place: NSF, rm. 500-D, 1110 Vermont Ave., NW.

Contact: Dr. F. Hank Grant, Program Director, 202-357-5167, National Science Foundation, 1800 G St., NW., Washington, DC 20550

Types of Meetings: Closed.

Purpose of Meetings: To provide advice and recommendations concerning support for research proposals submitted to NSF for financial support.

Agenda: To review and evaluate Materials Synthesis and Processing proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act.

Advisory Panel for Experimental Program to Stimulate Competitive Research (EPSCoR); Notice of Meeting

SUMMARY: In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting.

SUPPLEMENTARY INFORMATION: The purpose of the meetings is to review and evaluate and provide advice and recommendations as part of the selection process for awards. Because the proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with proposals, the meetings are closed to the public. These matters are within exemptions (4) and (6) of 5 U.S.C. 552(c), Government in the Sunshine Act.

Name: Advisory Panel for Experimental Program to Stimulate Competitive Research.

Dates: March 26-27, 1992.

Times: 3:30 p.m.-9 p.m., March 26, 1992, 8 a.m.-12 noon, March 27, 1992.

Place: New Hampshire Suites Hotel, 1121 New Hampshire Avenue NW., Washington, DC 20037.

Type of Meeting: Closed.

Agenda: Review and evaluate proposals from three states (Kansas, Nebraska, and West Virginia) submitted to the EPSCoR Advanced Development competition.

Contact: Dr. Richard J. Anderson, Acting Head, Office of Experimental Programs to Stimulate Competitive Research, National Science Foundation, room 1227, Washington, DC 20550 (202) 357-7560.

Dated: March 2, 1992.

Advisory Committee for Mechanical and Structural Systems Meeting;

The National Science Foundation announces the following meeting:

Name: Advisory Committee for Mechanical and Structural Systems.

Date & Time: March 25, 1992, 8:30 a.m. to 5 p.m.; March 26, 1992, 8:30 a.m. to 2 p.m.

Place: National Science Foundation, room 540, Washington, DC.

Type of Meeting: Open.

Contact Person: Ms. Hope Duckett, National Science Foundation, room 1108, Washington, DC 20550, Telephone (202) 357–9542.

Summary Minutes: May be obtained from contact person.

Purpose of Meeting: To advise the Division in the areas of Mechanical and Structural Systems.

Agenda:

Wednesday, March 25, 1992

8:30–12 noon—Review of Mechnical and Structural Systems Programs.

12:00–1:30 p.m.—Lunch.

1:30–5 p.m.—Working Panels Meetings.

Thursday, March 26, 1992

8:30–10 a.m.—Working Panels (cont'd)

10:00–10:30 a.m.—Break.

10:30–2 p.m.—Working Panel Reports, Draft Report Preparation, Plans for Next Meeting.

2 p.m.—Adjourn.

Dated: March 2, 1992.

M. Rebecca Winkler,

Committee Management Office.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

Draft Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a new guide planned for its Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the Commission's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and data needed by the staff in its review of applications for permits and licenses.

The draft guide is temporarily identified as DG–8011, "Radiation Dose to the Embryo/Fetus," and is intended for Division 8, "Occupational Health." This guide is being developed to provide guidance on calculating the radiation dose to the embryo/fetus.

This draft guide is being issued to involve the public in the early stages of the development of a regulatory position in this area. It has not received complete staff review and does not represent an official NRC staff position.

Public comments are being solicited on the guide. Comments should be accompanied by supporting data. Written comments may be submitted to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies of comments received may be examined at the NRC Public Document Room, 2120 L Street NW., Washington, DC. Comments will be most helpful if received by May 4, 1992.

Although a time limit is given for comments on this draft, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC. Requests for single copies of draft guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, attention: Distribution and Mail Services Section. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

Authority: 5 U.S.C. 552(a).

Dated at Rockville, Maryland, this 21st day of February 1992.

For the Nuclear Regulatory Commission.

Bill M. Morris,

Director, Division of Regulatory Applications, Office of Nuclear Regulatory Research.

Draft Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a new guide planned for its Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the Commission's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and data needed by the staff in its review of applications for permits and licenses.

The draft guide is temporarily identified as DG–8010, "Criteria for Monitoring and Methods for Summation of Internal and External Occupational Doses," and is intended for Division 8, "Occupational Health." This guide is being developed to provide criteria acceptable to the NRC staff that may be used by licensees to determine whether monitoring is needed. The guide also provides methods for calculating and summing external and internal radiation doses to demonstrate compliance with the dose limits in NRC regulations.

This draft guide is being issued to involve the public in the early stages of the development of a regulatory position in this area. It has not received complete staff review and does not represent an official NRC staff position.

Public comments are being solicited on the guide. Comments should be accompanied by supporting data. Written comments may be submitted to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies of comments received may be examined at the NRC Public Document Room, 2120 L Street NW., Washington, DC. Comments will be most helpful if received by May 4, 1992.

Although a time limit is given for comments on this draft, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC. BILLING CODE 7590–01–M

[Docket No. 50–461]

Illinois Power Co., Et al.; Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards; Consideration Determination, and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–62 issued to Illinois Power Company and Soyland Power Cooperative, Inc. (the licensee) for operation of the Clinton Power Station, Unit 1, located in DeWitt County, Illinois.

The proposed amendment would remove redundant wording regarding "Radiation Protection Manager" qualification requirements from Technical Specification (TS) 6.3.1. The proposed change would allow more TS flexibility by removing the site-specific organizational title of Director—Plant Radiation Protection from TS 6.3.1.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) The proposed change is administrative in nature as it only pertains to qualification requirements for unit staff personnel (in the area of radiation protection) and does not affect any plant equipment, system configurations, or operation. Furthermore, though the proposed change pertains to qualification requirements for unit staff personnel, the proposed change does not involve a technical change to these qualification requirements since the requirements of Regulatory Guide 1.8, September 1975 are contained in ANSI/ANS 3.1–1978. As a result, the proposed change cannot increase the probability or the consequences of any accident previously evaluated.

(2) As noted above, the proposed change only concerns the qualification requirements for a particular plant staff member(s) and does not involve any changes to plant equipment, system configurations or analyses. As a result, this proposed change does not introduce any new failure modes and cannot create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) The proposed change specifically and only addresses a textual change to the administrative control requirement concerning the qualification requirements of the radiation protection supervisor/manager position within the plant staff organization. The proposed change only eliminates a redundant requirement and would not alter the qualification requirements for this position since the requirements of Regulatory Guide 1.8, September 1975 are contained in ANSI/ANS 3.1–1978 (which is referenced in the Technical specifications). Therefore, the proposed change will not result in a significant reduction in any margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within thirty (30) days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to room P–223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By April 6, 1992, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and

Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to relay to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very frequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to John N. Hannon: petitioner's name and telephone number, date petition was mailed, plant name, and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Sheldon Zabel, Esq., Schiff, Hardin and Waite, 7200 Sears Tower, 233 Wacker Drive, Chicago, Illinois 60606, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board Panel that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated February 21, 1992, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727.

Dated at Rockville, Maryland, this 27th day of February 1992.

For the Nuclear Regulatory Commission.

Anthony T. Gody, Jr.,

Project Manager, Project Directorate III-3, Division of Reactor Projects III/IV/V, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

OFFICE OF PERSONNEL MANAGEMENT

Establishment of the Federal Labor Advisory Group

AGENCY: U.S. Office of Personnel Management.

ACTION: Notice.

ESTABLISHMENT OF AN ADVISORY GROUP: This notice is published in accordance with section 9(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463) and advises of the establishment of the Federal Labor Advisory Group. The Director of the Office of Personnel Management has determined that establishment of this Advisory Group is in the public interest.

DESIGNATION: Federal Labor Advisory Group.

PURPOSE: The Advisory Group will advise the Director, OPM, on the development of personnel policies that affect the working conditions of Federal employees represented by labor organizations. Members will include the presidents of labor organizations representing at least 50,000 Federal employees, and a representative of the Public Employees Department, AFL-CIO. The group will be chaired by the Director, OPM.

FOR FURTHER INFORMATION CONTACT: The Director, Office of Personnel Management, is the sponsor of this Advisory Group. For additional information, contact Allan D. Heuerman, Assistant Director for Labor Relations and Workforce Performance, Personnel Systems and Oversight Group, OPM, on (202) 606-2910.

Dated: February 27, 1992.

U.S. Office of Personnel Management.

Constance Berry Newman,

Director.

BILLING CODE 6325-01-M

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

AGENCY: Railroad Retirement Board.

ACTION: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the Railroad Retirement Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

Summary of Proposal(s)

(1) *Collection title*: Withholding Certificate for Railroad Retirement Monthly Annuity Payments.

(2) *Form(s) submitted*: RRB W-4P.

(3) *OMB Number*: 3320-0149.

(4) *Expiration date of current OMB clearance*: Three years from date of OMB approval.

(5) *Type of request*: Extension of the expiration date of a currently approved collection without any change in the substance or in the method of collection.

(6) *Frequency of response*: On occasion.

(7) *Respondents*: Individuals or households.

(8) *Estimated annual number of respondents*: 40,000.

(9) *Total annual responses*: 40,000.

(10) *Average time per response*: .000025 hours—See Justification (Item 13).

(11) *Total annual reporting hours*: 1.

(12) *Collection description*: Under Public Law 98-76, railroad retirement beneficiaries' Tier 2, dual vested and supplemental benefits are subject to income tax under private pension rules. Under Public Law 99-514, the non-social security equivalent benefit portion of Tier 1 is also taxable under private pension rules. The collection obtains the information needed by the Railroad Retirement Board to implement the income tax withholding provisions.

ADDITIONAL INFORMATION OR COMMENTS: Copies of the proposed forms and supporting documents can be obtained from Dennis Eagan, the agency clearance officer (312-751-4693). Comments regarding the information collection should be addressed to Ronald J. Hodapp, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611 and the OMB reviewer, Laura Oliven (202-395-7316), Office of Management and Budget, room 3002, New Executive Office Building, Washington, DC 20503.

Dennis Eagan,

Clearance Officer.

BILLING CODE 7905-01-M

SECURITIES AND EXCHANGE COMMISSION

Issuer Delisting; Application to Withdraw From Listing and Registration; (Magma Copper Co., Class B Common Stock, $0.01 Par Value; Series B Common Stock Warrants, $8.50 Exercise Price) File No. 1-10122

February 28, 1992.

Magma Copper Company ("Company") has filed an application with the Securities and Exchange Commission ("Commission"), pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and rule 12d2-2(d) promulgated thereunder, to withdraw the above specified securities from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing these securities from listing and registration include the following:

In addition to being listed on the Amex, the Company's common stock is listed on the New York Stock Exchange, Inc. ("NYSE"). The Company's stock commenced trading on the NYSE at the opening of business on February 10, 1992 and concurrently therewith such stock was suspended from trading on the Amex.

In making the decision to withdraw its common stock from listing on the Amex, the Company considered the direct and indirect costs and expenses attendant on maintaining the dual listing of its common stock on the NYSE and on the Amex. The Company does not believe that there is any advantage to the dual trading of its securities and believe that a dual listing of such securities would fragment the market for its common stock.

Any interested person may, on or before March 20, 1992, submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the exchanges and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Receipt of Revision to Approved Noise Compatibility Program and Request for Review; Phoenix Sky Harbor International Airport, Phoenix, AZ

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces that it is reviewing a proposed revision to the approved noise compatibility program that was submitted for Phoenix Sky Harbor Airport under the provisions of title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96-193) (hereinafter referred to as "the Act") and 14 CFR part 150 by the City of Phoenix, Arizona. The Noise Compatibility program was submitted subsequent to a determination by FAA that associated noise exposure maps submitted under 14 CFR part 150 for

Phoenix Sky Harbor Airport were in compliance with applicable requirements effective November 17, 1988. The Noise Compatibility Program for Phoenix Sky Harbor International Airport was approved by the FAA on April 2, 1990. The proposed revision to the approved noise compatibility program will be approved or disapproved on or before August 17, 1992.

EFFECTIVE DATE: The effective date of the start of FAA's review of the revision to the approved noise compatibility program is February 19, 1992. The public comment period ends April 19, 1992.

FOR FURTHER INFORMATION CONTACT: David B. Kessler, Airport Planner, Airports Division, AWP-611.2, Western-Pacific Region, Federal Aviation Administration, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009-2007, telephone: 310/297-1534. Comments on the proposed revision to the approved noise compatibility program should also be submitted to the above office.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA is reviewing a proposed revision to the approved noise compatibility program for Phoenix Sky Harbor International Airport which will be approved or disapproved on or before August 17, 1992. This notice also announces the availability of this revision for public review and comment.

An airport operator who has submitted noise exposure maps that are found by FAA to be in compliance with the requirements of Federal Aviation Regulations (FAR) part 150, promulgated pursuant to title I of the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes for the reduction of existing noncompatible uses and for the prevention of the introduction of additional noncompatible uses.

The FAA has formally received the revision to the approved noise compatibility program for Phoenix Sky Harbor International Airport, effective on February 19, 1992. It was requested that the FAA review this material and that the noise mitigation measures, to be implemented jointly by the airport and surrounding communities, be approved as a noise compatibility program under section 104(b) of the Act. On April 2, 1990, the FAA approved the noise compatibility program for Phoenix Sky Harbor International Airport. An announcement of FAA's approval of the noise compatibility program was published in the Federal Register on May 1, 1990. Preliminary review of the submitted material for the revision indicates that it conforms to the requirements for the submittal of noise compatibility programs, but that further review will be necessary prior to approval or disapproval of the program. The formal review period, limited by law to a maximum of 180 days, will be completed on or before August 17, 1992.

The FAA's detailed evaluation will be conducted under the provisions of 14 CFR part 150, § 150.33. The primary considerations in the evaluation process are whether the proposed measure may reduce the level of aviation safety, create an undue burden on interstate or foreign commerce, or be reasonably consistent with obtaining the goal of reducing existing noncompatible land uses and preventing the introduction of additional noncompatible land uses.

Interested persons are invited to comment on the proposed revision with specific reference to these factors. All comments, other than those properly addressed to local land use authorities, will be considered by the FAA to the extent practicable. Copies of the noise exposure maps, the FAA's evaluation of the maps, and the proposed revision to the approved noise compatibility program are available for examination at the following locations.

Federal Aviation Administration, 800 Independence Avenue, SW., room 617, Washington, DC 20591.

Federal Aviation Administration, Western-Pacific Region, Airports Division, room 3E24, 15000 Aviation Boulevard, Hawthorne, California 90261.

City of Phoenix, Aviation Department, 3400 Sky Harbor Boulevard, Phoenix, Arizona 85034-4420.

Questions may be directed to the individual named above under the heading, **FOR FURTHER INFORMATION CONTACT.**

Issued in Hawthorne, California, on February 19, 1992.

Herman C. Bliss,

Manager, Airports Division, AWP-600, Western-Pacific Region.

[FR Doc. 92-5116 Filed 3-4-92; 8:45 am]

BILLING CODE 4910-13-M

Air Traffic Procedures Advisory Committee Meeting

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Air Traffic Procedures Advisory Committee meeting.

SUMMARY: The FAA is issuing this notice to advise the public that a meeting of the Federal Aviation Administration Air Traffic Procedures Advisory Committee (ATPAC) will be held to review present air traffic control procedures and practices for standardization, clarification, and upgrading of terminology and procedures.

DATES: The meeting will be held from April 6, at 8:30 a.m., through April 9, 1992, at 5 p.m.

ADDRESSES: The meeting will be held at the FAA headquarters, 800 Independence Avenue, SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Theodore H. Davies, Executive Director, ATPAC, Air Traffic Rules and Procedures Service, 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267-3725.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. app. 2), notice is hereby given of a meeting of the ATPAC to be held from April 6, at 8:30 a.m., through April 9, 1992, at 5 p.m., in the MacCracken Room, FAA headquarters, 800 Independence Avenue, SW., Washington, DC. The agenda for this meeting is as follows: a continuation of the Committee's review of present air traffic control procedures and practices for standardization, clarification, and upgrading of terminology and procedures. It will also include:

1. Approval of minutes.
2. Discussion of agenda items.
3. Discussion of urgent priority items.
4. Report from Executive Director.
5. Old Business.
6. New Business.
7. Discussion and agreement of location and dates for subsequent meetings.

Attendance is open to the interested public but limited to the space available. With the approval of the Chairperson, members of the public may present oral statements at the meeting. Persons desiring to attend and persons desiring to present oral statements should notify the person listed above not later than April 3, 1992. The next quarterly meeting of the FAA ATPAC is planned to be held from August 3-7, 1992, in Seattle, WA. Any member of the public may present a written statement to the Committee at any time.

Issued in Washington, DC, on February 28, 1992.

Theodore H. Davies,

Executive Director, Air Traffic Procedures Advisory Committee.

[FR Doc. 92-5115 Filed 3-4-92; 8:45 am]

BILLING CODE 4910-13-M

Rotorcraft Subcommittee of the Aviation Rulemaking Advisory Committee; Meeting

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Meeting.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of the Federal Aviation Administration Rotorcraft Subcommittee of the Aviation Rulemaking Advisory Committee.

DATES: The meeting will take place on March 20, 1992, at 9 a.m. Arrange for oral presentations by March 11, 1992.

ADDRESSES: The meeting will be held in Conference Room No. 3, Las Vegas Hilton Hotel, 3000 Paradise Road, Las Vegas, NV 89109.

FOR FURTHER INFORMATION CONTACT: Ms. Marge Ross, Aircraft Certification Service (AIR-1), Independence Avenue, SW., Washington, DC 20591, telephone (202) 267-8235.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. app. II), notice is hereby given of a meeting of the Rotorcraft Subcommittee to be held on March 20, 1992, in Conference Room No. 3, Las Vegas, NV 89109. The agenda will include:

- Initial report from the External Load Working Group.
- Initial report for the Occupant Restraint Working Group.
- A briefing on the status of the FAA response to the Presidential moratorium on rulemaking.
- A briefing on the Rotorcraft Directorate's Advisory Circular Nos. 27-1 and 29-2, and the process for keeping them current.

Attendance is open to the interested public, but will be limited to the space available. The public must make arrangements by March 11, 1992, to present oral statements at the meeting. The public may present written statements to the committee at any time by providing 16 copies to the Executive Director, or by bringing the copies to him at the meeting. Arrangements may be made by contacting the person listed under the heading "**FOR FURTHER INFORMATION CONTACT.**"

Issued in Washington, DC, on March 2, 1992.

William J. Sullivan,

Executive Director, Rotorcraft Subcommittee, Aviation Rulemaking Advisory Committee.

BILLING CODE 4910-35-M

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: February 23, 1992.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

CORRECTION: This correction is submitted to make editorial changes to FR Doc. 92-4627 Filed 2-27-92; 8:45 am. A portion of the text in the "Special Request" paragraph was inadvertently removed by the Department. That portion is underlined.

SPECIAL REQUEST: The Department of the Treasury's Office of the Assistant Secretary for International Affairs is requesting approval from the Office of Management and Budget of this information collection by February 21, 1992 in order to receive responses from the states in a timely manner.

Departmental Offices

OMB Number: New.

Form Number: None.

Type of Review: New collection.

Title: Questionnaire on State Rules, Laws, and Measures That May Conflict with Proposal in North Atlantic Free Trade Agreement (NAFTA).

Description: We need to know state laws, rules, and other measures that may conflict with nondiscrimination obligations of the investment chapter of the draft NAFTA agreement. Knowing such measures in advance, and recording them in an annex to the agreement will enable the U.S. to exempt such measures from NAFTA obligations.

Respondents: State or local governments.

Estimated Number of Respondents: 50.

Estimated Burden Hours Per Response: 4 hours.

Frequency of Response: Other (One time).

Estimated Total Reporting Burden: 200 hours.

Clearance Officer: Lois K. Holland (202) 566-6579, Departmental Offices, Room 3171, Treasury Annex, 1500 Pennsylvania Avenue, NW. Washington, DC 20220.

OMB Reviewer: Milo Sunderhaulf (202) 395-6880, Office of Management and Budget, room 3001, New Executive Office Building, *Washington, DC 20503.*

Lois K. Holland,

Departmental Reports Management Officer.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:03 a.m. on Monday, March 2, 1992, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider the following:

Matters relating to the probable failure of certain insured banks.

Reports of the Office of the Inspector General:

Audit Report re:
Dallas Consolidated Office—FSLIC Resolution Fund, Receivership Operations, Cost Center—411 (Memo dated February 11, 1992)

Audit Report re:
American Federal Bank, F.S.B., Dallas, Texas, Assistance Agreement, Case Number SW-004 (Memo dated January 24, 1992)

Audit Report re:
Anchor Savings Bank, F.S.B., Northport, New York
and
Anchor Savings Bank, F.S.B., Wayne, New Jersey, Assistance Agreement, Case Number C-197 (Memo dated January 10, 1992)

Audit Report re:
First Heights Bank, F.S.A., Houston, Texas
and
Heights of Texas, F.S.B., Houston, Texas, Assistance Agreement, Case Number SW-013/014c (Memo dated February 13, 1992)

Audit Report re:
Heritage Federal Savings Bank, Taylor, Michigan, Assistance Agreement, Case Number C-293c (Memo dated February 13, 1992)

Audit Report re:
Local American Bank of Tulsa, F.S.B., Oklahoma City, Oklahoma, Assistance Agreement, Case Number SW-024 (Memo dated February 12, 1992)

Audit Report re:
Rocky Mountain Federal Savings Bank, Cheyenne, Wyoming, Assistance Agreement, Case Number C-370c (Memo dated February 10, 1992)

Audit Report re:
Report on the Limited Review of FSLIC Payments for the Interest Differential Between FHLB Advances and the Cost of Savings Deposits to Land of Lincoln Savings and Loan Association, Chicago, Illinois, Case Number C-112c (Memo dated February 12, 1992)

Audit Report re:
River Valley Savings Bank, F.S.B., Peoria, Illinois, Assistance Agreement, Case Number C-336c (Memo dated February 10, 1992)

Audit Report re:
River Valley Savings Bank, F.S.B., Peoria, Illinois, Assistance Agreement, Case Number C-337c (Memo dated February 10, 1992)

Audit Report re:
First Pacific Bank, Beverly Hills, California (4258) (Memo dated February 4, 1992)

Audit Report re:
New England Allbank for Savings, Gardner, Massachusetts (4300) (Memo dated January 31, 1992)

Audit Report re:
Inventory Closing Procedures, South Brunswick Consolidated Office (Memo dated January 31, 1992)

Audit Report re:

L. William Seidman Center Construction Costs (Memo dated January 27, 1992)

Audit Report re:
Audit of the FCIC Loose-Leaf Service (Memo dated January 31, 1992)

Recommendations concerning administrative enforcement proceedings.

Matters relating to the Corporation's corporate activities.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Director T. Timothy Ryan, Jr. (Office of Thrift Supervision), concurred in by Vice Chairman Andrew C. Hove, Jr., Director Stephen R. Steinbrink (Acting Comptroller of the Currency), and Chairman William Taylor, that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the pubic interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B) and (c)(10) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B) and (c)(10)).

The meeting was held in the Board Room of the FDIC Building located at 550—17th Street, N.W., Washington, DC.

Dated: March 3, 1992.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

BILLING CODE 6714-01-M

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 10 a.m. on Tuesday, March 10, 1992, to consider the following matters:

Summary Agenda

No substantial discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Reports of actions approved by the standing committees of the Corporation and by officers of the Corporation pursuant to authority delegated by the Board of Directors.

Memorandum and resolution re: Delegation of Authority to Issue a Subpoena or a Subpoena Duces Tecum.

Memorandum and resolution re: Delegations of Authority to the Resolution Trust Corporation's Division of FSLIC Operations.

Discussion Agenda

Memorandum and resolution re: Proposed amendments to Part 323 of the Corporation's rules and regulations, entitled "Appraisals," which: (1) Eliminates the requirement of FDIC-regulated institutions to obtain appraisals by certified or licensed appraisers for real estate-related financial institutions having a value, as defined in the rule, of $100,000 or less; (2) permits FDIC-regulated institutions to use appraisals prepared for loans insured or guaranteed by an agency of the federal government if the appraisal conforms to regulations or other written requirements of the federal insurer or guarantor; (3) excepts appraisals involving 1-to-4 family residential properties from certain minimum appraisal standards under specified conditions; and (4) adds a definition of "real estate" and "real property" to clarify that the appraisal regulation does not apply to transactions involving mineral rights, timber rights, growing crops, water rights, or similar interests in real estate when the transaction does not involve the associate parcel or tract of land.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550-17th Street, NW., Washington, DC. Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898-6757.

Dated: March 3, 1992.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714-01-M

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:30 a.m. on Tuesday, March 10, 1992, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b(c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of Title 5, United States Code to consider the following matters:

Summary Agenda

No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Memorandum re: Recommendation for Award of Contract.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured depository institutions or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of depository institutions authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Note: Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

Matters relating to the possible closing of certain insured banks:

Names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898-6757.

Dated: March 3, 1992.

	Dir Eastern Region NWS.
	Director Central Region.
National Institute of Standards and Technology	Dep Dir Center for Chemical Technology.
	Dir, Office of Technology Commercialization.
	Chief, Program Office.
	Chf Standard Reference Materials Program.
	Director, Center for Chemical Technology.
	Director for Quality Programs.
	Assoc Dir for Tech & Business Assessment.
	Sr Advr to the Dir, Technology Services.
Office of Associate Director	Director for International & Academic Affairs.
	Deputy Director for International Affairs.
	Deputy Director for Academic Affairs.
	Associate Director.
Advanced Technology Program	Dep Director, Advanced Technology Program.

POSITIONS THAT WERE CAREER RESERVED DURING CALENDAR YEAR 1991—Continued

Agency, Organization	Career Reserved Positions
	Director, Advanced Technology Program.
Technology Services	Deputy Director, Technology Services.
	Dir, Ofc of Technol Evaluation & Assessment.
Office of Measurement Services	Chf, Phy Meas S/P Ofc of Measurement Services.
	Director, Office of Measurement Services.
Office of Standards Services	Dir, Office of Standards Services.
Organization Abolished	Chief Gas and Particulate Science Division.
Organization Abolished	Deputy Director for Programs.
Organization Abolished	Chief, Atomic and Plasma Radiation Division.
	Dir, Cntr for Atomic, Molecular & Optical Phy.
	Chief, Surface Science Div.
	Dep Dir, Cntr for Molecular & Optical Phy.
Organization Abolished	Director-Center for Analytical Chemistry.
Organization Abolished	Dir Center for Radiation Research.
	Dep Dir, Ctr for Radiation Research.
Organization Abolished	Chief Radiation Physics Division.
Organization Abolished	Deputy Director, Center for Chemical Physics.
	Chief, Chemical Process Metrology Division.
Electronics and Electrical Engineering Laboratory	Dir, Electronics & Electrical Eng Laboratory.
	Assoc Dir for Technical Evaluation.
	Deputy Director.
	Dir, Office of Microelectronics Programs.
Electricity Division	Director-Center for Fire Research.
	Chief, Electricity Division.
	Deputy Director, Center for Fire Research.
Electromagnetic Technology Division	Dir, Center for Building Technology.
	Deputy Director, Center for Building Tech.
	Chf-Electromagnetic Technology Division.
	Chief, Structures Division.
Semiconductor Electronics Division	Chief Semiconductor Electronics Division.
	Senior Research Scientist.
Organization Abolished	Dep Dir, Ctr for Electronics & Electrical Eng.
	Associate Director for Program Development.
Manufacturing Engineering Laboratory	Dir, Manufacturing Engineering Laboratory.
	Manager for Industrial Relations.
	Program Manager Automated Manufacturing Res.
	Dep Dir, Manufacturing Engineering Laboratory.
Precision Engineering Division	Chief, Precision Engineering Division.
Robot Systems Division	Chief, Robot Systems Division.
Factory Automation Systems Division	Chief, Factory Automation Systems Division.
Physics Laboratory	Director, Physics Laboratory.
	Physicist (Nuclear).
	Coordinator of Radiation Measurement Services.
	Coordination of Program Development.
	Deputy Director, Physics Laboratory.
Ionizing Radiation Division	Chief Ionizing Radiation Division.
Radiometric Physics Division	Chief Radiometric Physics Division.
Fundamental Constants Data Center	Mgr, Fundamental Constants Data Center.
Molecular Physics Division	Chief Molcular Phsics Div.
Quantum Metrology Division	Chief, Quantum Metrology Division.
Atomic Physics Division	Chief, Atomic Physics Division.
Time and Frequency Division	Chief, Time and Frequency Division.
Quantum Physics Division	Senior Scientist.
	Senior Scientist & Fellow of Jila.
Electron and Optical Physics	Senior Scientist & Fellow of Jila.
	Group Leader for Far Ultraviolet Physics.
Chemical Science and Technology Laboratory	Dir, Chemical Sci & Technology Laboratory.
	Mgr. Tech Applications of Measurement Stds.
	Deputy Director for Programs.
Inorganic Analytical Research Division	Chief Inorganic Analytical Research Division.
Organic Analytical Research Division	Chief Organic Analytical Research Division.
Surface and Microanalysis Science Division	Chf, Surface & Microanalysis Science Division.
	Group Leader, Surface Spec. & Thin Films.
Process Measurements Division	Chief, Process Measurements Division.
Biotechnology Division	Chief, Biotechnology Division.
Materials Science and Engineering Laboratory	Dir, Materials Sci & Eng Laboratory
	Senior Scientist.
	Scientific Assistant to the Director, IMSE
	Dep Dir, Materials Sci & Eng Lab.
	Chief, Film & Fiber Technology.
	Chief Materials Reliability Div.
Matenals Reliability Division	Chief Materials Reliability Div.
Office of Intelligent Processing of Materials	Chf, Ofc of Intell Processing of Materials.
Ceramics Division	Chief Ceramics Division.
Polymers Division	Chief, Polymers Division.
Metallurgy Division	Chf, Metallurgy Division.
	Physicist (Solid State)
Reactor Radiation Division	Chief, Reactor Radiation Division.
	Group Leader Neutron Condensed Matter Science.
	Chief, Reactor Operations.

POSITIONS THAT WERE CAREER RESERVED DURING CALENDAR YEAR 1991—Continued

March 5, 1992

Part III

Environmental Protection Agency

40 CFR Part 61

National Emission Standards for Hazardous Air Pollutants; Benzene Waste Operations; Final Rule and Proposed Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 61

[AD–FRL–4109–6]

National Emission Standards for Hazardous Air Pollutants; Benzene Waste Operations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Today EPA is staying the effectiveness of subpart FF of 40 CFR part 61, the national emission standards for hazardous air pollutants (55 FR 8292, March 7, 1990), as applied to all sources originally subject to the rule. The affected sources are chemical manufacturing plants, coke by-product recovery plants, petroleum refineries, and facilities at which waste management units are used to treat, store, or dispose of waste generated by chemical manufacturing plants, coke by-product plants, or petroleum refineries.

The EPA is staying the effectiveness of subpart FF until it takes final action on clarifying amendments to subpart FF. Clarifying amendments to subpart FF are proposed in a separate notice of proposed rulemaking also published in today's **Federal Register**. The proposed clarifying amendments will not change the basic control requirements of the current rule or the level of public health protection it provides. The EPA has committed to taking final action on the proposed clarifying amendments on or before December 1, 1992.

DATES: Effective February 24, 1992, EPA hereby stays the effectiveness of Subpart FF of 40 CFR part 61 for each chemical manufacturing plant, coke by-product recovery plant, petroleum refinery, and facility at which waste management units are used to treat, store, or dispose of waste generated by chemical manufacturing plants, coke by-product recovery plants, or petroleum refineries, from February 24, 1992 until EPA takes final action on amendments to subpart FF of 40 CFR part 61. Under section 307(b) of the Clean Air Act, judicial review of this final action is available only by filing a petition for review in the U.S. Court of Appeals for the District of Columbia Circuit within 60 days of today's publication of this action.

ADDRESSES: *Docket.* Docket No. A–89–06, containing supporting information used in developing the final action, is available for public inspection and copying between 8:30 a.m. and 3:30 p.m., Monday through Friday, at EPA's Air Docket Section, Waterside Mall, room 1500, 1st Floor, 401 M Street, SW., Washington, DC 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Eric L. Crump, Office of Air Quality Planning and Standards, Chemicals and Petroleum Branch (MD–13), Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone (919) 541–5032.

SUPPLEMENTARY INFORMATION:

A. Overview

On May 7, 1990 (55 FR 8292), EPA promulgated under Section 112 of the Clean Air Act ("the Act"), 42 U.S.C. 7412, national emission standards for hazardous air pollutants (NESHAP) controlling emissions of benzene to the ambient air from waste operations (subpart FF of 40 CFR part 61).

The approach selected for the final rule was to base applicability of the control requirements on the total annual benzene quantity (TAB) in wastes managed at a facility. Facilities with a TAB of 10 megagrams per year (mg/yr) or more, calculated as specified in the rule, must treat the waste streams specified in the rule such that benzene in the waste streams is either below 10 parts per million (ppm) or reduced by 99 percent. Facilities with a TAB of less than 10 megagrams per year are exempt from the control requirements of subpart FF, but must comply with reporting and recordkeeping requirements. A period of 2 years was granted in the final standards to meet the control requirements of subpart FF. March 7, 1992, would have been the date by which sources would have been required to be in compliance.

Following promulgation of the rule, there were indications that the rule was poorly understood by affected facilities. Questions and comments by affected industry, consulting firms, and local, State and federal regulatory officials indicated widespread misunderstanding of many provisions of the rule. For example, a common point of confusion is how to estimate TAB for a facility, the basic criterion that determines whether the control requirements of the rule apply. Based on these and other considerations, EPA concluded that action should be taken to clarify the rule. Clarifications to the rule are proposed in a notice of proposed rulemaking that appears elsewhere in today's **Federal Register**.

A notice of proposed rulemaking proposing to stay the effectiveness of subpart FF was published in the **Federal Register** on December 9, 1991 (56 FR 64217). The public comment period on this notice of proposal was from December 9, 1991 to January 8, 1992. All the comments submitted on the notice of proposed stay have been considered by the EPA in developing this notice of final rulemaking issuing the stay. Twelve comment letters were received. The commenters included companies affected by the rule, trade associations, and an environmental group. Comments were made on the proposed stay of effectiveness, anticipated clarifications to subpart FF, and on the development of the policy for issuing waivers of compliance for the amended rule.

Only one comment was received objecting to the proposed stay. The commenter objecting to the proposed stay contends that EPA does not have the authority to issue a stay of effectiveness longer than 90 days in duration. As discussed in the Response to Comments section of this preamble, EPA believes that it does have the authority to issue a stay of effectiveness for subpart FF. Therefore, in this notice of final rulemaking the Agency is issuing a stay of effectiveness for subpart FF. Concurrent with the issuance of this stay, EPA is proposing clarifying amendments in a separate notice of proposed rulemaking in today's **Federal Register**.

The following paragraphs describe the factors that led EPA to propose a stay of effectiveness for subpart FF, summarize comments submitted on the December 9, 1991 notice of proposed stay, and present EPA's responses to those comments.

B. Background to the Stay Proposal

Evidence of Confusion About the Current Rule

As discussed in the notice of proposed rulemaking proposing the stay, several types of evidence indicated that affected sources misunderstood the promulgated standards. These indicators include direct conversations and correspondence with the regulated community and EPA, review of the 90-day reports submitted under the existing rule, and litigation that was filed against the EPA by several separate potentially affected parties. Following promulgation of the rule, numerous telephone calls and letters to EPA headquarters and regional offices requested explanation of the rule. These inquiries have continued to the present, and suggest widespread confusion on many key aspects of the rule. Because so many inquiries were received, EPA included sessions on the NESHAP for benzene waste operations in a workshop on air emission standards issued under the Resource Conservation and Recovery Act (RCRA). The workshop was presented in all 10 EPA regions to persons from industry, consulting firms, and State and Federal Governments. Questions and comments from workshop attendees confirmed widespread misunderstanding of many basic provisions of the rule.

Further, a review of the 90-day reports submitted by industrial facilities provided additional evidence of confusion about the rule. These reports were required to be submitted to EPA by each facility subject to the rule within 90 days of March 7, 1990, the promulation date of the original standard. The incorrect assumptions evident from many of the responses indicate that many facilities may have concluded incorrectly that they are not subject to the control requirements of subpart FF, when in fact, EPA intended them to be controlled in order to meet the NESHAP risk protection goals.

Finally, several lawsuits have been filed against EPA that focus on lack of clarity in the rule. On May 7, 1990, the American Petroleum Institute (API) filed a petition for review of the promulgated standard in the U.S. Court of Appeals for the District of Columbia Circuit, *American Petroleum Institute* v. *EPA*, 90–1238 (D.C. Circuit). On the same date, API submitted to the Agency a petition for reconsideration of the rule, and on May 30, 1991, submitted a supplement to the petition for reconsideration. On June 3, 1991, Conoco, Inc. and Sun Refining and Marketing Company (Conoco) filed actions in the U.S. Court of Appeals for the District of Columbia Circuit, *Conoco, Inc. and Sun Refining and Marketing Company* v. *EPA*, 91–1266 (D.C. Cir.), and in the U.S. District Court for the District of Montana, *Conoco, Inc. and Sun Refining and Marketing Company* v. *EPA*, No. CV–91–113–BLG–RAW (D. Mont.). Both these suits (including the supplement to API's petition for reconsideration) concern issues related to facility applicability that the litigants believe could not be resolved by simply reading the preamble and regulation.

Extent of Projected Non-Compliance

Trade associations representing facilities subject to Subpart FF and individual companies have indicated to EPA that, because they have only just begun to understand the intent of EPA with regard to the standards, compliance byMarch 7, 1992 is unlikely, if not impossible for many facilities. The API petition for reconsideration discussed at length that industry-wide compliance could not be timely. To support this claim, API subsequently conducted two surveys of its member companies to determine the extent of the petroleum refining industry's inability to comply with subpart FF by March 7, 1992. According to API, these surveys indicated that from 40 to 52 refineries subject to the control requirements of subpart FF, which represent roughly 50 percent of U.S. refining capacity, would be unable to comply by March 7, 1992. Further, the surveys indicated that, to a large degree, uncertainty about applicability of the rule has had the effect of lengthening the time needed by facilities to comply.

The EPA's Approach to Resolving Confusion About the Current Rule

To resolve the confusion concerning the current rule, the Agency has elected to stay the current rule while clarifying amendments are developed. The EPA believes that confusion about the rule regarding applicability determinations has led many facilities to assume incorrectly that controls are not required. Some facilities have realized only recently that controls must be installed to comply with the rule. Given the substantial confusion about basic rule requirements, it is the Agency's view that to cite these facilities for noncompliance with subpart FF after March 7, 1992, would unfairly penalize them. The approach selected will clarify the rule, but not penalize facilities for being confused about the original rule language.

Subpart FF is being stayed until EPA takes final action on clarifying amendments to the rule. In a separate notice of proposed rulemaking in today's **Federal Register**, clarifying amendments are proposed. The EPA has committed to taking final action on the proposed amendments on or before December 1, 1992.

Upon promulgation of the rule clarifications, facilities will have 90 days in which to comply with Subpart FF as amended. Facilities unable to comply within 90 days may apply for a waiver of compliance under § 61.10 of the General Provisions to 40 CFR part 61. As specified in the General Provisions, the Administrator may grant a waiver for up to 2 years past the promulgation date of the rule. To qualify for a waiver of compliance, facilities should first have demonstrated a good faith effort to comply with the rule. Second, to ensure that the health and environmental protection goals of the rule are not compromised during any waiver period granted for the amended rule and during the stay, the Agency plans to seek a commitment from each waiver applicant to take actions that will mitigate the benzene emissions lost due to delayed compliance.

Advantages of the Approach Selected to Clarify the Rule

The approach selected to resolve confusion concerning the requirements of subpart FF will maintain the stringency of the current rule and the level of public health and environmental protection it provides. At the same time, it will not unfairly penalize affected sources that would be out of compliance due to confusion. This approach will also promote the implementation of comprehensive multimedia control strategies. These strategies may take longer to implement than a strategy focussed on complying with Subpart FF alone, but are the most efficient and effective means of addressing releases to all media.

Another advantage of the approach is that, through the waiver process, it offers the opportunity for the Agency to obtain commitments for actions that will mitigate the benzene emissions lost due to delayed compliance. Finally, this approach will lead to a resolution of the litigation filed against EPA on subpart FF. In settlement agreements signed with EPA, the API, Conoco, and Sun have agreed to dismiss their lawsuits against EPA if clarifying amendments to the current rule are issued following the approach described above.

Due to the long lead times needed to design and install the control systems necessary to comply with subpart FF, and the comprehensive multimedia approach being taken by many facilities, EPA expects that facilities will continue their efforts toward compliance even while the rule is stayed. This means that a stay of the rule while clarifications are made will not necessarily result in a greater amount of benzene emissions and exposure than would occur without a stay. For facilities needing longer than 90 days beyond the effective date of the amended rule to comply, the Agency will seek commitments for mitigating actions to compensate for benzene emissions that occur because of delayed compliance and ensure public health protection during the waiver period.

C. Comments and Responses to Comments

Comments on the proposed stay of effectiveness were received from industry, trade associations, and an environmental group. A total of 12 letters were received. Most of these contained multiple comments. A summary of the comments received indicating action taken by EPA to respond to each comment was prepared by EPA and placed in the docket for this

action (Air Docket No. A-89-06, section VII-B).

The comments received on the notice of proposed stay and the EPA responses to them are discussed below. Many comments received addressed the summary of proposed rule clarifications outlined in the notice of proposed stay and the procedures for applying for a waiver of compliance. Both of these issues were discussed in the notice of proposed stay only for general information and are not within the scope of this rulemaking action. Issues concerning rule clarifications will be addressed in that rulemaking. (See separate notice of proposed rulemaking also published in today's **Federal Register**.) Issues concerning waivers of compliance will be addressed on a case-by-case basis under general guidance to be developed by EPA. Nevertheless, a brief response to certain comments is provided.

Comments on the Proposed Stay of Effectiveness for Subpart FF.

Comment: Nine letters were received indicating support for the proposed stay. These included statements of general support for the stay and specific comments on the need for the stay. Two commenters stated their belief that public health and the environment will be adequately protected during the stay. Three commenters commented favorably on the flexibility the stay provides to encourage integrated, multimedia approaches to implement multiple regulatory requirements that might encompass emissions outside the scope of the benzene waste NESHAP. An industry trade association, also a litigant, restated their support for the stay as indicated in their settlement agreement. Another commenter stated their support for one litigant's position on the stay. Two trade associations (writing under one comment response) and one corporation stated that the stay is essential. Six commenters stated their belief that more time is needed to adequately implement the regulations given the additional clarification as to EPA's intent. One commenter stated that to subject facilities to the March 7, 1992, deadline when they reasonably believed themselves to be exempt from the rule, would unfairly penalize them.

Response: For the reasons described in the notice of proposal, EPA agrees that subpart FF should be stayed. Today's final rulemaking stays the requirements of subpart FF until final action is taken by the Agency on the clarifying amendments.

Comment: One commenter contends that EPA lacks the legal authority to issue a stay for more than 3 months. Specifically, the commenter contends that section 307(d)(7)(B) of the Clean Air Act limits the Agency's authority to stay the effectiveness of a rule to 3 months, and that this provision overrides any general authority of the Agency.

Response: The EPA disagrees with the commenter's contention. First, section 307(d)(7)(B) is directed towards raising objections to a rule after promulgation under specific circumstances. If reconsideration is warranted under those circumstances, the Administrator may, without going through the formal notice and comment requirements of section 307(b) or other Administrative Procedure Act requirements, administratively stay the rule. It is only logical that the authority to issue an administrative stay, without notice and comment, should be limited in time. Nothing in the provision, however, can be read to override the Agency's general rulemaking authority under the Clean Air Act. Rather, section 307(d)(7)(B) should be read as a limited exception to the notice and comment rulemaking requirements of the Clean Air Act. The Agency has not implemented this exception in proposing a stay of effectiveness for subpart FF. Consequently, a stay in this case is not necessarily limited to 3 months.

The commenter's contention that the rules of statutory construction support its position that the proposed stay is illegal is also without merit. While EPA agrees that it is a general principle of statutory construction that specific provisions should govern more general, that rule is inapposite here. As noted above, the language of section 307(d)(7)(B) is really a grant to the Agency to administratively stay a rule for a limited time and for a specific purpose without notice and comment rulemaking. It is not a constraint on the Agency's general rulemaking authority under section 301 of the Act. Moreover, EPA's interpretation of the provision is consistent with another fundamental principle of statutory construction—that two provisions of a statute should be read in harmony wherever possible. Thus, rather than being inconsistent with the principles of statutory construction, EPA's reading is wholly consistent with those principles.

Comment: One commenter, also a litigant on subpart FF, claimed that the proposed stay was not pursuant to their signed settlement agreement with the Agency, because the dates by which final action was required were different, and because the commenter did not agree to provide mitigating environmental benefits as a condition for the waiver.

Response: The dates stated in the commenter's settlement agreement require final Agency action on rule clarifications on or before March 2, 1993. The date for final action on rule clarifications stated in the proposed stay is on or before December 1, 1992. This commitment is not inconsistent with the commenter's settlement agreement for action on or before March 2, 1993.

Further, the Agency does not agree with the commenter's contention that EPA's stated policy objective of receiving a commitment for mitigative actions as a condition of any waiver of compliance for the amended rule cannot be applied to the commenter. The Agency has the obligation and authority to include conditions in a waiver of compliance that are necessary, in the Administrator's judgement, to protect public health during the waiver period. See 40 CFR 61.11. The mitigation requirements for waivers of compliance from this NESHAP are simply an exercise of the Agency's discretion under that section. (Also see "Comments on Policy for Granting Waivers of Compliance" section of this preamble for further discussion of EPA's authority.)

Each waiver application received will be reviewed by the Agency and conditions included in any waiver granted on a case-by-case basis. The fact that the general policy to be followed by the Agency in granting waivers of compliance was not included as an attachment to all settlement agreements in no way forfeits the Agency's authority and obligation to include conditions necessary to protect public health in any waiver granted.

Comment: One commenter supported the stay only for those companies making a good faith effort to comply with the originally promulgated standards. The comment claimed that the company has invested significant funds into a compliance project that would have compiled by the March 7, 1992, deadline. Further, the company claims that their current accurate understanding of the intent of the rule means additional funds must be spent, and significant expenditures in new equipment could be rendered useless in complying with the standard. The company fears that even though they have made a good faith effort to comply, they will now be required to undertake mitigating actions under the waiver process because they cannot comply with the amended rule within 90 days of the expected promulgation date.

Response: The Agency commends the efforts of this commenter to comply by the March 7, 1992 deadline, because the net result is decreased emissions of benzene from waste operations at the site. Further, the Agency believes other companies also have already made significant progress towards decreasing these emissions at their facilities. Again, the EPA emphasizes that the rule clarifications proposed separately in this **Federal Register** today are not changes to the substantive requirements of the rule, but are more detailed explanations of EPA's original intent as to how the rule should be implemented to meet the NESHAP risk protection goals.

Assuming that the commenter correctly understood the original rule, progress towards compliance should not be negated by the proposed rule clarifications. Any additional time beyond the effective date of the amended rule necessary to achieve complete compliance by the commenter should be substantially less than for those facilities that did not begin efforts towards compliance until recently. Thus, if a waiver of compliance application is submitted by the facility, minimal mitigation of benzene emissions should be necessary based on the decrease in benzene emissions from waste operations that will have already been achieved at the facility.

If the commenter incorrectly interpreted the original regulation, the stay allows the commenter to not be deemed out of compliance as of March 7, 1992, but rather to have time to institute the modifications to their compliance program to attain compliance in a timely manner. Beyond this, the good faith effort demonstrated to comply with the original rule will have a positive bearing on the Agency's consideration of a waiver application.

Comments on Specific Rule Changes

As a part of some comment letters on the stay of effectiveness, several commenters discussed technical issues regarding what they believed to be the rule clarifications based on the settlement agreements signed by the Agency. The rule clarifications are proposed for public comment in a separate notice of proposed rulemaking that appears elsewhere in this issue of the **Federal Register**. The Agency intends to consider all comments received on the proposed clarifications at the same time and to respond to these comments in the notice of final rulemaking. Therefore, the EPA will retain all rule clarification comments that were submitted as part of comments on the proposed stay and will address them with all comments received on the proposed rule clarifications published today.

Comments on the Policy for Granting Waivers of Compliance for the Amended Rule

Comment: One commenter agreed with the concept of requiring mitigating actions from sources that seek a waiver of compliance. The commenter discussed specific details of how the mitigating actions should be considered by EPA in assessing waiver applications. Another commenter argued that non-air mitigative actions should not, and could not be considered by EPA in granting waivers of compliance.

Response: Under section 112(c)(1)(B)(2) of the Clean Air Act as amended in 1977, the EPA Administrator has the authority to grant a waiver of compliance for a source for up to 2 years beyond the effective date of a standard "if he finds that such period is necessary for the installation of controls and that steps will be taken to assure that the health of persons will be protected from imminent endangerment." Regulations to implement this authority are promulgated in §§ 61.10 and 61.11 of the General Provisions of 40 CFR part 61. Section 61.11(b)(4) states that a waiver of compliance granted by EPA "will specify any additional conditions which the Administrator determines necessary to assure installation of the necessary controls within the waiver period and to assure the health of persons during the waiver period." Nothing in the statutory or regulatory language would preclude the Administrator from taking factors such as contamination to other media into account in deciding whether to grant the waiver. Indeed, the statutory and regulatory language is broad enough to authorize EPA to take steps to protect the "health of persons" during the waiver period.

For sources unable to comply with subpart FF by the effective date of the amended rule, EPA has identified reasonable and necessary measures that should be taken to protect public health by sources that receive waivers. Due to the extent of non-compliance projected and to provide information to affected sources for planning purposes, the EPA has articulated in advance the general policy that will be used in considering waiver applications for subpart FF. Guidance is being developed by EPA that will more specifically articulate this policy and instruct sources on information that should be included in a waiver application.

The EPA views its articulation of a waiver policy for subpart FF as an appropriate exercise of its authority to specify conditions necessary to protect public health during the period of any waiver granted for this rule. Waiver applications for subpart FF will be considered by EPA on a case-by-case basis and appropriate conditions included in each waiver issued.

D. Miscellaneous

1. Paperwork Reduction Act

There are no information collection requirements associated with this stay of effectiveness.

2. Executive Order 12291

Under Executive Order 12291, EPA is required to judge whether this regulation is a "major rule" and therefore subject to certain requirements of the Order. The EPA has determined that issuing a stay for subpart FF will result in none of the adverse economic effects set forth in section I of the Order as grounds for finding a regulation to be a "major rule." This regulation should not be considered major because its annual effect on the economy is not expected to exceed $100 million, the regulation does not significantly increase process or production costs, and the regulation does not cause significant adverse effects on domestic competition, employment, investment, productivity, innovation, or competition in foreign markets.

The Agency has not conducted a Regulatory Impact Analysis (RIA) of this regulation because this action does not constitute a major rule.

3. Regulatory Flexibility Analysis

Section 603 of the Regulatory Flexibility Act, 5 U.S.C. 603, requires EPA to prepare and make available for comment an "initial regulatory flexibility analysis", which describes the effect of the proposed rule on small business entities. However, section 604(b) of the Regulatory Flexibility Act provides that analysis not be required when the head of an Agency certifies that the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.

This rule to stay 40 CFR part 61, subpart FF, will have the effect of easing the burdens associated with immediate compliance with subpart FF, and I, therefore, certify that this rule will not have significant economic impact on a substantial number of small entities.

List of Subjects in 40 CFR Part 61

Air pollution control, Arsenic, Asbestos, Benzene, Beryllium, Coke oven emissions, Hazardous substances, Intergovernmental relations, Mercury, Radionuclides, Reporting and recordkeeping requirements, Vinyl chloride, Volatile hazardous air pollutants.

Dated: February 24, 1992.

William K. Reilly,

Administrator.

For all of the reasons given in the preamble, part 61 of title 40 of the Code of Federal Regulations is amended as follows:

PART 61—[AMENDED]

1. The authority citation for part 61 continues to read as follows:

Authority: Secs. 101, 112, 114, 116, 301, Clean Air Act as amended (42 U.S.C. 7401, 7412, 7414, 7416, 7601).

2. Effective February 24, 1992, subpart FF of part 61 is amended by adding § 61.359 to read as follows:

§ 61.359 Stay of effective date.

The effective date for subpart FF is stayed for each chemical manufacturing plant, coke by-product recovery plant, petroleum refinery, and facility at which waste management units are used to treat, store, or dispose of waste generated by chemical manufacturing plants, coke by-product recovery plants, or petroleum refineries, until the date final action is taken with respect to clarifying amendments to subpart FF. The Environmental Protection Agency will publish any such final action in the **Federal Register.**

[FR Doc. 92-4770 Filed 3-4-92; 8:45 am]

BILLING CODE 6560-50-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 61

[AD-FRL-4109-7]

National Emission Standards for Hazardous Air Pollutants; Benzene Waste Operations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rule.

SUMMARY: On March 7, 1990 (55 FR 8292), EPA promulgated national emission standards for hazardous air pollutants for benzene emissions from benzene waste operations, subpart FF of 40 CFR part 61. Sources affected by subpart FF include chemical manufacturing plants, coke by-product recovery plants, petroleum refineries, and facilities at which waste management units are used to treat, store, or dispose of waste generated by chemical manufacturing plants, coke by-product recovery plants, or petroleum refineries.

Today the Agency is proposing amendments to subpart FF designed to clarify provisions of the rule that have been widely misunderstood by affected sources. The proposed clarifying amendments would not change the basic control requirements of the rule or the level of public health and environmental protection it provides.

A public hearing will be held, if requested, to provide interested persons an opportunity for oral presentation of data, views, or arguments concerning the proposed amendments to subpart FF.

DATES: *Comments.* Comments must be received by EPA on or before May 4, 1992.

Public Hearing. If anyone contacts EPA requesting to speak at a public hearing by March 16, 1992, a public hearing will be held on April 6, 1992 beginning at 10 a.m. A request for a hearing may be made by calling Ms. Lina Hanzely at (919) 541–5673.

Request to Speak at Hearing. Persons wishing to present oral testimony must contact Ms. Lina Hanzely at (919) 541–5673 by March 16, 1992.

ADDRESSES: *Comments.* Comments should be submitted (in duplicate if possible) to Air Docket Section (LE–131), Attention: Docket No. A–89–06, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Public Hearing. If requested, a public hearing will be held at EPA's Office of Administration Auditorium, Research Triangle Park, North Carolina. Persons interested in attending the hearing or wishing to present oral testimony should contact Ms. Lina Hanzely at (919) 541–5673.

Docket. Docket No. A–89–06, containing supporting information used in developing the proposed amendments, is available for public inspection and copying between 8:30 a.m. and 3:30 p.m., Monday through Friday, at EPA's Air Docket Section, Waterside Mall, room 1500, 1st Floor, 401 M Street, SW., Washington, DC 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Robert B. Lucas, Office of Air Quality Planning and Standards, Chemicals and Petroleum Branch (MD–13), Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone (919) 541–0884.

SUPPLEMENTARY INFORMATION: The information presented in this preamble is organized as follows:

I. Background and Overview
II. Proposed Amendments to Clarify Facility Applicability
III. Other Proposed Clarifying Amendments
IV. Compliance Dates for Amended Rule
V. Policy for Granting Waivers of Compliance
VI. Administrative Requirements

I. Background and Overview

On March 7, 1990 (55 FR 8292), EPA promulgated under section 112 of the Clean Air Act ("the Act"), 42 U.S.C. 7412, national emission standards for hazardous air pollutants (NESHAP) controlling emissions of benzene to the ambient air from waste operations (subpart FF of 40 CFR part 61). The NESHAP for benzene waste operations is applicable to owners or operators of chemical manufacturing plants, coke by-product recovery plants, and petroleum refineries. In addition, this subpart applies to owners and operators of facilities at which waste management units are used to treat, store, or dispose of waste generated by chemical plants, coke by-product recovery plants, or petroleum refineries.

Elsewhere in today's **Federal Register**, EPA has promulgated a stay of effectiveness of subpart FF until EPA takes final action on clarifying amendments to subpart FF. As indicated in the notice promulgation and the notice of proposal (56 FR 64382, December 9, 1991) of the stay, EPA has learned that there is widespread confusion among affected industries concerning key provisions of the rule. Misunderstanding of criteria for applying controls to facilities and waste streams within facilities had led numerous affected facilities to conclude that they were not required to install controls, when, in fact, EPA intended them to do so in order to meet the NESHAP goals for health risk protection.

With today's notice, EPA is proposing clarifying amendments to subpart FF. Following a review and consideration of comments received on today's proposed rulemaking, EPA will take final action on the proposed amendments on or before December 1, 1992. The EPA has agreed to take final action on or before this date in a settlement agreement filed in connection with litigation on subpart FF. See *API* v. *EPA*, No. 90–1238 (D.C. Circuit) (Settlement Agreement). Facilities subject to the rule would be required to be in compliance with all provisions of the amended rule within 90 days following promulgation, unless a waiver of compliance is obtained under §§ 61.10 and 61.11 of the General Provisions to 40 CFR part 61.

Additional information on the dates for compliance with the rule is presented in section IV of this preamble. The policy for granting waivers of compliance for the amended rule is discussed in section V.

The clarifying amendments to subpart FF that are being proposed today are discussed below. In accordance with section 112(q) of the Clean Air Act as amended in 1990, these amendments are being proposed under the authority of the Clean Air Act prior to enactment of the Clean Air Act Amendments of 1990. They are intended to clarify existing provisions of subpart FF, and would not change the basic control requirements of the rule or the level of public health and environmental protection it provides.

II. Proposed Amendments to Clarify Facility Applicability

The subpart FF NESHAP for benzene waste operations was promulgated under the authority of section 112 of the Act prior to its amendment by the Clean Air Act Amendments of 1990 ("the 1990 Amendments"). Accordingly, the rule was designed to meet NESHAP goals for protection of public health as described in the March 7, 1990 notice of final rulemaking (55 FR 8299).

In the analysis performed to support the development of subpart FF, EPA determined that the NESHAP risk protection goals could be exceeded if benzene emissions from benzene waste operations were not controlled. Rather than require all facilities to install controls, EPA structured the applicability criteria of the rule in a way that would identify that subset of facilities where controls were needed.

The approach selected for the final rule was to base facility applicability of the control requirements on the total

annual benzene quantity in all aqueous waste streams (TAB). The procedure for determining a facility's TAB is specified in §61.355(a) of the rule.

This TAB value is then compared to a facility threshold cutoff in the rule of 10 megagrams per year (Mg/yr). If the TAB is less than 10 Mg/yr, the facility is exempt from the control requirements of subpart FF, but must comply with the reporting and recordkeeping requirements of the rule. At those facilities with a TAB of 10 Mg/yr or greater, all benzene-containing waste streams (including those with less than 10 percent water) must be controlled unless it is demonstrated that exemption crtieria in the rule for individual streams are met.

The general criterion for individual waste streams is that all streams containing greater than 10 parts per million by weight (ppmw) annual average benzene concentration must be controlled. The basic control requirement is to manage the waste streams in units equipped with air emission controls and to treat the streams such that the benzene in them is removed or destroyed to below 10 ppmw, or by 99 percent. In addition, treatment processes must be controlled for air emissions.

As stated in the preamble to the final rule promulgated March 7, 1990, EPA's analysis to support the development of the rule showed that including only aqueous wastes in the TAB calculation would adequately distinguish those plants where control of all waste streams was needed to meet NESHAP health risk goals from those that did not need controls. Furthermore, the analysis showed that applying controls to all waste streams (including organic streams) with a benzene concentration of 10 ppmw or more at all facilities with a TAB equal to or greater than 10 Mg/yr reduces the health risks from all facilities such that the NESHAP risk protection goals are met. This analysis of the impacts of the rule included assumptions based on EPA's intent on how the rule should be implemented. It is critical that facilities seeking to be exempt from control requirements determine the applicability of controls consistent with the intent of the rule as structured. Otherwise attainment of the NESHAP risk protection goals will be jeopardized. As discussed in the notices of proposal and promulgation of the stay of effectiveness of subpart FF, many facilities have incorrectly concluded, due to confusion on facility applicability determinations, that controls are not required.

The amendments proposed today are designed to clarify EPA's intent on facility applicability. The amendments include clarifications on the following specific points on which there has been confusion concerning facility applicability: (1) Which wastes are included in the TAB calculation, (2) the definition of the point of generation, and (3) the prohibition against waste treatment to lower TAB below the 10 Mg/yr applicability threshold. These proposed clarifications are discussed in the following sections.

A. Wastes Included in the TAB Calculation for Applicability of Controls

For the purposes of the benzene waste operations NESHAP, waste is defined broadly as "any material resulting from industrial, commercial, mining, or agricultural operations, or from community activities that is discarded or is being accumulated, stored, or physically, chemically, thermally, or biologically treated prior to being discarded, recycled, or discharged." This broad definition of waste is essentially the same as that used by EPA in other air standards (40 CFR part 60, subpart Kb) promulgated under the Clean Air Act.

Unfortunately, this definition has caused confusion among affected facilities that are familiar with definitions of waste used in rules that regulate solid and hazardous waste management under the Resource Conservation and Recovery Act (RCRA) and in other regulations. This confusion is evident in questions that have been received by EPA since subpart FF was promulgated. Most of these questions relate to the fate of a waste after it is generated. For example, questions have been received on whether materials that are recycled, reclaimed, or sold as a raw material for another process should be included in the TAB calculation.

Materials are regulated under subpart FF based on their potential for benzene air emissions and their potential to be managed in process or waste management units not currently regulated for air emissions. The fate of a material once it is generated (i.e., whether recycled, reclaimed or sold) does not by itself determine whether it is material subject to subpart FF. Recycled or reclaimed materials will generally be subject to subpart FF unless they are recycled within a process or are directly recycled to another process.

The current rule provides general instructions for the calculation of TAB. Except for the exemptions in § 61.340, EPA intended that all aqueous materials that meet the definition of waste in the rule should be included in the TAB calculation. Section 61.355(a), which describes how TAB shall be calculated, specifies that the annual benzene quantity shall be estimated "for each waste stream subject to this subpart having a flow-weighted annual average water content greater than 10 percent water" (by volume). The benzene quantity for each of these streams is then summed to calculate TAB. The language of this section has been misconstrued by affected sources to suggest that the benzene in certain streams does not have to be included in the TAB calculation.

The EPA is proposing clarifying changes, consistent with the Agency's intent, to clarify that the following wastes are included in the calculation of TAB: (1) Organic wastes that become aqueous during waste management, (2) wastes exempted from control requirements (e.g., small-quantity wastes), and (3) wastes that are sold, such as spent caustic. Changes are also proposed to clarify that wastes generated by remediation activities, such as groundwater cleanup, are not included in the TAB calculation. Finally, changes are proposed to clarify that waste treatment cannot be used to reduce a facility's TAB (see section C of this preamble).

Organic Wastes That Become Aqueous

As discussed previously, applicability of the control requirements of the rule to a facility is determined based on the facility's TAB. The need to control individual waste streams at a facility subject to the control requirements of the rule (i.e, at a facility with a TAB of 10 Mg/yr or greater) is determined based on the flow-weighted annual average benzene concentration in each waste stream at the facility.

In the proposed rule published on September 14, 1989 (54 FR 38093), the benzene in all streams (including organic streams) was included in the calculation of TAB. On the basis of comments on the proposed rule, EPA changed the method of calculating TAB in the final rule such that only the benzene in those wastes containing greater than 10 percent water are included. As EPA stated in the preamble to the final rule on March 7, 1990 (55 FR 8319):

> When benzene is dissolved in water, it is highly volatile and thus easily emitted. Therefore, when aqueous wastes are managed in open sources such as open sewer systems, tanks, or surface impoundments, the benzene in the waste is quickly emitted to the atmosphere. In contrast, when benzene is dissolved in organics, it is much less volatile than benzene is aqueous waste at the same concentration. Additionally, organic wastes are more likely to be transported in closed systems such as covered tanks than are aqueous wastes which are routinely managed in open wastewater treatment tanks.

Aqueous wastes were distinguished from organic wastes in the final rule as being those wastes that contain greater than 10 percent water.

Since promulgation of the rule, there has been confusion as to whether organic wastes that are discharged to a wastewater collection system (e.g., a chemical sewer) should be counted in the calculation of TAB. Even though the preamble to the promulgated rule as cited above clearly indicates EPA's intent that all aqueous waste should be counted in the TAB, the public has been confused on this specific point.

Organic wastes discharged to wastewater collection systems are mixed with water and other aqueous wastes. Through this mixing, the wastes that were organic when they first were generated become aqueous wastes, with the attendant higher benzene emission potential. Many affected sources have failed to include the benzene content of these new aqueous wastes in the TAB calculation. Furthermore, organic wastes discharged to collection systems are generally not being managed in closed systems (i.e., closed to the atmosphere). Consequently, the high benzene emission potential of these wastes after they become aqueous is likely to be realized as actual benzene emissions.

If a waste management unit changes benzene in organic wastes to benzene in aqueous wastes, the benzene must be included in the calculation of TAB. A revision to the rule is proposed that will clarify EPA's intent that benzene in both aqueous wastes and wastes that become aqueous through mixing with other streams is counted towards a facility's TAB. The benzene in organic streams that become aqueous is counted at the point of generation of the organic waste stream (the concentration is determined prior to mixing or comingling with other wastes). This clarification would be implemented through a proposed amendment to § 61.342(a) of the rule to indicate that a facility's TAB is the sum of the annual benzene quantity for each waste stream at the facility that has an annual average water content greater than 10 percent or that is mixed with water, or other wastes, at any time such that the mixture has an annual average water content greater than 10 percent.

Wastes Exempt From Control

There are provisions in the rule under which waste streams containing benzene may be exempt from control based on low benzene concentration, low benzene quantity, or low total waste quantity. Under § 61.342(c)(2), a waste stream is exempt from control if it is demonstrated that the annual average benzene concentration for the stream is less than 10 ppmw. A process wastewater stream may be exempt from control under § 61.342(c)(3) if it is demonstrated that the flow rate of the stream is less than 0.02 liters per minute (L/min) or the annual waste quantity of the stream is less than 10 Mg/yr.

Questions to EPA have indicated confusion over whether the benzene in wastes that meet the exemption criteria of these provisions counts toward a facility's TAB. As previously stated, EPA intends that the benzene in all aqueous wastes and wastes that become aqueous be included in the determination of TAB. This includes the benzene in individual waste streams that may be exempt from control under §§61.342(c)(2) and (3). The proposed amendment to § 61.342(a) includes language to clarify that the benzene in wastes exempt from control because of low waste quantity, low benzene quantity, or low benzene concentration is counted toward a facility's TAB if the waste contains over 10 percent water or if the waste is mixed at any time with water, or with other wastes, such that the resulting mixture has an annual average water greater than 10 percent water.

Materials Subject to Subpart FF That Are Sold

The EPA has been asked if the benzene in materials that are subject to the rule and that may be sold routinely (such as spent caustic) also counts toward TAB if the materials have a water content greater than 10 percent. The Agency does intend for the benzene in these materials that meet the definition of waste in the rule to be included in the determination of TAB. As noted earlier, the fact that such materials have value and can be sold does not by itself mean that the material does not meet the definition of waste in the rule. Language included in the proposed amendment to § 61.342(a) would clarify this point.

Remediation Activities

Some facilities affected by the rule have questioned whether materials subject to the rule that are generated by remediation activities, such as the excavation of contaminated soil, the pumping and treatment of contaminated groundwater, or the recovery of product from soil or groundwater, should be counted toward the TAB. Remediation activities were not specifically addressed in the final rule promulgated on March 7, 1990. Under the current language of the rule, materials generated by remediation activities would be wastes and subject to all provisions of the rule.

Remediation activities generally fall into three categories: (1) Those required under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), (2) those required by the corrective action program under RCRA, and (3) remediation actions that are undertaken voluntarily by facilities. Remediation activities under CERCLA and RCRA must address multimedia protection, including air emissions. Consequently, benzene-containing wastes generated by CERCLA or RCRA activities would be controlled as necessary to protect public health, regardless of how they are addressed in subpart FF.

Multimedia protection is not required, however, for voluntary remediation activities and EPA is concerned that benzene-containing wastes generated by voluntary actions be managed such that public health is protected. The EPA also recognizes that including the benzene contained in remediation wastes in the calculation of TAB may trigger control of an entire facility that otherwise would not require control. This would create a disincentive for facilities to undertake voluntary remediation activities.

To avoid creating this disincentive, EPA is proposing a clarification that the benzene contained in remediation wastes be excluded from the determination of facility applicability (i.e., from the calculation of TAB). However, if a facility is subject to the control requirements of subpart FF due to a facility TAB of 10 Mg/yr or greater, then remediation wastes would be subject to the control provisions. The result of this proposed clarification would be that benzene in wastes generated during remediation activities would not affect a facility's TAB, and thus whether or not a facility was subject to the control requirements of subpart FF. However, if a facility is subject to the rule due to having a TAB of 10 Mg/yr or more, the wastes from remediation activities, including wastes generated by RCRA, CERCLA, and voluntary actions, would be subject to the control provisions of the rule.

B. Definition of Point of Waste Generation

As discussed earlier, subpart FF requires that the characteristics of waste streams at their "point of generation" be used for the purposes of determining a facility's TAB. Also, the point of generation characteristics determine

whether controls are applied to individual waste streams within a facility. The EPA's intent in specifying the point of generation was twofold: (1) To establish the true emission potential of a stream, prior to any losses that occur through volatilization to the atmosphere and prior to any waste treatment, and (2) to have affected facilities calculate their TAB in a manner consistent with EPA's intended structure of the rule. The definition of point of generation referred to contact with the atmosphere only to preclude losses of benzene prior to measurements, not as a means to allow reduction in TAB. This is further discussed in section II.C of this preamble, "Prohibition on the Use of Waste Treatment to Lower TAB."

Since promulgation of the rule, there has been considerable confusion about the definition of point of generation. The sources of this confusion appear to be misinterpretation of EPA's intent, the difficulty of determining whether certain units are process or waste management units, and the different definitions in the rule of point of generation depending on the type of facility (i.e., coke by-product plant; treatment, storage, or disposal facility (TSDF); or other type of facility). In addition, there has been confusion over whether storage tanks are considered to be part of a process.

To resolve this confusion, EPA is proposing to simplify the definition of point of generation in § 61.341, focusing on the difference between process and waste management units and emphasizing that the point of generation is before waste treatment. In the proposed new definition, point of generation means "the location where the waste stream exits the process unit component or storage tank prior to handling or treatment in an operation that is not an integral part of the production process, or in the case of waste management units that generate new wastes, the location where the waste stream exits the waste management component." The point of generation, as proposed in these amendments, would be defined in the same way for all facilities subject to the rule.

In addition, there are certain distinctions made in the proposed amendments between the point of generation and the point for sampling and analysis for the purposes of TAB determinations. These distinctions would be created in proposed §§ 61.355(b) and (c), which indicate where waste quantity and flow-weighted annual benzene concentration are determined for the purposes of determining TAB. These sections specify that determinations of waste quantity and flow-weighted annual benzene concentrations are made at the point of generation unless otherwise specified by listed exceptions. The listed exceptions address sour water streams, wastes at coke by-product plants, and wastes received from offsite by TSDF. These exceptions are discussed in more detail later in this preamble.

In the simplified definition proposed for point of generation, the distinction between what is a waste management unit and what is a process unit is made based on whether the material and the unit in which it is managed are an integral part of the production process. If a material entering a unit meets the subpart FF definition of a waste or if the primary function of a unit is to treat a waste stream, then the unit is a waste management unit, and the point of generation of the waste is a location where the waste leaves the last process unit. If the primary function of the unit is to make a product or products, then the unit is an integral part of the production process and not a waste management unit.

The EPA expects that this simplification in the rule will clarify the distinction between process and waste management units in many situations. However, it will not result in a clear distinction in every situation. Therefore, even with this change, some case-by-case determinations will still be necessary. These determinations will be made by EPA regional offices.

Consider as an example a desalter at a petroleum refinery that receives crude oil and water for processing (i.e., desalting), which is an integral step in the production process. The desalter is a process unit. However, the material leaving the desalter is typically separated into two streams, desalted crude oil and oily wastewater. Under this rule, the oily wastewater is considered a waste once it is separated from the bulk of the crude oil that is being processed in the unit, and its point of generation is where it leaves the process unit in which this primary separation is made. The oily wastewater may be further processed in other units to recover an additional quantity of the oil; however, these units are managing or treating a "waste" material and may be subject to control under this rule. The distinction is more difficult if a significant portion of the crude oil is carried over with the wastewater, and the recovery of this crude oil is an essential part of the production operation. These determinations must be made on a case-by-case basis with consideration given to factors such as the percentage of the product that is recovered, why the specific unit was installed, and other factors.

The production of monochlorobenzene (continuous process) provides another example of the distinction between process and waste management units as it pertains to the chemical processing industry. Monochlorobenzene is produced by reacting benzene with chlorine in the presence of a ferric chloride catalyst. The crude product stream leaving the reaction vessel contains monochlorobenzene product, dichlorobenzenes, benzene, hydrogen chloride, catalyst, and inert materials. This stream is passed through a series of four distillation and stripping columns to remove (1) heavy ends, (2) hydrogen chloride, (3) benzene, and (4) dichlorobenzenes. The heavy ends, hydrogen chloride, and dichlorobenzene streams are processed to separate recoverable by-products from process wastes while the recovered benzene stream is recycled directly to the reaction vessel without any further processing.

For the purposes of subpart FF, the reaction vessel and all of the four columns that process crude monochlorobenzene product are process units. The heavy ends, hydrogen chloride, and dichlorobenzene streams are considered wastes once they are separated from the crude monochlorobenzene product stream. Although these streams are fed to other units that recover some marketable or recyclable materials, they meet the Subpart FF definition of waste and units in which these streams are handled are considered to be waste management units that may be subject to control under this rule.

The benzene recycle stream in this example could be subject to subpart FF from the point that it leaves the recovery unit to the point that it is returned to the reactor. It would be a material subject to subpart FF if it was accumulated, stored, or treated prior to being returned to a process unit. Direct (in-process, closed-loop) recycle would be considered part of the process, and in this case the stream would not be included in the TAB determination or controlled under the rule. Again, such determination will be made on a case-by-case basis, taking into account the percentage of the stream that is recovered and other factors.

As noted earlier, there are certain distinctions made in §§ 61.355 (b) and (c) of the proposed amendments between the point of generation and the point for sampling and analysis for the purposes of TAB determinations. These are discussed further below.

Materials Subject to Subpart FF Received by TSDF From Offsite

TSDF that receive wastes from offsite generated by petroleum refineries, chemical manufacturing plants, or coke by-product recovery plants (i.e., other facilities also subject to this rule) are subject to the provisions of subpart FF. Control of these wastes at TSDF may be required in either of two ways.

First, each TSDF subject to the rule must calculate its TAB, based on the characteristics of the wastes received from petroleum refineries, chemical manufacturing plants, and coke by-product recovery plants. If the TAB calculated for a TSDF is equal to or greater than 10 Mg/yr, then the facility is subject to the control requirements of the rule for those wastes received from petroleum refineries, chemical manufacturing plants, and coke by-product recovery plants.

The EPA's intent is that TAB determinations (i.e., facility applicability determinations) for TSDF be made based on the characteristics of wastes at the point where they enter the facility. Previously, this was implemented through the definition of point of generation. In the proposed amendments, it would be implemented through specifications on where to determine annual waste quantity and benzene concentration in §§ 61.355(b)(3) and (c)(1)(i)(C). At TSDF with a TAB equal to or greater than 10 Mg/yr, the characteristics of waste streams as they enter the TSDF determine whether those waste streams must be controlled to meet the requirements of the rule.

A second way that TSDF could be affected by subpart FF is if they receive any individual waste streams subject to the rule that would have had to be controlled at the generator site. Any waste received by a TSDF from a facility subject to the rule that would have had to control that waste if it had remained onsite must be controlled at the offsite TSDF.

Consider, for example, a chemical plant with a TAB above 10 Mg/yr, which makes it subject to the control provisions of the rule. If the chemical plant ships offsite one or more of their benzene-containing waste streams that require control, the TSDF must manage these wastes in compliance with the control requirements of the rule. In this case, the need for control at the TSDF is determined based on the characteristics of the waste at the generator as opposed to the first case in which the need for control is determined based on the characteristics of the waste as it enters the TSDF. As specified in § 61.342(e)(2) of the rule, the owner or operator shipping the waste offsite must include with each offsite waste shipment a notice stating that the waste contains benzene which is required to be managed and treated in accordance with the provisions of subpart FF.

Coke By-Product Recovery Plants Subject to Subpart L

Coke by-product recovery plants subject to subpart FF are also subject to subpart L of 40 CFR part 61. Subpart L limits benzene emissions from specific sources at furnace and foundry coke by-product recovery plants.

The EPA's intent in subpart FF is that waste stream characteristics be determined where the waste exits the last unit controlled under subpart L. The EPA's assumption in having the coverage of subpart FF begin after the last unit subject to subpart L is that units subject to subpart L are already controlled for benzene emissions to meet NESHAP goals for the protection of public health. This intent previously was implemented in the definition of point of generation. In the proposed amendments, it would be implemented through specifications on where to determine annual waste quantity and benzene concentration in §§ 61.355(b)(2) and (c)(1)(i)(B).

Since promulgation of the rule, EPA has been asked to clarify the calculation of TAB for coke by-product wastes managed in subpart L units. This included a clarification on the calculation of TAB for wastes transferred between subpart L units and between subpart L units and process units, and also the acceptability of changing waste management practices within units subject to subpart L to lower a facility's TAB.

It remains EPA's intent that TAB be determined for coke by-product wastes at the point where the waste exits the production process or the last subpart L unit in which the waste is managed. Changes in waste management within the universe of production processes and subpart L units would be an acceptable means of lowering a facility's TAB, provided that the transfer of wastes among units is accomplished in totally enclosed conveyances (e.g., hard piping). This is clarified in the proposed amendments regarding coke by-product plants in §§ 61.355 (b) and (c).

Sour Water Streams

One other potential exception to EPA's general intent on point of generation has been identified since promulgation. The EPA has determined that the rule requirements as they apply to sour water streams treated in sour water strippers may not have been consistent with the assumptions used in the analysis performed to support development of the rule. For these streams, the benzene content at the exit of the sour water stripper was used in the analysis to determine facility applicability and to estimate emissions and health risk. With this assumption, and also assuming there would be no emissions from the stripper, the analysis indicated that the NESHAP risk protection goals would be met.

Sour water streams are those that contain sulfur compounds, usually hydrogen sulfide, or ammonia. These streams are routinely stripped to remove the ammonia and sulfur compounds at petroleum refineries and coke by-product plants. Under the definition in subpart FF, these streams are wastes and the stripping process is waste treatment. In contrast to other treatment processes, however, sour water stripping is inherently controlled for air emissions (e.g., for hydrogen sulfide). Combustion is the primary control used, and this control also results in destruction of benzene emissions by 98 percent or more.

Based on these considerations, EPA has sought to clarify in the proposed amendments the requirements of the rule as they apply to sour water streams. The proposed specifications on where to determine annual waste quantity and benzene concentration in §§ 61.355 (b)(1) and (c)(1)(i)(A) indicate that these determinations would be made at the point where the treated sour water exits the sour water stripper. Definitions for sour water and sour water stripper are proposed to be added to § 61.341 to ensure that only sour water streams managed in inherently controlled treatment units qualify for this proposed exception to EPA's general intent on point of generation.

C. Prohibition on the Use of Waste Treatment to Lower TAB

Waste treatment, except as described above for inherently controlled sour water streams and wastes managed in subpart L units, cannot be used to decrease TAB to exempt a facility from the control requirements of the rule. Although the basis for EPA's analysis and EPA's intent on determining the need for controls at a facility was discussed in the preamble to both the proposed and promulgated rule, the language of the rule has been interpreted by some facilities as allowing waste treatment as a means of reducing a facility's TAB. Furthermore, as indicated by a review of the 90-day

reports submitted by facilities describing the regulatory status of waste streams and by direct questions to EPA, some facilities believe that selectively treating waste streams such that TAB is lowered to just below 10 Mg/yr qualifies a facility for an exemption from the control requirements in the rule.

The EPA's analysis identified facilities with the potential for exceeding NESHAP health risk protection goals based on TAB prior to waste treatment. To allow facilities to use waste treatment to reduce TAB would result in increased benzene emissions and would jeopardize attainment of the NESHAP health risk protection goals for several reasons.

First, the rule is structured to ensure control of treatment processes for benzene air emissions. Treatment processes used to reduce TAB such that a facility is not subject to the control provisions of the rule would not be required to be controlled. Thus, air stripping or other processes that simply transfer benzene from the waste to the air without control could be used and benzene emissions would increase.

Second, at facilities with a TAB equal to or greater than 10 Mg/yr, all benzene-containing wastes are subject to the control requirements of the rule, not just wastes included in the determination of TAB. The TAB determination includes only the benzene in wastes containing an annual average water content of greater than 10 percent. If facilities were allowed to selectively treat aqueous wastes to lower TAB to below 10 Mg/yr, benzene emissions from organic wastes, assumed by EPA to be controlled by facilities with a TAB of 10 Mg/yr or more, would remain uncontrolled. This would result in benzene emissions greater than was intended by the rule.

Finally, as stated in the preamble to the final rule, the 10 Mg/yr level of benzene in waste used to identify facilities for control "was not intended as a facility target level" (55 FR 8321). In fact, EPA assumed that, "once controls are applied, benzene emissions at most affected plants would be reduced significantly below 10 megagrams per year" (55 FR 8329). It should be noted that, at the request of commenters on the proposed rule, EPA provided a facility target option for treating process wastewater in the final rule (§ 61.342(d)(2)). Under this option, process wastewater shall be treated to achieve a total annual benzene quantity from facility process wastewater less than 1 Mg/yr, not 10 Mg/yr. If 10 Mg/yr TAB were a target, each facility could have up to 10 Mg/yr of residual benzene in aqueous wastes. This would also increase benzene emissions beyond what was intended.

As outlined above, benzene emissions would increase and attainment of the NESHAP risk protection goals would be jeopardized if facilities were allowed to treat to the 10 Mg/yr TAB level. For this reason, waste treatment is not allowed to reduce a facility's TAB for the purposes of subpart FF. A revision to the rule is proposed to clarify this point. The proposed revision to § 61.342(a) would clarify EPA's intent that the benzene concentration cannot be reduced before measurement by the loss of benzene from volatilization, by mixing or diluting with other materials, or by any waste treatment.

It has been suggested that the structure of the rule does not encourage reclamation and recycling of materials at affected facilities. The EPA solicits suggestions for other structures for the rule, including supporting information, that would encourage reclamation and recycling without compromising the NESHAP risk protection goals. Supporting information should clearly describe the suggested structure and document the level of protection it would provide. Approaches suggested will be considered by the Agency when taking final action on the clarifying amendments proposed today. If another structure is adopted, it would be added as an alternative to the current structure and, therefore, the number of facilities that would require controls to meet the rule would not increase.

Any structure suggested should address the benzene emission concerns including, but not limited to, characterizing and assuring adequate control of the benzene emissions that would result from aqueous waste treatment processes, non-aqueous wastes, treatment residuals, or materials sold offsite. For example, an alternative structure could include elements such as a lower facility applicability threshold (possibly 1 or 6 Mg/yr) based on a change in the determination of "point of generation" for purposes of calculating TAB for materials that are reclaimed, recycled, or sold offsite for reclamation or recycling, coupled with requirements for control of non-aqueous wastes and management and treatment of aqueous wastes at facilities with TAB's less than the facility applicability threshold. In this example, commenters should address how these elements interact to meet the NESHAP risk protection goals.

Also, the structure should be generic in that it should be able to be applied at any facility and result in achievement of the NESHAP risk protection goals. That is, the Agency is not seeking suggestions for structures based on site-specific control or risk protection. Finally, any structure suggested should be one that can be developed and evaluated for the level of protection it provides within the timeframe of this rulemaking (final action by December 1, 1992).

III. Other Proposed Clarifying Amendments

A. Applicability of the Rule to Wastes Generated by Maintenance Operations and Other Low-Quantity Wastes

Many of the questions EPA has received on the rule since promulgation have concerned the applicability of control requirements to maintenance wastes, particularly those generated during "turnaround." Turnaround refers to the shutdown of a plant or process unit within a plant to perform maintenance and safety checks that can be performed only when the plant or unit is not in operation.

Through discussions with the American Petroleum Institute (API) and individual companies, EPA has become aware of the frequency, duration, and quantities of wastes generated by maintenance activities. Turnaround occurs approximately once every 3 to 5 years for petroleum refineries. Turnaround for plants in other industries covered by subpart FF occurs on a similar schedule. Often, outside contractors are brought in to perform turnaround tasks. The wastes generated during turnaround include both organic wastes, such as process fluids drained from piping, and aqueous wastes, such as those generated by the washdown of process equipment and the flushing of lines.

When EPA developed the original rule, it intended benzene-containing wastes generated by maintenance operations to be included within the scope of coverage of the rule. However, it was not clear to EPA when the rule was developed in what quantity and how often these wastes were generated. Consequently, they were not specifically addressed in the rule promulgated on March 7, 1990.

The EPA also recognized that there are many low-quantity waste streams generated at a facility that do not contribute significantly to benzene emissions and health risk and that would be inefficient to control. Consequently, an exemption from control requirements for low-flow streams was included in the rule. Section 61.342(c)(3) of the rule exempts process wastewater streams from control requirements if the stream flow rate is less than 0.02 L/min or if the annual waste quantity of the stream is less than 10 Mg/yr. However, this exemption applies only to process wastewater streams.

To reduce the confusion among affected sources about the applicability of the rule to maintenance wastes and based on the considerations described above, EPA is proposing to (1) add a requirement that facilities prepare and implement a maintenance turnaround plan, (2) add provisions relating to the exemption of small-quantity wastes, and (3) clarify how intermittently generated wastes should be included in the calculation of facility TAB.

The proposed requirement for a maintenance turnaround plan (in proposed § 61.356(m)) is designed to ensure that good engineering practices are used during equipment and unit turnarounds to minimize benzene emissions to the atmosphere. As proposed, the requirement for a management plan for turnarounds would apply to all facilities subject to the provisions of the benzene waste operations NESHAP that have TAB equal to or greater than 10 Mg/yr. The plan would cover turnaround activities, wastes generated during turnarounds, and actions taken to minimize benzene emissions. The maintenance turnaround waste management plan, to the extent practicable, should contain the following:

(1) A description and relative schedule of actions taken to complete the maintenance turnaround of each piece of equipment or process unit that contains or contacts benzene or benzene mixtures;

(2) Identification of wastes that are generated during the turnaround and estimates of the maximum waste quantity and benzene concentration of each waste generated during the turnaround;

(3) A description of how each benzene-containing waste generated during the turnaround is collected, stored, treated, and disposed;

(4) A description of actions, including good engineering practices, taken to minimize emissions of benzene to the atmosphere from collection, storage, and treatment of the benzene-containing waste generated during a maintenance turnaround.

The EPA requests comments on the following aspects of the proposed requirement for a maintenance turnaround waste management plan: (1) The need to ensure that the volume of benzene-containing wastes generated by maintenance turnaround is minimized, (2) the opportunities available for reducing the amount of waste generated by maintenance turnaround activities, (3) the level of detail needed in a maintenance turn around waste management plan, and (4) the reporting burden on facilitites to develop and maintain a maintenance turnaround waste management plan.

The EPA is also proposing (in § 61.342(c)(3)) an additional option designed to provide an exemption for wastes generated in small quantities. Along with process wastewater, wastes from routine maintenance, equipment turnarounds, and other operations would qualify for the proposed option. Wastes could be exempted under the proposed option if the annual benzene quantity of the individual waste stream, other than process wastewater, is less than 25 kilograms per year (kg/yr) and the total annual benzene quantity in all of the exempted waste streams is less than 1 Mg/yr. Process wastewater would not be limited to a benzene quantity of 25 kg/yr.

To limit the total amount of waste exempted, several restrictions would apply. If a facility chose the proposed option to exempt low-quantity wastes, it would not be able to take advantage of the low-flow or mass quantity cutoffs for process wastewater (less than 0.02 L/min or 10 Mg/yr total mass of waste). Wastes from tank drawdown and wastes from purging prior to sampling would not qualify for the proposed exemption.

The proposed clarifications also address (in proposed § 61.355(a)(6)) how maintenance turnaround wastes and other infrequently generated wastes should be handled in calculating TAB for the purpose of determining applicability of controls. The revision clarifies that waste streams generated on an infrequent basis, such as wastes from process unit turnarounds that occur only once every 2 to 5 years, are counted in the TAB. The proposed clarification specifies that these waste streams be included in the TAB calculation for the year in which they are generated and that the benzene quantities in these wastes are not averaged over the time period between generations.

B. Control Efficiency Requirement for Vapor Recovery Systems

Standards for closed-vent systems and control devices used to comply with the rule are specified in § 61.349. A vapor recovery system (e.g., a carbon adsorption system or a condenser) is required to recover the organic emissions vented to it with an efficiency of 95 percent or greater. The proposed change would establish a performance standard for vapor recovery systems of 98 percent control efficiency for benzene emissions as an alternative to the existing 95 percent control efficiency for the total organic compounds. This change makes the use of carbon adsorption a more practical control alternative. Because the gas composition typically released from some refinery process sewer vents (one of the sources regulated by the NESHAP) contains a high concentration of light hydrocarbons (20 weight percent based on data supplied by the American Petroleum Institute), the carbon in an adsorption system must be replaced or regenerated at a much greater frequency at the 95 percent limit for the total organic compounds than if the control efficiency is set at 98 percent for benzene alone. The extended bed life provided by the proposed option of a benzene limit would make the use of carbon adsorption more feasible for some facilities. There would be no change in the benzene emission reduction as a result of this proposed rule amendment.

C. Miscellaneous Proposed Changes

In addition to the proposed clarifications discussed previously, there are several miscellaneous revisions proposed to clarify the rule. These are discussed below.

Car-Seal Valves as an Alternative to Flow Indicators

The EPA proposes to revise the rule language in § 61.349(a)(1)(ii) on the location of flow indicators and provide an alternative to the requirement for closed vent systems to have flow indicators to ensure that the vapors are being routed to the control device. The alternative being proposed involves the use of car-seals to indicate the position of any valves that might be used to divert flow from the control device. Revisions to §§ 61.354 and 61.356 are also proposed to incorporate car seals as an option. This revision is being made to make subpart FF consistent with other NESHAP (e.g., the benzene transfer operations NESHAP, § 61.305(c)).

Clarification to the Repair Schedule for Treatment Devices

The requirement in § 61.348(g) pertaining to first attempt at repair was intended to apply only to gaskets and seals on access doors, hatches, and other similar openings on treatment processes and wastewater treatment systems. However, the language of this section may be interpreted to mean attempt at repair can be applied to the operation of the entire process or system. The proposed clarification would be implemented by changing section designations so that it is clear

the repair delay provisions apply to seals and gaskets on access doors, hatches, etc., as was originally intended and does not permit repair delays for malfunctioning treatment processes and wastewater treatment systems.

Clarification of What Wastes Are Exempt From the Rule

Section 61.340(c)(3) of the rule was originally designed to indicate that certain materials that would meet the broad definition of "waste" under this rule would be exempt from the requirements of this rule. This exemption was intended to apply to a narrow population of wastes that included primarily intermediate and product distillation reflux streams. The provision has been incorrectly interpreted to exclude materials that the Agency would consider wastes. Because there has not been a problem of a facility including process fluid reflux in the population of wastes that contain benzene, this paragraph has been deleted from the rule to avoid further misinterpretation of the intent and applicability.

Clarification of What Wastes Must Be Controlled

This revision to § 61.342(c)(1) would clarify that all wastes (that contain benzene at a concentration of 10 ppm or more and do not meet other exemption criteria) at facilities with a TAB of 10 Mg/yr or more are subject to the control requirements. Based on a review of 90-day reports submitted, it appears that some facilities have concluded incorrectly that only those wastes discharged to the sewer or only wastes with greater than 10 percent water were required to be controlled. However, any waste that contains benzene at a concentration of 10 ppm or more, including wastes with 10 percent water or less that are not discharged to an individual drain system, are subject to control.

As EPA stated in the preamble to the final rule, "at facilities that meet the applicability level, all wastes, including organics, are subject to the control requirements of the final rule unless they have a specific exclusion or meet other exemption requirements. Even though the calculation of annual benzene in waste excludes organic waste streams, benzene emissions from organic wastes contribute to the overall risk and the impacts of the rule were estimated based on the assumption that these streams would be controlled" (55 FR 8319). The Agency solicits comments on the risks associated with these waste streams. The criterion of a water content of greater than 10 percent is relevant only in identifying those waste streams that are to be used in determining the facility's TAB.

Points for Sampling and Analysis

Minor changes, in addition to those already discussed in section II of this preamble relating to applicability determinations, are proposed to clarify EPA's intent on several questions relating to points for sampling and analysis. These are discussed below.

Questions have been received on how multiple phase wastes should be characterized. A clarification is proposed in § 61.355 that for wastes with multiple phases, the benzene concentration must characterize (or represent) the waste stream as a whole (i.e., determine the weighted average concentration from the benzene concentration and the mass of each phase).

For purposes of determining whether a stream has met the standards in § 61.348(a), the determination of benzene concentration is made at the point where the waste exits the treatment process as provided in § 61.355 (d), (e), (f), and (g). These sections refer to paragraph (c) for the methods to be used in determining the benzene concentration of the waste stream and the mass flow rate of benzene in the waste stream.

Another clarification proposed is that waste quantity and benzene concentration determinations must be made at the point of generation (unless otherwise specified) for all wastes, not only aqueous wastes. The current rule specifies that determinations be made at the point of generation only for wastes that contain more than 10 percent water (in § 61.355(a)). In addition, the current rule does not explicitly specify that determinations be made at the point of generation for wastes that are exempted from control because of a benzene concentration less than 10 ppm (§ 61.342(c)(2)). The structure of this part of the rule is such that § 61.355(a) is devoted to determining total annual benzene quantity, (b) is for determining waste quantity, and (c) is for determining benzene concentration. However, (b) and (c) currently do not specify that waste quantity and concentration were to be determined at the point of generation.

It has always been EPA's intent that determinations of waste quantity and benzene concentration for all wastes subject to Subpart FF be made at the point of generation. That this was explicitly stated in the rule only for those wastes included in the TAB calculation was an inadvertent oversight that would be corrected with this clarification.

Clarification That Above-Ground Sewer Systems Must Meet the Wastewater Treatment Provisions

Under § 61.348(a)(5), if an owner or operator mixes any combination of process wastewater and other specified wastes for the purpose of facilitating management or treatment in a wastewater treatment system, then the requirements of § 61.348(b) apply. A revision to § 61.348(a)(5) of the rule is proposed to clarify that above-ground wastewater collection and treatment systems are also subject to these conditions.

The intent of the provisions for wastewater treatment systems is to prevent dilution from being used to lower the benzene concentration in affected waste streams to below 10 ppmw. A treatment process (e.g., a steam stripper) that complies with § 61.348(a) is not considered to be part of a wastewater treatment system provided that the reduction in benzene concentration in waste streams treated by the process is not achieved through dilution.

Alternative Control Devices

Section 61.349(a) of the rule specifies requirements for closed-vent systems and control devices used to comply with subpart FF. Requirements are specified for three types of devices most likely to be used. These are enclosed combustion devices, vapor recovery systems, and flares.

Since promulgation of the rule, EPA has been asked what requirements apply to control devices other than those identified in the rule. Consequently, a revision to § 61.349 is proposed that would add a new provision for control devices other than enclosed combustion devices, vapor recovery systems, or flares. The change will allow owners or operators, prior to the installation of the control device, to demonstrate through the use of test data and design information that an alternative control device achieves 95 percent control of the organic compounds or 98 percent control of benzene.

Under the proposed provision, owners or operators who propose to use an alternative control device would be required to develop and submit to EPA for approval, information documenting that the proposed device would meet the performance requirements of the rule. Following EPA approval, parameters indicating the operation and maintenance of the device in accordance with the rule would have to be monitored. Under § 61.349(e), the EPA Administrator would be able to request an owner or operator of an alternative control device to conduct a performance test at any time. Minor changes are also proposed to requirements for monitoring, recordkeeping, and reporting to incorporate the change for alternative control devices.

Clarification on Reporting Requirements

This is a minor revision to clarify that all chemical plants, petroleum refineries, coke by-product recovery plants, and facilities managing wastes from these industries are subject to the reporting requirements. If the facility has no benzene onsite in wastes, products, by-products, or intermediates, the facility must simply submit an initial report to that effect.

Clarify Alternative Means of Emission Limitation

This revision would add some minor clarifying words to § 61.353(a) on alternative means of emission limitation to make that section consistent with the General Provisions in subpart A of part 61 (§ 61.12(d)(1)).

Clarification on Loading Waste Into Containers

This revision is a minor clarification to § 61.345(a)(2) to indicate that the requirement for submerged loading of containers is not for all potentially pumpable wastes. The requirement for submerged loading is only for wastes that are acutally pumped into the container.

Clarification of "Recycled to a Process"

This proposed revision to § 61.342(c)(1)(iii) would clarify that once the waste stream is recycled to a process, including tanks used for the storage of production process feed, product or intermediates, the material is no longer subject to the rule (i.e., the storage tank, if it is not used primarily as a waste storage tank, is not subject to the control requirements of the rule).

Monitoring Requirements for Wastewater Treatment Systems

When an owner or operator mixes any combination of process wastewater and other specified wastes for the purpose of facilitating management or treatment in a wastewater treatment system, then the requirements of § 61.348(b) apply. Waste management units in the wastewater treatment system must be controlled for air emissions unless (1) the benzene content of each waste stream entering the unit is less than 10 ppmw and (2) the total annual benzene quantity contained in all waste streams managed or treated in units comprising the system that are not controlled for air emissions is less than 1 Mg/yr. The benzene in waste streams managed or treated in enhanced biodegradation units is not included in the determination of total annual benzene for the second condition.

Monitoring requirements for owners and operators complying with the wastewater treatment provisions of § 61.348(b) described above are included in § 61.354(b) of the rule. Section 61.354(b) requires monitoring of the flow rate of each wastewater stream exiting the wastewater treatment system. This is an inadvertent error. To monitor compliance with § 61.348(b), EPA's intent is that the flow rate and benzene concentration of each stream entering a unit not controlled for air emissions be monitored, except for biodegradation units. For biodegradation units, the benzene concentration of waste streams entering the unit should be monitored. A change to § 61.354(b) is proposed to make this section consistent with EPA's intent.

IV. Compliance Dates for Amended Rule

In general, the owner or operator of a facility subject to a NESHAP promulgated in 40 CFR part 61 must be in compliance with the NESHAP within 90 days of the effective date of the standard, unless a waiver of compliance is granted by the Administrator. The effective date for a NESHAP is defined as the date of its promulation in the **Federal Register**. The maximum waiver period that may be granted by the Administrator for a NESHAP promulgated under the authority of section 112 of the Clean Air Act prior to the 1990 Amendments is 2 years.

The NESHAP for benzene waste operations was promulgated on March 7, 1990. In the final rule, a 2-year waiver of compliance for the control requirements of the rule was granted to all facilities, making the date for compliance with the control requirements March 7, 1992. However, all facilities subject to the rule were required to submit a report to EPA within 90 days of the promulgation date as required by §61.10 of the General Provisions to 40 CFR part 61. Also, the rule required that a report describing the regulatory status of each waste stream containing benzene be submitted within 90 days of the promulgation date. These reports were due by June 5, 1990.

The final date for compliance with the control requirements of the rule would have been March 7, 1992. In a separate notice in today's **Federal Register**, EPA promulgated a stay of effectiveness of subpart FF until final action is taken on clarifying rule amendments. Clarifying rule amendments are proposed with today's notice, and EPA expects to take final action on the proposed amendments by December 1, 1992. Compliance with the amended rule would be required for existing sources within 90 days of the effective date of the rule amendments, unless a waiver of compliance is obtained pursuant to 40 CFR 61.10 and 61.11. New sources would have to be in compliance at startup.

The EPA expects that some population of existing facilities will not be able to comply fully with the amended rule within 90 days of promulgation. A facility may apply for a waiver of compliance for an additional period of up to 2 years past the effective date under § 61.10(b) of the General Provisions to 40 CFR part 61. The policy EPA will follow in reviewing waiver applications for the amended rule is discussed in section V of this preamble.

In addition, because the clarifying amendments are expected to affect facilities' understanding of the rule, all facilities subject to the rule would be required to submit a new report describing the regulatory status of benzene-containing waste streams to EPA. The requirements for the content of this report are described in § 61.357(a) of the rule. If an owner or operator, after reviewing the amended rule, believes his last report reflected a correct interpretation of the rule and has not changed, submission of a copy of the original report with a statement that it is still valid for that facility would be adequate to meet the requirement for a new report.

V. Policy for Granting Waivers of Compliance

The owner or operator of an existing source unable to come into complete compliance with the NESHAP for benzene waste operations within 90 days of the promulgation of amendments to the rule may apply for a waiver of compliance.

The procedure for applying for a waiver is described in § 61.10 of the General Provisions to 40 CFR part 61. A request for a waiver must be in writing and, in addition to the requirements of § 61.10, include a description of interim emission control steps that will be taken during the waiver period.

As specified in § 61.11, the Administrator may grant a waiver of up to 2 years based on information provided in the waiver request and other information. Any waiver issued will be in writing and will identify the sources covered, specify a date the

waiver expires, dates by which steps toward compliance are to be taken, and any additional conditions which the Administrator determines necessary to ensure protection of public health during the waiver period. An owner or operator will be notified prior to the denial of a waiver request and given an opportunity to present additional information or arguments before a final determination is made. The Administrator will not deny any waiver application solely because an applicant does not project full compliance within 2 years. This is an exception to current EPA policy, which would require compliance to be attained within 2 years. However, the Administrator believes it is reasonable to make an exception for this NESHAP in order to promote the multimedia compliance approaches being undertaken by many facilities, and considering that a commitment for actions to mitigate the effects of delayed compliance will be obtained from all facilities receiving waivers. In no event will a waiver be granted for a period of time exceeding 2 years or longer than the time needed to install the control equipment or process changes that the source intends to construct or implement to comply with this standard. If a source is not in compliance with the emission requirements and mitigating offsets required at the end of 2 years, then the source would be considered to be in violation of the NESHAP and would need to incorporate the compliance schedule in a federally enforceable consent order or administrative order as applicable.

In evaluating requests for waivers of compliance with the benzene waste operations NESHAP, additional specific factors will be considered by the Administrator, as outlined in § 61.342(b) of the proposed amendments. The EPA is preparing a document to provide guidance on how the waiver policy will be implemented. The following is a general discussion of the policy.

The EPA believes that it is essential that the risk to human health from benzene emissions that will continue during any waiver period be mitigated through reduction of other emissions or through other actions taken at the facility that have an equal or greater environmental benefit. It is the goal of the waiver policy to receive an enforceable commitment from a facility to obtain mitigating environmental benefits for the benzene emissions that result from extending the original compliance date. Such mitigation projects would initially be implemented through the compliance wiaver process and must contain enforceable interim steps toward compliance.

Although subpart FF would not be enforceable during any period that the standard is stayed, EPA encourages those facilities that can meet the requirements of subpart FF before the new effective date of the rule to do so. For sources requesting a waiver, EPA would consider the facility's good faith effort to comply with the requirements of subpart FF at the earliest possible date after March 7, 1992.

In general, EPA will consider mitigating actions taken by sources that reduce risk to the population and environment that are not currently required by regulation or taken in advance of future known regulatory requirements.

The EPA prefers actions that can be demonstrated to result in quantifiable emission and pollution reductions rather than nonquantifiable improvements. The EPA encourages sources to make permanent, rather than temporary, investments in emissions reductions when planning for waiver consideration.

These mitigating actions should consider, in the following order of highest lowest priority, additional benzene emission reductions from benzene waste operations not otherwise required under this rule, benzene emissions reductions from sources other than benzene waste operations, emission reductions of air pollutants other than benzene, reductions in pollutants transferred to media other than air (such as groundwater or surface water), or nonquantifiable benefits.

It is recognized that some facilities may request compliance waivers for this rule to implement comprehensive construction programs that will not only lead to compliance with subpart FF of part 61, but compliance with other regulations addressing releases to air, water, and land. EPA encourages this approach to implement these comprehensive multi-media control programs; provided the effect of the delayed compliance with the benzene waste operation NESHAP is mitigated. The EPA realizes that the environmental benefits of some comprehensive compliance strategies may accrue after the end of the waiver period. In limited situations and within a limited duration after the end of the waiver period, EPA will take into consideration such benefits toward the mitigation goal of the waiver applicant. The EPA will address the specifics of such situations in future guidance.

The EPA will also consider nonquantifiable case-specific features of waiver applications, in addition to quantified emissions reductions. For example, EPA will look favorably upon applications that stress pollution prevention/source reduction measures, as well as plans that offer compliance with other environmental regulations in advance of regulatory deadlines, or actions that are not currently required by regulation.

VI. Administrative Requirements

A. Paperwork Reduction Act

The information collection requirements in the proposed amendments to subpart FF have been submitted for approval to the Office of Management and Budget (OMB) under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* OMB approved the Information Collection Request Document prepared by EPA (ICR No. 1541) for the original rule promulgated on March 7, 1990 as No. 2060–0183. An amendment to this document has been prepared by EPA, and a copy may be obtained from Ms. Sandy Farmer, Information Policy Branch, EPA, 401 M Street, SW. (PM–233), Washington, DC 20460, or by calling (202)260–2740. The public reporting burden for this collection of information is estimated to average 11.9 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Send comments regading the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Chief, Information Policy Branch, PM–223, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, and to the Office of Information and Regualtory Affairs, Office of Management and Budget, Washington, DC 20503, marked "Attention: Desk Officer for EPA." The final rule will respond to any OMB or public comments on the information collection requirements contained in the proposed amendments.

B. Regulatory Flexibility Analysis

Section 603 of the Regulatory Flexibility Act, 5 U.S.C. 603, requires EPA to prepare and make available for comment an "initial regulatory flexibility analysis" which describes the effect of the proposed rule on small business entities. However, section 604(b) of the Regulatory Flexibility Act provides that analysis not be required when the head of an Agency certifies that the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.

The proposed amendments to 40 CFR part 61, subpart FF, are intended to clarify the rule and would not affect the number of facilities subject to the rule or the controls that must be installed to comply. I therefore certify that this rule will not have significant exonomic impact on a substantial number of small entities.

C. Docket

The docket is an organized and complete file of all the informaiton submitted to or otherwise considered by EPA in the development of this rulemaking. The docketing system is intended to allow members of the public and industries involved to readily identify and locate documents so that they can effectively participate in the rulemaking process. Along with the statement of basis and purpose of the proposed and promulgated revisions, and EPA responses to significant comments, the contents of the docket, except for interagency review materials, will serve as the record in case of judicial review [Section 307(d)(7)(A)].

D. Executive Order 12291

Under Executive Order 12291, EPA is required to judge whether this regulation is a "major rule" and therefore subject to certain requirements of the Order. The EPA has determined that the proposed clarifying amendments to subpart FF would result in none of the adverse economic effects set forth in section I of the Order as grounds for finding a regulation to be a "major rule." the EPA does not believe these proposed amendments to the regulation are major because the exonomic effects of the amendments do not meet the $100 million threshold, the amendments would not significantly increase process or production costs, and the amendments would not cause significant adverse effects on domestic competition, employment, investment, productivity, innovation, or competition in foreign markets.

The Agency has not conducted a Regulatory Impact Analysis (RIA) of this proposed regulation because this action does not constitute a major rule.

List of Subjects in 40 CFR Part 61

Air pollution control, Arsenic, Asbestos, Benzene, Beryllium, Coke oven emissions, Hazardous substances, Intergovernmental relations, Mercury, Radionuclides, Reporting and recordkeeping requirements, Vinyl chloride, Volatile hazardous air pollutants.

Dated: February 24, 1992.

William K. Reilly,

Administrator.

PART 61 [AMENDED]

For the reasons set out in the preamble, title 40, chapter 1, part 61 of the Code of Federal Regulations is proposed to be amended as follows:

1. The authority citation for part 61 continues to read as follows:

Authority: Sections 101, 112, 114, 116, 301 Clean Air Act as amended (42 U.S.C. 7401, 7412, 7414, 7416, 7601).

§ 61.340 [Amended]

2. In § 61.340, paragraph (c)(3) is removed.

3. Section 61.341 is amended by revising the definition for "point of waste generation" and by adding definitions in alphabetical order to read as follows:

§ 61.341 Definitions.

* * * * *

Car-seal means a seal that is placed on a device that is used to change the position of a valve (e.g., from opened to closed) in such a way that the position of the valve cannot be changed without breaking the seal.

* * * * *

Flow indicator means a device which indicates whether gas flow is present in a line or vent system.

* * * * *

Point of waste generation means the location where the waste stream exits the process unit component or storage tank prior to handling or treatment in an operation that is not an integral part of the production process, or in the case of waste management units that generate new wastes after treatment, the location where the waste stream exits the waste management unit component.

* * * * *

Sour water stream means a stream that: (1) Contains ammonia or sulfur compounds (usually hydrogen sulfide) at concentrations of 10 ppm by weight or more, (2) is generated from separation of water from a feed stock, intermediate, or product that contained ammonia or sulfur compounds, and (3) requires treatment to remove the ammonia or sulfur compounds.

Sour water stripper means a unit that: (1) Is designed and operated to remove ammonia or sulfur compounds (usually hydrogen sulfide) from sour water streams, (2) has the sour water streams transferred to the stripper through hard piping or other enclosed system, and (3) is operated in such a manner that the offgases are sent to a sulfur recovery unit, processing unit, incinerator, flare, or other combustion device.

* * * * *

4. Section 61.342 is amended by revising paragraphs (a), (b), (c)(1) introductory text, (c)(1)(iii), (c)(2), (c)(3), and (g) to read as follows:

§ 61.342 Standards: General.

(a) An owner or operator of a facility at which the total annual benzene quantity from facility waste is less than 10 megagrams per year (Mg/yr) shall be exempt from the requirements of paragraphs (b) and (c) of this section. The total annual benzene quantity from facility waste is the sum of the annual benzene quantity for each waste stream at the facility that has a flow-weighted annual average water content greater than 10 percent or that is mixed with water, or other wastes, at any time and the mixture has an annual average water content greater than 10 percent. The benzene quantity in a waste stream is to be counted only once without multiple counting if other waste streams are mixed with or generated from the original waste stream. Other specific requirements for calculating the total annual benzene waste quantity are as follows:

(1) Wastes that are exempted from control under §§ 61.342(c)(2) and 61.342(c)(3) are included in the calculation of the total annual benzene quantity if they have an annual average water content greater than 10 percent, or if they are mixed with water or other wastes at any time and the mixture has an annual average water content greater than 10 percent,

(2) The benzene in a material subject to this subpart that is sold is included in the calculation of the total annual benzene quantity if the material has an annual average water content greater than 10 percent,

(3) Benzene in wastes generated by remediation activities, such as the excavation of contaminated soil, pumping and treatment of groundwater, and the recovery of product from soil or groundwater, are not included in the calculation of total annual benzene quantity; however, if the facility's total annual benzene quantity is 10 Mg/yr or more, wastes generated by remediation activities are subject to the requirements of paragraphs (c) through (g) of this section.

(4) The total annual benzene quantity is calculated using the quantity of benzene in the waste before any waste treatment occurs to remove the benzene except as specified in § 61.355(c)(1)(i)(A) through (C).

(b) Each owner or operator of a facility at which the total annual benzene quantity from facility waste is equal to or greater than 10 Mg/yr as

determined in paragraph (a) of this section shall be in compliance with the requirements of paragraphs (c) through (g) of this section no later than 90 days following the effective date, unless a waiver of compliance has been obtained under § 61.11, or by the initial startup for a new source with an initial startup after the effective date.

(1) The owner or operator of an existing source unable to comply with the rule within the required time may request a waiver of compliance under § 61.10.

(2) As part of the waiver application, the owner or operator shall sumit to the Administrator a plan under § 61.160(b)(3) that is an enforceable commitment to obtain environmental benefits to mitigate the benzene emissions that result from extending the compliance date. The plan shall include the following information:

(i) A description of the method of compliance, including the control approach, schedule for installing controls, and quantity of the benzene emissions that result from extending the compliance date,

(ii) If the control approach involves a compliance strategy designed to obtain integrated compliance with multiple regulatory requirements, a description of the other regulations involved and their effective dates, and

(iii) A description of the actions to be taken at the facility to obtain mitigating environmental benefits, including how the benefits will be obtained, the schedule for these actions, and an estimate of the quantifiable benefits that directly result from these actions.

(c) * * *

(1) For each waste stream that contains benzene, including (but not limited to) organic waste streams that contain less than 10 percent water and aqueous waste streams, even if the wastes are not discharged to an individual drain system, the owner or operator shall:

* * * * *

(iii) Each waste management unit used to manage or treat waste streams that will be recycled to a process shall comply with the standards specified in §§ 61.343 through 61.347 of this subpart. Once the waste stream is recycled to a process, including to a tank used for the storage of production process feed, product, or product intermediates, unless this tank is used primarily for the storage of wastes, the material is no longer subject to paragraph (c) of this section.

(2) A waste stream is exempt from paragraph (c)(1) of this section provided that the owner or operator demonstrates initially and, thereafter, at least once per year that the flow-weighted annual average benzene concentration for the waste stream is less than 10 ppmw as determined by the procedures specified in § 61.355(c)(2) or § 61.355(c)(3) of this subpart.

(3) A waste stream is exempt from paragraph (c)(1) of this section provided that the owner or operator demonstrates initially, and thereafter, at least once per year that the conditions specified in either paragraph (c)(3)(i) or (c)(3)(ii) of this section are met.

(i) The waste stream is process watewater that has a flow rate less than 0.02 liters per minute or an annual wastewater quantity of less than 10 Mg/yr; or

(ii) All of the following conditions are met:

(A) The owner or operator does not choose to exempt process wastewater under paragraph (c)(3)(i) of this section,

(B) The annual benzene quantity in the waste stream, other than process wastewater, is less than 25 kg/yr,

(C) The total annual benzene quantity in all waste streams chosen for exemption in paragraph (c)(3)(ii) does not exceed 1.0 Mg/yr,

(D) The total annual benzene quantity in a waste stream chosen for exemption is determined for the year in which the waste is generated and is not averaged over the period of years in which the waste might be generated as specified in § 61.355(a)(6),

(E) The waste is not product tank drawdown, and

(F) The waste is not material that is generated from purging prior to sampling of a waste or process fluid.

* * * * *

(g) Permission to use an alternative means of compliance to meet the requirements of §§ 61.342 through 61.352 of this subpart may be granted by the Administrator as provided in § 61.353 of this subpart.

5.–6. Paragraph (a)(2) of § 61.345 is amended by revising the first sentence to read as follows:

§ 61.345 Standards: Containers.

(a) * * *

(2) When a waste is transferred into a container by pumping, the owner or operator shall perform the transfer using a submerged fill pipe. * * *

* * * * *

7. Section 61.348 is amended by adding a new sentence at the end of paragraph (a)(5) to read as follows:

§ 61.348 Standards: Treatment processes.

(a) * * *

(5) * * * These provisions apply to above-ground wastewater treatment systems as well as those that are at or below ground level.

* * * * *

8. Section 61.349 is amended by revising paragraphs (a)(1)(ii), (a)(2)(ii), and (e); and by adding paragraph (a)(2)(iv) to read as follows:

§ 61.349 Standards: Closed-vent systems and control devices.

(a) * * *

(1) * * *

(ii) Vent systems that contain any bypass line that could divert the vent stream away from a control device used to comply with the provisions of this subpart shall install, maintain, and operate according to the manufacturer's specifications a flow indicator that provides a record of vent stream flow away from the control device at least once every 15 minutes, except as provided in paragraph (a)(1)(ii)(B) of this section.

(A) The flow indicator shall be installed at the entrance to any bypass line that could divert the vent stream away from the control device to the atmosphere.

(B) Where the bypass line valve is secured in the closed position with a car-seal or a lock-and-key type configuration, a flow indicator is not required.

* * * * *

(2) * * *

(ii) A vapor recovery system (e.g., a carbon adsorption system or a condenser) shall recover or control the organic emissions vented to it with an efficiency of 95 weight percent or greater, or shall recover or control the benzene emissions vented to it with an efficiency of 98 weight percent or greater.

* * * * *

(iv) A control device other than those described in paragraphs (a)(2)(i) through (iii) of this section may be used provided that the following conditions are met:

(A) The device shall recover or control the organic emissions vented to it with an efficiency of 95 weight percent or greater, or shall recover or control the benzene emissions vented to it with an efficiency of 98 weight percent or greater.

(B) The owner or operator shall develop test data and design information that documents the control device will achieve an emission control efficiency of either 95 percent or greater for organic compounds or 98 percent or greater for benzene;

(C) The owner or operator shall identify:

(1) The critical operating parameters that affect the emission control performance of the device,

(2) The range of values of these operating parameters that ensure the emission control efficiency specified in paragraph (a)(2)(iv)(A) of this section is maintained during operation of the device, and

(3) How these operating parameters will be monitored to ensure the proper operation and maintenance of the device.

(D) The owner or operator shall submit the information and data specified in paragraphs (a)(2)(iv)(B) and (C) of this section to the Administrator prior to operation of the alternative control device.

(E) The control device shall not be judged as in compliance with requirements of § 61.349 of this subpart until the Administrator has approved the use of the alternative control device.

* * * * *

(e) The Administrator may request at any time an owner or operator demonstrate that a control device meets the applicable conditions specified in paragraph (a)(2) of this section by conducting a performance test using the test methods and procedures as required in § 61.355 of this subpart, and for control devices subject to paragraph (a)(2)(iv), the Administrator may specify alternative test methods and procedures, as appropriate.

* * * * *

9. Section 61.353 is amended by revising paragraph (a) to read as follows:

§ 61.353 Alternative means of emission limitation.

(a) If, in the Administrator's judgment, an alternative means of emission limitation will achieve a reduction in benzene emissions at least equivalent to the reduction in benzene emissions from the source achieved by the applicable design, equipment, work practice, or operational requirements in §§ 61.342 through 61.349 of this subpart, the Administrator will publish in the Federal Register a notice permitting the use of the alternative means for purposes of compliance with that requirement. The notice may condition the permission on requirements related to the operation and maintenance of the alternative means.

* * * * *

10. Section 61.354 is amended by revising paragraphs (b), (c)(6)(i), (c)(7)(i), (c)(8), and (d) and by adding paragraphs (c)(9) and (f) to read as follows:

§ 61.354 Monitoring of operations.

* * * * *

(b) If an owner or operator complies with the requirements of § 61.348(b) of this subpart, then the owner or operator shall install, calibrate, operate, and maintain according to manufacturer's specifications equipment as follows:

(1) For the first exempt waste management unit in each waste treatment train, other than an enhanced biodegradation unit, equipment to continuously monitor and record the flow rate and benzene concentration of each waste stream entering the unit.

(2) For each enhanced biodegradation unit that is the first exempt waste management unit in a treatment train, equipment to continuously monitor and record the benzene concentration of each waste stream entering the unit.

(c) * * *

(6) * * *

(i) A monitoring device equipped with a continuous recorder to measure either the concentration level of the organic compounds or the concentration level of benzene in the exhaust vent stream from the condenser; or

* * * * *

(7) * * *

(i) A monitoring device equipped with a continuous recorder to measure either the concentration level of the organic compounds or the benzene concentration level in the exhaust vent stream from the carbon bed; or

* * * * *

(8) For a vapor recovery system other than a condenser or carbon adsorption system, a monitoring device equipped with a continuous recorder to measure either the concentration level of the organic compounds or the benzene concentration level in the exhaust vent stream from the control device.

(9) For a control device subject to the requirements of § 61.349(a)(2)(iv) of this subpart, devices to monitor the parameters as specified in § 61.349(a)(2)(iv)(C) of this subpart.

(d) For a carbon adsorption system that does not regenerate the carbon bed directly on site in the control device (e.g., a cargon canister), either the concentration level of the organic compounds or the concentration level of benzene in the exhaust vent stream from the carbon adsorption system shall be monitored on a regular schedule, and the existing carbon shall be replaced with fresh carbon immediately when carbon breakthrough is indicated. The device shall be monitored on a daily basis or at intervals no greater than 20 percent of the design carbon replacement interval, whichever is greater. As an alternative to conducting this monitoring, an owner or operator may replace the carbon in the carbon adsorption system with fresh carbon at a regular predetermined time interval that is less than the carbon replacement interval that is determined by the maximum design flow rate and either the organic concentration or the benzene concentration in the gas stream vented to the carbon adsorption system.

* * * * *

(f) Owners or operators using a closed vent system that contains any bypass line that could divert a vent stream from a control device used to comply with the provisions of this subpart shall do the following:

(1) Visually inspect the bypass line valve at least once every month, checking the position of the valve and the condition of the car-seal or closure mechanism required under § 61.349(a)(1)(ii) of this subpart to ensure that the valve is maintained in the closed position and the vent stream is not diverted through the bypass line.

(2) Visually inspect the readings from each flow monitoring device required by § 61.349(a)(1)(ii) of this subpart at least once each operating day to check that vapors are being routed to the control device as required.

11. Section 61.355 is amended by revising paragraphs (a)(1) introductory text, (a)(1)(i), (a)(1)(ii), (b) introductory text, (c) introductory text, (e)(3), (e)(4), (f)(3), (i) introductory text, (i)(3), (i)(3)(ii)(C), (i)(3)(iii), (i)(3)(iv), and (i)(4); by adding paragraph (a)(6); by redesignating paragraphs (b)(1), (b)(2), and (b)(3) as (b)(4), (b)(5), and (b)(6); by adding paragraphs (b)(1), (b)(2), and (b)(3); by redesignating paragraphs (c)(1) and (c)(2) as (c)(2) and (c)(3); and by adding (c)(1) to read as follows:

§ 61.355 Test methods, procedures, and compliance provisions.

(a) * * *

(1) For each waste stream subject to this subpart having a flow-weighted annual average water content greater than 10 percent water, on a volume basis as total water, or is mixed with water or other wastes at any time and the resulting mixture has an annual average water content greater than 10 percent as specified in § 61.342(a), the owner or operator shall:

(i) Determine the annual waste quantity for each waste stream using the procedures specified in paragraph (b) of this section.

(ii) Determine the flow-weighted annual average benzene concentration for each waste stream using the procedures specified in paragraph (c) of this section.

* * * * *

(6) The benzene quantity in a waste stream that is not generated at least once each year (e.g., wastes generated during maintenance turnarounds that occur only once every 2 to 5 years) shall be included in the determination of total annual benzene quantity from facility waste for the year in which the waste is generated unless the waste stream is otherwise excluded from the determination of total annual benzene quantity from facility waste in accordance with § 61.355 (a) through (c) of this subpart. The benzene quantity in this waste stream shall not be annualized or averaged over the time interval between the activities that resulted in generation of the waste, for purposes of determining the total annual benzene quantity from facility waste.

(b) For purposes of the calculation required by § 61.342(c)(3)(ii) and § 61.355(a), an owner or operator shall determine the annual waste quantity at the point of waste generation, unless otherwise provided in paragraphs (b)(1), (2), and (3) of this section, by one of the methods given in paragraphs (b)(4) through (6) of this section.

(1) The determination of annual waste quantity for sour water streams that are processed in sour water strippers shall be made at the point that the treated water exits the sour water stripper.

(2) The determination of annual waste quantity for wastes at coke by-product plants subject to and complying with the control requirements of §§ 61.132, 61.133, 61.134, or 61.139 of subpart L of this part shall be made at the location that the waste stream exits the process unit component or waste management unit controlled by that subpart or at the exit of the ammonia still, provided that the following conditions are met:

(i) The transfer of wastes between units complying with the control requirements of subpart L of this part, process units, and the ammonia still is made through hard piping or other enclosed system.

(ii) The ammonia still meets the definition of a sour water stripper in § 61.341.

(3) The determination of annual waste quantity for wastes that are received at treatment, storage, or disposal facilities from offsite shall be made at the point where the waste enters the treatment, storage, or disposal facility.

* * * * *

(c) For the purposes of the calculation required by § 61.342(c)(3)(ii) and § 61.355(a) of this subpart, an owner or operator shall determine the flow-weighted annual average benzene concentration in a manner that meets the requirements given in paragraph (c)(1) using either of the methods given in paragraphs (c)(2) and (c)(3) of this section.

(1) The determination of flow-weighted annual average benzene concentration shall meet all of the following criteria:

(i) The determination shall be made at the point of waste generation except for the specific cases given in paragraphs (c)(1)(i)(A) through (C) of this section.

(A) The determination for sour water streams that are processed in sour water strippers shall be made at the point that the treated water exits the sour water stripper.

(B) The determination for wastes at coke by-product plants subject to and complying with the control requirements of §§ 61.132, 61.133, 61.134, or 61.139 of subpart L of this part shall be made at the location that the waste stream exits the process unit component or waste management unit controlled by that subpart or at the exit of the ammonia still, provided that the following conditions are met:

(1) The transfer of wastes between units complying with the control requirements of subpart L of this part, process units, and the ammonia still is made through hard piping or other enclosed system.

(2) The ammonia still meets the definition of a sour water stripper in § 61.341.

(C) The determination for wastes that are received from offsite shall be made at the point where the waste enters the treatment, storage, or disposal facility.

(ii) Volatilization of the benzene by exposure to air shall not be used to reduce the benzene concentration determination.

(iii) Mixing or diluting the waste stream with other wastes or other materials shall not be used to reduce the benzene concentration determination.

(iv) The determination shall be made prior to any treatment of the waste that removes benzene, except as specified in (c)(1)(i)(A) through (C) of this section.

(v) For wastes with multiple phases, the determination shall provide the weighted-average benzene concentration based on the benzene contained in each phase of the waste.

* * * * *

(e) * * *

(3) The mass flow rate of benzene entering the treatment process (E_b) shall be determined by computing the product of the flow rate of the waste stream entering the treatment process, as determined by the inlet flow meter, and the benzene concentration of the waste stream, as determined using the sampling and analytical procedures specified in paragraph (c)(2) or (c)(3) of this section. Three grab samples of the waste shall be taken at equally spaced time intervals over a 1-hour period. Each 1-hour period constitutes a run, and the performance test shall consist of a minimum of 3 runs conducted over a 3-hour period. The mass flow rate of benzene entering the treatment process is calculated as follows:

$$E_b = \frac{K}{n \times 10^6} \left[\sum_{i=1}^{n} V_i C_i \right]$$

Where:
E_b = Mass flow rate of benzene entering the treatment process, kg/hour.
K = Density of the waste stream, kg/m³.
V_i = Average volume flow rate of waste entering the treatment process during each run i, m³/hour.
C_i = Average concentration of benzene in the waste stream entering the treatment process during each run i, ppmw.
n = Number of runs.

(4) The mass flow rate of benzene exiting the treatment process (E_a) shall be determined by computing the product of the flow rate of the waste stream exiting the treatment process, as determined by the inlet flow meter, and the benzene concentration of the waste stream, as determined using the sampling and analytical procedures specified in paragraph (c)(2) or (c)(3) of this section. Three grab samples of the waste shall be taken at equally spaced time intervals over a 1-hour period. Each 1-hour period constitutes a run, and the performance test shall consist of a minimum of 3 runs conducted over the same 3-hour period at which the mass flow rate of benzene entering the treatment process is determined. The mass flow rate of benzene exiting the treatment process is calculated as follows:

$$E_a = \frac{K}{n \times 10^6} \left[\sum_{i=1}^{n} V_i C_i \right]$$

Where:
E_a = Mass flow rate of benzene exiting the treatment process, kg/hour.
K = Density of the waste stream, kg/m³.
V_i = Average volume flow rate of waste exiting the treatment process during each run i, m³/hour.
n = Number of runs.

* * * * *

(f) * * *

(3) The mass flow rate of benzene entering the combustion unit shall be determined by computing the product of the flow rate of the waste stream entering the combustion unit, as determined by the inlet flow meter, and the benzene concentration of the waste stream, as determined using the sampling procedures paragraph (c)(2) or (c)(3) of this section. Three grab samples of the waste shall be taken at equally spaced time intervals over a 1-hour period. Each 1-hour period constitutes a run, and the performance test shall consist of a minimum of 3 runs conducted over a 3-hour period. The mass flow rate of benzene into the combustion unit is calculated as follows:

$$E_b = \frac{K}{n \times 10^6} \left[\sum_{i=1}^{n} V_i C_i \right]$$

Where:
E_b = Mass flow rate of benzene into the combustion unit, kg/hour.
K = Density of the waste stream, kg/m³.
V_i = Average volume flow rate of waste entering the combustion unit during each run i, m³/hour.
C_i = Average concentration of benzene in the waste stream entering the combustion unit during each run i, ppmw.
n = Number of runs.

* * * * *

(i) An owner or operator using a performance test to demonstrate compliance of a control device with either the organic reduction efficiency requirement or the benzene reduction efficiency requirement specified under § 61.349(a)(2) of this subpart shall use the following procedures:

* * * * *

(3) The mass flow rate of either the organics or benzene entering and exiting the control device shall be determined as follows:

* * * * *

(ii) * * *

(C) The organic concentration or the benzene concentration, as appropriate, in the vent stream entering and exiting the control shall be determined using Method 18 from Appendix A of 40 CFR Part 60.

(iii) The mass of organics or benzene entering and exiting the control device during each run shall be calculated as follows:

$$M_{aj} = K V_{aj} \left[\sum_{i=1}^{n} C_{ai} MW_i \right] (10^{-6})$$

$$M_{bj} = K V_{bj} \left[\sum_{i=1}^{n} C_{bi} MW_i \right] (10^{-6})$$

Where:
M_{ai} = Mass of organics or benzene in the vent stream entering the control device during run j, kg.
M_{bj} = Mass of organics or benzene in the vent stream exiting the control device during run j, kg.
V_{aj} = Volume of vent stream entering the control device during run j at standard conditions, m³.
V_{bj} = Volume of vent stream exiting the control device during run j at standard conditions, m³.
C_{ai} = Organic concentration of compound i or the benzene concentration measured in the vent stream entering the control device as determined by Method 18, ppm by volume on a dry basis.
C_{bi} = Organic concentration of compound i or the benzene concentration measured in the vent streaentering the control device as determined by Method 18, ppm by volume on a dry basis.
MW_i = Molecular Weight of organic compound i in the vent stream or the molecular weight of benzene, kg/kg-mol.
n = Number of organic compounds in the vent stream; if benzene reduction efficiency is being demonstrated, then n = 1.
K = Conversion factor molar volume = 0.0416 kg-mol/m³ (at 293 °K and 760 mm Hg).
10^{-6} = Conversion from ppm, ppm^{-1}.

(iv) The mass flow rate of organics or benzene entering and exiting the control device shall be calculated as follows:

$$E_a = \left(\sum_{j=1}^{n} M_{aj} \right) / T$$

$$E_b = \left(\sum_{j=1}^{n} M_{bj} \right) / T$$

Where:
E_a = Mass flow rate of organics or benzene entering the control device, kg/hour.
E_b = Mass flow rate of organics or benzene exiting the control device, kg/hour.
M_{aj} = Mass of organics or benzene in the vent stream entering the control device during run j, kg.
M_{bj} = Mass of organics or benzene in vent stream exiting the control device during run j, kg.
T = Total time of all runs, hour.
n = Number of runs.

(4) The organic reduction efficiency or the benzene reduction efficiency for the control device shall be calculated as follows:

$$R = \frac{E_a - E_b}{E_a} \times 100$$

Where:
R = Total organic reduction efficiency or benzene reduction efficiency for the control device, percent.
E_a = Mass flow rate of organics or benzene entering the control device, kg/hr.
E_b = Mass flow rate of organics or benzene exiting the control device, kg/hr.

12. Section 61.356 is amended by revising paragraphs (b)(2), (f)(2)(ii) (E) through (G), (j)(3), (j)(8), and (j)(9); and by adding paragraphs (f)(2)(ii)(H), (j)(12), and (m) to read as follows:

§ 61.356 Recordkeeping requirements.

* * * * *

(b) * * *

(2) For each waste stream exempt from § 61.342(c)(1) of this subpart in accordance with § 61.342(c)(3) of this subpart, the records shall include:

(i) all measurements, calculations, and other documentation used to determine that the continuous flow of process wastewater is less than 0.02 liters per minute or the annual waste quantity of process wastewater is less than 10 Mg/yr, or

(ii) all measurements, calculations, and other documentation used to determine that the total annual benzene quantity in each waste stream that is not process wastewater is less than 25 kg/yr and that the sum of the total annual benzene quantity in all exempt waste streams does not exceed 1.0 Mg/yr.

* * * * *

(f) * * *

(2) * * *

(ii) * * *

(E) For a condenser, the design analysis shall consider the vent stream composition, constituent concentrations, flow re, relative humidity, and temperature. The design analysis shall also establish the design outlet organic compound concentration level or the design outlet benzene concentration level, design average temperature of the condenser exhaust vent stream, and the design average temperatures of the coolant fluid at the condenser inlet and outlet.

(F) For a carbon adsorption system that regenerates the carbon bed directly on-site in the control device such as a fixed-bed adsorber, the design analysis shall consider the vent stream composition, constituent concentrations, flow rate, relative humidity, and temperature. The design analysis shall also establish the design exhaust vent stream organic compound concentration level or the design exhaust vent stream benzene concentration level, number and capacity of carbon beds, type and working capacity of activated carbon used for carbon beds, design total steam flow over the period of each complete carbon bed regeneration cycle, duration of the carbon bed steaming and cooling/drying cycles, design carbon bed temperature after regeneration, design carbon bed regeneration time, and design service life of carbon.

(G) For a carbon adsorption system that does not regenerate the carbon bed directly on-site in the control device, such as a carbon canister, the design analysis shall consider the vent stream composition, constituent concentrations, flow rate, relative humidity, and temperature. The design analysis shall also establish the design exhaust vent stream organic compound concentration level or the design exhaust vent stream benzene concentration level, capacity of carbon bed, type and working capacity of activated carbon used for carbon bed, and design carbon replacement interval based on the total carbon working capacity of the control device and source operating schedule.

(H) For a control device subject to the requirements of § 61.349(a)(2)(iv), the design analysis shall consider the vent stream composition, constituent concentrations, and flow rate. The design analysis shall also include all of the information submitted under § 61.349(a)(2)(iv).

* * * * *

(j) * * *

(3) Periods when the closed vent system and control device are not operated as designed including all periods and the duration when:

(i) Any valve car-seal or closure mechanism required under § 61.349(a)(1)(ii) of this subpart is broken or the by-pass line valve position has changed.

(ii) The flow monitoring devices required under § 61.349(a)(1)(ii) of this subpart indicate that vapors are not routed to the control device as required.

* * * * *

(8) If a condenser is used, then the owner or operator shall maintain continous records of the parameters selected to be monitored in accordance with § 61.354(c)(6) of this subpart. If concentration of organics or concentration of benzene in the control device outlet gas stream is monitored, then the owner or operator shall record all 3-hour periods of operation during which the concentration of organics or the concentration of benzene in the exhaust stream is more than 20 percent greater than the design value. If the temperature of the condenser exhaust stream and coolant fluid is monitored, then the owner or operator shall record all 3-hour periods of operation during which the temperature of the condenser exhaust vent stream is more than 6°C above the design average exhaust vent stream temperature, or the temperature of the coolant fluid exiting the condenser is more than 6°C about the design average coolant fluid temperature at the condenser outlet.

(9) If a carbon adsorber is used, then the owner or operator shall maintain continuous records of the concentration of organics or the concentration of benzene in the control device outlet gas stream. If the concentration of organics or the concentration of benzene in the control device outlet gas stream is monitored, then the owner or operator shall record all 3-hour periods of operation during which the concentration of organics or the concentration of benzene in the exhaust stream is more than 20 percent greater than the design value. If the carbon bed regeneration interval is monitored, then the owner or operator shall record each occurrence when the vent stream continues to flow through the control device beyond the predetermined carbon bed regeneration time.

* * * * *

(12) If a control device subject to the requirements of § 61.349(a)(2)(iv) of this subpart is used, then the owner or operator shall maintain records of the parameters that are monitored and each occurrence when the parameters monitored are outside the range of values specified in § 61.349 (a)(2)(iv)(C) of this subpart, or other records as specified by the Administrator.

* * * * *

(m) Each owner or operator of a facility at which the total annual benzene quantity from facility waste is equal to or greater than 10 Mg/yr as determined in accordance with the procedures specified in § 61.355(a) of this subpart shall have a plan for the management of benzene containing wastes generated from the emptying and purging of equipment and process units that are shut down temporarily for inspection, maintenance, and repair work (i.e., a maintenance turnaround).

(1) The provisions of this plan shall be implemented during each maintenance turnaround at the facility.

(2) This plan shall specify the procedures used by the owner or operator that are consistent with pollution prevention and good air pollution control practices to limit emissions of benzene to the atmosphere from activities associated with the maintenance turnaround of equipment or process units that contain or contact benzene or benzene mixtures.

(3) The owner or operator shall modify and update the plan as needed following each maintenance turnaround based on the actions taken and wastes generated during the preceding maintenance turnaround.

(4) The maintenance turnaround waste management plan shall be in the facility operating record by the date the facility becomes subject to the provisions of this subpart and shall be maintained for the life of the facility or until the facility is no longer subject to the provisions of this subpart.

13. Section 61.357 is amended by revising paragraphs (a) introductory text, (a)(4), (d)(1), (d)(3)(iii), (d)(6)(iii)(D), and (d)(7); and by adding paragraph (d)(6)(iii)(I) to read as follows:

§ 61.357 Reporting requirements.

(a) Each owner or operator of a chemical plant, petroleum refinery, coke by-product recovery plant, and any facility managing wastes from these industries shall submit to the Administrator within 90 days after the effective date of this subpart, or by the initial startup for a new source with an initial startup after the effective date, a report that summarizes the regulatory status of each waste stream subject to § 61.342 and is determined by the procedures specified in § 61.355(c) of this subpart to contain benzene. Each owner or operator subject to this subpart who has no benzene onsite in wastes, products, by-products, or intermediates shall submit an initial report that is a statement to this effect. For all other owners or operators subject to this subpart, the report shall include the following information:

* * * * *

(4) The information required in paragraphs (a)(1), (2), and (3) of this section should represent the owner's or operator's best estimate of the waste stream characteristics based on existing information and current configuration and operating conditions. An owner or operator only needs to list in the report those waste streams that contact materials containing benzene. The report does not need to include a description of the controls to be installed to comply with the standard or other information required in § 61.10(a) of this part.

* * * * *

(d) * * *

(1) Within 90 days after March 5, 1992, unless a waiver of compliance under § 61.11 of this part is granted, or by the date of initial startup for a new source with an initial startup after the effective date, a certification that the equipment necessary to comply with these standards has been installed and that the required initial inspections or tests have been carried out in accordance with this subpart. If a waiver of compliance is granted under § 61.11, the certification of equipment necessary to comply with these standards shall be submitted by the date the waiver of compliance expires.

* * * * *

(3) * * *

(iii) For each process wastewater stream identified as being controlled for benzene emissions in accordance with the requirements of this subpart, the table shall report the following information for the process wastewater stream as determined at the exit to the treatment process: Annual waste quantity, range of benzene concentrations, annual average flow-weighted benzene concentration, and annual benzene quantity.

* * * * *

(6) * * *

(iii) * * *

(D) Each 3-hour period of operation during which the average concentration of organics or the average concentration of benzene in the exhaust gases from a carbon adsorber, condenser, or other vapor recovery system is more than 20 percent greater than the design concentration level of organics or benzene in the exhaust gas.

* * * * *

(J) Each 3-hour period of operation during which the parameters monitored are outside the range of values specified in § 61.349(a)(2)(iv)(C) of this subpart, or any other periods specified by the Administrator for a control device subject to the requirements of § 61.349(a)(2)(iv) of this subpart.

(7) Beginning one year after the date that the equipment necessary to comply with these standards has been certified in accordance with paragraph (d)(1) of this section, the owner or operator shall submit annually to the Administrator a report that summarizes all inspections required by §§ 61.342 through 61.354 of this subpart during which detectable emissions are measured or a problem (such as a broken seal, gap or other problem) that could result in benzene emissions is identified, including information about the repairs or corrective action taken.

Thursday
March 5, 1992

Part IV

Department of Education

Vocational Rehabilitation Service Projects for American Indians With Handicaps; Notices

DEPARTMENT OF EDUCATION

Vocational Rehabilitation Service Projects for American Indians With Handicaps

AGENCY: Department of Education.

ACTION: Notice of final priorities for fiscal year 1992.

SUMMARY: The Secretary announces priorities for fiscal year 1992 for the Vocational Rehabilitation Service Projects for American Indians with Handicaps program. The Secretary takes this action to focus Federal financial assistance on identified national needs. The priorities are intended to increase the availability of vocational rehabilitation services to American Indians with disabilities living on reservations and Native Alaskans with disabilities living in tribal villages by—(1) Addressing the needs of Native Americans with specific learning disabilities; and (2) Addressing the needs of individuals with certain disabilities that are prevalent on the applicant's reservation or in the tribal village.

EFFECTIVE DATE: These priorities take effect either 45 days after publication in the Federal Register or later if the Congress takes certain adjournments. If you want to know the effective date of these priorities, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Edward Hofler, U.S. Department of Education, 400 Maryland Avenue, SW., room 3318 Switzer Building, Washington, DC 20202–2740. Telephone: (202) 732–1332. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., eastern time.

SUPPLEMENTARY INFORMATION: Grants under the Vocational Rehabilitation Service Projects for American Indians with Handicaps program are authorized by title I, section 130 of the Rehabilitation Act of 1973, as amended. The purpose of this program is to provide vocational rehabilitation services to American Indians and Native Alaskans with handicaps who reside on Federal or State reservations or in tribal villages in order to prepare them for suitable employment. This program, as well as the final priorities selected for this fiscal year, will further the Department's AMERICA 2000 strategy by assisting individuals with disabilities to compete in a global economy and exercise the rights and responsibilities of citizenship.

Applicable program regulations in 34 CFR part 371 call for projects to establish a vocational rehabilitation structure and provide services comparable to those provided to other individuals with disabilities served by the State vocational rehabilitation agencies. The regulations encourage cooperative arrangements between these projects and the State vocational rehabilitation system in order to provide complete and continuous services to American Indians living on reservations. An evaluation of this program completed in 1987 recommended that further efforts be made to establish a close and lasting relationship with the State vocational rehabilitation (VR) agency that will assure the project the necessary training, technical assistance, and provision of specific client services not feasible for the project to provide directly. A strong relationship with the State VR agency is also necessary to guarantee uninterrupted client services if and when the project ceases to receive Federal funding.

Furthermore, studies from the American Indian Research and Training Centers and program experience indicate that these projects cannot function effectively in isolation from other tribal components that provide human services. Each project needs to establish within its own tribal organization effective linkages with the human service delivery system offering social services, health care, alcohol dependency treatment, and other comparable programs that, if already in place on the reservation, should not be duplicated in the vocational rehabilitation program.

Effective linkages and appropriate referrals, however, cannot be made unless a good working relationship is created between the director of the project and the management of the other tribal human service agencies. To achieve more effective internal relations on the reservations, special attention needs to be given to the recruitment of project directors who are knowledgeable about the various services already in place on the reservation and who are knowledgeable about the cultural, linguistic, and political realities of the reservation or Indian village. In addition, project directors must be effective liaison persons who can work constructively with other managers and directors of related programs. Since voc rehabilitation is relatively new to many tribal organizations, the project director should be capable of communcating in an effective way to the existing human service delivery system the importance of the rehabilitation process for persons with disabilities.

On August 19, 1991 the Secretary published a notice of proposed priorities for these competitions in the Federal Register (56 FR 41180).

Note: This note of final priorities does not solicit applications. A notice inviting applications under these competitions is published in a separate notice in this issue of the Federal Register.

Analysis of Comments and Changes

In response to the Secretary's invitation in the notice of proposed priorities, eight parties submitted comments. An analysis of the comments and the Secretary's responses follow. Technical and other minor changes—and suggested changes the Secretary is not legally authorized to make under the applicable statutory authority—are not addressed. No substantive changes have been made since publication of the notice of proposed priorities.

Absolute Priority 1—Projects Addressing the Needs of American Indians With Specific Learning Disabilities (SLD)

Comments: Four commenters opposed this priority. One commenter opposing this priority indicated that priorities should be established only after direct consultation with tribal organizations concerning their needs. The other three commenters opposed the priority as being too restrictive and urged that any priorities for services to American Indians with SLD not hamper the opportunity to serve persons with other disabilities. One opposing commenter was especially concerned that this priority would increase the caseload of its vocational rehabilitation (VR) program to an unmanageable level, inflate the costs of rehabilitation because of the difficulty of serving persons with SLD, give preference to persons with SLD over persons with severe disabilities, and narrow the focus of the American Indian VR program to create a school-to-work transition project. This commenter also questioned whether the priority to serve clients with SLD will be adhered to for the three-year project period and, if the Secretary proposes a new priority for FY 1993, whether grantees funded under the FY 1992 priority will be eligible to apply for a new grant under a new FY 1993 priority.

Discussion: The Secretary acknowledges the need for ongoing consultation with American Indian organizations in the establishment of priorities responsive to their needs. The Department, in providing monitoring and technical assistance to tribal organizations, receives frequent input from India tribes concerning their needs related to serving persons with disabilities. The Secretary also recognizes the need for comprehensive VR services to all American Indians with disabilities, and the intention of the priority is not to limit the scope of services solely to persons with SLD. However, studies have shown that a larger percentage of American Indian youth enrolled in schools was classified as learning disabled than any other racial or ethnic group, and that this higher incidence of learning disabilities is thought to be related to learning delays at critical developmental points. Furthermore, while the establishment of this priority is intended to require an applicant to give special emphasis within its program to persons with specific learning disabilities, each applicant is bound to respond to the broader regulatory requirements of the section 130 program. All projects under this authority are required to provide vocational rehabilitation services comparable to those provided by the State agency to all individuals with disabilities.

The focus on service to clients with SLD within this priority is not intended to create a school-to-work transition project but rather to address a disability that poses one of the greatest obstacles to successful employment for American Indians, no matter what their ages may be.

This priority is expected to be implemented over the three-year life of the project starting in FY 1992, and it is hoped that models developed during that time will become permanent components of service to clients with SLD within the section 130 VR program. The SLD priority does not call for establishing a special VR project for persons with SLD, but rather a comprehensive VR structure with a focus on service to persons with SLD. Therefore, a grantee funded in FY 1992 for three years under this section 130 program may be eligible to apply for another section 130 grants, whether or not another priority is implemented for the FY 1993 competition, provided the applicant is proposing to set up an entirely new VR project to serve persons with the full range of disabilities at a geographical location distinct from that of the previous project.

Changes: None.

Comments: Three commenters supported this priority. Two of these commenters called for additional funds for the training of staff on the identification of SLD and on the implications of this disability for overall VR services. They also recommended that screening, identification, and evaluation criteria for potential SLD clients should be provided as soon as possible. One of these commenters stated that this priority was clearly necessary but that there was a need to carefully assess any persons thought to have SLD in order to avoid inappropriate classification of individuals into this disability category. This commenter emphasized the need to test students in their primary language as well as in English, if applicable, and to eliminate unfair or biased verbal items from any assessment procedure. Another supporting commenter recommended the inclusion of a data collector as a staff member to conduct a thorough survey on the prevalence of SLD and other disabilities in the geographic area of the tribe.

Discussion: The Secretary agrees that there is need for further training of section 130 VR staff on the diverse aspects of SLD. For those applicants who choose to respond to this priority, it will be necessary to seek assistance in the training of staff in the fair and accurate evaluation of potential SLD clients. Within the scope of the project, training and evaluation resources can be secured as needed by the use of outside consultants and by assessment services arranged through the State vocational rehabilitation agency. From the screening and evaluation of potential SLD clients through the actual delivery of rehabilitation services to those clearly diagnosed as having a specific learning disability, this priority calls for an approach that accounts not only for the difference between American Indian culture and other cultures, but also for tribal differences among Indian people. Effective diagnosis and subsequent delivery of rehabilitation services must grow out of procedures that reflect knowledge of the language and culture of the specific tribes, must recognize differences between traditional Indian values and specific tribal customs and concepts of other cultures, and must simultaneously address the functional limitations of each individual's disability.

While the suggestion of including a section 130 staff person to collect data on SLD has merit, the Secretary will not require such a staff member under this priority. Resources for the collection of data on SLD among American Indians and Alaskan natives can be obtained through the American Indian Research and Training Centers at Flagstaff and Tucson, Arizona.

Concerning any increase in funding for training and evaluation of potential SLD clients, there are no extra funds available to the American Indian VR program beyond those appropriated by Congress in a given fiscal year, even if absolute priorities are established.

Changes: None.

Absolute Priority 2—Projects Addressing Disabilities of High Prevalence on the Reservation or in the Tribal Village

Comments: Three commenters supported this priority. One commenter suggested that a staff person act as data collector to gather information identifying in rank order the disabilities of highest prevalence within the American Indian geographic locations served.

Discussion: For applicants responding to this priority, there is a need to verify the disabilities of highest prevalence on the reservation to be served by the section 130 program. However, the priority will not require the hiring of a specific person to gather that data. Assistance in gathering necessary data can be obtained through the Indian Health Service and the American Indian Research and Training Centers at Flagstaff and Tucson, Arizona.

Changes: None.

Comments: One commenter proposed that the Rehabilitation Services Administration provide planning grants to tribes expressing an interest in conducting a needs assessment on their reservations.

Discussion: The Secretary agrees that an assessment of vocational rehabilitation needs could be of benefit to the tribe. However, planning grants are not authorized under the section 130 program.

Changes: None.

Invitational Priority—Encouroging Applications From Tribal Organizations From the Midwestern or Eastern Areas of the Country or from Tribal Organizations not Previously Funded

Comments: Three commenters supported the invitational priority encouraging applications from the midwestern and eastern parts of the country and from applicants not previously funded. One commenter opposed the invitational priority. One of the supporting commenters recommended that, in encouraging more new applications while maintaining existing projects, consideration be given

to increasing the set-aside for Indian VR from the current one fourth of one percent to the full one percent authorized by section 110(d) (1) and (2) of the Rehabilitation Act of 1973, as amended.

The commenter who opposed the priority strongly objected to the invitational priority based on section 130(b)(4) of the Rehabilitation Act of 1973, as amended, which gives priority consideration to applications for the continuation of projects that have been funded under this program. As an alternative priority, this commenter recommended a revision of the priority to make increased funding available to encourage new applications from new geographic areas while granting priority to previously funded projects.

Discussion: The Secretary does not believe that the invitational priority conflicts with section 130(b)(4) of the Act. The invitational priority is an encouragement for tribal organizations from midwestern and eastern parts of the country, and tribes not previously funded, to apply. These new applicants are not given preference under this priority, and preference will still be given to previously funded projects in keeping with the Act. The funding level for the set-aside for the section 130 program is a decision of the Secretary and is not an issue for these priorities.

Changes: None.

General Comments

Comments: One commenter proposed a third absolute priority to address the VR needs of older persons with disabilities. The proposal is based on studies indicating both that persons over age 45 with disabilities are in greater need of rehabilitation and are more often successfully rehabilitated than younger persons.

Discussion: In order to ensure timely grant awards this year, the Secretary will not at this time entertain further absolute priorities for FY 1992. However, this suggestion will be taken into account in the process of establishing priorities for this program in future years.

Changes: None.

Priorities

Under 34 CFR 75.105(c)(3), the Secretary gives an absolute preference to applications that meet one of the following priorities. The Secretary funds under these competitions only applications that meet one of these absolute priorities:

Absolute Priority 1—Projects Addressing the Needs of American Indians with Specific Learning Disabilities

Background

According to the 1988 Elementary and Secondary School Civil Rights Survey conducted by the Department of Education, Office for Civil Rights, a larger percentage of American Indian youth (5.8 percent) enrolled in schools was classified as learning disabled than any other group (4.4 percent of African Americans enrolled have learning disabilities; 4.4 percent of White Americans enrolled have learning disabilities; 3.9 percent of Hispanic Americans enrolled have learning disabilities; and 1.4 percent of Asian Americans enrolled have learning disabilities.)

The characteristics of American Indian youth with specific learning disabilities (SLD) include significant differences between verbal and performance I.Q. scores; achievement scores below what one would expect based on I.Q. scores; processing deficits such as auditory sequencing and memory deficits despite intact hearing and sound discrimination skills; and behaviors consistently linked with learning disabilities, such as attention deficits, cognitive difficulties, difficulties in impulse control, poor interpersonal skills, and emotional problems. While the priority is not limited to American Indian youth, these data are representative of the general American Indian population.

Rehabilitation counseling literature recognizes the general need for screening, evaluation, and actual delivery of rehabilitation services that account not only for the difference between American Indian culture and other cultures, but also for tribal differences among Indian people. Thus, effective rehabilitation services to American Indians must grow out of procedures that reflect knowledge of the language and culture of a specific tribe, must recognize differences between traditional Indian values and specific tribal customs and concepts of other cultures, and must simultaneously address the functional limitations of each individual's disability.

Priority

Projects under this priority must prepare eligible American Indians with SLD for vocational training or employment using remedial, compensatory, and accommodative strategies to overcome the individual functional limitations of their disability, while introducing them to concepts from other cultures that are essential for being successful in the employment sector. These models must be developed in the context of a specific tribal culture by skilled professionals of that tribe. Projects must continue to serve all tribal members with disabilities in keeping with the overall purpose of the program.

In addition, all projects must meet the following three requirements: (1) Each project must have a cooperative working arrangement with the appropriate State vocational agency or agencies to facilitate complete and continuous services to American Indians and Native Alaskans served under the project. (2) Each project must have effective linkages with the existing human service delivery system within the specific tribe or consortium of tribes. (3) Each project must have a project director who is familiar with the specific tribal population and its cultural and linguistic needs, the reservation structures and policies, and the human service delivery system in place at each tribal organization.

Absolute Priority 2—Projects Addressing Disabilities of High Prevalence on the Reservation or in the Tribal Village

Background

Among the issues especially unique to the American Indian, as cited in a 1987 study done by the American Indian Research and Training Center, is the existence of a high variance in the prevalence of certain disabilities according to geographical area. It has been found that certain disabilities, such as diabetes, tuberculosis, specific learning disabilities, mental retardation, alcoholism, and substance abuse, are prevalent on certain reservations. There is the need to increase capacity to serve those disability groups representing conditions of high prevalence within the American Indian or Native Alaskan population by the geographic location served.

Priority

Projects under this priority must offer special measures or arrangements for effectively addressing specific disabilities of high prevalence on the reservation or in the tribal village, while continuing to serve all tribal members with disabilities in keeping with the overall purpose of the program.

In addition, all projects must meet the following three requirements: (1) Each project must have a cooperative working arrangement with the appropriate State vocational agency or agencies to facilitate complete and continuous services to American Indians and Native Alaskans served under the project. (2) Each project must have effective linkages with the existing human service delivery system within the specific tribe or consortium of tribes. (3) Each project must have a project director who is familiar with the specific tribal population and its cultural and linguistic needs, the reservation structures and policies, and the human service delivery system in place at each tribal organization.

Invitational Priority

Background

To date, only 39 (13 percent) of the 309 Federally-recognized American Indian tribes and only 4 (2 percent) of the 197 tribal villages in Alaska have received funding under this project authority. In addition, 16 of the 17 grants awarded under this authority have served reservations in the western, southwestern, and far-northwestern areas of the United States.

Priority

In conjunction with the preceding absolute priorities, the Secretary is particularly interested in encouraging applications from tribal organizations in the midwest or eastern areas of the country or from tribal organizations that have not yet been funded under this program authority. The Secretary is interested in expanding these projects into other areas of the country and in providing funding to other tribal organizations and tribal villages.

However, under 34 CFR 75.105(c)(1) an application that meets this invitational priority does not receive competitive or absolute preference over applications that do not meet the priority.

Applicable Program Regulations: 34 CFR parts 369 and 371.

Program Authority: 29 U.S.C. 750.

DEPARTMENT OF EDUCATION

[CFDA No.: 84.250]

Vocational Rehabilitation Service Projects for American Indians With Handicaps; Inviting Applications for New Awards for Fiscal Year (FY) 1992

Purpose of Program: To provide grants for vocational rehabilitation services to American Indians with handicaps who reside on Federal or State reservations.

Eligible Applicants: Governing bodies of Indian tribes and consortia of those governing bodies located on Federal and State reservations are eligible to apply for awards under this program.

Deadline for Transmittal of Applications: April 30, 1992.

Applications Available: March 9, 1992.

Available Funds: $3,000,910.

Estimated Range of Awards: $200,000–$850,000.

Awards are to be made in two priority areas. Specific information regarding the estimated average size and number of awards for each priority appears in the chart in this notice.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 36 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 75, 77, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR Parts 369 and 371.

Priorities: The priorities in the notice of final priorities for this program, as published elsewhere in this issue of the **Federal Register**, apply to these competitions.

For Applications or Information Contact: Bruce Rose, U.S. Department of Education, 400 Maryland Avenue, SW., room 3332, Switzer Building, Washington, DC 20202–2649. To request an application, call (202) 732–1347; to receive further information, call (202) 732–1325. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., eastern time.

Program Authority: 29 U.S.C. 750(a).

Dated: February 28, 1992.

Michael E. Vader,

Acting Assistant Secretary, Office of Special Education and Rehabilitative Services.

PROGRAM OF VOCATIONAL REHABILITATION SERVICE PROJECTS FOR AMERICAN INDIANS WITH HANDICAPS

CFDA number	Priority areas	Estimated average size of awards	Estimated number of awards
84.250A	Projects addressing disabilities of high prevalence on the reservation or in the tribal village.	$239,000	7
84.250B	Projects addressing the needs of American Indians with specific learning disabilities.	239,000	9

Department of Education

Special Projects and Demonstrations for Providing Supported Employment Services to Individuals With Severe Handicaps; Community-Based Projects; Notices

DEPARTMENT OF EDUCATION

Special Projects and Demonstrations for Providing Supported Employment Services to Individuals With Severe Handicaps; Community-Based Projects

AGENCY: Department of Education.

ACTION: Notice of final priorities for fiscal year 1992.

SUMMARY: The Secretary announces priorities for fiscal year 1992 under the program of Special Projects and Demonstrations for Providing Supported Employment Services to Individuals with Severe Handicaps authorized by title III, section 311(d) of the Rehabilitation Act, as amended. The Secretary takes this action to focus Federal financial assistance on areas of identified national need. These priorities are intended to expand and improve supported employment services to individuals with severe handicaps in rural areas, individuals with long-term mental illnesses, individuals with traumatic brain injury, individuals with severe physical disabilities, and individuals who are blind with at least one other disabling condition.

EFFECTIVE DATE: These priorities take effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments. If you want to know the effective date of these priorities, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: RoseAnn Godfrey, U.S. Department of Education, 400 Maryland Avenue, SW., room 3225 Switzer Building, Washington, DC 20202–2742. Telephone: (202) 732–1319. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., eastern time.

SUPPLEMENTARY INFORMATION: This notice contains three final priorities for community-based supported employment projects under the program of Special Projects and Demonstrations for Providing Supported Employment Services to Individuals with Severe Handicaps authorized by title III, section 311(d) of the Rehabilitation Act, as amended.

The purposes of community-based supported employment projects are to stimulate the development of innovative approaches for improving and expanding the provision of supported employment services to individuals with severe handicaps and to enhance local capacity to provide supported employment services. The Secretary funded 12 community-based projects in fiscal year (FY) 1989. These three-year projects are currently serving individuals with a wide range of severe disabilities. The Secretary has selected the following final priorities in FY 1992 in order to fund additional community-based projects that would increase services to individuals with severe handicaps who could benefit from supported employment. These priorities support the National Education Goals and AMERICA 2000, the President's strategy for achieving the goals, by providing improved opportunities for persons with severe handicaps to develop the skills and knowledge necessary to compete in a global economy.

The Rehabilitation Act of 1973, as amended, has been extended through FY 1992. We anticipate that the Rehabilitation Act will be reauthorized in FY 1992.

On September 26, 1991 the Secretary published a notice of proposed priorities for this program in the **Federal Register** (56 FR 48970).

Note: This notice of final priorities does *not* solicit applications. A notice inviting applications under these competitions is published in a separate notice in this issue of the **Federal Register.**

Analysis of Comments and Changes

In response to the Secretary's invitation in the notice of proposed priorities, 25 parties submitted comments. Sixteen commenters indicated general support for the priorities. Twenty commenters asked for certain changes in or clarification of the priorities. Technical and other minor changes—and suggested changes the Secretary is not legally authorized to make under the applicable statutory authority—are not addressed. An analysis of the comments and the Secretary's responses follow. One clarifying change has been made under Priority 2, Individuals with Long-Term Mental Illnesses. Language has been added to this priority to clarify that projects may demonstrate innovative approaches to providing either supported employment or transitional employment for individuals with long-term mental illnesses.

Priority 1—Individuals With Severe Handicaps in Rural Areas

Comments: Three commenters suggested that the Secretary make changes in the definition of rural area in this priority. One of these commenters stated that some metropolitan statistical areas contain sparsely populated areas similar to those that are defined as rural in this priority. The commenter was concerned that the proposed priority would exclude programs in metropolitan statistical areas that serve sparsely populated areas from applying for a grant under this priority. Another commenter noted that the definition of rural area does not address the special needs of individuals living in sparsely populated or frontier areas. Another commenter questioned whether individuals who reside in rural areas and relocate or commute to metropolitan areas could be served by projects funded under this priority.

Discussion: The Secretary acknowledges the difficulty in achieving consensus on a definition of rural areas. The definition adopted for this priority is well documented through publications of the 1990 decennial census. This definition takes into account commuting patterns and individual access to metropolitan centers. Sparsely populated areas are included in metropolitan statistical areas only when there is evidence that a substantial portion of the workforce in these areas regularly commutes to the center city or cities of the metropolitan area. Thus, the Secretary believes that this definition of rural areas is an effective means to limit applications under this priority to projects that serve individuals who reside in areas with very few services. Therefore, individuals who live outside of but regularly commute to metropolitan areas are eligible for supported employment services under this priority. Individuals who reside in a metropolitan area, whether sparsely populated or not, are not eligible for supported employment services under this priority. The Department believes that individuals who relocate from rural areas to metropolitan areas will have access to supported employment services because these services are generally more available in metropolitan areas.

Changes: None.

Priority 2—Individuals With Long-Term Mental Illnesses

Comments: One commenter requested that the Secretary recognize that transitional employment is an appropriate model of supported employment for individuals with long-term mental illnesses under this priority. This commenter requested that the Secretary encourage the submission of proposals that demonstrate innovative approaches in transitional employment for individuals with long-term mental illnesses.

Discussion: The Secretary agrees with the commenter that transitional employment should be recognized as an appropriate model of supported employment under this priority. The Secretary also wishes to point out that under the statute and current program regulations transitional employment is included within the definition of supported employment and is an authorized supported employment model.

Changes: The Secretary has added language under this priority to clarify that projects may demonstrate innovative approaches to providing supported employment, including transitional employment, for individuals with long-term mental illnesses.

Priority 3—Unserved and Underserved Populations

Comments: Eight commenters requested that this priority state that natural supports are an acceptable source of extended services in supported employment.

Discussion: The Secretary acknowledges that natural supports are an acceptable method for providing extended services. Natural supports are provided by co-workers, family members, friends, and others to assist individuals in supported employment with work-related tasks and daily living skills. No change is required in the priority.

Changes: None.

Comments: Several commenters requested that individuals with other severe disabilities, such as those who are deaf with one other disabling condition, those who are autistic, those who have seizure disorders, or those who have severe mental retardation, should be included as unserved or underserved groups under this priority.

Discussion: The particular unserved or underserved populations selected for this priority were chosen based upon data collected by the Rehabilitation Research and Training Center on Supported Employment at Virginia Commonwealth University. The Secretary agrees that certain other disability groups are unserved or underserved in supported employment. In the future, the Secretary hopes to expand funding priorities to other populations who require special approaches in supported employment.

Changes: None.

Comments: One commenter requested that this priority be modified to include individuals who are blind or severely visually impaired and who possess significant attendant factors that impose barriers to their rehabilitation.

Discussion: The Secretary does not believe the phrase "or severely visually impaired" needs to be added to the priority because blindness is defined broadly enough by rehabilitation programs to include most severe visual impairments as long as the impairment meets the standard for legal blindness. The Secretary agrees that many individuals who are blind possess significant attendant factors that impose additional barriers to their rehabilitation and that these individuals may be appropriate candidates for supported employment services. However, the purpose of the priority is to target funds for individuals who are blind and have a second disabling condition. This purpose would not be achieved if the priority were modified to allow the presence of significant attendant factors exacerbating blindness to substitute for the requirement for a second disability.

Changes: None.

Comments: Two commenters proposed that the priority targeting unserved and underserved populations should focus on individuals whose handicaps are severe rather than focusing on any specific disability group.

Discussion: All individuals served by projects funded under the program of Special Projects and Demonstrations for Providing Supported Employment Services to Individuals with Severe Handicaps under section 311(d) of the Rehabilitation Act must meet the definition of "individual with severe handicaps," as defined in 34 CFR 369.4(b). The purpose of this priority is to fund projects that demonstrate the capacity to develop innovative models for serving particular severe disability populations that are unserved or underserved in supported employment. The Secretary believes that these innovative models are necessary because the needs of the populations targeted under this priority vary and these individuals require specialized program models to serve them.

Changes: None.

Comments: One commenter suggested that the priority that focuses on unserved or underserved populations should support programs for Native Americans with disabilities. Another commenter requested that the Secretary expand this priority to include Native Americans who live on reservations.

Discussion: The Secretary acknowledges that many Native Americans with severe disabilities have special needs. However, the Secretary notes that projects serving Native Americans, including those living on reservations, may submit applications under any of the priorities contained in this notice.

Changes: None.

General Issues

Comments: One commenter requested that projects be allowed to budget for the provision and coordination of transportation services in their applications, if appropriate. The same commenter stated that projects should be permitted to fund transportation services while an individual is in extended services.

Discussion: The Secretary notes that projects funded under any of these priorities are permitted to use grant funds for transportation services for individuals served. Under Priority 1, projects are specifically required to address the availability of transportation services as part of their overall program of supported employment services. Additionally, program regulations (Special Projects and Demonstrations for Providing Supported Employment Services to Individuals with Severe Handicaps—Community-Based Projects, 34 CFR 380.5(b)) permit community-based projects to provide funding for transportation services only during the period of traditionally time-limited post-employment services (not to exceed eighteen months). Therefore, projects funded under these priorities are not permitted to use grant funds for extended services whether for transportation purposes or other rehabilitation needs.

Changes: None.

Comments: One commenter requested that projects funded under these priorities provide technical assistance to service providers so that innovative approaches can be replicated throughout the Nation.

Discussion: The secretary agrees and encourages projects funded under these priorities to plan for and provide technical assistance to service providers so that innovative approaches for providing supported employment services will be available nationally. Under the selection criteria for community-based supported employment projects in 34 CFR 380.12, the Secretary reviews each application and determines the extent to which project findings and results will be disseminated. Therefore, the Secretary believes there is no need to reiterate the requirement for dissemination of project results in these priorities.

Changes: None.

Comments: Two comenters believed that the priority that focuses on unserved and underserved populations should be ranked higher in importance than the other priorities listed in this notice.

Discussion: The Secretary notes that these commenters misunderstood the intent of the numerical listing of the priorities. The order in which the priorities are presented does not indicate the degree of their importance. Applications under each priority are evaluated independently based on the criteria for that priority and no one priority is ranked higher or considered more important than the others. Funds will be distributed among the priorities based upon the number of fundable applications received.

Changes: None.

Comments: One commenter requested that applicants under these priorities be required to propose appropriate roles for individual consumers, vocational rehabilitation counselors, employers, and community agencies to ensure their participation and to eliminate duplication of services.

Discussion: The Secretary agrees that supported employment requires effective community collaboration. However, the Secretary does not believe that it is necessary to specify the roles of individuals or agencies in these priorities.

Changes: None.

Priorities

Under 34 CFR 75.105(c)(3), the Secretary gives an absolute preference to applications that meet one of the following priorities. The Secretary funds under these competitions only applications that meet one of these absolute priorities:

Priority 1—Individuals with Severe Handicaps in Rural Areas

Information from the Research and Training Center on Rural Rehabilitation Services at the University of Montana substantiates that individuals with severe handicaps in rural areas are underserved and that their rehabilitation needs are different than the needs of individuals in urban areas. In addition, all community-based supported employment projects awarded in FY 1989 were located in urban areas. Information received from the 27 title III statewide systems change grants funded in FY 1985 and FY 1986 identified the need to expand supported employment services to rural areas. Most of the efforts of the systems change grantees were to develop supported employment services in the more populated areas of their States. One particular problem identified by these projects was that in providing supported employment services to individuals in rural areas a general lack of transportation services existed.

Projects under this priority must provide supported employment services to individuals with severe handicaps in rural areas. For the purposes of this priority, rural is defined as the area outside of metropolitan statistical areas as specified by the Office of Management and Budget and documented in the publications of the 1990 Decennial Census. As part of their overall program of supported employment services, projects must specifically address the availability of transportation services, as appropriate, in order to ensure that individuals served under the projects are able to commute to their employment.

All projects under this priority must arrange for the provision of extended services for the individuals with severe disabilities they serve. Extended services are on-going support services that are needed by an individual in supported employment to enable the individual to maintain a particular job placement when time-limited services (not to exceed 18 months) provided with funds under this program have ceased.

Priority 2—Individuals With Long-Term Mental Illnesses

Statistics regarding the participation of individuals with long-term mental illnesses in supported employment programs show that this population accounts for approximately 20 percent of the individuals served (Virginia Commonwealth University, 1991). However, significant issues still exist in providing supported employment services to this population. Many individuals with long-term mental illnesses have existing skills that may be difficult to transfer to the work setting. Even if they learn skills quickly, problems may arise in putting the job skills into practice and sustaining the skills over time. Different job intervention strategies are usually needed due to the nature of psychiatric disabilities. In maintaining individuals with long term mental illnesses in supported employment, studies have shown that emphasis should be placed on instructional interventions that focus on the "application" of appropriate job behaviors rather than the "acquisition" of these behaviors. Studies also indicate that the focus of the instructional content of new job skills and behaviors should be on interpersonal and intrapersonal demands of the job environment rather than the demands associated with specific job tasks ("The Choose-Get-Keep Model," Danley and Anthony, 1987).

Projects under this priority must develop innovative approaches for improving and expanding the provision of supported employment services, including transitional employment services, to individuals with long-term mental illnesses and must focus on variations in job intervention strategies needed to assist these individuals in maintaining employment.

All projects under this priority must arrange for the provision of extended services for the individuals with severe disabilities they serve. Extended services are on-going support services that are needed by an individual in supported employment to enable the individual to maintain a particular job placement when time-limited services (not to exceed 18 months) provided with funds under this program have ceased.

Priority 3—Unserved and Underserved Populations

Although there has been a tremendous growth in the number of individuals participating in supported employment, specific populations continue to be underrepresented. These populations include individuals with severe physical disabilities, individuals with traumatic brain injuries, and individuals with sensory impairments. Data collected by the Rehabilitation Research and Training Center on Supported Employment at the Virginia Commonwealth University for FY 1989 indicate that individuals with cerebral palsy accounted for 2.4 percent, individuals with sensory impairments accounted for 3.4 percent, and individuals with traumatic brain injuries accounted for 2.3 percent of the total number served.

Historically, the supported employment program model was developed to provide services to individuals with developmental disabilities. Recently, other disability populations have benefited from supported employment services. In an effort to expand and improve services to these populations under the supported employment program, innovative models must be considered in serving the needs of these individuals.

In order to increase supported employment services to these underrepresented populations, projects under this priority must develop innovative approaches for expanding the provision of supported employment services to one or more of the following unserved or underserved disability populations: (1) Individuals with severe physical disabilities. (2) Individuals with traumatic brain injuries. (3) Individuals who are blind and have at least one other disabling condition.

All projects under this priority must arrange for the provision of extended services for the individuals with severe disabilities they serve. Extended services are on-going support services that are needed by an individual in supported employment to enable the individual to maintain a particular job placement when time-limited services (not to exceed 18 months) provided with funds under this program have ceased. Because of the special needs of individuals with severe physical disabilities, individuals with traumatic brain injuries, and individuals who are blind and have at least one other disabling condition, all projects under this priority must include or arrange for the provision of rehabilitation engineering services, as appropriate, for the individuals they serve.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Special Projects and Demonstrations for Providing Supported Employment Services to Individuals With Severe Handicaps; Inviting Applications for New Awards for Fiscal Year (FY) 1992

Purpose of Program: To provide grants for community-based special projects and demonstrations to stimulate the development of innovative approaches for improving and expanding the provision of supported employment services to individuals with severe handicaps and to enhance local capacity to provide supported employment services.

Eligible Applicants: Applications for community-based projects may be submitted by public and nonprofit rehabilitation facilities, designated State units, and other public and private agencies and organizations.

Deadline for Transmittal of Applications: April 20, 1992.

Deadline for Intergovernmental Review: June 22, 1992.

Applications Available: March 9, 1992.

Available Funds: $1,713,280.

Estimated Range of Awards: $100,000–$130,000.

Estimated Average Size of Awards: $114,000.

Estimated Number of Awards: 15.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 36 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 380.

Priorities: The priorities in the notice of final priorities for this program, as published elsewhere in this issue of the **Federal Register**, apply to these competitions.

Department of Education

Vocational Rehabilitation Service Projects Program for Migratory Agricultural and Seasonal Farmworkers With Handicaps; Final Priority and Invitations for Applications for New Awards for Fiscal Year 1992; Notices

DEPARTMENT OF EDUCATION

Vocational Rehabilitation Service Projects Program for Migratory Agricultural and Seasonal Farmworkers With Handicaps

AGENCY: Department of Education.

ACTION: Notice of final priority for fiscal year 1992.

SUMMARY: The Secretary announces a priority for fiscal year 1992 under the Vocational Rehabilitation Service Projects Program for Migratory Agricultural and Seasonal Farmworkers with Handicaps. The Secretary takes this action to focus Federal financial assistance on identified national needs. This priority is intended to improve the provision of vocational rehabilitation services to individuals with handicaps who are migratory agricultural and seasonal farmworkers by expediting the eligibility determination and service delivery processes, improving communications through the use of bilingual counselors, and coordinating services for these individuals across State lines to facilitate continuity and completion of rehabilitation plans.

EFFECTIVE DATE: This priority takes effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments. If you want to know the effective date of this priority, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Edward Hofler, U.S. Department of Education, 400 Maryland Avenue, SW., room 3318 Switzer Building, Washington, DC 20202–2649. Telephone: (202) 732–1332. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION: Grants under the Vocational Rehabilitation Service Projects Program for Migratory Agricultural and Seasonal Farmworkers with Handicaps are authorized by title III, section 312 of the Rehabilitation Act of 1973, as amended. The purpose of this program is to provide grants to State or local vocational rehabilitation agencies to establish service delivery systems for the vocational rehabilitation of migratory and seasonal farmworkers with handicaps. Programs must be administered in coordination with other programs serving migrant agricultural and seasonal farmworkers, including programs under title I of the Elementary and Secondary Education Act of 1965, section 311 of the Economic Opportunity Act of 1964, the Migrant Health Act, and the Farm Labor Contractor Registration Act of 1963. This program and the final priority selected for this fiscal year will further AMERICA 2000, the President's strategy for moving the Nation toward the National Education Goals, by assisting individuals with handicaps to compete in a global economy and exercise the rights and responsibilities of citizenship.

An evaluation of this program completed in 1987 found that the migratory and seasonal farmworker population requires special services for their rehabilitation. This evaluation reported that 23 of the 50 States have a migratory and seasonal farmworker population. This evaluation highlighted the need for more bilingual counselors to work with this population.

In addition, migratory farmworkers are required to move often as the work in a particular area is completed. These frequent moves pose special problems in determining eligibility for services, providing services, maintaining agency contact, and completing rehabilitation plans. Development of innovative service models to expedite and coordinate the provision of services across State lines to this population may result in more individuals successfully completing the rehabilitation process.

On October 16, 1991, the Secretary published a notice of proposed priority for this competition in the **Federal Register** (56 FR 51962).

Note: This notice of final priority does not solicit applications. A notice inviting applications under this competition is published in a separate notice in this issue of the **Federal Register**.

Analysis of Comments and Changes

In response to the Secretary's invitation in the notice of proposed priority, five parties submitted comments. An analysis of the comments and the Secretary's responses follow. Based on the suggestion of one commenter, a change in the priority has been made to require that project directors must be knowledgeable about farm labor issues and sensitive to the special needs of the migratory agricultural and seasonal farmworkers (MSFW) population. Technical and other minor changes—and suggested changes the Secretary is not legally authorized to make under the applicable statutory authority—are not addressed.

Comments: Three commenters expressed support for this priority. One of these commenters suggested that information on assistive technology be made available to programs that serve the MSFW population.

Discussion: The Secretary agrees with the need for the effective dissemination of information on assistive technology that will enable MSFWs with handicaps to function in their accustomed employment. This suggestion will be given serious consideration in future priorities and in the provision of technical assistance to VR projects for MSFWs.

Changes: None.

Comments: One commenter from a State vocational rehabilitation (VR) agency with considerable experience in serving the MSFW population recommended that the final priority include an emphasis on the recruitment of program directors who are sensitive to the cultural and linguistic characteristics of the MSFW population, and who are knowledgeable and have personal experience with farm labor issues and the needs of farmworkers with handicaps in order to provide the most effective technical assistance possible.

Discussion: The Secretary agrees that projects under this priority must give special attention to the unique qualifications of the project director as well as the other staff.

Changes: Language has been added to the final priority to require that project directors must be knowledgeable about farm labor issues and sensitive to the special needs of the MSFW population.

Comments: The same commenter also suggested that the final priority clearly encourage the use of geographic-specific pilot projects to provide enhancements to existing VR service delivery programs that will accelerate the approval process and the delivery of VR services to the migrant target population.

Discussion: The Secretary does not believe that it is necessary to add this emphasis to the present priority in order to secure service models that will expedite the rehabilitation process for MSFWs with handicaps. It is expected that with leadership, effective liaison with the business and human service communities, and technical assistance specifically geared to the MSFW population, new projects will enhance the existing VR service delivery programs in an effective and more expeditious way.

Changes: None.

Comments: Another commenter recommended that projects under this priority be coordinated with projects funded by the Office of Migrant Education as well as the Department of Labor's Job Training Partnership Act (JTPA) projects.

Discussion: The Secretary appreciates the need for effective coordination of services among Federal agencies sharing similar goals in order to maximize the total program resources and to avoid duplication of services. The Rehabilitation Act and Federal regulations for this program require that each MSFW project be administered in cooperation with other organizations having special skills and experience in the provision of services to MSFWs. The Department of Education's program coordinator for this program actively participates in regular meetings of the Federal Interagency Committee on Migrants together with coordinators of migrant education, health, and employment program staff from the Departments of Education, Health and Human Services, Labor, and Agriculture. On a national level, the Federal Interagency Committee on Migrants shares program information and assists in the coordination of services provided to migrant workers on the State and regional levels. The State vocational rehabilitation agencies that administer the projects for the rehabilitation of MSFWs with handicaps are committed by the comparable services and benefits provisions of the Rehabilitation Act of 1973, as amended, to refer clients to other agencies that can provide services that are necessary to rehabilitation but are provided more effectively by another human service program. For example, State vocational rehabilitation programs coordinate closely with local JTPA projects for employment services and, if appropriate, refer VR clients to the JTPA program.

Changes: Language requiring coordination with appropriate departments has been included in a preceding paragraph of this Supplementary Information section.

Priority

Under 34 CFR 75.105(c)(3), the Secretary gives an absolute preference to applications that meet the following priority. The Secretary funds under this competition only applications that meet this absolute priority:

Priority—Service Models to Expedite the Rehabilitation Process

Priority will be given to projects that will develop and implement service models for expediting the eligibility determination process and accelerating the provision of necessary and appropriate services to migratory and seasonal farmworkers. In view of the extreme mobility of many migratory agricultural and seasonal farmworkers and the short time that they are available for receiving services in any one location, projects must use innovative methods to accelerate the provision of services to this population, such as revising and streamlining administrative procedures, pre-approval of routine case service expenditures, and coordination of services across State lines as migrant and seasonal farmworkers follow the available work.

Projects responding to this priority also must demonstrate the use of easily administered assessment tools as a component of the service model. Efforts must be directed to the modification of these tools to assure that the instruments take into account the unique characteristics and traits of the migratory agricultural and seasonal farmworkers, such as their ethnicity, language, and socioeconomic level. Project directors must be knowledgeable about farm labor issues and sensitive to the special needs of farmworkers with handicaps in order to provide the most effective technical assistance possible to rehabilitation and related program staff. In addition, the project must utilize bilingual intake workers, liaison persons, and vocational rehabilitation counselors who are able to communicate with the particular migratory and seasonal farmworker population to be served, and who possess the knowledge of and sensitivity to the unique rehabilitation needs of this population due to its unique characteristics.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for these programs.

DEPARTMENT OF EDUCATION

[CFDA No.: 84.128G]

Vocational Rehabilitation Service Projects Program for Migratory Agricultural and Seasonal Farmworkers With Handicaps—Service Models To Expedite the Rehabilitation Process; Notice Inviting Applications for New Awards for Fiscal Year (FY) 1992

Purpose of Program: To provide grants for vocational rehabilitation services to migratory agricultural workers with handicaps or seasonal farmworkers with handicaps.

Eligible Applicants: State vocational rehabilitation agencies or local agencies administering vocational rehabilitation programs under written agreements with State agencies are eligible to apply for awards under this program. A State agency may, if it chooses, enter into an agreement with the State vocational rehabilitation agencies of one or more other States to develop a cooperative program for the provision of vocational rehabilitation services.

Deadline for Transmittal of Applications: April 23, 1992.

Deadline for Intergovernmental Review: June 30, 1992.

Applications Available: March 9, 1992.

Available Funds: $289,000.

Estimated Range of Awards: $75,000–125,000.

Estimated Average Size of Awards: $96,300.

Estimated Number of Awards: 3.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 36 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR parts 369 and 375.

Priority: The priority in the notice of final priority for this program, as published elsewhere in this issue of the **Federal Register**, applies to this competition.

For Applications or Information Contact: Bruce Rose, U.S. Department of Education, 400 Maryland Avenue, SW., room 3332, Switzer Building, Washington, DC 20202–2649. To request an application, call (202) 732–1347. To receive further information, call (202) 732–1325. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service on 1–800–877–8339 (in the Washington, DC 202 area code,

telephone 708-9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 29 U.S.C. 777b.

Dated: February 28, 1992.

Robert R. Davila,

Assistant Secretary, Office of Special Education and Rehabilitative Services.

Part VII

Department of Education

Grants and Cooperative Agreements; Rehabilitation Short-Term Training Program; Notice

DEPARTMENT OF EDUCATION

Rehabilitation Short-Term Training

AGENCY: Department of Education.

ACTION: Notice of proposed priorities for fiscal year 1992.

SUMMARY: The Secretary proposes priorities for fiscal year 1992 under the Rehabilitation Short-Term Training program. The Secretary takes this action to focus Federal financial assistance on identified national needs. The President's AMERICA 2000 strategy is designed to achieve six National Education Goals, one of which is that "every adult American will be literate and will possess the knowledge and skills necessary to compete in a global economy * * *". With this action, the Secretary proposes to contribute to the achievement of this goal by training rehabilitation professionals so that they may better assist individuals with disabilities in acquiring the knowledge and skills to obtain employment. These priorities are intended to increase the supply of trained rehabilitation professionals in the areas of—(1) vocational rehabilitation of individuals who have a history of drug dependency; (2) evaluation and rehabilitation of individuals who are hard of hearing, including late-deafened adults; and (3) issues of cultural diversity in the rehabilitation of persons with disabilities.

DATES: Comments must be received on or before April 6, 1992.

ADDRESSES: All comments concerning these proposed priorities should be addressed to Mark Shoob, U.S. Department of Education, 400 Maryland Avenue, SW., room 3036 Switzer Building, Washington, DC 20202–2575.

FOR FURTHER INFORMATION CONTACT: Dr. Richard Melia, U.S. Department of Education, 400 Maryland Avenue, SW., room 3324 Switzer Building, Washington, DC 20202–2649. Telephone: (202) 732–1400. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION: The Rehabilitation Short-Term Training program is authorized by title III, section 304 of the Rehabilitation Act of 1973, as amended. The purpose of this discretionary grant program is to provide Federal support for developing and conducting special seminars, institutes, workshops, and other short-term courses in technical matters pertaining to the delivery of vocational, medical, social, and psychological rehabilitation services.

The Secretary will announce the final priorities in a notice in the **Federal Register**. The final priorities will be determined by responses to this notice, available funds, and other considerations of the Department. Funding of particular projects depends on the availability of funds, the nature of the final priorities, and the quality of the applications received. The publication of these proposed priorities does not preclude the Secretary from proposing additional priorities, nor does it limit the Secretary to funding only these priorities, subject to meeting applicable rulemaking requirements.

Note: This notice of proposed priorities does not solicit applications.

Priorities

Under 34 CFR 75.105(c)(3), the Secretary proposes to give an absolute preference to applications that meet one of the following priorities. The Secretary proposes to fund under these competitions only applications that meet one of these absolute priorities:

Proposed Priority 1—Rehabilitation Short-Term Training—Vocational Rehabilitation of Individuals Who Have a History of Drug Dependency

Background

The increasing attention to the War on Drugs is shared by Federal, State, and local agencies, and those agencies' resources are being developed and organized to rehabilitate individuals who have a history of drug dependency. This attention has increased the referrals of these individuals to State vocational rehabilitation (VR) agencies. Prior history of drug dependency may be a primary or secondary disability for these individuals, and it is frequently a major handicap to employment. The number of individuals with a history of drug abuse as a primary disability who were successfully rehabilitated has more than doubled between fiscal year 1984 (3,664 individuals; 1.7% of total rehabilitations) and fiscal year 1988 (7,572 individuals; 3.5% of total rehabilitations).

Individuals who have a history of drug dependency display distinctive and different characteristics and work histories, compared with other populations typically served by vocational rehabilitation counselors. In order to assist in serving these individuals, rehabilitation personnel need training on effective approaches to the vocational rehabilitation of persons who have a history of drug dependency.

The Rehabilitation Services Administration (RSA), in conjunction with the Office of Juvenile Justice and Delinquency Prevention of the U.S. Department of Justice (DOJ), sponsored an initiative in 1990–1991 to train vocational rehabilitation personnel in how to rehabilitate youths (ages 14 to 18) who have a history of drug dependency. The initiative had four primary objectives: (1) To assess the present resources and training available to vocational rehabilitation counselors in State agencies. (2) To design and develop culturally sensitive training modules to educate vocational rehabilitation counselors. (3) To demonstrate, through application of one or more training modules, effective approaches to vocational rehabilitation for youth who have a history of drug dependency. (4) To provide an evaluation plan to measure the relevancy of the training approach and modules. The Rehabilitation Services Administration believes that the same basic approach to personnel training to assist clients aged 14 to 18 can be applied to adults who have a history of drug dependency. The training modules developed as a result of objective (2) are culturally sensitive to the extent that they do not stereotype racial, ethnic, national, religious or other minorities in describing drug abuse. The modules do not address specific issues relevant to the cultures of vocational rehabilitation clients and how cultural factors and barriers relate to critical elements of the vocational rehabilitation process as presented in proposed priority 3.

Priority

Projects must develop training, utilizing information generated from the joint RSA/DOJ initiative and other appropriate sources, in order to enhance vocational rehabilitation services provided to adults who have a history of drug dependency. (Interested persons can call RSA at (202) 732–4281 for further details on the joint RSA/DOJ initiative.)

Projects must provide courses for pre-service educators and post-employment trainers of personnel working in State vocational rehabilitation agencies, centers for independent living, client assistance programs, rehabilitation facilities, and community-based programs for individuals with disabilities.

Projects must be national in scope and demonstrate potential for replication based on project impacts through the dissemination of training materials and protocols.

Proposed Priority 2—Rehabilitation Short-Term Training—Evaluation and Rehabilitation of Individuals Who Are Hard of Hearing, Including Late-Deafened Adults

Background

In recent years consumers and rehabilitation professionals alike have expressed concern about the capabilities of rehabilitation personnel to serve effectively those individuals who experience hearing loss but are not identified as "deaf." This population, generally referred to as "hard of hearing," and those individuals who become deaf as adults make up the vast majority of individuals disabled by hearing loss.

Of the 22 to 28 million persons estimated to have some degree of hearing loss, the vast majority are hard of hearing (Task Force Report from the National Institute on Deafness and Other Communicative Disorders, 1989). It is important to distinguish the significantly different needs of hard of hearing individuals from the needs of persons who experience early, prelingual deafness. Only approximately 500,000 of the total hearing impaired population experienced congenital or early onset deafness. These are deaf persons who have little or no hearing at birth, or those who lose most of their hearing before the age of 3 to 5 years. The majority of these individuals rely on sign language as their primary means of communication. In contrast, individuals who are hard of hearing, or who become deaf as adults, rely on augmentative communication devices (e.g., hearing aids, audio loops, lip reading, oral interpreting, and captioning).

Retaining employment for people who are hard of hearing is particularly difficult due to the frequently progressive nature of the disability, requiring adjustment and new accommodations. New low-cost interventions are available. However, these devices are generally underutilized. Rehabilitation personnel must learn to recognize the diverse needs of individuals who are hard of hearing and how to address the rehabilitative needs of this population.

Priority

Projects must train State vocational rehabilitation personnel and other professionals from nonprofit facilities directly supporting the State agency to better address the rehabilitative needs of individuals who are hard of hearing or who become deaf as adults. The training must include—(1) instruction on how to meet the diverse communication needs of hard of hearing individuals as well as individuals who become deaf as adults; (2) development and demonstration of training materials, including texts and video tapes, on the use of assistive technology and effective strategies to assist individuals who are hard of hearing or become deaf as adults to cope with the progressive nature of the disability; and (3) development and demonstration of an in-service training module on function assessment, use of community resources, and appropriate counseling and guidance techniques.

Projects must be national in scope and demonstrate potential for replication based on project impacts through the dissemination of training materials and protocols.

Proposed Priority 3—Rehabilitation Short-Term Training—Issues of Cultural Diversity in the Rehabilitation of Persons with Disabilities

Background

The literature on the workforce of the United States, including the Hudson Institute report (Workforce 2000) and Department of Labor reports, suggests that this country will experience increasingly widespread shortages of skilled labor in the upcoming century. This body of literature also suggests that individuals who are members of minority groups will represent a larger share of the workforce. Given a larger demand for workers and a workforce with an increased proportion of workers who are members of minority groups, it is reasonable to assume that a larger share of disabled, working age adults will be members of minority groups.

Training for counselors in issues relevant to the cultures of vocational rehabilitation clients is essential to the success of effectively providing vocational counseling and related vocational rehabilitative activities to minority clients. For example, studies indicate that minorities tend to drop out of counseling services at a higher rate than non-minorities. By way of explanation, they indicated that a lack of cultural awareness by counselors may lead to the use of rehabilitative techniques inconsistent with the norms and values of these populations. ("World Views and Counseling," Personnel and Guidance Journal, Sue, D., 1978, and "Ethnic Issues in Psychology: A Reexamination, "American Psychologist, Sue, S., 1983). In addition, research by the Research and Training Center at Howard University for Access to Rehabilitation and Economic Opportunity, Washington, DC, supports the need for training rehabilitation personnel on issues of cultural diversity. Therefore, the Secretary has determined that it is important for counselors and other rehabilitation professionals who support vocational rehabilitation efforts to be trained in issues of cultural diversity and in how to use that knowledge to improve their effectiveness in working with people from minority populations.

Priority

Projects must train State vocational rehabilitation agency and other professionals from nonprofit facilities directly supporting the State agency on issues relevant to the cultures of vocational rehabilitation clients. Projects must provide training in cultural factors and barriers relevant to the rehabilitation of people with vocational disabilities who are members of racial, ethnic, national, religious, or other minority populations. The training must address how those cultural factors and barriers relate to the critical elements of the vocational rehabilitative process, including outreach, vocational assessment, rehabilitation planning, counseling techniques, and job placement.

Projects must be national in scope and demonstrate potential for replication based on project impacts through the dissemination of training materials and protocols.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed priorities.

All comments submitted in response to this notice will be available for public inspection, during and after the comment period, in room 3324 Mary E. Switzer Building, 330 "C" Street, SW., Washington, DC between the hours of 8:30 a.m. and 4 p.m., Monday through Friday of each week except Federal holidays. Applicable Program Regulations: 34 CFR parts 385 and 390.

Program Authority: 29 U.S.C. 774.

Title 3—

The President

Executive Order 12790 of March 3, 1992

Amending the Order Establishing the Southwest Asia Service Medal

By the authority vested in me as President by the Constitution and the laws of the United States of America, including my authority as Commander in Chief of the Armed Forces of the United States, it is hereby ordered that Executive Order No. 12754 of March 12, 1991, is amended as follows:

Section 1. Section 1 is amended by deleting in the second sentence "Armed Forces" and by inserting in lieu thereof "Uniformed Services."

Sec. 2. Section 3 is amended to read: "The Secretaries of the Military Departments, with the approval of the Secretary of Defense; the Secretary of Transportation, with respect to the Coast Guard when it is not operating as a service in the Navy; the Secretary of Commerce, with respect to the National Oceanic and Atmospheric Administration; and the Secretary of Health and Human Services, with respect to the Public Health Service, are directed to prescribe uniform regulations governing the award and wearing of the Southwest Asia Service Medal."

George Bush

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

Rules and Regulations

Federal Register
Vol. 57, No. 45
Friday, March 6, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

FEDERAL RESERVE SYSTEM

12 CFR Part 204

[Docket No. R-0749]

Regulation D—Reserve Requirement of Depository Institutions

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board is amending its Regulation D to reduce the reserves required on net transaction account balances over $42.2 million from the current level of 12 percent to 10 percent, based on a determination that the current level of reserves required on these liabilities is in excess of the level necessary for the conduct of monetary policy, and that a reduction in the level of required reserves will provide an impetus for bank lending and overall economic activity by freeing funds now held as reserves and facilitating depository institutions' access to the capital markets.

EFFECTIVE DATE: April 2, 1992. For depository institutions that report deposits weekly, this reduction will become operative for the reserve maintenance period beginning April 2, 1992. For depository institutions reporting quarterly, the reduction will be operative for the reserve maintenance period starting April 16, 1992.

FOR FURTHER INFORMATION CONTACT: Patrick McDivitt, Attorney (202/452–3818), or Lawranne Stewart, Attorney (202/452–3513), Legal Division; or Joshua Feinman, Economist (202/452–2841), Division of Monetary Affairs. For the hearing impaired *only*, Telecommunications Device for the Deaf ("TDD"), Dorothea Thompson (202/452–3544).

SUPPLEMENTARY INFORMATION: Section 19(b)(2) of the Federal Reserve Act, as amended by title I of the Monetary Control Act of 1980 (Pub. L. 96–221 (March 31, 1980)), provides:

(A) Each depository institution shall maintain reserves against its transaction accounts as the Board may prescribe by regulation solely for the purpose of implementing monetary policy—

(i) In the ratio of 3 per centum for that portion of its total transaction accounts of [$42,200,000 or less]; [1] and

(ii) In the ratio of 12 per centum, or in such other ratio as the Board may prescribe not greater than 14 per centum and not less than 8 per centum, for that portion of its total transaction accounts in excess of [$42,200,000].

Currently, reserves on transaction accounts balances over $42.2 million are set at 12 percent under Regulation D. 12 CFR 204.9(a)(1).

The Board is exercising its authority under section 19 to reduce the reserve required against net transaction balances in excess of $42.2 million from 12 percent to 10 percent. It is taking this action based on a determination that the current level of reserves required on these liabilities is in excess of the level necessary for the conduct of monetary policy, and that a reduction in the level of required reserves will provide an impetus for bank lending and overall economic activity by freeing funds now held as reserves and facilitating depository institutions' access to the capital markets.

The last reductions to reserve requirements were made in December 1990, at which time reserves for nonpersonal time deposits and Eurocurrency liabilities were reduced from 3 percent to zero percent. These reductions, which were phased in over two reserve maintenance periods in December and January, resulted in a brief period of increased volatility in the federal funds rate and unpredictable demand for excess reserves. Depository institutions generally experience seasonal lows in required reserve balances at the beginning of the year, and the effect of the reductions was to decrease the reserve balances required at this time of year to levels below those needed for clearing purposes. As a result, banks had difficulty adjusting to the lower reserve requirements.

Although the current reduction in reserve requirements for transaction accounts is not expected to have similar effects, the reduction in transaction account reserves will not be effective until April in order to provide depository institutions with adequate time to adjust reserve management strategies.

To assist the adjustment to lower required reserve balances, the Board also is proposing for comment two amendments to Regulation D that are intended to reduce the seasonal variations in operating balance requirements and to improve the ability of depository institutions to manage their reserve balances. These amendments would reduce lags in the application of vault cash to reserve requirements and would increase the percentage of excesses or deficiencies that may be carried over into the next reserve maintenance period.[2]

Notice and Public Participation

The provisions of the Administrative Procedure Act relating to notice and public participation (5 U.S.C. 553(b)) have not been followed in connection with the adoption of this amendment. In view of the current lack of credit availability, the Board finds good cause for determining, and so determines, that notice and public participation are unnecessary and contrary to the public interest. The amendment will have the affect of decreasing a regulatory burden by lowering the reserves that depository institutions are required to maintain against transaction account. Banks have adopted a more cautious approach to lending, born in part out of concerns about capital, that has had a restraining effect on bank credit growth and a damping influence on aggregate economic actitivy. The announcement is expected to have immediate, beneficial effects on the ability of banks to raise capital. To the extent that an announcement of reserve requirement reductions will provide banks with easier access to capital markets, it should help to improve credit availability. Putting a proposed reduction out for notice and comment is

[1] Under section 19(b)(2)(C), the amount below which reserves on net transaction account balances are payable at 3 percent, known as the low reserve tranche, is adjusted annually in relation to the growth in total transaction accounts at all depository institutions. The most recent adjustment was made on December 17, 1991 (56 FR 60054 (November 27, 1991)).

[2] See accompanying proposed rule published elsewhere in today's issue of the Federal Register.

likely to delay or dilute any beneficial effects.

Regulatory Flexibility Act

Because the Board finds that no notice of proposed rulemaking is required, a statement concerning the effects of the rule on small entities is also not required under the Regulatory Flexibility Act. 5 U.S.C. 604. The Board notes, however, that the amendment imposes no additional reporting or recordkeeping requirements. Reserve requirements for depository institutions with net transaction accounts in excess of $42.2 million will be reduced by the action, and no other small entities should be affected. The first $42.2 million of net transaction accounts are subject a reserve requirement of 3 per cent by statute, and the Board does not have the authority to reduce this requirement.

List of Subjects in 12 CFR Part 204

Banks, banking, Currency, Federal Reserve System, Penalties, Reporting and recordkeeping requirements.

For the reasons set out in the preamble, and pursuant to the Board's authority under section 19 of the Federal Reserve Act, 12 U.S.C. 461 *et seq.*, the Board is amending 12 CFR part 204 to read as follows:

PART 204—RESERVE REQUIREMENTS OF DEPOSITORY INSTITUTIONS

1. The authority citation for part 204 continues to read as follows:

Authority: Sections 11(a), 11(c), 19, 25, 25(a) of the Federal Reserve Act (12 U.S.C. 248(a), 248(c), 371a, 371b, 461, 601, 611); section 7 of the International Banking Act of 1978 (12 U.S.C. 3105); and section 411 of the Garn St-Germain Depository Institutions Act of 1982 (12 U.S.C. 461).

2. Section 204.9 is amended by revising paragraph (a)(1) to read as follows:

§ 204.9 Reserve requirement ratios.

(a)(1) *Reserve percentages.* The following reserve ratios are prescribed for all depository institutions, Edge and Agreement corporations, and United States branches and agencies of foreign banks:

Category	Reserve requirement
Net transaction accounts: [1]	
$0 to $42.2 million	3 percent of amount.
Over $42.2 million	$1,266,000 plus 10 percent of amount over $42.2 million.
Nonpersonal time deposits	0 percent.
Eurocurrency liabilities	0 percent.

[1] Dollar amounts do not reflect the adjustment to be made in the next paragraph.

* * * * *

By order of the Board of Governors of the Federal Reserve System, March 2, 1992.

William W. Wiles,

Secretary of the Board.

[FR Doc. 92-5218 Filed 3-5-92; 8:45 am]

BILLING CODE 6210-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 91-CE-74-AD; Amendment 39-8189; AD 92-06-09]

Airworthiness Directives; Beech Models 1900 and 1900C Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This action supersedes Airworthiness Directive (AD) 91-12-02, which currently requires initial and repetitive inspections of the engine trusses for cracks at weld joints on certain Beech Models 1900 and 1900C airplanes, repair or replacement of engine trusses found cracked, and the installation of reinforcement doublers. New trusses have been manufactured that, if installed, would allow for the elimination of the inspection requirements of AD 91-12-02. In addition, the Federal Aviation Administration (FAA) has determined that different repetitive inspection intervals should be established for certain weld joint areas of the engine mounts. This action will retain the requirements of AD 91-12-02, but would change the repetitive inspection intervals and allow the repetitive inspections to be terminated if a certain engine truss is installed. The actions specified by this AD are intended to prevent engine truss failure, which could result in complete loss of the engine from the airplane.

DATES: Effective April 17, 1992. The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 17, 1992.

ADDRESSES: Service information that is applicable to this AD may be obtained from the Beech Aircraft Corporation, Commercial Service, Department 52, P.O. Box 85, Wichita, Kansas 67201-0085; Telephone (316) 676-7111. This information may also be examined at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Don Campbell, Aerospace Engineer, Airframe Branch, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 946-4128.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an AD that would supersede AD 91-12-02, which currently requires initial and repetitive inspections of the engine trusses for cracks at weld joints on certain Beech Models 1900 and 1900C airplanes, repair or replacement of engine trusses found cracked, and the installation of reinforcement doublers, was published in the **Federal Register** on November 15, 1991 (56 FR 57996). The action proposed retaining the requirements of AD 91-12-02, but changing the repetitive inspection intervals and allowing the repetitive inspections to be terminated if a certain engine truss is installed. The proposed actions would be done in accordance with Beech Service Bulletin No. 2255, Revision III, dated November 1991.

Interested persons have been afforded an opportunity to participate in the making of this amendment. One comment was received in favor of the proposed rule. No comments were received on the FAA's determination of the cost to the public. After careful review, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed except for minor editorial corrections. The FAA has determined that these minor corrections will not change the meaning of the AD nor add any additional burden upon the public than was already proposed.

The FAA estimates that 202 airplanes in the U.S. registry will be affected by this AD, that it will take approximately 19 hours per airplane to accomplish the required action, and that the average labor rate is approximately $55 an hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $235,125. The above cost analysis is the same as AD 91-12-02, which will be superseded by this action. There will be no additional cost impact on U.S. operators by this action than that required by AD 91-12-02.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES**".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing AD 91-12-02, **Amendment 39-7013** (56 FR 23996, May 28, 1991), and by adding the following new airworthiness directive:

92-06-09 BEECH: Amendment 39-8189; Docket No. 91-CE-74-AD. Supersedes AD 91-12-02, Amendment 39-7013.

Applicability: Model 1900 airplanes (serial numbers (S/N) UA-2 and UA-3); Model 1900C airplanes (S/N UB-1 through UB-74, S/N UC-1 through UC-156, and UD-1 through UD-6), certificated in any category.

Compliance: Required initially upon the accumulation of 1,700 hours time-in-service (TIS), or within the next 100 hours TIS after July 1, 1991 (the effective date of AD 91-12-02), whichever occurs later, unless already accomplished, and thereafter as indicated.

To detect cracks and prevent possible failure of the engine truss assembly, accomplish the following:

(a) If either engine truss, part number (P/N) 118-910025-37 or P/N 118-910025-121 is installed, or if either engine truss P/N 114-910025-1 or P/N 118-910025-1 that is equipped with reinforcement doublers at the engine firewall attachment bosses is installed, inspect the engine truss for cracks at the weld joints in accordance with the instructions in Beech Service Bulletin (SB) 2255, Revision III, dated November 1991.

(1) If no cracks are found, return the airplane to service and visually reinspect the engine truss at the weld joint areas as specified in paragraph (c) of this AD in accordance with the instructions in Beech SB No. 2255, Revision III, dated November 1991.

(2) If cracks are found, prior to further flight, accomplish one of the following in accordance with the instructions in Beech SB No. 2255, Revision III, dated November 1991:

(i) Repair the cracked engine truss or replace the cracked engine truss with a serviceable truss, P/N 118-910025-37 or P/N 118-910025-121, and visually reinspect the engine trusses at the weld joint areas as specified in paragraph (c) of this AD; or

(ii) Replace the cracked engine truss with a new improved engine truss by installing Beech Kit 114-9036-1 or 114-9036-3. This action terminates the need for any repetitive inspections required by this AD.

(b) If either engine truss, P/N 114-910025-1 or P/N 118-910025-1 that is not equipped with reinforcement doublers at the engine firewall attachment bosses is installed, inspect the engine truss for cracks at the weld joints in accordance with the instructions in Beech SB No. 2255, Revision III, dated November 1991.

(1) If no cracks are found, install reinforcement doublers in accordance with the instructions in Beech SB No. 2255, Revision III, dated November 1991, and visually reinspect the engine trusses at the weld joint areas as specified in paragraph (c) of this AD in accordance with the instructions in Beech SB No. 2255, Revision III, dated November 1991.

(2) If cracks are found, prior to further flight, accomplish one of the following in accordance with the instructions in Beech SB No. 2255, Revision III, dated November 1991:

(i) Repair the cracked engine truss, install reinforcement doublers, and visually reinspect the engine trusses at the weld joint areas as specified in paragraph (c) of this AD;

(ii) Replace the cracked engine truss with a serviceable truss, P/N 118-910025-37 or P/N 118-910025-121, and visually reinspect the engine trusses at the weld joint areas as specified in paragraph (c) of this AD; or

(iii) Replace the cracked engine truss with a new improved engine truss by installing Beech Kit 114-9036-1 or 114-9036-3. This action terminates the need for any repetitive inspections required by this AD.

(c) Accomplish the repetitive inspections required by paragraph (a)(1), (a)(2)(i), (b)(1), (b)(2)(i), or (b)(2)(ii) of this AD at the intervals below at the areas specified in Figure 1: Engine Truss Inspection Areas of Beech SB No. 2255, Revision III, dated November 1991:

Inspection area	Inspection interval—hours (TIS)
A	300
B	600
C	3,000

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a location where the requirements of this AD can be accomplished.

(e) An alternative method of compliance or adjustment of the initial or repetitive compliance times that provides an equivalent level of safety may be approved by the Manager, Wichita Aircraft Certification Office, 1801 Airport Road, room 100, Mid-Continent Airport, Wichita, Kansas 67209. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Wichita Aircraft Certification Office.

(f) The inspections, replacements and installations required by this AD shall be done in accordance with Beech Service Bulletin No. 2255, Revision III, dated November 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CRR part 51. Copies may be obtained from Beech Aircraft Corporation, Commercial Service, Department 52, P.O. Box 85, Wichita, Kansas 67201-0085. Copies may be inspected at the FAA, Central Region, Office of the Assistant Chief Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri, or at the Office of the Federal Register, 1100 L Street, NW., room 8401, Washington, DC.

(g) This amendment (39-8189) supersedes AD 91-12-02, Amendment 39-7013.

(h) This amendment (39-8189) becomes effective on

Issued in Kansas City, Missouri, on February 25, 1992.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

Federal Aviation Administration

14 CFR Part 39

[Docket No. 91-CE-55-AD; Amendment 39-8188; AD 92-06-08]

Airworthiness Directives; Gulfstream American Model GA-7 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain Gulfstream American Model GA-7 airplanes. This action requires an inspection of the elevator hinge for cracks, replacement of

the elevator if cracks extend into certain areas, and the installation of Service Kit No. 12. There have been several field reports and service difficulty reports of cracks in the elevator spar center hinge area of the affected airplanes. The actions specified by this AD are intended to prevent elevator binding and loss of pitch control, which could result in loss of control of the airplane .

DATES: Effective April 17, 1992. The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 17, 1992.

ADDRESSES: Service information that is applicable to this AD may be obtained from the American General Aircraft Corporation, Route 1, AB 306, P.O. Box 5757, Greenville, Mississippi 38703. This information may also be examined at the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. David Cundy, Aerospace Engineer, FAA, Atlanta Aircraft Certification Office, 1669 Phoenix Parkway, suite 210C, Atlanta, Georgia 30349; Telephone (404) 991–2910; Facsimile (404) 991–3606.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an AD that is applicable to certain Gulfstream American Model GA–7 airplanes was published in the **Federal Register** on November 19, 1991 (56 FR 58328). The action proposed an initial inspection of the elevator hinge for cracks; replacement of the elevator if cracks are found that extend inboard of stabilizer station 41.0, outboard of stabilizer station 45.0, or into the spar caps; and the installation of Service Kit No. 12. The proposed actions would be accomplished in accordance with the modification instructions that are contained in the instructions for GA–7/Cougar Aircraft Service Kit No. 12, referenced by American General Service Bulletin ME–1A, dated February 21, 1991.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received on the proposed rule or the FAA's determination of the cost to the public. After careful review, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed except for minor editorial corrections. The FAA has determined that these minor corrections will not change the meaning of the AD nor add any additional burden upon the public than was already proposed.

The FAA estimates that 115 airplanes in the U.S. registry will be affected by this AD, that it will take approximately 10 hours per airplane to accomplish the required action, and that the average labor rate is approximately $55 an hour. Parts cost approximately $200 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $124,200.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **"ADDRESSES"**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

92–06–08 Gulfstream American: Amendment 39–8188; Docket No. 91–CE–66–AD.

Applicability: Model GA–7 airplanes (serial numbers GA7–0001 through GA7–0115), certificated in any category.

Compliance: Required within the next 100 hours time-in-service after the effective date of this AD, unless already accomplished.

To prevent elevator binding and loss of pitch control, which could result in loss of control of the airplane, accomplish the following:

(a) Dye penetrant inspect the elevator spar between stabilizer station 41.0 and 45.0 for cracks by accomplishing paragraphs A–1, A–2, A–3, B–1, B–2 and B–3 of the Modification Instructions in the instructions for GA–7/Cougar Aircraft Service Kit No. 12, referenced by American General Service Bulletin ME–1A, dated February 21, 1991.

(1) If cracks are found that extend inboard from station 41.0, outboard of station 45.0, or into the spar caps, prior to further flight, replace the elevator and accomplish the following:

(i) Install Service Kit No. 12 by accomplishing paragraphs B–5 through B–20 of the Modification Instructions in the instructions for GA–7/Cougar Aircraft Service Kit No. 12, referenced by American General Service Bulletin ME–1A, dated February 21, 1991.

(ii) Balance the new elevator in accordance with Gulfstream American Model GA–7 Maintenance Manual, Chapter 27–1–1.

(iii) Install the new elevator in accordance with Gulfstream American Model GA–7 Maintenance Manual, Chapter 27–3–1.

(2) If cracks are found that do not extend inboard from station 41.0, outboard of station 45.0, or into the spar caps, prior to further flight, accomplish the following:

(i) Stop drill any cracks found.

(ii) Install Service Kit No. 12 by accomplishing paragraphs B–5 through B–20 of the Modification Instructions in the instructions for GA–7/Cougar Aircraft Service Kit No. 12, referenced by American General Service Bulletin ME–1A, dated February 21, 1991.

(iii) Balance the elevator in accordance with Gulfstream American Model GA–7 Maintenance Manual, Chapter 27–1–1.

(iv) Reinstall the elevator in accordance with Gulfstream American Model GA–7 Maintenance Manual, Chapter 27–3–1.

(3) If no cracks are found, prior to further flight accomplish the following:

(i) Install Service Kit No. 12 by accomplishing paragraphs B–5 through B–20 of the Modification Instructions in the instructions for GA–7/Cougar Aircraft Service Kit No. 12, referenced by American General Service Bulletin ME–1A, dated February 21, 1991.

(ii) Balance the elevator in accordance with Gulfstream American Model GA–7 Maintenance Manual, Chapter 27–1–1.

(iii) Reinstall the elevator in accordance with Gulfstream American Model GA–7 Maintenance Manual, Chapter 27–3–1.

(b) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(c) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Atlanta Aircraft Certification Office, 1669 Phoenix Parkway, suite 210C, Atlanta, Georgia 30349. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Atlanta Aircraft Certification Office.

(d) The inspection and installation required by this AD shall be done in accordance with the instructions contained in GA–7/Cougar Aircraft Service Kit No. 12, referenced by American General Service Bulletin ME–1A, dated February 21, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from American General Aircraft Corporation, Route 1, AB 306, P.O. Box 5757, Greenville, Mississippi 38703. Copies may be inspected at the FAA, Central Region, Office of the Assistant Chief Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri, or at the Office of the Federal Register, 1100 L Street, NW., room 8401, Washington, DC.

(e) This amendment (39–8188) becomes effective on April 17, 1992.

Issued in Kansas City, Missouri, on February 25, 1992.

Barry D. Clements,

Manager, Small Airplane Directorate Aircraft Certification Service.

[FR Doc. 92–4980 Filed 3–5–92; 8:45 am]

BILLING CODE 4910–13–M

14 CFR Part 39

[Docket No. 91–CE–81–AD; Amendment 39–8190; AD 92–06–10]

Airworthiness Directives; SOCATA Groupe AEROSPATIALE Morane Saulnier MS890 Series and Rallye 235 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to SOCATA Groupe AEROSPATIALE Morane Saulnier MS890 series and Rallye 235 series airplanes. This action requires repetitive dye penetrant inspections of the nose wheel axle for cracks, replacement of the nose wheel axle if found cracked, and replacement of the nose wheel axle attaching screws. Reports received by the Federal Aviation Administration (FAA) show that cracks could form in the nose wheel axle and the nose wheel axle attaching screws could fail over time. The actions specified by this AD are intended to prevent loss of control of the airplane caused by nose gear wheel axle fatigue failure.

DATES: Effective April 17, 1992. The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 17, 1992.

ADDRESSES: Service information that is applicable to this AD may be obtained from SOCATA Groupe AEROSPATIALE, Socata Product Support, Aeroport Tarbes-Ossun-Lourdes, B P 930, 65009 Tarbes Cedex, France; Telephone 62.41.74.26; Facsimile 62.41.74.32; or the Product Support Manager, U.S AEROSPATIALE, 2701 Forum Drive, Grand Prairie, Texas 75053; Telephone (214) 641–3614; Facsimile (214) 641–3527. This information may also be examined at the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Raymond A. Stoer, Program Officer, Brussels Aircraft Certification Office, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, B–1000 Brussels, Belgium; Telephone (322) 513.38.30; Facsimile (322) 230.68.99; or Mr. Mike Dahl, Project Officer, Small Airplane Directorate, Airplane Certification Service, FAA, 601 E. 12th Street, Kansas City, Missouri 64106; Telephone (816) 426–6932; Facsimile (816) 426–2169.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an AD that is applicable to certain SOCATA Groupe AEROSPATIALE Morane Saulnier MS890 series and Rallye 235 series airplanes was published in the **Federal Register** on November 21, 1991 (56 FR 58655). The action proposed repetitive dye penetrant inspections of the nose wheel axle for cracks, replacement of the nose wheel axle if found cracked, and replacement of the nose wheel axle attaching screws. The actions would be accomplished in accordance with the instructions in SOCATA Groupe AEROSPATIALE Service Bulletin No. 150, dated June 1991.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received on the proposed rule or the FAA's determination of the cost to the public. After careful review, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed except for minor editorial corrections. The FAA has determined that these minor corrections will not change the meaning of the AD nor add any additional burden upon the public than was already proposed.

The FAA estimates that 72 airplanes in the U.S. registry will be affected by this AD, that it will take approximately 2 hours per airplane to accomplish the required action, and that the average labor rate is approximately $55 an hour. Parts cost approximately $16 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $9,072.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **"ADDRESSES"**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

92–06–10 Socata Groupe Aerospatiale: Amendment 39–8190; Docket No. 91–CE–81–AD.

Applicability: Morane Saulnier Models MS892A150, MS892E150, MS893A, MS893E, MS894A, and MS894E airplanes (all serial numbers); and Rallye Models 235C and 235E

airplanes (all serial numbers), certificated in any category.

Compliance: Required initially upon accumulation of 500 hours time-in-service (TIS) or within the next 50 hours TIS after the effective date of this AD, whichever occurs later, and thereafter, as indicated, unless already accomplished.

To prevent nose wheel axle fatigue failure, accomplish the following:

(a) Dye penetrant inspect the nose wheel axle assembly for cracks in accordance with the instructions in DESCRIPTION: (1) of SOCATA Groupe AEROSPATIALE Service Bulletin No. 150, dated June 1991.

(1) If cracks are found, prior to further flight, replace the nose wheel axle assembly in accordance with the applicable maintenance manual, and reinspect thereafter at intervals not to exceed 500 hours TIS.

(2) If no cracks are found, reinspect thereafter at intervals not to exceed 500 hours TIS.

(b) At every 4th repetitive inspection interval (2,000 hours TIS) mandated in paragraphs (a)(1) and (a)(2) of this AD, replace the nose wheel axle attaching screws instead of reinstalling the existing screws as specified in the instructions of DESCRIPTION: (2) of SOCATA Groupe AEROSPATIALE SB No. 150, dated June 1991.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the compliance times that provides an equivalent level of safety, may be approved by the Manager, Brussels Aircraft Certification Office, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, B-1000 Brussels, Belgium. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Brussels Aircraft Certification Office.

(e) The inspections and replacements required by this AD shall be done in accordance with SOCATA Groupe AEROSPATIALE Service Bulletin No. 150, dated June 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from SOCATA Groupe AEROSPATIALE, Socata Product Support, Aeroport Tarbes-Ossun-Lourdes, B P 930, 65009 Tarbes Cedex, France. Copies may be inspected at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri, or at the Office of the Federal Register, 1100 L Street, NW.; room 8401, Washington, DC.

(f) This amendment (39-8190) becomes effective on April 17, 1992.

Issued in Kansas City, Missouri, on February 25, 1992.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc 92-4979 Filed 3-5-92; 8:45 am]

BILLING CODE 4910-13-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 14

Advisory Committees; Food Advisory Committee; Establishment

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is announcing the establishment by the Commissioner of Food and Drugs of the Food Advisory Committee in the FDA's Center for Food Safety and Applied Nutrition. A notice requesting nominations for membership on this committee will publish at a later date. This document adds to the agency's list of standing advisory committees. The authority citation for 21 CFR part 14 is also being revised to reflect changes made as a result of the transfer and redesignation of certain sections of the Public Health Service Act to the Federal Food, Drug, and Cosmetic Act, by the Safe Medical Devices Act of 1990.

DATES: This rule becomes effective March 6, 1992. Authority for the committee being established will end on December 15, 1993, unless the Commissioner of Food and Drugs formally determines that renewal is in the public interest.

FOR FURTHER INFORMATION CONTACT: Donna M. Combs, Committee Management Office (HFA-306), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-2765.

SUPPLEMENTARY INFORMATION: Under the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463), section 903 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 394) as amended by the Food and Drug Revitalization Act (Pub. L. 101-635), and 21 CFR 14.40(b), FDA is announcing the establishment by the Commissioner of Food and Drugs of the Food Advisory Committee.

The committee shall provide advice primarily to the Director, Center for Food Safety and Applied Nutrition, and as needed, to the Commissioner and other appropriate officials on emerging food safety, food science, and nutrition issues that FDA considers of primary importance in the next decade. The committee shall also provide advice and make recommendations on ways of communicating to the public the potential risks associated with these issues, and recommend approaches that may be considered in addressing the issues.

The Safe Medical Devices Act of 1990, Public Law 101-629, enacted November 28, 1990, amended subpart 3 "Electronic Product Radiation Control" of part F of title III of the Public Health Service Act, and redesignated sections 354 through 360F of that act as sections 530 through 542 of the Federal Food, Drug, and Cosmetic Act, respectively.

Because these are technical amendments to 21 CFR part 14, the Commissioner of Food and Drugs finds under 5 U.S.C. 553(b)(B) and 21 CFR 10.40 (c), (d), and (e), that notice and public procedure are unnecessary and contrary to the public interest. Therefore, the agency is revising the authority citation for 21 CFR part 14 and adding new paragraph (g) to 21 CFR 14.100 as set forth below.

List of Subjects in 21 CFR Part 14

Administrative practice and procedure, Advisory committees, Color additives, Drugs, Radiation protection.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 14 is amended as follows:

PART 14—PUBLIC HEARING BEFORE A PUBLIC ADVISORY COMMITTEE

1. The authority citation for 21 CFR part 14 is revised to read as follows:

Authority: Sec. 201-903 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321-394); 21 U.S.C. 41-50, 141-149, 467f, 679, 821, 1034; secs. 2, 351, 361 of the Public Health Service Act (42 U.S.C. 201, 262, 264); secs. 2-12 of the Fair Packaging and Labeling Act (15 U.S.C. 1451-1461); 5 U.S.C. App. 2; 28 U.S.C. 2112.

2. Section 14.100 is amended by adding new paragraph (g) to read as follows:

§ 14.100 List of standing advisory committees.

* * * * *

(g) *Center for Food Safety and Applied Nutrition—Food Advisory Committee.* (1) Date established: December 15, 1991.

(2) Function: The committee provides advice on emerging food safety, food science, and nutrition issues that FDA considers of primary importance in the next decade.

Dated: March 2, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

BILLING CODE 4160-01-M

21 CFR Part 173

[Docket No. 87F-0013]

Secondary Direct Food Additives Permitted in Food for Human Consumption; Chemicals for Controlling Micro-Organisms in Cane-Sugar and Beet-Sugar Mills

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of glutaraldehyde as a chemical for controlling micro-organisms in beet-sugar mills. This action is in response to a petition filed by Union Carbide Corp.

DATES: Effective March 6, 1992; objections by April 6, 1992.

ADDRESSES: Written objections may be sent to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Andrew D. Laumbach, Center for Food Safety and Applied Nutrition (HFF-334), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202-254-9519.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of March 16, 1987 (52 FR 8112), FDA announced that a food additive petition (FAP 7A3981) had been filed by Union Carbide Corp., P.O. Box 670, Bound Brook, NJ 08805, proposing that § 173.320 Chemicals for controlling micro-organisms in cane-sugar and beet-sugar mills (21 CFR 173.320) be amended to provide for the safe use of glutaraldehyde as a chemical for controlling micro-organisms in cane-sugar and beet-sugar mills.

The agency has since determined that the March 16, 1987, filing notice incorrectly described the petitioner's request because the petition specifically requested approval for the use of glutaraldehyde as an antimicrobial agent to control micro-organisms solely in beet-sugar mills. Therefore, the agency is amending the food additive regualtion in § 173.320 by adding paragraph (b)(6) to provide for the safe use of glutaraldehyde as a chemical for controlling micro-organisms in beet-sugar mills.

FDA has evaluated data in the petition and other relevant material. The agency concludes that the proposed food additive use is safe and that the regulations should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Any person who will be adversely affected by this regulation may at any time on or before April 6, 1992 file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 173

Food additives.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director of the Center for Food Safety and Applied Nutrition, 21 CFR part 173 is amended as follows:

PART 173—SECONDARY DIRECT FOOD ADDITIVES PERMITTED IN FOOD FOR HUMAN CONSUMPTION

1. The authority citation for 21 CFR part 173 continues to read as follows:

Authority: Secs. 201, 402, 409 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 342, 348).

2. Section 173.320 is amended in paragraph (b) introductory text by adding "or (6)" after "paragraph (b)(4)" and by adding new paragraph (b)(6) to read as follows:

§ 173.320 Chemicals for controlling micro-organisms in cane-sugar and beet-sugar mills.

* * * * *

(b) * * *

(6) Single additive for beet-sugar mills:

	Parts per million
Glutaraldehyde (CAS Reg. No. 111-30-8).	Not more than 250.

* * * * *

Dated: February 26, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

BILLING CODE 4160-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Public and Indian Housing

24 CFR Parts 905, 965 and 968

[Docket No. R-92-1535; FR-2984-02]

RIN: 2577-AA92

Termination of Consolidated Supply Program

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Final rule.

SUMMARY: This final rule terminates HUD's Consolidated Supply Program (CSP), currently set out at 24 CFR part 965, subpart G, and 24 CFR 905.175(f), and makes conforming amendments to 905.640(c) and 968.240(c), which reference the CSP. Under the CSP, HUD furnishes technical assistance to public housing agencies and Indian housing authorities in purchasing certain supplies, material, equipment, and

services necessary for the development, operation and maintenance of low-income housing. The decision to terminate the CSP was made after a thorough evaluation of the program, and careful consideration of the public comments received on a June 10, 1991 proposed rule. These comments are discussed in the Supplementary Information section of this document.

EFFECTIVE DATE: April 6, 1992. Contract extensions for all CSP contracts except Roofing Shingles, and Floor Tile and Sheet Vinyl expired on February 28, 1992. Contracts for the latter two products will expire on March 31, 1992. PHAs may not issue purchase orders for contracts which have expired. For the two contracts which have not expired, PHAs may issue Purchase Orders up to the contract expiration date. Once any contract has expired, contractors and PHAs may complete work/delivery of items reflected on Purchase Orders issued before the expiration of the last contract extension; no new Purchase Orders may be issued.

FOR FURTHER INFORMATION CONTACT: William C. Thorson, Director, Maintenance and Supply Division, Office of Construction, Rehabilitation and Maintenance, room 4124, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410, telephone (202) 708–4703. Hearing- or speech-impaired individuals may call the TDD number for the Office of Public and Indian Housing, (202) 708–0850. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

I. Background

The Consolidated Supply Program (CSP) was established to assist public housing agencies (PHAs), and Indian housing authorities (IHAs) (PHAs and IHAs are collectively referred to as PHAs), to assure the low income character of public housing, as required under sections 6(a) and 9(a) of the United States Housing Act of 1937, by providing technical assistance in the procurement process. (The CSP regulations, which are removed by this rule, are codified at 24 CFR 965, subpart G, and 24 CFR 905.175(f). Additionally, conforming amendments are made to 24 CFR 905.640(c) and 24 CFR 968.240(c), which reference the CSP.)

Under the CSP, the Department enters into competitive open-end contracts with suppliers of products (supplies, material, equipment and services) commonly used by PHAs in the development, operation, and maintenance of low-income housing. The Department prepares the technical specifications, and undertakes the solicitation, procurement and contracting functions. Contracts are awarded to all responsive and responsible bidders whose prices are at or below the average of bids received (not just the low bidder). The CSP contracts generally are of 15 months duration and are indefinite quantity contracts with no guarantee to the CSP supplier of any minimum volume of business under the contracts. A catalog identifying the product specifications, product items and price is prepared for each CSP product.

The objective of the CSP was to provide PHAs with the price benefits of competition, while reducing the administrative costs that would otherwise be incurred by each PHA in preparing individual contract specifications, and in soliciting for bids. The CSP operated on the premises that: (1) CSP contractors offer their best prices to the program—that is prices that are equal to or better than prices available to PHAs through open competition; and (2) CSP installed item specifications, including authorized options, add-ons, and deletions, are sufficient to satisfy the job needs of PHAs. The Department found, however, that these operating premises were inaccurate.

Audits of the CSP conducted by HUD's Office of the Inspector General (OIG) in 1981, 1984, 1988 and 1990 revealed widespread program abuse by PHAs and contractors. The audits also revealed that use of the CSP by PHAs was small ($102 million for the 1988/1989 period) compared to overall PHA procurement of more than $3 billion. The Department further studied the CSP, including seeking the assistance of an outside consultant, and determined that the structural and inherent flaws of the CSP were so serious that the corrective measures required to make the CSP cost effective would far exceed available resources and outweigh any potential program benefits.

Accordingly, in a rule published on June 10, 1991 (56 FR 26826), the Department proposed to terminate the CSP. The preamble to the proposed rule provided a detailed account of the findings of the OIG's audits, and the additional steps taken by HUD to further evaluate the benefits and problems of the CSP. These steps included an August 10, 1990 meeting with the CSP participants. Attendees at the meeting included representatives of the National Association of Housing and Redevelopment Officials (NAHRO), the Public Housing Authority Directors' Association (PHADA), various CSP contractors, auditors and others interested in the CSP.

In the June 10, 1991 rule, the Department stated that if the CSP were terminated, it would continue to offer PHAs procurement assistance, by making available to PHAs the guide specifications for many items currently available through the CSP. The Department also stated that it would seek the passage of legislation that would make the General Services Administration (GSA) schedule available to PHAs, in an effort to provide an additional source from which PHAs may procure products.

II. Discussion of Public Comments

The Department invited comment on the June 10, 1991 proposed rule. During the comment period, which expired August 9, 1991, HUD received 120 comments. The commenters included 105 PHAs. The commenters also included nine contractors; four associations representing various PHAs, PHA officials and PHA contractors; one corporation involved in product testing and certification; and one U.S. legislator.

Of the 120 commenters, three commenters supported, or expressed no opposition to termination of the CSP. These three commenters, all PHAs, stated that they could obtain better prices through competitive bidding than through the CSP. The remaining commenters were opposed to termination of the program. Of the 105 PHA commenters, almost half (50) submitted a form letter.

One of the commenters, NAHRO, advised that, together with PHADA, it conducted a survey on the CSP among public housing agencies. NAHRO stated that on June 1, 1991, it submitted a questionnaire to 3,244 PHAs, and that 583 PHAs responded to the survey. NAHRO reported that of the 583 respondents, 470 PHAs stated that they used the CSP, and 97 percent of this group stated that they saved money by using the CSP. NAHRO reported that this group stated that they spent nearly $37 million on CSP products, at an estimated savings of $9 million.

In reviewing the NAHRO survey, some PHAs perceived administrative and time savings to be major benefits of the CSP. The Department will comment further in this Rule regarding the benefits of the CSP. However, the Department also notes the following from the survey:

—While some PHAs claimed savings as a benefit, elsewhere in the survey the principal reason cited for not using the CSP was cost, followed by local preference, poor warranties, slow/unreliable delivery and poor quality.
—The principal problem identified with the CSP is unreliable contractors, followed by inferior products, unnecessary add-ons, over-pricing, poor service.
—The items identified in the survey as being the most frequently purchased—refrigerators, floor tile, ranges, water heaters and window shades—are available from the GSA.
—19 percent of PHAs responding to the survey did not use the CSP.
—498 out of 546 (92 percent) responding to the survey said they already have procurement staff.
—292 out of 469 (66 percent) responding to the survey advised that they solicit further/additional quotes from CSP vendors.
—57 of PHAs responding to the survey were aware of program abuses, but only 23 advised that they notified HUD.
—161 out of 214 (76 percent) responding to the survey advised that there were products for which they preferred not to use the CSP.

The survey results also confirmed the following findings of the Department during its evaluation of the program: PHAs already have procurement staff and procure most of their goods and services from non-CSP sources; and there are structural flaws, abuse and higher costs in the program. Accordingly, the Department does not consider the survey results to provide a persuasive argument in favor of retaining the CSP. The Department also noted that only 18 percent of the PHAs surveyed decided to respond. This low response rate confirms the relatively limited interest and usage of the CSP.

Following careful consideration of the comments on the proposed rule and the survey results provided by NAHRO and PHADA, the Department has decided to proceed with termination of the CSP. Notwithstanding the recognizable loss of some benefit to participating PHAs, the Department's evaluation of the program continues to support that the magnitude of the problems with CSP is such that the measures required to correct these problems, to curtail future abuse, and to make the program cost effective far exceed available resources, and outweigh the benefits.

The following section presents a discussion of the specific issues raised by the commenters, and the Department's response to each issue. The comments opposing termination of the CSP generally fell into the following four areas: (1) Comments describing the benefits of the CSP; (2) comments describing the problems that will result for PHAs if the CSP is terminated; (3) comments criticizing HUD's rationale for terminating the CSP; and (4) comments offering suggestions on how PHA procurement may be improved.

1. Benefits of the CSP

The majority of the commenters appealed to HUD to continue the CSP, because of the many benefits derived by PHAs through participation in the program. The benefits identified by the commenters are as follows:

Comment: The CSP provides savings in the administrative costs and time involved in procurement. A number of commenters stated that the CSP helps PHAs avoid the costly and time consuming process of bid and specification preparation.

Response. HUD acknowledges that the CSP may reduce the administrative costs and time involved in procurement for many participating PHAs. HUD will make guide specifications available to PHAs for many of the items now on the CSP. Through this effort, HUD will continue to assist PHAs in reducing the administrative costs and time involved in procurement.

HUD also acknowledges that PHAs which relied substantially on the CSP for a number of products may incur slightly increased procurement costs. The increase, however, should not be significant. Most, if not all, PHAs already have staff performing procurement functions for items that are not available through the CSP. These items (those not available through the CSP) comprise the majority of PHA procurement purchases.

In addition, as stated in the June 10, 1991 proposed rule, HUD intends to seek legislation which will enable PHAs to purchase products from the GSA schedule. While the GSA schedule does not include installed items, it includes a number of non-installed items available through the CSP, and many items that are not available through the CSP—items, which can be extremely useful to PHAs, such as office and maintenance equipment. HUD believes that use of the GSA schedule will result in much of the same savings in administrative cost and time as the CSP provides.

Many States operate programs similar to the GSA Schedule. PHAs can and should purchase goods through these programs when prices are determined to be advantageous. Further, PHAs can form consortiums to make group purchases and take advantage of discounts available when making volume purchases. Any such purchases would have to conform to HUD procurement requirements at 24 CFR 85.36.

Comment: The CSP provides better quality products. Several commenters stated that the product specifications which have been written for the CSP have continually improved, thus ensuring better and more consistent quality of products, which is not always true in an open bid process.

Response: PHAs will continue to benefit from these specifications, because HUD will continue to update, and to make available to PHAs, guide specifications for many of the CSP products.

Comment: The CSP provides savings on professional fees. Several commenters stated that the CSP provides savings on architectural and engineering fees.

Response: The guide specifications that HUD will make available to PHAs, will make it possible for PHAs to continue to save on architectural and engineering fees for both installed and non-installed items. Although PHAs will continue to require professional services for installed items, these services will be needed to a lesser degree because of the guide specifications.

Comment: The CSP reduces inventory and maintenance problems. Several commenters stated that one of the principal benefits of the CSP is standardization of products, which reduces the need for a large inventory of replacement and repair parts, and reduces the need for maintenance personnel to have knowledge of a wide range of products.

Response. The guide specifications that HUD will provide for many CSP products will assist PHAs in maintaining a standardized inventory. However, with advancing technology, new products are frequently introduced in the market. Even with the same manufacturer, models are periodically updated and changed. Thus, PHAs must expect changes in the products that they use. Product changes occur with or without the CSP. In addition, HUD regulations have relatively simple and informal procedures for purchases of services and supplies that do not cost more than $25,000 (or a lesser amount as specified by State law). These procedures facilitate, when ever possible, standardization and maintenance of reasonable inventories.

Comment: CSP contractors complete jobs more quickly. Several commenters stated that utilizing CSP contractors frequently results in shorter job completion time, because CSP contractors are familiar with the various requirements that pertain to work and

services in connection with public housing developments, including the paperwork requirements.

Response. HUD questions the contention that CSP contactors complete jobs more quickly than non-CSP contactors because the CSP contractors are familiar with the requirements pertaining to public housing. All contractors complete jobs in accordance with certain plans and specifications and within the times specified in the contracts. The requirements applicable to HUD-assisted public housing, including the paperwork requirements, should not affect a contractor's ability to deliver a product or service in accordance with a plan or specification, in a timely manner. In its audit of the CSP, the OIG found many CSP contractors performing work outside the scope of their contracts. Under this situation, PHAs incurred less paperwork, because they did not compete for the additional work, in violation of the CSP requirements.

Comment: CSP contractors perform on-site work with less disruption to residents. Several commenters stated that extensive public housing experience permits CSP contractors to perform on-site work in a manner that requires public housing residents to relocate less frequently, thereby obviating the need for relocation costs, and reducing the loss of rental revenue on units under repair.

Response. While HUD is pleased that some PHAs found CSP contractors disrupted residents infrequently, HUD sees no reason why non-CSP contractors could not perform on-site work in the same manner, and achieve the same results.

Comment: The CSP is effective in meeting minority contractor hiring goals. Several commenters stated that the CSP is one of the most effective ways for PHAs to meet their minority contractor hiring goals, and that loss of the CSP will result in a reduction in the hiring of minority contractors.

Response. HUD's evaluation of the CSP indicates that PHAs purchase the majority of their products and services through sources other than the CSP. Accordingly, PHAs already should have systems in place that encourage minority business enterprises (MBE) to participate in PHA procurement. PHAs can and should achieve MBE goals without the CSP.

Comment: CSP prices are equal to or less than competitive bid prices. A number of commenters stated that the CSP is less costly to PHAs than competitive bidding. A few of these commenters provided examples of the savings incurred by purchasing through the CSP. One commenter stated that dependent upon the economic conditions of the PHA's locale, prices obtained through competitive procurement may be significantly inflated, whereas under the CSP, prices, in many cases, remain fixed for a period of 15 months. Another commenter stated that "the bidding process would not gurantee product uniformity as is available under CSP, and could prove chaotic if PHAs are forced to procure varied products designed to different specifications."

Response. HUD disagrees that the CSP is less costly than competitive bidding. While in certain cases, CSP prices may be lower than competitive bid prices, the low volume of CSP sales supports that, for the majority of PHA purchases, CSP prices were higher than prices obtained through the competitive bid process. HUD notes that no commenters provided any supporting documentation of actual savings obtained through the CSP. Rather, each commenter estimated savings based on the commenter's asserted knowledge of the market.

HUD also disagrees with the commenters' generalization that CSP prices are or will be lower, because they are fixed for a period of 15 months or longer. One of the reasons CSP prices were generally higher than competitive bid prices, as found in the IG audit, is because CSP prices are fixed for a period of 15 months or longer and for a Region(s) where prices may vary from locality to locality. To establish a price for such an extended period, a CSP contractor must factor in anticipated price increases. A competitive bid price, however, would reflect current product cost. HUD believes that in an open economy, a competitive bidding process is the best vehicle for obtaining the most advantageous prices.

With regard to uniformity, no competitive system for procurement of goods and services can guarantee uniformity indefinitely. As discussed previously, products frequently change because of advances in technology. Uniformity was not guaranteed under the CSP. The CSP had a variety of contractors offering similar, but not identical products.

HUD further disagrees that terminating the CSP would prove chaotic. Again, HUD's study of the CSP revealed that most PHAs do not use the CSP for the majority of their purchases. For those PHAs that were more dependent on the CSP, the guide specifications that HUD intends to make available for many of CSP items, will provide much of the technical expertise that PHAs will need for procurement through the competitive bid process.

Comment: CSP provides savings on freight charges. A few commenters stated that because the CSP offers several competing available sources for products, a PHA can choose to save freight charges by selecting a source in the PHA's geographical area.

Response: One of the principal criticisms of the CSP was that the higher CSP prices resulted from high freight charges imposed. CSP prices must be valid for an entire HUD regional area. Accordingly, a CSP contractor, in establishing a price for an item, must consider the varying freight costs, e.g., prices must be high enough to cover the long distances.

Comment: CSP provides better and longer product warranties. A few commenters stated that PHAs are able to obtain better warranties (and of longer duration) for CSP products than for products obtained locally.

Response. PHAs may establish any warranty period desired in competitively bid contracts, even longer than the warranties provided under the CSP.

Comment: Installation and delivery time is reduced under the CSP. A few commenters stated that the time for installation and delivery of material ordered through the CSP is much shorter than through the competitive bid process.

Response. HUD disagrees that delivery and installation time can be reduced once a contract is executed simply because an item is available through the CSP. There is no reason why a competent non-CSP contractor could not deliver and install products in the same time frame as a CSP supplier.

2. Termination—Problems for PHAs

Comment: Termination of the CSP will increase PHA financial problems, and impact most adversely on small PHAs. Several commenters stated that PHAs are already experiencing financial difficulty, and that termination of the CSP will increase PHA administrative costs, and consequently increase PHA financial problems. Other commenters stated that the increase in costs will hurt small PHAs the most.

Response. While HUD recognizes that PHAs may incur some additional administrative expenses as a result of termination of the CSP, the additional costs should not be significant. As noted previously, procurement of items through the CSP represents a low percentage of total PHA procurement, which means that the majority of PHAs, including small PHAs, already have staff performing non-CSP procurement. For those PHAs which were more dependent on the CSP, the guide specifications will help minimize increases in procurement costs. PHAs experiencing financial difficulties already should be exploring ways to address these difficulties. These difficulities may be the result of management and operational deficiencies that will continue to cause financial problems for PHAs, with or without the CSP.

Comment: Small PHAs have limited procurement expertise. One commenter stated that small PHAs operate with limited staff, possess no background or expertise in the specific procedures involved in the competitive bid process, and are extremely susceptible to "hard sell" and to "snake oil" sales representatives. The commenter stated: "It is our opinion that the termination of the CSP would result, in many cases, in the procurement of substandard goods and services and improper or illegal contracting methods, which in turn will result in an increased cost to the PHA, to HUD and to the taxpayer."

Response. In order to operate public housing developments, PHAs, even small PHAs, must possess management capability in all area of property management, including procurement. Procurement is a basic component of a PHA's operation. If a PHA lacks staff that has the capability to successfully handle procurement, then the PHA needs to employ additional personnel or make personnel changes. If a PHA is susceptible to fraudulent practices, the existence of the CSP will not improve the situation.

Comment: Rural PHAs make up the majority of PHAs and lack competitive market places. One commenter stated: "Rural PHAs, which make up the majority of the PHAs in the nation, lack available competitive market places for economical purchasing."

Response. PHAs purchase the majority of their items outside of the CSP, which means that there are other sources to procure products available through the CSP. HUD seriously questions the inability of rural PHAs to purchase CSP items on the local market. To the extent this may occur for some items, PHAs need to expand their marketing range beyond the immediate locality. This is not uncommon in rural communities, regardless of whether the procuring entity is a PHA or some other type of business entity.

Comment: Termination of the CSP will increase the PHA paperwork burden. One commenter complained that termination of the CSP will increase the PHA paperwork burden.

Response. PHAs are responsible for managing their business. Procurement is a typical part of this business. The act of doing any business, including procurement, will generate a paperwork burden. HUD acknowledges that the CSP has provided some relief to PHAs from the paperwork burden that is part of all procurement. Again, however, since the majority of PHA procurement is not conducted through the CSP, the paperwork burden relief provided by the CSP was not widespread among PHAs. Conversely, the additional paperwork burden that may be incurred by termination of the CSP will not be significant.

Comment: Termination of the CSP will result in greater procurement abuses. One commenter stated that there will be more abuses if PHAs are limited to a local bidding system. The commenter stated: "If there are abuses under the HUD-controlled CSP system, imagine how may more opportunities for abuse will exist under bid systems locally administered by over 3,500 public and Indian housing authorities. Major vendors have a significant business interest in maintaining their CSP contracts. * * * Major suppliers deal with PHAs at arm's length, while local procurement is done on a much closer basis. We believe dealing with major suppliers at arm's length provides minimal opportunity for abuse of the procurement system."

Response. PHA procurement is now largely administered at the local level, because most PHAs purchase the majority of their products under a competitive bid system. To the extent that a PHA lacks adequate internal control systems over its procurement transactions, opportunities for abuse exist under either system—a competitive bid process or the CSP system. The OIG audit clearly documents repeated instances where CSP contractors disregarded and violated CSP rules and regulations.

3. HUD's Rationale for Terminating the CSP

Comment: The OIG's findings are based on a small number of PHAs. Several commenters stated that the decision to terminate the CSP was unfair because the OIG's findings were based on a small percentage (one percent) of PHAs.

Response. Since 1976, the OIG has conducted four audits of the CSP. Each audit identified serious problems with the program. The most recent audit focused on four regions with significant CSP activity. PHAs were selected for study primarily based on major activity under the Comprehensive Improvement Assistance Program (CIAP). Given the limited dollars spent by PHAs, nationwide, on items available through the CSP, the PHAs audited by the OIG represent a large portion of the overall CSP activity. Accordingly, to state that the OIG audit only focused on one percent of PHAs does not provide an accurate indication of the extent of CSP activity investigated by the OIG.

Comment: The OIG only examined competitively bid purchase orders. Two commenters stated that in all the contracts examined by the IG, the PHAs had opted to use local competitive bidding instead of the CSP and saved money doing so. The commenter stated that the OIG should have included in its review cases where the PHA opted for CSP procurement, and then compared those costs to the prospective cost of a locally bid contract.

Response. If a PHA purchased a CSP item, there would be no reasonable way for the OIG to determine what the competitive cost of that item would have been at a given time in the past. It would be unreasonable to ask vendors to provide competitive bids on contracts for which awards already have been made. Therefore, the methodology proposed by the commenter is inappropriate.

Comment: HUD did not undertake a cost-benefit analysis. One commenter stated that HUD's reasons for terminating the program were flawed because HUD did not undertake a cost-benefit analysis. The commenter stated that HUD failed to take into consideration the additional costs to PHAs and to HUD that would result from termination of the CSP. The commenter stated that these additional costs include: the costs of architectural and engineering fees, bid preparation, proposal solicitation, review and decision-making by PHAs, as well as the costs of competitive bid process review, and individual contract and product quality review by HUD.

Response. In deciding whether to terminate the CSP, HUD did take into consideration the benefits provided by the program, the problems with the program, and the duties and increased administrative costs that would revert to PHAs as a result of termination of the program. HUD recognizes that the CSP may reduce certain administrative costs and time involved in PHA procurement. HUD also recognizes that CSP sales are low and have been low for some time. This data indicated that notwithstanding the reduction in administrative costs, PHAs do not realize the significant savings in product costs anticipated and intended by the

program, and therefore use the competitive bidding process, not the CSP, for the majority of their purchases. After careful evaluation of all aspects of the program, HUD determined that the high vulnerability to fraud, waste and abuse of the program outweighs the benefits provided to a limited group of PHAs and that there is no system of cost efficient modifications which would justify continuation of the program. Again, HUD expects that the costs to be incurred by some PHAs as a result of termination of the CSP will be reduced by the guide specifications that HUD will make available for certain CSP items.

Comment: The lack of widespread use of the CSP by PHAs results from inadequate information. One commenter stated that the low use of the CSP by PHAs results from the fact that the program was never presented properly to PHAs. The commenter stated:

> In (our State) very few of our small PHAs use CSP because it has never been explained to them in a way they can understand. It is much easier to continue to do business as usual than to learn new tricks. HUD sends CSP information month after month with nothing to guide PHAs, to even let them know it is something which will save them money. Many think of the CSP information as another marketing catalog, just like the ones they receive from other businesses. Often it is discarded without serious consideration. If HUD is serious about saving Federal dollars, the CSP catalog information would be better marketed, explained, and supported with training by the Field Offices.

Response. The CSP is a voluntary program which has been in existence since 1954. The rules and procedures applicable to the CSP are outlined in HUD's regulations, handbook and the CSP catalogues. These procedures fully explain the use of the CSP. The high cost of additional, complex marketing procedures is not warranted in view of the high level of fraud and abuse present in the program.

Comment: High CSP prices result from ambiguous information. One commenter stated that the ambiguity of CSP information given to contractors caused the contractors to establish higher prices than necessary.

Response. HUD agrees that CSP prices are generally higher. However, HUD disagrees that the higher CSP prices are the result of ambiguous information provided by HUD. On the contrary, many commenters have praised the HUD specifications on which contractors submit bids. HUD has found that higher CSP prices are the result of serious flaws in the framework of the program. As stated in the preamble to the June 10, 1991 proposed rule, because the CSP is designed to serve a variety of contracting jobs, CSP contracts are subject to contracts that involve extended terms, unknown quantities, and generalized specifications. The uncertainty and generality of these terms causes CSP contractors to establish higher prices for CSP items.

Comment: The CSP problems can be correctd through better enforcement. Several commenters challenged HUD's position that the problems with the CSP could not be corrected in a cost effective manner. These commenters stated that instead of terminating the CSP, HUD should increase its monitoring and enforcement of the program requirements. A few commenters stated that HUD was aware of certain "known" CSP violators and took no action against them. One commenter stated that HUD allowed a handful of violators to become the centerpiece of the OIG's audit, and the basis for termination of the program.

Response. HUD agrees with the commenters that increased enforcement of existing CSP rules would help identify and reduce program abuses. However, HUD has concluded that the low volume of CSP sales does not justify diverting limited HUD staff and travel resources to increase the level and quality of monitoring that would be necessary to halt these abuses and to ensure the integrity of the CSP. HUD believes that it would be more prudent to use its resources to provide assistance to programs more widely used by and more critical to the operation of PHAs.

HUD denies the allegation that it took no action against certain "known" CSP violators, or that the problems with CSP were caused by a handful of violators. The OIG audits, conducted over the past several years have documented that the abuses in the program go beyond a few vendors. HUD has taken administrative sanctions whenever evidence revealed CSP abuses and identified program violators. HUD cannot take action against a CSP contractor based only on what others "believe" to be the case. In many situations, it was difficult for HUD to identify contractor violations because PHAs, on which HUD relies to assist with enforcement of contracts, often acted in collusion with these violators.

Comment: HUD's termination proposal failed to provide detailed findings concerning the termination decision. One commenter stated HUD's proposal to terminate the CSP should be given further review through correspondence with CSP users. The commenter stated that HUD should send a detailed list of findings to all CSP users, and should solicit comment on these findings.

Response. In the preamble to the June 10, 1991 proposed rule, HUD discussed in detail the problems uncovered in the CSP, and HUD's reasons for proposing termination, rather than redesign, of the program. (See 56 FR 28628–28629.) The June 10, 1991 rule invited comment from the public on HUD's proposal to terminate. In addition to solicitation of public comment through the June 10, 1991 proposed rule, the Assistant Secretary of HUD's Office of Public and Indian Housing invited interested CSP participants to a meeting to discuss the OIG's audit findings on the CSP and the issue of continuation of the program. The meeting was held on August 10, 1990, and attendees included representatives from NAHRO and PHADA, CSP contractors, auditors and other individuals interested in the program. Thus, the decision to terminate the CSP was made only after: (1) A thorough evaluation of the program by HUD; (2) full disclosure to the public of the problems with the CSP and of HUD's proposal to discontinue the program; and (3) careful consideration of public comments on the CSP—comments made at the August 10, 1990 meeting and in response to the June 10, 1991 proposed rule. HUD therefore disagrees that further analysis and public comment on termination of the CSP is necessary.

Comment: HUD's proposal to terminate the CSP constitutes a "major rule". One commenter stated the June 10, 1991 proposed rule constitutes a "major rule" under Executive Order 12291. The commenter stated that termination of the CSP would have a significant impact on a substantial number of small entities because it will change the way public housing authorities throughout the nation will spend billions of dollars of federal funds annually on materials, supplies, services and equipment. The commenter also stated that termination of the CSP would cause a major increase in costs or prices for consumers and for local government agencies because, in many instances, the CSP provides bigger discounts than what local governments can receive on the local market.

Response. Termination of the CSP will not have an annual effect on the economy of $100 million or more, nor will it cause a major increase in the costs or prices for consumers or for local government agencies. As has been stated several times in this preamble, purchase of items through CSP constitutes a small percentage of total PHA procurement. The majority of PHAs, including small PHAs, purchase items through the local competitive bid process, not through the CSP. In addition, PHAs will need to purchase the same products and services with or without the CSP. Termination of the program only shifts the procurement mode from the CSP to direct competitive solicitations by the PHAs. Accordingly, termination of the CSP will not cause a significant change in the way most PHAs currently carry out their procurement.

4. Recommendations for Improved PHA Procurement

Comment: Postpone termination of CSP until the GSA schedule is available. Two commenters stated that HUD should postpone termination of the CSP until legislation is passed which makes the GSA schedule available to PHAs.

Response. Given the extent of problems with the CSP, it is not prudent for HUD to continue operation of the CSP until the GSA schedule is available.

However, while waiting for the GSA schedule to be made available to PHAs, PHAs will not be without procurement assistance. The guide specifications that HUD will make available for a number of CSP products will assist PHAs in conducting their own competitive procurement.

In addition, many States operate programs similar to the GSA Schedule. PHAs can and should purchase goods through these programs when prices are determined to be advantageous. Further, PHAs can form consortiums to make group purchases and take advantage of discounts available when making volume purchases. Any such purchases would have to conform to HUD procurement requirements at 24 CFR 85.36.

Comment: The GSA schedule is currently not an acceptable procurement source. Two commenters stated that procurement through the GSA schedule should be pursued as an additional procurement source for PHA, and not as an alternative to the CSP. The commenters stated that if at some future time, procurement through the GSA schedule is proven to provide the same benefits as the CSP, the usefulness of the CSP could be reconsidered at that time. Another commenter stated that procurement through the GSA schedule is not an acceptable substitute for the CSP because installed items, representing 59 percent of CSP sales, are not available on the GSA schedule, and HUD has identified only five CSP items that are included on the GSA schedule.

Response: As stated above, HUD does not believe it is prudent to delay termination. HUD is aware that installed items are not available on the GSA schedule, and HUD will not seek to have installed items included on the GSA schedule because many of the CSP program violations involve installed items.

With respect to the number of CSP items currently listed on the GSA schedule, the five CSP items identified by HUD were provided as examples of CSP items that are available through the GSA schedule. This does not mean that these are the only CSP items listed on the GSA schedule. There are a number of items on the GSA schedule of use to PHAs, and many items that were not available through the CSP, such as maintenance and office equipment. HUD will work with the GSA to include more CSP items on the GSA schedule. HUD also will work with the GSA to modify or add specifications which are tailored to PHAs.

Comment: PHA procurement should not be limited to competitive bidding. One commenter stated that there should be means of procurement other than through the competitive bid process.

Response. The methods of procurement for grantees receiving Federal funds, and the rules and requirements applicable to these methods, are prescribed in the HUD common rule at 24 CFR 85.36. These methods are government-wide and include procurement by sealed bids, small purchases, procurement by competitive proposals, and procurement by noncompetitive proposals. Accordingly, depending upon the type of procurement to be undertaken, a PHA may follow one of several procurement methods.

Comment: Improve the CSP by eliminating the installation aspect of the program. Two commenters stated that eliminating the installation aspect of the CSP would eliminate a substantial part of the problem with the CSP. One commenter stated that part of the problem with the installation aspect of the CSP is that contractors do not retain sufficient control over installation that is subcontracted out, and PHAs do not have an adequate inspection program. The commenter stated: "Originally the CSP was not intended to include installation. If this is eliminated, the control and responsibility reverts to the PHA."

Response. HUD agrees that the installation aspect of the CSP represents a significant part of the problem with the CSP. However, elimination of the installation component of the CSP will not significantly improve the program to justify its continuation. With or without the installation component of the program, purchases made under the CSP are not sufficient to justify the expenditure of additional funds to effectively monitor and enforce compliance with the program requirements.

Comment: HUD should vest CSP enforcement responsibility with one office. One commenter stated that HUD should vest overall CSP enforcement responsibility with one office or person, which would be empowered to resolve disputes and to recommend sanctions against any violators of the program.

Response. The current method of administering the program was decided upon as the most effective system to assure proper contract administration while at the same time allow for policy development and catalog preparation. Since the CSP is operated nationwide, HUD's Regional and Field Offices have monitoring and enforcement responsibilities for PHAs within their jurisdiction. HUD believes that these local offices are better able to carry out these duties because of their geographical proximity to the PHAs.

Comment: HUD should appoint a task force to oversee the CSP. One commenter recommended the appointment of a task force consisting of HUD Field and Headquarters personnel, PHA procurement personnel, testing agencies and industry personnel. The commenter stated that the task force would have a twofold mission: (1) To research and develop product specifications; and (2) to institute guidelines and procedures for the establishment of this group as a permanent, integral and contributing part of the CSP.

Response. The problems with the CSP are not with product specifications or with establishing guidelines and procedures. The major problem with the CSP is with its very structure. The CSP is a program designed to serve a maximum number of PHAs for a variety of contracting jobs. However, because specific jobs are unknown at the time contracts for these jobs are solicited (unlike the situation in a competitive bid process), the CSP contracts are subject to contracts which involve extended terms, unknown quantities and generalized specifications. The uncertainty of these contract terms results in higher CSP prices. The higher CSP prices account for the majority of PHAs purchasing the greater part of needed supplies and items through the competitive bidding process.

Comment: HUD should continue the CSP for small PHAs only. One commenter stated that because termination of the CSP will cause a financial hardship for small PHAs, the

CSP should remain available for small PHAs only.

Response. HUD recognizes that the CSP is beneficial to some small PHAs. However, limiting the use of the CSP to small PHAs is not sufficient to justify continuation of the program. Current active participation in the CSP, even among small PHAs, is not sufficient to justify the time and resources to continue to operate the CSP in a cost-effective manner, with minimum violations.

Comment: HUD should limit the number of vendors in the CSP, and only provide manufacturer direct merchandise and prices. One commenter stated that the CSP could be improved by having fewer vendors supply the materials. The commenter stated that limiting the number of CSP vendors would increase the competitiveness of the vendors and reduce the cost of CSP items.

Response. Were HUD to retain the CSP under the proposal recommended by the commenter, the program would be unduly restrictive and limit, not increase, competition. HUD finds no basis to conclude that fewer vendors in the program would result in reduced costs to PHAs.

Comment: Several reforms would improve the CSP and eliminate program abuses. Four commenters recommended several reforms that they believed would significantly improve the CSP, and reduce program abuses. Their comments are as follows:

a. Reforms recommended by NAHRO and PHADA. NAHRO and PHADA recommended the following changes to the CSP: (1) Exclude freight/destination charges from CSP bids; (2) exclude all local tax, permit and fee costs from CSP bids; (3) exclude regional Davis-Bacon wage requirements from CSP bids; and (4) adopt a 10 percent ceiling on change orders for installed products.

Response. HUD does not agree that the commenters' recommended reforms would improve the CSP for the following reasons:

(1) Excluding freight would make the CSP program more complicated and difficult to administer. PHAs would have to negotiate freight charges separately on each purchase, which would increase CSP prices or present another potential source of abuse;

(2) It is impossible to restructure the CSP to avoid the inclusion of contingencies in contractors' bids. To pay local fees separately would unnecessarily complicate the CSP ordering process.

(3) The CSP program operates on a regional basis. To change to another more localized system would impose prohibitive costs on the procurement process for HUD.

(4) The CSP does not provide for a ceiling because of the uncertainty surrounding possible required changes. Thus, a 10 percent ceiling will not alleviate this problem.

b. Recommendations by a CSP contractor. A CSP contractor recommended the following changes for improvement of the CSP: (1) Impose stricter qualification for bidders; (2) limit the tiers of subcontractors; (3) require site supervision by the contract holder; (4) standardize the ordering format; and (5) clarify the CSP procedures to PHAs and HUD Area Offices.

Response. These changes would not significantly improve the CSP for the following reasons:

(1) The qualifications governing bidders on HUD contracts are set forth in 24 CFR 85.36 and are part of uniform administrative requirements governing the award of all Federal contracts. Section 85.36 provides that awards only will be made to responsible contractors possessing the ability to perform successfully under the terms and conditions of a proposed procurement. This section further provides that in making this determination, consideration is to be given to such matters as contractor integrity, compliance with public policy, record of past performance, and financial and technical resources.

(2) Subcontracting is the responsibility of the contractor. Although subcontractors to a Federal contract are obligated to comply with the same Federal requirements as contractors, to limit the number of subcontractors that a contractor may employ would constitute undue interference with a contractor's business on the part of the Federal Government.

(3) HUD agrees that site supervision is necessary. The current HUD form of "Owner-Architect Agreement" requires the PHA architect or engineer to supervise construction, or, in the case of the CSP, installation.

(4) While a standardized purchase order could be helpful, it is not clear how this change would help eliminate some of the principal problems with the CSP.

(5) The current CSP procedures are clear. The problem has been that many PHAs and CSP contractors failed to follow these procedures.

c. Reforms recommended by a public housing agency. A PHA suggested the following changes to the CSP:

(1) Require the PHA to submit to the applicable HUD Field Office, the final proposal from the CSP contractor with a copy of the purchase order;

(2) Require that all items procured outside of the CSP contract, but that are necessary or incidental to the work being performed, be reviewed and approved by the applicable HUD Field Office, prior to the PHA's execution of the purchase order. HUD may wish to assign a dollar threshold to this amount similar to the threshold already assigned to PHAs for their general contracts;

(3) Require HUD to monitor CSP contracts to the same extent that it monitors general contracts;

(4) Require CSP contracts to be issued on a regular, and timely basis instead of extending contracts to a period often double in length of the original CSP contract. By keeping the contracts on schedule, the "additional inflation" factors that CSP contractors now add to their CSP contracts would be eliminated, and prices would be lower; and

(5) Penalize the CSP contractor and/or housing authority that violates the regulations.

Response. The first suggestion is already a requirement of the program. Award of contracts outside of the CSP without the benefit of further competition is inconsistent with Federal regulations on grantee procurement, regardless of any HUD review or dollar threshold. HUD agrees that monitoring of CSP contracts is important and requires its Field Offices to do so, but to substantially curtail program abuses, increased program monitoring is needed. HUD does not believe that the resources required to achieve and maintain this level of program monitoring is justified, given the low volume of CSP sales. HUD also agrees that issuance of timely contracts is important and that extensions should be limited. However, this change would not solve the basic flaws in the CSP previously discussed in this preamble. As also discussed previously, HUD has taken action against PHAs and contractors found to have violated the program requirements. To identify and take action against all violators requires the utilization of additional resources that are not justified by the level of PHA participation in the program.

III. Other Matters

Regulatory Impact

This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation issued on February 17, 1981. Analysis of the rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Impact on Small Entities

The Secretary, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this rule before publication and by approving it certifies that this rule does not have a significant economic impact on a substantial number of small entities. This rule terminates the CSP, a program that provided technical procurement assistance to PHAs. Purchases made by PHAs and IHAs, including small PHAs, through this program constituted a small percentage of annual total PHA procurement. Accordingly, the termination of the program will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act. Additionally, HUD will continue to provide technical procurement assistance by making guide specifications available to PHAs and IHAs for many items formerly obtained through the CSP.

Environmental Impact

At the time of publication of the proposed rule on June 10, 1991, a Finding of No Significant Impact with respect to the environment was made in accordance with HUD regulations at 24 CFR part 50, which implements section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332). The Finding of No Significant Impact remains applicable to this final rule, and is available for public inspection during regular business hours in the Office of the General Counsel, Rules Docket Clerk, room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410.

Executive Order 12612, Federalism

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, Federalism, has determined that the policies contained in this rule do not have Federalism implications and, thus, are not subject to review under the Order. No programmatic or policy changes would result from this rule's promulgation which would affect existing relationships between the Federal government and State and local governments.

Executive Order 12606, The Family

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this rule does not have a potential significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the Order. No significant changes in existing HUD policies or programs will result from promulgation of this rule, as those policies and programs relate to family concerns.

Regulatory Agenda

This rule was listed as sequence number 1514 in the Department's Semiannual Agenda of Regulations published on October 21, 1991 (56 FR 53380, 53430) under Executive Order 12291 and the Regulatory Flexibility Act.

Lists of Subjects

24 CFR Part 905

Grant programs—Indians, Low and moderate income housing, Aged, Grant programs—housing and community development, Handicapped, Indians, Loan programs—housing and community development, Loan programs—Indians, Public housing, Reporting and recordkeeping requirements.

24 CFR Part 965

Energy conservation, Government procurement, Grant programs—housing and community development, Lead poisoning, Loan programs—housing and community development, Public housing, Reporting and recordkeeping requirements, Utilities.

24 CFR Part 968

Grant programs—housing and community development, Loan programs—housing and community development, Public housing, Reporting and recordkeeping requirements.

Accordingly, 24 CFR parts 905, 965, 968 are amended as follows:

PART 905—INDIAN HOUSING PROGRAMS

1. The authority citation for part 905 continues to read as follows:

Authority: 42 U.S.C. 1437aa, 1437bb, 1437cc, 1437ee; 25 U.S.C. 450e(b); 42 U.S.C. 3535(d).

§ 905.175 [Amended]

2. Paragraph (f) of § 905.175 is removed.

3. In § 905.640, paragraph (c) is revised to read as follows:

§ 905.640 Contracting requirements.

* * * * *

(c) *Sealed bid (formal advertising) requirements.* For each construction or equipment contract over $25,000, the PHA shall conduct formal advertising as provided in § 905.175(c).

* * * * *

PART 965—PHA-OWNED OR LEASED PROJECTS—MAINTENANCE AND OPERATION

Subpart G—Consolidated Supply Program

4. The authority citation for part 965 continues to read as follows:

Authority: 42 U.S.C. 1437, 1437a, 1437d, and 1437g; 42 U.S.C. 3535(d). Subpart H is also issued under 42 U.S.C. 4821–4846.

§§ 965.601–965.605 [Removed and reserved]

5. Subpart G (§§ 965.601–965.605) is removed and reserved.

PART 968—PUBLIC HOUSING MODERNIZATION

6. The authority citation for part 968 continues to read as follows:

Authority: 42 U.S.C. 1437d and 1437l; 42 U.S.C. 3535(d).

7. In § 968.240, paragraph (c) is revised to read as follows:

§ 968.240 Contracting requirements.

* * * * *

(c) *Sealed bid (formal advertising) requirements.* For each construction or equipment contract over $25,000, and lead-based paint testing services over $25,000, the PHA shall conduct formal advertising as required in 24 CFR 85.37(d)(2).

BILLING CODE 4210–33–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 8245]

Consolidated Return Regulations—Distributions After the Sale of Stock of a Subsidiary; Correction

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary and final regulations; Correcting amendment.

SUMMARY: This document contains corrections to the temporary and final regulations (T.D. 8245), which were published Thursday, March 16, 1989 (54 FR 10980). The regulations related to a dividend or other distribution subject to section 301 that is declared with respect to stock of a subsidiary member of an affiliated group filing consolidated Federal income tax returns if the stock of that subsidiary member is disposed of before the distribution is made, but after the selling member becomes entitled to the distribution.

EFFECTIVE DATE: March 16, 1989.

FOR FURTHER INFORMATION CONTACT: Steven B. Teplinsky, 202-566-4324 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The temporary and final regulations that are subject of these corrections amended temporary regulation § 1.1402-32T and added cross-references to §§1.1502-14(a) and 1.1402-32 (b) and (c).

Need for Correction

As published, the temporary regulations contain material incorrectly appearing at the end of § 1.1502-32T(b) which may prove to be misleading and is in need of being removed.

List of Subjects in 26 CFR 1.1502-12 Through 1.1502-34

Income taxes.

PART 1—INCOME TAXES; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Accordingly, 26 CFR part 1 is corrected by making the following correcting amendment:

1. The authority citation for part 1 continues to read in part:

Authority: Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805, 26 U.S.C. 6038 and 26 U.S.C. 6038A * * *

§ 1.1502-32T [Corrected]

2. In § 1.1502-32T, the undesignated paragraph following paragraph (b)(3) is removed.

Dale D. Goode,

Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

BILLING CODE 3810-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 35

[FRL-4112-6]

State and Local Assistance

AGENCY: Environmental Protection Agency.

ACTION: Final rule; Technical amendment.

SUMMARY: This document amends a final rule on allotments of grant funds to States under the Environmental Protection Agency's Hazardous Waste Management program authorized by section 3011 of the Solid Waste Disposal Act, as amended, 42 U.S.C. 6931. This action is necessary to make the regulatory language precisely like the statutory provision. The regulation at 40 CFR 35.115(i) lists specific technical criteria established by section 3011 upon which the Agency bases the allotment of grant funds to States. The regulation as originally published, however, inadvertently failed to include the general authority in the statute to consider "such other factors as the Administrator deems appropriate." As a result, EPA has found it necessary to seek deviations from its grant allocation regulations in order to allot grant funds for activities (e.g., corrective actions) permissible under the broader statutory authority, but not authorized by the narrower regulatory provision. This action adds that authority to the existing allotment criteria to bring the regulatory language into conformance with the statutory language upon which the regulation is based.

EFFECTIVE DATE: March 6, 1992.

FOR FURTHER INFORMATION CONTACT: Richard E. Mitchell, Grants Administration Division (PM-216F), Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 260-6078.

SUPPLEMENTARY INFORMATION:

List of Subjects in 40 CFR Part 35

Grant programs, Hazardous waste, and Waste treatment and disposal.

Dated: February 10, 1992.

Christian R. Holmes,

Acting Assistant Administrator for Administration and Resources Management.

For the reasons set out in the preamble, title 40, chapter I, part 35 of the Code of Federal Regulations is amended as follows:

PART 35—STATE AND LOCAL ASSISTANCE

Subpart A—Financial Assistance for Continuing Environmental Programs

1. Authority citation for part 35, subpart A, continues to read as follows:

Authority: Secs. 105 and 301(a) of the Clean Air Act, as amended (42 U.S.C. 7405 and 7601(a)); Secs. 106, 205(g), 205(j), 208, 310, 501(a) and 518 of the Clean Water Act, as amended (33 U.S.C. 1256, 1283(g), 1285(j), 1288, 1361(a), and 1377); Secs. 1443, 1450, and 1451 of the Safe Drinking Water Act (42 U.S.C. 300j-2, 300j-9, and 300j-11); Secs. 2002(a) and 3011 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976 (42 U.S.C. 6912(a), 6931, 6947, and 6949); and Secs. 4, 23, and 25(a) of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (7 U.S.C. 136(b), 136(u), and 136w(a).

2. Section 35.115 is amended by revising paragraph (i) to read as follows:

§ 35.115 State allotments and reserves.

* * * * *

(i) Hazardous waste management allotment (Solid Waste Disposal Act, as amended, section 3011): The extent to which hazardous waste is generated, transported, treated, stored, and disposed of in the State and the extent of exposure of human beings and the environment to such waste, and such other factors as the Administrator deems appropriate.

* * * * *

[FR Doc. 92-5257 Filed 3-5-92; 8:45 am]

BILLING CODE 6560-50-M

40 CFR Part 52

[LA-5-1-5272; FRL 4108-5]

Approval and Promulgation of Air Quality Implementation Plans; Technical Amendment to Identification of Plan, Louisiana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; Technical amendment.

SUMMARY: Today's action corrects an error made on March 8, 1989 (54 FR 9783), in which EPA erroneously approved amendment of the State Implementation Plan (SIP) to incorporate the Public Comment Provisions regulation recodified at Louisiana Administrative Code (LAC): Title 33 (Environmental Quality): Part III (Air). Chapter 5 (Permit Procedures). Section 505 (For Emissions Below PSD de minimus Levels). Paragraph I. EPA recently realized that text of the State-recodified new code regulation, LAD:33:III.505.I, is substantially changed from text of the corresponding EPA-approved old code regulation, section 6.6 of Louisiana Air Quality Regulations (LAQR). LAQR 6.6 was adopted by the State of Louisiana on February 20, 1981, submitted by the Governor to EPA on March 25, 1981, and approved by EPA on June 9, 1982 (47 FR 25012). New, revised and recodified air regulations were adopted by the State on December 20, 1987, and submitted by the Governor to EPA for approval and incorporation into the Louisiana SIP on January 6 and October 4, 1988. On March 8, 1989 (54 FR 9795), EPA conditionally approved recodification of those air regulations already approved as part of the Louisiana SIP—including LAQR 6.6—and containing either no changes at all, or only minor textual changes. Concurrently, EPA also approved amendment of the Louisiana SIP to include some new regulations and exclude other obsolete regulations. Today's rulemaking is necessary because EPA was unaware of, and does not approve of, certain textual changes made in the process of recodifying LAQR 6.6 to LAC:33:III.505.I. The effect of this notice is to amend the Louisiana SIP to incorporate LAQR 6.6 as previously approved by EPA on June 9, 1982 (47 FR 25013).

EFFECTIVE DATE: This action will become effective on May 5, 1992 unless notice is received within 30 days of publication that adverse or critical comments will be submitted. If the effective date is delayed, timely notice will be published in the **Federal Register.**

ADDRESSES: Copies of the State submittal for this action are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency—Region 6, Air Planning Section (6T-AP), 1445 Ross Avenue, Dallas, TX 75202-2733,

Louisiana Department of Environmental Quality, Air Quality Division, 7290 Bluebonnet, Baton Rouge, LA 70810, and

U.S. Environmental Protection Agency, Public Information Reference Unit, 401 M Street SW., Washington, DC 20460.

Anyone wishing to review these documents should contact the person named below to schedule an appointment.

SUPPLEMENTARY INFORMATION:

Background

EPA recently identified unacceptable textual changes made to the Public Comment Provisions regulation at LAC:33:III.505.I in the process of recodifying LAQR 6.6 of the Louisiana SIP on March 8, 1989. Requirements for an acceptable State or local agency permitting program are specified in 40 CFR part 51 subpart I, Review of New Sources and Modifications. Specifically, §§ 51.160, Legally Enforceable Procedures, and 51.161, Public Availability of Information, apply to all construction or modification of a facility, building, structure or installation, or combination of these pollutant-emitting activities as defined in section 51.165, Permit Requirements. LAQR 6.6, the EPA-approved old code regulation, applies to every such construction or modification as well. However, the State-recodified new code regulation, LAC:33:III.505.I, is substantially changed from LAQR 6.6, and covers only new or modified major stationary sources. Consequently, LAC:33:III.505.I does not fulfill 40 CFR part 51 subpart I requirements to provide opportunity for public comments on the State or local agency analysis of construction or modification information submitted by owners and operators of any source affecting ambient air quality. EPA erroneously noted that no changes were made to LAQR 6.6 (see 54 FR 9788) and approved recodification of LAQR 6.6 to LAC:33:III.505.I, in effect incorporating LAC:33:III.505.I in the place of LAQR 6.6 in the Louisiana SIP. To correct the error, EPA is publishing this notice amending the Louisiana SIP to incorporate LAQR 6.6 as previously approved by EPA on June 9, 1982 (47 FR 25013).

EPA is publishing this action without prior public notice because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. This action will become effective 60 days from the date of publication unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted. If such notice is received, this action will be withdrawn before the effective date by publishing two subsequent notices. One notice will withdraw the final action, and a second will begin a new rulemaking by announcing a proposal of the action and establishing a comment period.

Final Action

Today's notice amends the Louisiana SIP to incorporate LAQR 6.6 as approved earlier by EPA on June 9, 1982 (47 FR 25013), correcting an error made on March 8, 1989 (54 FR 9795), in which EPA erroneously approved recodification of LAQR 6.6 to LAC:33:III.505.I and effectively replaced LAQR 6.6 with LAC:33:III.505.I in the Louisiana SIP. The Louisiana Department of Environmental Quality agreed to both revise the Public Comment Provisions regulation recodified as LAC:33:III.505.I to meet appropriate requirements of 40 CFR part 51 subpart I, and submit the revised LAC:33:III.505.I as a SIP revision to EPA once the revised recodified regulation is adopted by the State. If no adverse or critical comments are received, the public is advised that this action will become effective 60 days from the date of publication.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any State Implementation Plan. Each request for revision to the State implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities (see 46 FR 8709).

This action has been classified as a Table 3 action by the Regional Administrator under the procedures established in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget waived Table 2 and 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for a period of two years.

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 5, 1992. Filing a petition for reconsideration of this final rule by the Administrator does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Air pollution control, Carbon monoxide, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Note: Incorporation by reference of the State Implementation Plan for the State of Louisiana was approved by the Director of the Federal Register on July 1, 1982.

Dated: February 14, 1992.

Joe D. Winkle,

Acting Regional Administrator.

40 CFR part 52, subpart T, is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

Subpart T—Louisiana

2. Section 52.970 is amended by adding paragraph (c)(58) to read as follows:

§ 52.970 Identification of plan.

* * * * *

(c) * * *

(58) Louisiana Air Quality Regulation section 6.6 as revised and adopted by the Louisiana Environmental Control Commission on February 26, 1981, submitted by the Governor on March 25, 1981, and approved by the Environmental Protection Agency on June 9, 1982.

(i) *Incorporation by reference.* (A) Louisiana Air Quality Regulation section 6.6 as revised and adopted by the Louisiana Environmental Control Commission on February 26, 1981, submitted by the Governor on March 25, 1981, and approved by the Environmental Protection Agency on June 9, 1982.

(ii) *Additional material.* (A) Letter dated March 24, 1981, from the Secretary of the Louisiana Department of Natural Resources to the Governor of Louisiana acknowledging approval of Louisiana Air Quality Regulation section 6.6 by the Louisiana Environmental Control Commission effective on February 26, 1981.

BILLING CODE 6560–50–M

---

40 CFR Part 52

[MO6–1–5333; FRL–4102–7]

Approval and Promulgation of Lead Implementation Plans; State of Missouri

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: As required by Section 110 of the Clean Air Act, the State of Missouri has submitted a State Implementation Plan (SIP) for lead to EPA for approval. This lead SIP provides for attainment of the National Ambient Air Quality Standards (NAAQS) in the vicinity of the Doe Run Herculaneum lead smelter in Herculaneum, Missouri. EPA's approval of this SIP revision provides federal enforceability of the state requirements to attain the NAAQS.

EFFECTIVE DATE: This rule will become effective on April 6, 1992.

ADDRESSES: Copies of the documents relevant to this action are available for public inspection during normal business hours at the: Environmental Protection Agency, Region VII, Air Branch, 726 Minnesota Avenue, Kansas City, Kansas 66101; the Missouri Department of Natural Resources, Air Pollution Control Program, Jefferson State Office Building, 205 Jefferson Street, Jefferson City, Missouri 65101; and the Public Information Reference Unit, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Stanley A. Walker at (913) 551–7494 (FTS 276–7494).

SUPPLEMENTARY INFORMATION: On October 5, 1978, the NAAQS for lead were promulgated by the EPA (43 FR 46246). Both the primary and secondary lead standards were set at a level of 1.5 micrograms of lead per cubic meter of air averaged over a calendar quarter. During 1986, ambient air monitoring data showed that violations of the lead NAAQS were occurring in the vicinity of the Doe Run lead smelter located in Herculaneum, Missouri. In response to the violations of the lead standard, EPA called for a revision to the Missouri SIP on June 3, 1986.

In response to the SIP call, the state submitted a SIP revision for the DOE Run Herculaneum smelter on September 6, 1990; additional SIP materials were submitted on May 8, 1991.

On August 21, 1991, EPA published a Notice of Proposed Rulemaking (NPR) to approve the Missouri Doe Run Herculaneum lead SIP (56 FR 41500); no public comments were received on the NPR. For a complete discussion of the SIP and EPA's rationale for approval, the reader is referred to the above mentioned **Federal Register** notice.

Pursuant to the 1990 Clean Air Act Amendments, EPA designated the Herculaneum vicinity as nonattainment with respect to the lead NAAQS on November 6, 1991 (56 FR 56694).

Therefore, the Part D (Nonattainment Provisions) area requirements now apply to this SIP revision. In accord with section 191(a) of the Act, the state has until July 6, 1993 (18 months from the effective date of the nonattainment designation), to submit a plan revision which meets the applicable Part D requirements.

In the NPR, EPA stated that the Herculaneum area would likely be designated nonattainment and that it was proposing a limited approval of the state submittal (56 FR 41501). In view of the applicability of part D, due to the recent nonattainment designation, EPA is taking final action on a limited approval of the state submittal. EPA is granting a limited approval because the SIP provides progress toward improving air quality, but does not meet all the applicable requirements of the Act. EPA's aforementioned NPR provides additional discussion of the limited approval concept. No comments were received on the proposed limited approval. EPA's full and final approval of this SIP revision is contingent on the state's submittal of a supplemental plan revision which meets the applicable part D requirements. In the NPR, EPA included proposed revisions to 40 CFR 52.1320 and 52.1323. In this rulemaking, EPA is making a minor revision to the language in proposed § 52.1323(g) to reflect the actual date of the nonattainment designation for the Herculaneum area, and to incorporate technical, nonsubstantive changes to the language of the proposal.

EPA Action

In today's notice, EPA takes final action on a limited approval of Missouri's September 6, 1990, and May 8, 1991, submittals which constitute the Doe Run Herculaneum lead SIP. Rule 10 CSR 10–6.120 contains provisions which are applicable to other lead smelters in the state. Lead SIP revisions for these other facilities are still under development; thus, EPA takes final limited approval action on this SIP revision only insofar as the Doe Run Herculaneum lead smelter is concerned.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

This action has been classified as a Table 3 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget waived Table 2 and 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 5, 1992. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Air pollution control, Incorporation by reference, Lead, and Reporting and recordkeeping requirements.

Dated: February 3, 1992.

Morris Kay,

Regional Administrator.

40 CFR part 52, is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

Subpart AA—Missouri

2. Section 52.1320 is amended by adding paragraph (c)(76) to read as follows:

§ 52.1320 Identification of plan.

* * * * *

(c) * * *

(76) In submittals dated September 6, 1990, and May 8, 1991, the Missouri Department of Natural Resources submitted a lead NAAQS attainment plan for the Doe Run Herculaneum primary lead smelter. Although Missouri rule 10 CSR 10–6.120 contains requirements which apply statewide to primary lead smelting operations, EPA takes action on this rule only insofar as it pertains to the Doe Run Herculaneum facility. Plan revisions to address the other lead smelters in the state are under development.

(i) Incorporation by reference.

(A) New rule 10 CSR 10–6.120, Restriction of Emissions of Lead from Primary Lead Smelter-Refinery Installations, effective December 29, 1988, with amendments effective March 14, 1991.

(B) Consent order, entered into between the Doe Run Company and the Missouri Department of Natural Resources, dated March 9, 1990.

(C) Supplemental consent order, signed by the Doe Run Company on July 26, 1990, and by the Missouri Department of Natural Resources on August 17, 1990.

(ii) Additional material.

(A) Narrative SIP material, submitted on September 9, 1990. This submittal includes the emissions inventory and attainment demonstration.

(B) The Doe Run Herculaneum Work Practice Manual was submitted on May 8, 1991. In the May 8, 1991, submittal letter, the state agreed that any subsequent changes to the work practice manual would be submitted to EPA as SIP revisions.

3. Section 52.1323 is amended by adding paragraphs (f) and (g) to read as follows:

§ 52.1323 Approval status.

* * * * *

(f) The Administrator approves Rule 10 CSR 10–6.120 as identified under § 52.1320(c)(76), under the following terms, to which the state of Missouri has agreed. Subparagraph (2)(B)2.B.(IV) contains a provision whereby the Director of the Missouri Department of Natural Resources has discretion to approve revisions to the Doe Run Herculaneum work practice manual. Any revisions to the work practice manual, pursuant to this rule, must be submitted to EPA for approval as an individual SIP revision. Thus, any existing federally approved work practices remain in effect, until such time that subsequent revisions are submitted to EPA and approved as SIP revisions.

(g) The Administrator's approval of the Doe Run Herculaneum lead SIP, as identified under § 52.1320(c)(76) constitutes a limited approval in accord with a March 22, 1991, guidance memorandum from EPA's Office of Air Quality Planning and Standards. Pursuant to the 1990 Clean Air Act Amendments, EPA designated the Herculaneum, Missouri, area as nonattainment with respect to the NAAQS for lead on November 6, 1991 (56 FR 56694). The effective date of the nonattainment designation is January 6, 1992. In accord with section 191(a) of the Act, the state of Missouri must, within 18 months after the effective date of the nonattainment designation, submit a supplemental SIP revision for Doe Run Herculaneum which meets the applicable requirements of part D. EPA's full and final action on the Doe Run Herculaneum SIP is contingent on the state meeting the part D requirements.

[OK–7–1–5348; FRL–4105–9]

Approval and Promulgation of Air Quality Implementation Plans, Oklahoma; Sulfur Dioxide Emissions Trade for the Conoco, Incorporated, Ponca City Refinery

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This notice approves a source-specific revision to the Oklahoma State Implementation Plan (SIP) for the Conoco, Incorporated, Ponca City Refinery. The revision consists of a sulfur dioxide (SO_2) emissions trade for the construction and operation of a sulfur recovery unit (SRU) and a cogeneration unit. On September 25, 1991, EPA proposed approval of the Conoco SO_2 emissions trade (56 FR 48472). The intended effect of this action is to approve a SO_2 emissions trade consistent with the requirements of the Environmental Protection Agency's

(EPA) Emissions Trading Policy Statement (ETPS), published December 4, 1986 (51 FR 43814).

EFFECTIVE DATE: This rule will become effective on April 6, 1992.

ADDRESSES: Copies of the documents relevant to this action are available for public inspection during normal business hours at the following locations: Environmental Protection Agency, Region 6, Air Programs Branch (6T–A), 1445 Ross Avenue, Dallas, Texas 75202; Oklahoma State Department of Health, Air Quality Service (0201), 1000 Northeast 10th Street, Oklahoma City, Oklahoma 73117–1299; and Public Information Reference Unit, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Robin M. Sullivan, Air Programs Branch, EPA Region 6, telephone (214) 655–7214 or (FTS) 255–7214.

SUPPLEMENTARY INFORMATION:

I. Background

EPA described the facts surrounding this SIP revision in its notice of proposed rulemaking on September 25, 1991, at 56 FR 48472. The Agency will not repeat that information in this notice, but will summarize the major issues and respond to comments received on the notice of proposed rulemaking. EPA recommends that interested readers examine that notice for a complete understanding of today's action.

On November 7, 1989, the Governor of Oklahoma submitted a request to revise the Oklahoma SIP. This request would make federally-enforceable a sulfur dioxide emissions trade for Conoco's Ponca City Refinery (Conoco) involving a construction permit and an operating permit approved by the Oklahoma State Department of Health (OSDH). On July 3, 1990, the Oklahoma Air Quality Service (AQS) submitted an operating permit, number 88–117–O, for a sulfur recovery unit (SRU) and a construction permit, number 88–116–C, for a cogeneration unit. The operating permit for the SRU was approved by the State under Oklahoma Air Pollution Control Regulation 1.6, "Alternate Emissions Reduction Permits". Regulation 1.6 is not part of Oklahoma's approved SIP, therefore, EPA approval of this permit is necessary to make it federally-enforceable.

The construction is to take place in two phases. The first phase involves the construction and operation of an SRU that will remove up to 20 long tons of sulfur per day from refinery fuel gas streams. The increase in SO_2 emissions from operation of the SRU will occur contemporaneously with an SO_2 emissions reduction from seven refinery furnaces, which will switch from operating on sour fuel gas to sweetened gas. The sweetened gas is generated from gas sweetening facilities utilizing amine contractors. The SRU receives off-gas from the gasoline sweetening facilities, performing the function of a pollution control device. Without the SRU, this off-gas would have to be flared, resulting in much higher SO_2 emissions.

In the second phase of the project, two cogeneration units will be constructed. The cogeneration units will result in increased SO_2 emissions, however, additional SO_2 reductions will occur from the shut down of four boilers currently fueled by sour refinery gas, and the curtailment of two boilers which will then be fired with partially sweetened refinery fuel gas. The actual SO_2 emissions increases and reductions are further discussed in the next section.

II. Sulfur Dioxide Emissions Trade

In the Oklahoma SIP, Regulation 3.4(c)(1)(C)(ii) limits the emissions of SO_2 from sulfur recovery plants to 20 pounds per ton of sulfur processed. This is equivalent to a minimum sulfur recovery efficiency of 99.5%. The emissions trade allows the new SRU to deviate from this Oklahoma SIP requirement and instead meet the requirements of Regulation 3.4(c)(1)(C)(i) which pertains to natural gas processing. This results in the SRU meeting a 94.5% SO_2 emissions reduction efficiency as allowed by Regulation 3.4(c)(1)(C)(i) rather than a 99.5% reduction as allowed by Regulation 3.4(c)(1)(C)(ii). Conoco contended that the 99.5% reduction efficiency requirement posed a substantial economic hardship for the SRU. The 94.5% reduction efficiency will allow the SRU to emit an additional 865 tons per year (TPY) more than it would at 99.5% efficiency.[1] Thus, an offset of at least 865 TYP was required for the emissions trade.

The State of Oklahoma does not allow the banking of emissions reduction credits (ERCs). Therefore, excess ERCs associated with the trade go to the benefit of the environment and may not be used by Conoco for future purposes.

Table 1 outlines to the SO_2 emissions associated with the SRU/cogeneration project. The first phase, or interim phase (post-SRU/pre-cogen), SO_2 reductions occur when seven existing furnaces within the refinery begin to operate on sweetened fuel gas from the new SRU. The increase in emissions from the SRU are compensated by a 2,320 tons per year (TPY) reduction in SO_2 from furnaces, H–5001, H–48A, H–48B, H–48C, H–48D, H–48E, and H–28. The sweetened fuel gas for the furnaces will result in a net refinery-wide SO_2 emissions reduction of 1,368 TYP. Of the total SO_2 emissions reductions, 325 TPY must be allocated to fulfill the requirements of a 1987 consent decree. Therefore, a net SO_2 emissions reduction of 1,043 TPY will be realized from the interim phase.

TABLE 1.—SO_2 EMISSIONS (TPY) FOR CONOCO'S SULFUR RECOVERY UNIT AND COGENERATION PROJECT

Affected unit	Pre emissions (pre-SRU/pre-cogen)	Interim emissions (post-SRU/pre-cogen)	Post emissions (post-SRU/post-cogen)
SRU	0	[1] 952 (865)	952
Cogeneration	0	0	109
Boilers:			
B–1	555	555	0
B–2	681	681	0
B–4	629	629	0
B–5	624	624	0
B–6	1009	1009	594
B–7	1352	1352	1014
Heaters:			
H–28	831	30	30
H–48A	438	20	20
H–48B	283	15	15
H–48C	206	11	11
H–48D	167	13	13
H–48E	193	8	8
H–5001	321	22	22
Total	7289	5921	2788
		[2] 1368–325	
Net emissions reduction		1043	3133

[1] The required offset is 865 TPY; however the net emissions reduction is calculated in terms of total SO_2 increases and is thus more conservative.
[2] Consent degree.

Upon startup of the cogeneration units, the post phase (post-SRU/post-cogen), four existing boilers, B–1, B–2, B–4, and B–5, will be permanently retired from service, while the use of two other boilers, B–6, B–7, will be curtailed. The startup of the cogeneration units will increase SO_2 emissions by 109 TPY and the reductions from boilers B–1, B–2, B–4, B–5, B–6, and B–7 will result in a reduction of 3,242 TPY of SO_2 emissions. Thus, the net reduction from the post phase will be 3,133 TPY of SO_2 emissions.

[1] It should be noted that the SRU was designed to operate at 20 tons per day of elemental sulfur processed. This size SRU is exempt from EPA New Source Performance Standards (NSPS) for SRUs. (See 40 CFR part 60 subpart J).

III. Ambient Equivalence Modeling

Conoco performed both Level II and Level III modeling consistent with the requirements of the ETPS to ensure that the emissions associated with the SRU and cogeneration project would not cause or contribute to a violation of the NAAQS for SO_2. EPA discussed this modeling in detail in its notice of proposed rulemaking on September 25, 1991 (56 FR 48472). The Agency will not repeat that discussion here, but recommends that interested readers refer to that notice for information on the modeling.

IV. Response to Comments

One comment letter was received in response to EPA's notice of proposed rulemaking; that letter was submitted by a representative of the Conoco, Inc., Ponca City Refinery. Conoco stated that it fully supports EPA's approval of the SO_2 emissions trade as a source-specific revision to the Oklahoma SIP. The comments were meant to provide clarification to some of the statements made in the notice of proposed rulemaking.

Comment: The notice of proposed rulemaking stated that an SO_2 emissions reduction would be achieved from seven refinery furnaces which will switch from operating on sour fuel gas to sweetened fuel from the SRU. Conoco clarified that the sweetened gas is generated from gas sweetening facilities utilizing amine contactors. The SRU receives off-gas from the gasoline sweetening facilities, performing the function of a pollution control device; without the SRU, this off-gas would have to be flared, resulting in much higher SO_2 emissions.

Response: EPA agrees with the clarification to this wording and has revised the language, as recommended, in the Background section of this notice.

Comment: In the discussion of the Level III modeling, the notice of proposed rulemaking stated that all point sources within a 50 kilometer (km) radius of the area of significant impact were explicitly modeled. Conoco provided clarification that all point sources within a 50 km radius were included in the analysis, but not explicitly modeled. As further discussed in the proposal, some sources were excluded from the modeling by applying EPA's "20–D Rule". Consequently, sources outside the area of significant impact, but within 50 km of that area, were excluded from the modeling if the entire facility's emissions were less than 20 times the distance from the facility to the area.

Response: EPA agrees with Conoco's clarification that all point sources within a 50 km radius of the area of significant impact were considered, but were not necessarily modeled, as explained above.

Comment: Conoco provided comments further supporting the use of 1974–1978 Ponca City meteorological data in the Level III modeling, rather than the use of more recent data from other areas in the State.

Response: As stated in the proposal, EPA believes that the 1974–1978 meterological data are the most representative available for Ponca City. The 1974–1978 data are the most recent available for the Ponca City area; the use of these data for the Level III modeling is more representative of the climatic conditions of the Ponca City area than more current data from other areas in the State.

Comment: Conoco's final comments pertain to the proposal's discussion of SO_2 ambient air quality in Kay County. Conoco reiterated that the modeling conducted for the emissions trade proved that the trade would not cause or contribute to a violation of the SO_2 NAAQS. Conoco stated that it believes the general issue of NAAQS compliance should be addressed as a separate issue. Conoco further noted that the OSDH/AQS has addressed EPA's concerns related to NAAQS compliance in the Kay County area and that EPA recognized that the area should not be designated nonattainment. In a September 30, 1991, letter from Mr. Robert E. Layton, Jr., P.E., Regional Administrator, EPA Region 6, to Mr. Mark S. Coleman, Commissioner for Environmental Health Services, OSDH, EPA stated its position that the Kay County area should not be designated nonattainment for the SO_2 NAAQS.

Response: EPA believes that a discussion of the ambient air quality in Kay County was indeed warranted in the notice of proposed rulemaking, even though the Level III modeling demonstrated that the SO_2 emissions trade would not cause or contribute to a violation of the NAAQS. The proposal explained that, based on monitoring data and supplementary modeling, EPA had taken the position that Key County appeared to be violating the SO_2 NAAQS (see the April 22, 1991, **Federal Register** notice at 56 FR 16274). Since that time, however, the OSDH/AQS has submitted additional information supporting an attainment designation. Based on EPA's evaluation of this information, the Agency has decided to retain the area's attainment designation. This position was stated in the September 30, 1991, letter cited above and will be further addressed in a forthcoming **Federal Register** notice.

V. Final Action

Today, EPA is approving the SIP revision submitted by the Governor of Oklahoma on November 7, 1989, which includes permits number 88–117–O and 88–116–C. These permits allow the Conoco refinery to operate a sulfur recovery unit and to construct a cogeneration facility. EPA has determined that the emissions trade is consistent with the ETPS and that the emissions associated with the trade will neither cause nor contribute to a violation of the NAAQS for SO_2. By this action, EPA approves the SO_2 emissions trade resulting from the SRU and cogeneration project as a revision to the Oklahoma SIP.

Regulatory Process

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any State implementation plan. Each request for revision in the State implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

This action has been classified as a Table 3 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget (OMB) waived Tables 2 and 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for a period of two years. EPA has submitted a request for a permanent waiver for Tables 2 and 3 SIP revisions. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 5, 1992. Filing a petition for reconsideration of this final rule by the Administrator does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

The Agency has reviewed this request for revision of the federally approved SIP for conformance with the provisions of the 1990 Amendments enacted on November 15, 1990. The Agency has

determined that this action conforms with those requirements irrespective of the fact that the adoption of the revision by the State preceded the date of enactment.

List of Subjects in 40 CFR Part 52

Air pollution control, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements, Sulfur oxides.

Dated: February 10, 1992.

Joe D. Winkle,

Acting Regional Administrator.

40 CFR Part 52, is amended as follows:

PART 52—[AMENDED]

1. The Authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

Subpart LL—Oklahoma

2. Section 52.1920 is amended by adding paragraph (c)(42) to read as follows:

§ 52.1920 Identification of plan.

* * * * *

(c) * * *

(42) On November 7, 1989, the Governor of Oklahoma submitted a revision to the SIP consisting of a construction permit, number 88–116–C, for a cogeneration unit and an operating permit, number 88–117–O, for a sulfur recovery unit. The revision involves a sulfur dioxide emissions trade for the Conoco, Incorporated, Ponca City Refinery.

(i) *Incorporation by reference.* (A) Permit number 88–116–C, as adopted by the Oklahoma State Department of Health (OSDH) on May 23, 1989.

(B) Permit number 88–117–O, as adopted by the Oklahoma State Department of Health (OSDH) on June 22, 1990.

(ii) *Additional material.* (A) The document issued by Conoco Ponca City Refinery, titled, "Level II Modeling Analysis in Support of Alternate Emissions Reduction Permit for Sulfur Recovery Plant" dated April 1990.

(B) The document issued by Conoco Ponca City Refinery, titled, "Level III Remodeling for an SO_2 Bubble Trade" dated June 3, 1991 (revised July 8, 1991).

Approval and Promulgation of Air Quality Implementation Plans; Virginia; Non-CTG Reasonably Available Control Technology for Nabisco Brands, Inc.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is approving a State Implementation Plan (SIP) revision submitted by the Commonwealth of Virginia. This revision establishes and requires the use of reasonably available control technology (RACT) to control volatile organic compound (VOC) emissions from Nabisco Brands, Inc. (Nabisco) in Henrico County, Virginia, which is part of the Richmond nonattainment area. Virginia is required to develop RACT regulations for VOC sources with the potential to emit 100 tons per year (TPY) or more for which EPA has not issued a Control Techniques Guidelines (CTG) document. Such sources are commonly referred to as non-CTG sources. Nabisco's facility in Henrico County is a non-CTG VOC source subject to RACT under the Virginia SIP. The intended effect of this action is to approve non-CTG RACT requirements for Nabisco's facility in Henrico County, Virginia. This approval is based on a determination that these requirements represent RACT for this source. This action is being taken in accordance with section 110 and part D of the Clean Air Act.

EFFECTIVE DATE: This action will become effective May 5, 1992, unless notice is received within April 6, 1992, that adverse or critical comments will be submitted. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Comments may be mailed to Thomas J. Maslany, Director, Air, Radiation and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, PA 19107. Copies of the documents relevant to this action are available for public inspection during normal business hours at the Air, Radiation, and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, PA 19107; Public Information Reference Unit, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460; and the Virginia Department of Air Pollution Control, P.O. Box 10089, Richmond, Virginia 23240.

FOR FURTHER INFORMATION CONTACT: Maria A. Pino, (215) 597–9337; FTS 597–9337.

SUPPLEMENTARY INFORMATION: On April 29, 1991, the Commonwealth of Virginia submitted a formal revision to its State Implementation Plan (SIP). The SIP revision consists of Consent Agreement and Order No. DTE–179–91 (the Order), between the State Air Pollution Control Board (SAPCB) of the Commonwealth of Virginia and Nabisco Brands, Inc. (Nabisco). The Order was signed by Nabisco's Vice President of Manufacturing on April 18, 1991 and the Executive Director of the Virginia SAPCB on April 24, 1991. The Order became effective on April 24, 1991.

In the **Federal Register** on November 24, 1987, EPA's Proposed Post-1987 Policy for Ozone and Carbon Monoxide stated that air quality monitors revealed continued exceedances of the National Ambient Air Quality Standards (NAAQS) for ozone and carbon monoxide in Virginia and that a SIP call would be issued. (See 52 FR 45044.) On May 26, 1988, the Regional Administrator of EPA Region III notified the governor of Virginia that the Commonwealth's SIP was substantially inadequate to achieve the ozone and carbon monoxide NAAQS for certain areas in Virginia, including Henrico County in the Richmond-Petersburg metropolitan statistical area, and therefore required a SIP revision. As prescribed by the SIP call, Virginia is required to develop reasonable available control technology (RACT) regulations in all its nonattainment areas for all VOC sources with the potential to emit 100 tons per year (TPY) or more for which EPA has not issued a Control Techniques Guidelines (CTG) document. Such sources are known as non-CTG sources. One of the non-CTG sources identified as requiring RACT is Nabisco's facility in Henrico County. Henrico County is located in the Richmond area, which is currently designated nonattainment for ozone. Therefore, Virginia is submitting this Order as a SIP revision to fulfill part of its SIP call obligation.

In addition, this SIP revision serves to fulfill one of the RACT fix-up requirements of the Virginia SIP required by section 182(a)(2)(A) of the Clean Air Act as amended by the Clean Air Act Amendments of 1990, Public Law 101–549. Areas classified as marginal nonattainment areas for ozone pursuant to section 181(a) of the Clean Air Act, as amended, are required to meet the RACT fix-up requirements. Under Section 182(a)(2)(A), a state is required to submit, within six months of such classification, a SIP revision to correct requirements in (or add requirements to) the plan concerning RACT, as interpreted in guidance issued by the Administrator under Section 108 of the Act before November 15, 1990.

Background

On January 11, 1991, the Virginia Department of Air Pollution Control (VDAPC) submitted to EPA a proposed amendment to the Virginia SIP for review and comment. The submittal consisted of a draft Order between the Virginia SAPCB and Nabisco and a draft of the RACT determination for Nabisco's facility in Henrico County, Virginia (Source Registration No. 50703). EPA reviewed the draft documents and provided comments on February 4, 1991.

Virginia submitted the final Order, No. DTE–179–91, along with the final RACT determination, as a formal SIP revision on April 29, 1991. The Order was signed by the Nabisco's Vice President of Manufacturing on April 18, 1991 and the Executive Director of the Virginia SAPCB on April 24, 1991. The effective date of the Order is April 24, 1991.

Summary of SIP Revision

The Order determines and imposes RACT on Nabisco, as required by Section 120–04–0407, "Standard for Volatile Organic Compounds", of Virginia's SAPCB Regulations.

Nabisco produces cookies, crackers, and pretzels at its Henrico County, Virginia plant. It is a major VOC source in the Richmond-Petersburg nonattainment area, with the potential to emit 266 TPY. The plant operates 24 hours/day and 5 days/week. The plant uses two different types of dough to produce its baked goods: Sponge-dough and straight-dough. In the sponge-dough process, yeast is used as the leavening agent and ethanol is a product of the yeast's metabolic fermentation. In the straight-dough process, the dough is leavened without yeast and the amount of VOC produced is relatively low. The possible sources of VOC at this plant are the ovens, proof room, and oil treatment facilities. The majority of VOC emissions are from Oven No. 1, which produces crackers using a sponge-dough process.

Sponge dough in Oven No. 1

Oven No. 1 produces crackers using a sponge-dough process and has the potential to emit 261 of the plant's 266 TPY of VOC. By design, cracker production in Oven No. 1 is limited to 8953 pounds/hour and 108 tons/day (TPD). Any increase in production would require physical modification to the oven. Virginia has determined that RACT for Oven No. 1, when baking sponge-dough, is catalytic incineration with 95% destruction efficiency on a mass basis. This oven will also meet the criteria for a permanent total enclosure when baking sponge-dough. These measures will reduce VOC emissions from Oven No. 1 to a maximum of 14 TPY.

Oven Nos. 2–6 and 8–10

Oven Nos. 2–6 and 8–10 use straight-dough processes, which chemically leaven dough and produce relatively low levels of VOC. Uncontrolled VOC emissions from these eight ovens is estimated to be less than 5 TPY. Virginia has determined that RACT for these ovens is no add-on control, but limiting production to only straight-dough.

Oven No. 7

Oven No. 7 is regulated by a new source permit and therefore not subject to the Order.

Oil Treatment Facilities

The plant has three oil treatment facilities, which are located at Oven Nos. 1, 2, and 4. The oil treatment facilities are chambers in which vegetable oil is sprayed on baked crackers for flavoring. Vegetable oils are not considered VOCs for the purpose of control programs, according to the OAQPS August 21, 1990 policy memo, "Interpretation of VOC Definition as Applied to Vegetable Oil". Virginia has determined that RACT for the oil treatment facilities is limiting the type of oil used to only vegetable oil.

Proof Room

Doughs are enclosed in the proof room and proofed from one hour for straight-dough to 24 hours for sponge-dough. Uncontrolled VOC emissions from the proof room are estimated to be less than 0.4 TPY. Virginia has determined that RACT for the proof room is no control.

For more information on Virginia's RACT determination and the specific provisions of the Order, please refer to the Technical Support Document (TSD) prepared for this notice. A copy of the TSD is available, upon request, from the EPA Regional Office listed in the Addresses section of this notice.

EPA's review of this material indicates that Consent Agreement and Order No. DTE–179–91, between the Virginia SAPCB and Nabisco, imposes requirements on Nabisco's facility in Henrico County which constitute RACT for Nabisco's VOC emitting processes.

EPA is approving the Virginia SIP revision, which was submitted on April 29, 1991. The Commonwealth of Virginia certified that a public hearing with regard to this proposed SIP revision was held on February 20, 1991 in Richmond, Virginia, as required by 40 CFR 51.102. EPA is approving this SIP revision without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. This action will be effective 60 days from the date of this **Federal Register** notice unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted. If such notice is received, this action will be withdrawn before the effective date by simultaneously publishing two subsequent notices. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective on May 5, 1992.

Final Action

EPA is approving this request for a revision to the Virginia SIP, which the VDAPC submitted on April 29, 1991. The revision consists of Consent Agreement and Order No. DTE–179–91, between the Virginia SAPCB and Nabisco, which imposes RACT on the Nabisco facility in Henrico County, Virginia. The effective date of Order No. DTE–179–91 is April 24, 1991.

The Agency has reviewed this request for revision of the federally-approved State Implementation Plan for conformance with the provisions of the Clean Air Act Amendments of 1990, Public Law 101–549, effective November 15, 1990. The Agency has determined that this action conforms with those requirements.

Nothing in this action should be construed as permitting, allowing, or establishing a precedent for any future request for revision to any State Implementation Plan. Each request for revision to a State Implementation Plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

This action, pertaining to the approval of RACT for this non-CTG source in Henrico County, Virginia, has been classified as a Table 3 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR

2214–2225). On January 6, 1989, the Office of Management and Budget waived Table 2 and 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for a period of two years. EPA has submitted a request for a permanent waiver for Table 2 and 3 SIP revisions. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

Under Section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 5, 1992. Under Section 307(b)(2) of the Act, this action may not be challenged later in proceedings to enforce its requirements.

List of Subjects in 40 CFR Part 52

Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: January 27, 1992.

Stanley L. Laskowski,

Acting Regional Administrator, Region III.

Part 52, chapter I of title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

Subpart VV—Virginia

2. Section 52.2420 is amended by adding paragraph (c)(95) to read as follows:

§ 52.2420 Identification of plan.

* * * * * * *

(c) * * *

(95) Revisions to the State Implementation Plan submitted by the Virginia Department of Air Pollution Control on April 29, 1991.

(i) Incorporation by reference.

[IN 2–2–5177; FRL–4096–5]

Approval and Promulgation of Implementation Plans; Indiana

AGENCY: United States Environmental Protection Agency (USEPA).

ACTION: Final rule.

SUMMARY: USEPA is approving State submitted revisions to the Indiana State Implementation Plan (SIP) for ozone. These revisions modify Indiana's Volatile Organic Compound (VOC) emission control regulations (rules) to eliminate rule deficiencies identified in a June 17, 1988, letter from the USEPA to the Indiana Department of Environmental Management (IDEM). The Clean Air Act, as amended in 1990, required States to correct their SIPs to include Reasonably Available Control Technology (RACT) regulations as required under pre-amended section 172(b) as interpreted in USEPA's pre-amendment guidance. The June 17, 1988, letter discussed rule revisions needed to correct the State's rules to comply with RACT guidelines. USEPA proposed approval of these requested revisions to the Indiana SIP on January 2, 1991, (56 FR 51).

USEPA is approving all of the rule revisions (with the exception of revisions to the pneumatic rubber tire manufacturing rule, to be addressed in a separate rulemaking) fully adopted by the State of Indiana and cumulatively addressed in State submittals on November 18, 1988, March 9, 1990, October 23, 1990, May 15, 1991, and August 19, 1991. (The rule revisions addressed in the May 15, 1991, submittal and adopted after the January 2, 1991, NPR were addressed as preliminarily adopted rule revisions in the October 23, 1990, submittal and in the NPR. The State submitted these rule revisions for parallel processing.) These rule revisions eliminate all of the rule deficiencies identified in the June 17, 1988, letter except the lack of acceptable emissions capture efficiency test methods. The State has submitted an acceptable schedule to correct this remaining deficiency.

EFFECTIVE DATE: April 6, 1992.

ADDRESSES: Copies of the SIP revisions are available at the following addresses for review: (It is recommended that you telephone Randolph O. Cano at (312) 886–6036, before visiting the Region V office.)

U.S. Environmental Protection Agency, Region V, Regulation Development Branch, 230 South Dearborn Street, Chicago, Illinois 60604

Indiana Department of Environmental Management, Office of Air Management, 105 South Meridian Street, Indianapolis, Indiana 46206

U.S. Environmental Protection Agency, Public Information Reference Unit, 401 M Street SW., Washington, DC 20460

FOR FURTHER INFORMATION CONTACT: Edward J. Doty, U.S. Environmental Protection Agency, Region V, Regulation Development Branch (5AR–26), 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886–6057.

SUPPLEMENTARY INFORMATION:

Background

On November 18, 1988, March 9, 1990, and October 23, 1990, the IDEM submitted VOC emission control rules as proposed revisions to Indiana's SIP for ozone. These revisions were submitted to correct deficiencies in Indiana's VOC rules identified in a June 17, 1988, letter from the USEPA to the IDEM. The June 17, 1988, letter was a followup letter to USEPA's May 26, 1988, notification to Indiana under section 110(a)(2)(H) of the Clean Air Act (Act), as amended in 1977, that Indiana's ozone SIP was substantially inadequate.[1]

The Clean Air Act, as amended in 1990, specifically provides that States must correct their RACT rules as required by section 172(b) of the pre-amended Act and as interpreted in USEPA's pre-amendment guidance issued pursuant to section 108. Section 182(a)(2)(A). Since the June 17, 1988, letter informed Indiana of the State's RACT deficiencies as interpreted in USEPA's guidance,[2] the amended Act carries forth the requirement that Indiana make the regulation corrections identified in the June 17, 1988, letter.

On January 2, 1992, (56 FR 51) the USEPA proposed to approve the corrected VOC rules as being consistent with the SIP call and as meeting the RACT "fix-up" requirement of section 182(a)(2)(A) of the amended Act. In this NPR, USEPA noted that some of the corrected rules had only been

[1] On November 15, 1990, the Clean Air Act Amendments of 1990 were enacted. Pub. L. 101–549, codified at 42 U.S.C. 7401–7671q (1991). The amended Clean Air Act substantially retains the requirement of pre-amended section 110(a)(2)(H). 42 U.S.C. section 7410(a)(2)(H).

[2] The June 17, 1988, letter was based on the Blue Book and USEPA's post-1987 ozone policy.

preliminarily adopted by the Indiana Pollution Control Board (IPCB). The rules that were preliminarily adopted by the IPCB were submitted to the USEPA for parallel processing. These preliminarily adopted rule revisions were proposed for approval in the NPR, but the USEPA noted in the NPR that no final action could be taken on these rule revisions until they had been promulgated by the State.

On May 15, 1991, and August 19, 1991, the IDEM submitted finally adopted rule revisions for those rules subject to the preliminarily adopted rule revisions. The rule revisions were signed by Governor Evan Bayh on May 3, 1991, and were filed with the Secretary of State on May 6, 1991. Under Indiana law, these rule revisions are considered by the State to be promulgated at the time they are filed with the Secretary of State. These rule revisions complete the State promulgation required in the January 2, 1991, NPR.

The January 2, 1991, NPR solicited comments on the proposed SIP (rule) revisions and on USEPA's proposed rulemaking. No comments were received during the public comment period for this proposed rulemaking.

The VOC rule revisions covered by this rulemaking can be thought of as being divided into two subcategories: Those fully adopted by the State prior to the January 2, 1991, NPR; and those adopted after January 2, 1991, but prior to this final rulemaking. The following sections of this final rulemaking address each of these rule revision subcategories.

Rules Fully Adopted by January 2, 1991

These rules were contained in the November 18, 1988, March 9, 1990, and October 23, 1990, State submittals. All rule revisions covered in these submittals amend Volume 326 of the Indiana Administrative Code (326 IAC). A description of the adopted rule revisions is presented on a rule-by-rule basis below. The VOC rule revisions summarized below have been determined to comply with the CAAA and USEPA guidance except as noted for the pneumatic rubber tire manufacturing rule.

326 IAC 1–2–16.5 "Cold Cleaner Degreaser" Definition

326 IAC 1–2–21.5 "Conveyorized Degreaser" Definition

326 IAC 1–2–29.5 "Freeboard Height" Definition

326 IAC 1–2–29.6 "Freeboard Ratio" Definition

326 IAC 1–2–49.5 "Open Top Vapor Degreaser" Definition

Rule 326 IAC 1–2 has been amended by adding these five new definitions related to organic solvent degreasing operations. These definitions clarify Indiana's degreasing regulations in a manner consistent with USEPA policy.

326 IAC 1–2–48 "Nonphotochemically Reactive Hydrocarbon" Definition

This definition was amended to include four new compounds considered by the USEPA to be negligibly photochemically reactive. The definition has also been amended to state that compliance calculations for coatings with VOC concentration units expressed as "pounds VOC per gallon of coating (less water)" should treat nonphotochemically reactive hydrocarbons as water for purposes of calculating the "less water" portion of the coating composition.

326 IAC 1–2–90 "Volatile Organic Compound (VOC)" Definition

This rule has been amended to define "VOC" as any organic material which participates in atmospheric photochemical reactions, that is any organic compound other than those nonphotochemically reactive compounds listed in 326 IAC 1–2–48. VOC coating contents or emission levels are to be measured using procedures given in 326 IAC 8–1–4 (testing procedures).

326 IAC 8–1–0.5 "Coating" Definition

"Coating" is defined to be the application of protective, functional, or decorative films.

326 IAC 8–1–2 Compliance Methods

This rule has been amended to incorporate USEPA's December 1988 "Protocol for Determining the Daily Volatile Organic Compound Emission Rate of Automobile and Light Duty Truck Topcoat Operations" (EPA–450/3–88–018). The rule has also been amended to require equivalency calculations to be performed on a coating solids basis. A procedure for calculating the overall capture system and control device efficiency required to comply with surface coating limits has been specified. Use of USEPA's topcoat protocol is required when demonstrating compliance with the equivalent emission limit for automobile and light duty truck topcoating operations.

326 IAC 8–1–4 Testing Procedures

USEPA-approved test methods have been added to this rule to address the following topics: (1) Testing coatings to determine their compliance with the content and emission limits contained in 326 IAC 8 (Article 8); (2) determining the VOC emissions from gasoline vapor recovery systems; and (3) determining the VOC emissions from solvent degreasing operations. The rule has been amended to require sources applying coatings to document that the coating manufacturers used acceptable test methods to determine the VOC contents and percent solids of coatings supplied to the sources.

326 IAC 8–1–4(1) has been added to the rule to allow the IDEM or the USEPA to verify any test results. In the event of any inconsistency between a source's test results and those obtained by the IDEM or the USEPA, IDEM's or USEPA's test results take precedence over the source's test results. The use of equivalent test procedures will be allowed provided they are addressed in site-specific SIP revisions submitted to and approved by the USEPA. It should be noted that the underlying SIP requirements remain in effect until they are changed by final USEPA rulemaking actions.

326 IAC 8–2–5 Paper Coating Operations

This rule has been revised to extend the applicability of paper coating regulations to saturation processes and coating of plastic and metal foils. The rule has also been revised to modify a previous exemption given to single pieces of equipment which conduct rotogravure or flexographic printing operations in line with other surface coating operations. The rule now specifies that only single pieces of equipment that meet the emission limitations given in 326 IAC 8–5–5 (Graphic Arts Operations) may be exempted from the paper coating emission limits.

326 IAC 8–2–9 Miscellaneous Metal Coating Operations

This rule has been revised to eliminate exemptions for maintenance coating of production equipment, preparation and application of adhesives, application of lubricants, and chromiun plating of plastics effective on July 1, 1991.

326 IAC 8–2–11 Fabric and Vinyl Coating

This rule has been revised to: (1) Extend the applicability of fabric coating regulations to saturation operations; (2) extend the applicability of vinyl coating regulations to the application of functional coatings; and (3) specify that organosol and plastisol use cannot be used to bubble emissions from vinyl printing and topcoating.

326 IAC 8-3-1 Organic Solvent Degreasing Operations—Applicability

The applicability criteria for organic solvent degreaser emission control has been changed from degreasers at plants with the potential to emit 100 tons of VOC per year or more to: (1) Cold cleaner degreasers without remote solvent reservoirs; (2) open top vapor degreasers with an air to vapor interface area of one square meter or greater; and (3) conveyorized degreasers with an air to solvent interface area of two square meters or more regardless of the VOC emission level of a facility. Sources subject to these new criteria must comply with the degreasing requirements by July 1, 1991.

326 IAC 8-4-8 Leaks from Petroleum Refineries-Monitoring Reports

Exemptions from monitoring requirements in 326 IAC 8-4-8 have been deleted for inaccessible valves and, after July 1, 1991, for components in lines carrying gases composed of 90 percent methane and/or ethane. Commencing on July 1, 1991, components which are located where monitoring is hazardous shall be monitored when conditions allow these components to be monitored safely. USEPA Reference Method 21 has replaced the method described in the petroleum refinery Control Technology Guideline (CTG) (the method previously included in Indiana's rules) for monitoring for leaks.

326 IAC 8-5-3 Synthesized Pharmaceutical Manufacturing Operations

The VOC emission control requirement for air dryers and production equipment exhaust systems at synthesized pharmaceutical manufacturing facilities with VOC emission levels of 150 kilograms per day or greater has been increased from 85 percent to 90 percent effective July 1, 1991.

326 IAC 8-5-5 Graphic Arts Operations

This rule has been amended as follows: (1) 326 IAC 8-5-5(b)(4) now specifies an alternative compliance method VOC emission limit of 0.5 pounds VOC per pound of ink; (2) 326 IAC 8-5-5(d) (reviewed in the January 2, 1991, NPR as 326 IAC 8-5-5(e)) now specifies the following emission control requirements: (i) 75 percent for publication rotogravures; (ii) 65 percent for packaging rotogravures; and (iii) 60 percent for flexographic printing; and (3) 326 IAC 8-5-5(c) (revised in the January 2, 1991, NPR as 326 IAC 8-5-5-(d)) now requires compliance with 326 IAC 8-5-5(e) by July 1, 1991.

Equivalent and Alternative Methods

Rules referring to the use of equivalent test methods and alternative emission control techniques have been amended to require the submittal of these equivalent test methods and alternative control techniques to the USEPA as SIP revisions. Indiana's language is approvable because it acknowledges that these equivalent test methods and alternative control techniques are not part of the federally approved SIP until they are specifically approved by the USEPA as SIP revisions. The USEPA is adding language to its approval in part 52 of the CFR clarifying that USEPA must approve any such proposed revisions before they are effective in altering the federally enforceable SIP.

Rules Adopted After January 2, 1991

The following rule revisions were reported in their finally adopted forms in the May 15, 1991, and August 19, 1991, submittals. Unless noted otherwise the finally adopted rule revisions were identical to the preliminarily adopted versions reviewed in the January 2, 1991, NPR. The rule revisions summarized below have been determined to comply with USEPA RACT and related regulations and policy.

326 IAC 1-2-14 "Coating Line" Definition

The definition of "coating line" has been modified to mean all operations and equipment which are used to apply, convey, and dry a surface coating. This would include, but not be limited to, one or more of the following components: (1) Spray booths; (2) flow coaters; (3) flash-off areas; (4) air dryers; and (5) ovens. Any operation utilizing one or more of the listed equipment types would qualify as a coating line.

326 IAC 8-1-1 Applicability of Rules

This rule has been revised to require that facilities once subject to the control requirements of any of the VOC rules will remain subject to such rules even if emissions are subsequently reduced below the rules' applicability levels. A facility may be exempted from the applicable rules if: (1) the facility has an enforceable permit issued under 326 IAC 2 or a federally-approved SIP revision that permanently restricts one or more source activities resulting in the lowering of actual VOC emissions before add-on controls to a level below 15 pounds per day (expiration of the permit results in the expiration of the exemption from rule applicability); (2) the permit or SIP revision referenced in (1) also requires the facility owner or operator to keep records demonstrating compliance with the permit or SIP restrictions; and (3) all permits, renewed permits, and other related documents are submitted to the USEPA as SIP revisions. Indiana's language is approvable because the State acknowledges that proposed SIP revisions, including proposed SIP revisions covering changes in rule applicability, are not part of the federally approved SIP until they are specifically approved by the USEPA as SIP revisions. Consistent with the State's interpretation of its rules, the USEPA is adding language to its approval in part 52 of the CFR clarifying that USEPA must approve any such proposed revisions before they are effective in altering the federally enforceable SIP.

326 IAC 8-1-2 Compliance Methods

The term "thermal or catalytic incineration" has been added to 326 IAC 8-1-2(a)(2) to clarify their use as a means of compliance with the requirements of Article 8 (326 IAC 8). The rule has also been revised to clarify requirements and to specify additional recordkeeping requirements.

Subsequent to the January 2, 1991, NPR, Indiana added a new clause to this rule. Subsection 8-1-2(a)(8) has been added to the rule to state that the requirements of Article 8 may be met through the use of an emission control device specifically allowed under provisions of any rule in this Article to meet the emission limitations specified in the rule. This clause was added to clarify that there are other specific emission control requirements (other than those listed in 326 IAC 8-1-2) within rules in Article 8. This additional clause is judged to be nonsubstantive and needed only for the purpose of preventing interference between 326 IAC 8-1-2 and other rules in 326 IAC 8. As such, this rule revision does not require additional proposed rulemaking on the part of the USEPA.

326 IAC 8-1-4 Testing Procedures

Revisions to 326 IAC 8-1-4 (h) and (i) state that the appropriate test methods shall be used for the source categories listed in (h) and (i) (synthesized pharmaceutical manufacturing, pneumatic rubber tire manufacturing, graphic arts, and external floating roof tanks). USEPA-recommended test procedures are referenced. These rule revisions were addressed in the January 2, 1991, NPR.

A minor change in 326 IAC 8-1-4(a)(4)(C) was made by the State after the January 2, 1991, NPR publication. An erroneous reference to an USEPA guideline was corrected. An appropriate reference to EPA 340/1-88-004, "A Guideline for Graphic Arts Calculations", has replaced the erroneous reference. This revision is inconsequential and does not trigger the need for additional rulemaking.

326 IAC 8-2-1 Applicability

This rule has been modified to state that, for sources listed in 326 IAC 8-2-2 through 326 IAC 8-2-13, VOC emission exemption cutoff levels shall be 15 pounds/day actual emissions based on emission levels before add-on controls.

326 IAC 8-3-5 Cold Cleaner Operations
326 IAC 8-3-6 Open Top Vapor Degreaser Operations
326 IAC 8-3-7 Conveyorized Degreaser Operations

Language has been added to these rules to make them consistent with USEPA's RACT requirements. The revisions include both improved emission control requirements and the requirement that the authorization of any equivalent emission controls must be accompanied by the submittal of the equivalent emission control requirements to the USEPA as SIP revisions. The following specific changes have been made to these rules: (1) 326 IAC 8-3-5(a)(5) has been modified to require the use of one of several possible control measures when solvents are heated to temperatures over 48.9 degrees Centigrade (120 degrees Fahrenheit) (possible controls include the use of a freeboard that attains a freeboard ratio of 0.75 or greater, the use of a water cover when the solvents used are insoluble in and heavier than water, or the use of other control systems demonstrated to provide equivalent emissions control and submitted to the USEPA as SIP revisions); (2) 326 IAC 8-3-6(a)(4) has been modified to require, as one control option, the use of a freeboard with a freeboard ratio of 0.75 or greater and a powered cover for an open top vapor degreaser with an opening exceeding one square meter in area; (3) 326 IAC 8-3-6(a)(4)(E) now contains the requirement that all acceptable equivalent emission control systems shall be addressed in requested SIP revisions submitted to the USEPA; (4) 326 IAC 8-3-6(b)(5) has been revised to prohibit the loading of an open top degreaser to the point where the vapor level would drop more than 10 centimeters (4 inches) when the workload is removed; (5) 326 IAC 8-3-7(a)(1) has been revised to require the closure of conveyorized degreaser downtime covers when the degreasers are not in use; (6) 326 IAC 8-3-7(a)(2) has been revised so that the requirement for the use of various switches is not conditioned on the heating of a solvent to its boiling point; and (7) 326 IAC 8-3-7(a)(6)(C) now contains the requirement that all acceptable equivalent (alternative) emissions control systems shall be addressed in SIP revision submittals to the USEPA. It should be noted that the underlying SIP requirements remain in effect until changed by final USEPA rulemaking actions.

326 IAC 8-4-8 Leaks From Petroleum Refineries; Monitoring; Reports

The rule revisions adopted for this rule are as follows: (1) 326 IAC 8-4-8(p) has been revised to specify that recordkeeping and reporting programs varying from the guidelines in subsections specified in 8-4-8(b) through 8-4-8(o) shall be submitted to the USEPA as SIP revisions; (2) 326 IAC 8-4-8-(q)(1) has been revised to state that the Commissioner may require the operator of a refinery to reschedule turnaround based on the number and severity of tagged leaks awaiting repair at the times of turnarounds; and (3) 326 IAC 8-4-8(q)(2) has been revised to state that, except for safety pressure relief valves, no owner or operator of a petroleum refinery shall install or operate a valve at the end of a pipe or line containing organic compounds unless the pipe or line is sealed with a second valve, blind flange, plug, or cap.

326 IAC 8-5-4 Pneumatic Rubber Tire Manufacturing

In the January 2, 1991, NPR, responding to the State's withdrawal of revisions to this rule, the USEPA stated that it would take no action on this rule. The revised rules adopted by the State and submitted on May 15, 1991, contained finally adopted regulations for pneumatic rubber tire manufacturing which significantly differ from rule revisions previously submitted and discussed in the NPR. Because the rule has been substantially revised and because the USEPA proposed to take no action on revisions to this rule, the revisions to this rule submitted on May 15, 1991, will be addressed in a separate rulemaking action.

326 IAC 8-5-5 Graphic Arts Operations

This rule has been revised to drop a previously unacceptable subsection, 326 IAC 8-5-5(f), which allowed an automatic one-year compliance date extension for this source category. The deletion of this subsection was proposed for approval in the January 2, 1991, NPR. The finally adopted rule revision matches the preliminarily adopted revision addressed in the NPR.

Conclusion

All of the rule revisions discussed above, with the exception of the rule revisions for pneumatic rubber tire manufacturing, were found to comply with the Clean Air Act, as amended, and with USEPA RACT guidelines and, therefore, are finally approvable. These rule revisions eliminate all of the rule deficiencies addressed in the June 15, 1988, letter from the USEPA to the IDEM except the lack of capture efficiency test methods. Moreover, the revisions meet the requirement under section 182(a)(2)(A) of the amended Act that States correct their SIPs consistent with guidance issued by the Administrator before the date of enactment of the amended Act.

Response to Public Comments and Final Rulemaking Action

No public comments were received in response to USEPA's January 2, 1991, proposed rule. For the reasons cited above, USEPA approves the incorporation of the following Indiana regulations into the Indiana State Implementation Plan for ozone. These rules were adopted as part of title 326 of the Indiana Administrative Code (326 IAC) by the Air Pollution Control Board and published in the Indiana Register and effective as indicated below.

Published November 1, 1988; Effective October 23, 1988:
- 326 IAC 8-1-0.5 Coating Definition
- 326 IAC 8-2-11 Fabric and Vinyl Coating

Published March 1, 1990; Effective February 15, 1990:
- 326 IAC 1-2-48 Non-Photochemically Reactive Hydrocarbon Defined
- 326 IAC 8-2-5 Paper Coating Operations

Published June 1, 1990; Effective May 18, 1990:
- 326 IAC 1-2-18.5 Cold Cleaner Degreaser Defined
- 326 IAC 1-2-21.5 Conveyorized Degreaser Defined
- 326 IAC 1-2-29.5 Freeboard Height Defined
- 326 IAC 1-2-29.6 Freeboard Ratio Defined
- 326 IAC 1-2-49.5 Open Top Vapor Degreaser Defined
- 326 IAC 8-2-9 Miscellaneous Metal Coating Operations
- 326 IAC 8-3-1 Organic Solvent Degreasing Operations

326 IAC 8–5–3 Synthesized Pharmaceutical Manufacturing Operations
326 IAC 8–5–5 Graphic Arts Operations
Published July 1, 1990; Effective June 8, 1990:
326 IAC 8–1–2 Compliance Methods
326 IAC 1–2–90 Volatile Organic Compound (VOC) Definition
326 IAC 8–1–4 Testing Procedures
Published June 1, 1991; Effective June 5, 1991:
326 IAC 1–2–14 Coating Line Definition
326 IAC 8–1–1 Applicability of Rule
326 IAC 8–1–2 Compliance Methods
326 IAC 8–1–4 Testing Procedures
326 IAC 8–2–1 Applicability
326 IAC 8–3–5 Cold Cleaner Degreaser Operation and Control
326 IAC 8–3–6 Open Top Vapor Degreaser Operation and Control Requirements
326 IAC 8–3–7 Conveyorized Degreaser Operation and Control
326 IAC 8–4–8 Leaks from Petroleum Refineries; Monitoring; Reports
326 IAC 8–5–5 Graphic Arts Operations.

No action is taken on 326 IAC 8–5–4 Pneumatic Rubber Tire Manufacturing.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 5, 1992. Filing petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. [See section 307(b)(2).]

List of Subjects in 40 CFR Part 52

Air pollution control, Environmental protection, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Ozone.

Note: Incorporation by Reference of the State Implementation Plan for the State of Indiana was approved by the Director of the Federal Register on July 1, 1982.

Dated: December 31, 1991.

Valdas V. Adamkus,

Regional Administrator.

For the reasons set out in the Preamble, chapter I, title 40, Code of Federal Regulations is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

Subpart P—Indiana

2. Section 52.770 is amended by adding paragraph (c)(87) to read as follows:

§ 52.770 Identification of plan.

* * * * *

(c) * * *

(87) On October 23, 1990, and August 19, 1991, the Indiana Department of Environmental Management submitted regulations adopted by the Indiana Air Pollution Control Board as part of title 326 of the Indiana Administrative Code and intended incorporation into the Indiana ozone plan as part of the stationary source control strategy.

(i) Incorporation by reference.

(A) The following volatile organic compound rules adopted by the Indiana Air Pollution Control Board as part of title 326 of the Indiana Administrative Code (326 IAC) and intended to partially satisfy the requirements of the Clean Air Act.

(*1*) Effective October 23, 1988: 326 IAC 8–1–.05 Coating Definition, 326 IAC 8–2–11 Fabric and Vinyl Coating.

(*2*) Effective February 15, 1990: 326 IAC 1–2–48 Non-Photochemically Reactive Hydrocarbon Defined; 326 IAC 8–2–5 Paper Coating Operations.

(*3*) Effective May 18, 1990: 326 IAC 1–2–18.5 Cold Cleaner Degreaser Defined; 326 IAC 1–2–21.5 Conveyorized Degreaser Defined; 326 IAC 1–2–29.5 Freeboard Height Defined; 326 IAC 1–2–29.6 Freeboard Ratio Defined; 326 IAC 1–2–49.5 Open Top Vapor Degreaser Defined; 326 IAC 8–2–9 Miscellaneous Metal Coating Operations; 326 IAC 8–3–1 Organic Solvent Degreasing Operations; 326 IAC 8–5–3 Synthesized Pharmaceutical Manufacturing Operations; 326 IAC 8–5–5 Graphic Arts Operations.

(*4*) Effective June 8, 1990: 326 IAC 8–1–2 Compliance Methods; 326 IAC 1–2–90 Volatile Organic Compound (VOC) Definition; 326 IAC 8–1–4 Testing Procedures.

(*5*) Effective June 5, 1991: 326 IAC 1–2–14 Coating Line Definition; 326 IAC 8–1–1 Applicability of Rule; 326 IAC 8–1–2 Compliance Methods; 326 IAC 8–1–4 Testing Procedures; 326 IAC 8–2–1 Applicability; 326 IAC 8–3–5 Cold Cleaner Degreaser Operation and Control; 326 IAC 8–3–6 Open Top Vapor Degreaser Operation and Control Requirements; 326 IAC 8–3–7 Conveyorized Degreaser Operation and Control; 326 IAC 8–4–8 Leaks from Petroleum Refineries, Monitoring, Reports; 326 IAC 8–5–5 Graphic Arts Operations.

3. Section 52.777 is amended by adding paragraph (c)(2) to read as follows:

§ 52.777 Control strategy: photochemical oxidants (hydrocarbons).

* * * * *

(c) * * *

(*2*) The stationary source volatile organic control measures submitted by the State on October 23, 1990, and August 19, 1991, are approved as described in 40 CFR 52.770(c)(87) with the exception of 326 IAC 8–5–4 Pneumatic Rubber Tire Manufacturing, on which USEPA has taken no action. It should be noted that although the State's control measures provide that equivalent test methods, alternative emission controls, and revisions in rule applicability must be submitted to the USEPA as proposed revisions to the State Implementation Plan (SIP), such proposed SIP revisions are not part of the SIP unless and until they are approved as such by the USEPA.

[FRL–4112–2]

Land Disposal Restrictions for Third Third Scheduled Wastes

AGENCY: Environmental Protection Agency (EPA).

ACTION: Technical amendments.

SUMMARY: On June 1, 1990, EPA published regulations promulgating congressionally-mandated prohibitions on land disposal of certain hazardous wastes. This notice corrects errors and clarifies the language in the preamble and regulations of the June 1, 1990 final rule.

EFFECTIVE DATE: This rule is effective on March 6, 1992.

ADDRESSES: The RCRA docket is open from 9:30 to 3:30, Monday through Friday, excluding Federal holidays, and is located at the following address: EPA RCRA Docket (OS–305), room M–2427, 401 M Street SW., Washington, DC 20460. The public must make an appointment to review docket materials by calling (202) 260–9327. Refer to Docket number F–92–13C2–FFFFF when making appointments to review any background documentation for this correction. The public may copy a maximum of 100 pages of material from any one regulatory docket at no cost; additional copies cost $0.20 per page.

FOR FURTHER INFORMATION CONTACT: For general information contact the RCRA Hotline at (800) 424–9346 (toll free) or (703) 920–9810 in the Washington, DC metropolitan area. For technical information contact the Waste Treatment Branch, Office of Solid Waste, 401 M Street SW., Washington, DC 20460, (703) 308–8434.

SUPPLEMENTARY INFORMATION:

Outline

I. Reasons and Basis for Today's Amendment
II. Summary of Corrections to the Third Third Final Rule
A. Section 148.1 & .10
B. Sections 264.13 & 265.13
C. Section 268.3
D. Section 268.41
E. Section 268.42
III. Rationale for Immediate Effective Date
IV. Regulatory Impact Analysis
V. List of Subjects in Parts 148, 264, 265, and 268

I. Reasons and Basis for Today's Amendment

It has recently come to the attention of the Agency in regard to the so-called third third rule, which established land disposal prohibitions and treatment standards for characteristic wastes and for listed wastes in the final third of the section 3004(g) schedule (55 FR 22520–720, June 1, 1990), that in some cases the regulatory language was at odds with the intent of the preamble to the final regulation, or failed to express those intentions. This notice corrects those errors, and also restores language inadvertently deleted from the third third rule by an unrelated **Federal Register** notice.

II. Summary of Corrections to the Third Third Final Rule

An explanation is provided below for each of the corrections made in today's rule.

A. Section 148.1 & .10

In the preamble to the final regulation, EPA discussed at length its reasons for applying land disposal prohibitions at the point of disposal for characteristic wastes that are injected into nonhazardous Class I deep wells (wells in which wastewater is injected below the lowermost geologic formation containing an underground source of drinking water). 55 FR 22658–59; 22645, col. 3. In essence, this means that if a characteristic waste no longer exhibits a characteristic when it is injected into such a deep well, the disposal is not prohibited. *Id.* at 22658–59.

In codifying this principle, however, EPA mistakenly indicated that it applied to characteristic wastes injected into either a nonhazardous or hazardous Class I deep well. See § 148.1(d)(1), 55 FR 22683. The provision should apply only to injection into nonhazardous Class I deep wells because hazardous wells would not be subject to any regulatory disruption if land disposal prohibitions (including the dilution prohibition) for characteristic wastes are applied to them. This is because hazardous Class I deep wells are already subject to such prohibitions by virtue of receiving listed and other hazardous wastes. EPA is consequently correcting § 148.1(d)(1) by removing the reference to hazardous Class I deep wells.

In the technical amendment to the third third, published on January 31, 1991 (55 FR 3864), Table A in 40 CFR 148.10 was incorrectly transposed and several constituents were inadvertently omitted. EPA is correcting Table A in § 148.10 by adding the omitted constituents.

B. Sections 264.13 & 265.13

In the 1986 rulemaking establishing the framework provisions for the land disposal restrictions program, EPA amended the waste analysis plan provisions contained in §§ 264.13(a) and 265.13(a) to require that any waste analysis done by subtitle C facilities must be adequate to comply with the provisions of the land disposal restrictions program in the part 268 regulations. 51 FR at 40637, 638 (Nov. 7, 1986). As amended, the provision consequently read in pertinent part: "(a)(1) Before an owner or operator treats, stores, or disposes of any hazardous wastes * * * he must obtain a detailed chemical and physical analysis of a representative sample of the wastes * * * At a minimum, the analysis must contain all the information which must be known to treat, store, or dispose of the waste in accordance with this part and part 268 of this chapter * * *"

In an August 14, 1989 regulation related to closure requirements, EPA amended the first sentence of §§ 264.13(a)(1) and 265.13(a)(1). The Office of the Federal Register misinterpreted the codification instructions, however, and deleted the second sentence of these provisions. EPA is restoring the mistakenly deleted language in this technical correction.

C. Section 268.3

EPA established treatment standards for D003 reactive cyanide wastes of 590 mg/kg (total cyanide) and 30 mg/kg (amenable cyanide) for nonwastewaters, and 0.86 mg/l (amenable cyanide) for wastewaters. § 268.43(a) Table CCW; 55 FR 22701. At issue here is whether these treatment standards can be achieved by dilution.

EPA stated expressly that these treatment standards had to be achieved through modes of treatment other than dilution: "EPA also notes that it considers * * * reactive cyanide wastes * * * to be toxic characteristic wastes * * * Reactive cyanide * * * wastes obviously contain toxic constituents. Thus, dilution would not be an appropriate method of treatment for [such wastes]." 55 FR 22666, col. 1. See also 54 FR at 48426, col. 2 (Nov. 22, 1989) (proposing that D003 reactive cyanide wastes be subject to the dilution prohibition).

In codifying this regulation, however, EPA inadvertently omitted this prohibition on dilution for reactive cyanide wastewaters that are treated in treatment systems whose ultimate discharges are subject to regulation under the Clean Water Act. The error results from the drafting of § 268.3(b), an exception from the dilution prohibition for characteristic wastes treated in systems whose discharges are subject to Clean Water Act regulation. The exception does not, however, apply to wastes for which "a method has been specified as the treatment standard." § 268.3(b) (final sentence). Since the reactive cyanide standards are levels rather than methods, this limitation on the exclusion would not apply and dilution of D003 reactive cyanide wastewaters would be allowed in Clean Water Act treatment systems. As noted above, this is the opposite result EPA proposed and intended, as stated in the preambles. Therefore, EPA is amending § 268.3(b) to indicate that the treatment standard for reactive cyanide wastes cannot be achieved through dilution as a substitute for adequate treatment under any circumstance, including management in a treatment system whose discharge is subject to the Clean Water Act. As always, the issue of what dilution is impermissible (i.e., serves as a substitute for adequate treatment, see § 268.3(a)) turns on specific facts, and aggregation of different D003 reactive cyanide wastes for centralized treatment that efficiently destroys cyanide is not ordinarily precluded. See, *e.g.*, 55 FR 22666, cols. 1–2; 55 FR 22664.

D. Section 268.41

As part of the third third rule, EPA added language to § 268.41 and .43 indicating that where treatment standards are based on grab sampling, enforcement would also use grab samples. Conversely, where treatment standards are based on composite sampling, so would enforcement. 55 FR 22680, 22701; *see also id.* at 22539. The regulatory language to § 268.41(a), however, suggests that enforcement will invariably be based on grab sampling. EPA is correcting this rule by adding the language already present in § 268.43(a), which states that grab sampling will be used unless noted otherwise in the treatment standard itself. (As an example of how such an instruction is noted, see e.g., standards for U209 to U226, all of which are based on composite samples, as stated in the treatment standard.)

E. Section 268.42

EPA also stated that D003 reactive sulfide wastes remain subject to the dilution prohibition: "EPA also notes that it considers * * * reactive sulfide wastes to be toxic characteristic wastes * * * Reactive * * * sulfide wastes obviously contain toxic constituents. Thus, dilution would not be an appropriate method of treatment for [such waste]." 55 FR 22666, col. 1. (EPA also proposed that reactive sulfide wastes be subject to the dilution prohibition. 54 FR 48428, col. 2 (Nov. 22, 1989).)

EPA specified, as a method of treatment for these wastes, deactivation to remove the characteristic. § 268.42(a) Table 2; 55 FR 22694. As is clear from the discussion in the relevant preambles, EPA did not intend to allow dilution as a substitute for adequate treatment to deactivate reactive sulfide wastes. EPA is consequently adding clarifying language to § 268.42 to confirm that the dilution prohibition applies to reactive sulfide wastes. EPA notes further that because there is a specified method of treatment for these wastes, the exception from the dilution prohibition in § 268.3(b) (for wastes treated in Clean Water Act treatment systems) does not apply.

III. Rationale for Immediate Effective Date

Today's notice does not create any new regulatory requirements; rather, it restates and clarifies requirements already in effect by correcting a number of errors in the June 1, 1990 final rule (55 FR 22520). For these reasons, EPA finds that good cause exists under section 3010(b)(3) of RCRA, 42 U.S.C. 9903(b)(3), to provide for an immediate effective date. In addition, there already was full opportunity to comment on all of these issues during the rulemaking so that further comment is unnecessary. For the same reasons, EPA finds that there is good cause under 5 U.S.C. 553(b)(3) to promulgate today's corrections in final form and that there is good cause under 5 U.S.C. 553(b)(3) to waive the requirement that regulations be published at least 30 days before they become effective. Finally, EPA notes that although it is not withdrawing any existing regulatory language, all of today's revisions operate prospectively.

IV. Regulatory Impact Analysis

Under Executive Order 12291, EPA must judge whether a regulation is "major" and, therefore, subject to the requirement of a Regulatory Impact Analysis. Due to the nature of this regulation (technical correction), it is not "major"; therefore, no Regulatory Impact Analysis is required.

V. List of Subjects in Parts 148, 264, 265, and 268

Administrative practice and procedure, Confidential business information, Designated facility, Environmental protection, Hazardous materials, Hazardous materials transporting, Hazardous waste, Intergovernmental relations, Labeling, Manifests, Packaging and containers, Recycling, Reportable quantities, Reporting and recordkeeping requirements, Waste treatment and disposal, Water pollution control, Water supply.

Dated: February 27, 1992.

Don R. Clay,

Assistant Administrator, Office of Solid Waste and Emergency Response.

For the reasons set out in the preamble, title 40, chapter I of the Code of Federal Regulations is amended as follows:

PART 148—HAZARDOUS WASTE INJECTION RESTRICTIONS

1. The authority citation for part 148 continues to read as follows:

Authority: Section 3004, Resource Conservation and Recovery Act, 42 U.S.C. 6901 et. seq.

2. Section 148.1 is amended by revising paragraph (d) to read as follows:

§ 148.1 Purpose, scope, and applicability.

* * * * *

(d) Wastes that are hazardous only because they exhibit a hazardous characteristic, and which are otherwise prohibited under this part, are not prohibited if the wastes:

(1) Are disposed into a nonhazardous injection well defined under 40 CFR 144.6(a); and

(2) Do not exhibit any prohibited characteristic of hazardous waste identified in subpart C of part 261 at the point of injection.

3. In Section 148.10 Table A is amended by adding entries for "ethyl ether" and "methyl isobutyl ketone" in alphabetical order.

PART 264—STANDARDS FOR OWNERS AND OPERATORS OF HAZARDOUS WASTE TREATMENT, STORAGE, AND DISPOSAL FACILITIES

1. The authority citation for part 264 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6924, and 6925.

2. Section 264.13 is amended by revising paragraph (a)(1) to read as follows:

§ 264.13 General waste analysis.

(a)(1) Before an owner or operator treats, stores, or disposes of any hazardous wastes, or nonhazardous wastes if applicable under § 264.113(d), he must obtain a detailed chemical and physical analysis of a representative sample of the wastes. At a minimum, the analysis must contain all the information which must be known to treat, store, or dispose of the waste in accordance with this part and part 268 of this chapter.

* * * * *

PART 265—INTERIM STATUS STANDARDS FOR OWNERS AND OPERATORS OF HAZARDOUS WASTE TREATMENT, STORAGE, AND DISPOSAL FACILITIES

1. The authority citation for part 265 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6924, 6925, and 6935.

2. Section 265.13 is amended by revising paragraph (a)(1) to read as follows:

§ 265.13 General waste analysis.

(a)(1) Before an owner or operator treats, stores, or disposes of any hazardous wastes, or nonhazardous wastes if applicable under § 265.113(d), he must obtain a detailed chemical and physical analysis of a representative sample of the wastes. At a minimum, the analysis must contain all the information which must be known to treat, store, or dispose of the waste in accordance with this part and part 268 of this chapter.

* * * * *

PART 268—LAND DISPOSAL RESTRICTIONS

1. The authority citation for part 268 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6921, and 6924.

2. Section 268 is amended by revising paragraph (b) to read as follows:

§ 268.3 Dilution prohibited as a substitute for treatment.

* * * * *

(b) Dilution of wastes that are hazardous only because they exhibit a characteristic in a treatment system which treats wastes subsequently discharged to a water of the United States pursuant to a permit issued under section 402 of the Clean Water Act (CWA) or which treats wastes for the purposes of pretreatment requirements under section 307 of the CWA is not impermissible dilution for purposes of this section unless a method has been specified as the treatment standard in § 268.42, or unless the waste is a D003 reactive cyanide wastewater or nonwastewater.

3. Section 268.41 is amended by revising paragraph (a) to read as follows:

§ 268.41 Treatment standards expressed as concentration in waste extract.

(a) Table CCWE identifies the restricted wastes and the concentrations of their associated constituents which may not be exceeded by the extract of a waste or waste treatment residual developed using the test method in Appendix I of this part of the allowable land disposal of such wastes, with the exception of wastes D004, D008, D031, K084, K101, K102, P010, P011, P012, P036, and U136 and the concentrations of their associated constituents which may not be exceeded by the extract of a waste or waste treatment residual developed using the test methods in appendix II of 40 CFR part 261 for the allowable land disposal of such wastes. (Appendix II of this part provides Agency guidance on treatment methods that have been shown to achieve the Table CCWE levels for the respective wastes. Appendix II of this part is not a regulatory requirement but is provided to assist generators and owners/operators in their selection of appropriate treatment methods.) Compliance with these concentrations is required based upon grab samples, unless otherwise noted in the following Table CCW.

* * * * *

4. In § 268.42 Table 2 is amended by revising, under waste code D003, the entry for "Reactive Sulfides based on 261.23(a)(5)." to read as follows:

§ 268.42 Treatment standards expressed as specified technologies.

* * * * *

TABLE 2.—TECHNOLOGY-BASED STANDARDS BY RCRA WASTECODE

Waste code	See also	Waste descriptions and/or treatment subcategory	CAS No. for regulated hazardous constituents	Technology code	
				Wastewaters	Nonwastewaters
D003		Reactive Sulfides based on 261.23(a)(5).	NA	DEACT but not including dilution as a substitute for adequate treatment.	DEACT but not including dilution as a substitute for adequate treatment.

BILLING CODE 6560-50-M

40 CFR Part 271

[FRL-4111-3]

Rhode Island; Final Authorization of State Hazardous Waste Management Program Revisions

AGENCY: Environmental Protection Agency.

ACTION: Immediate final rule.

SUMMARY: Rhode Island has applied for final authorization of revisions to its hazardous waste program under the Resource Conservation and Recovery Act (RCRA). The Environmental Protection Agency (EPA) has reviewed Rhode Island's application and has made a decision, subject to public review and comment, that Rhode Island's hazardous waste program revision satisfies all of the requirements necessary to qualify for final authorization. Thus, EPA intends to approve Rhode Island's hazardous waste program revision. Rhode Island's application for program revision is available for public review and comment.

DATES: Final authorization for Rhode Island shall be effective May 5, 1992, unless EPA publishes a prior **Federal Register** action withdrawing this immediate final rule. All comments on Rhode Island's program revision application must be received by the close of business April 6, 1992.

ADDRESSES: Copies of Rhode Island's program revision application are available for inspection and copying, 8:30 a.m.–4 p.m. Monday–Friday at the following addresses: Rhode Island Department of Environmental Management, Division of Air & Hazardous Materials, 291 Promenade Street, Providence, Rhode Island 02908–5767, Phone: 401/277–2797; U.S. EPA Region I Library, One Congress Street, 11th Floor, Boston, Massachusetts 02203, Phone: 617/565–3300. Written comments should be sent to Frank Battaglia, at the address below.

FOR FURTHER INFORMATION CONTACT: Frank Battaglia, MA & RI Waste Regulation Section, U.S. EPA Region I, HRR–CAN3, JFK Federal Building, Boston, Massachusetts 02203, Phone: 617/573–9643.

SUPPLEMENTARY INFORMATION:

A. Background

States with final authorization under section 3006(b) of the Resource Conservation and Recovery Act ("RCRA" or "the Act"), 42 U.S.C. 6929(b), have a continuing obligation to maintain a hazardous waste program that is equivalent to, consistent with, and no less stringent than the Federal hazardous waste program.

Revisions to State hazardous waste programs are necessary when Federal or State statutory or regulatory authority is modified or when certain other changes occur. Most commonly, State program revisions are necessitated by changes to EPA's regulations in 40 CFR parts 260–266, 268, 124 and 270.

B. Rhode Island

Rhode Island initially received final authorization on January 31, 1986, (51 FR 3780, January 30, 1986) to implement its base hazardous waste program. Rhode

Island received final authorization for revisions to its program on March 26, 1990, (55 FR 9128, March 12, 1990) to implement the program revisions listed in the **Federal Register** notice published March 12, 1990. On December 12, 1989, Rhode Island submitted, for EPA's review, a draft program revision application for federal requirements promulgated from July 1, 1985 to June 30, 1986, except that approval was not requested for revisions which are required as a result of the Hazardous and Solid Waste Amendments of 1984 (Pub. L. 98-616, November 8, 1984, hereinafter "HSWA"). On March 25, 1991, Rhode Island submitted the final program revision application which responded to all of EPA's prior review comments. Today, Rhode Island is seeking approval of its program revision in accordance with 40 CFR 271.21(b)(3).

EPA has reviewed Rhode Island's application, and has made an immediate final decision that Rhode Island's hazardous waste program revision satisfies all of the requirements necessary to qualify for final authorization. Consequently, EPA intends to grant final authorization for the modifications to the Rhode Island program subject to further review based on adverse public comment. The public may submit written comments on EPA's immediate final decision up until April 6, 1992. Copies of Rhode Island's application for program revision are available for inspection and copying at the locations indicated in the "**ADDRESSES**" section of this notice.

Approval of Rhode Island's program revision shall become effective in 60 days unless an adverse comment pertaining to the State's revision discussed in this notice is received by the end of the comment period. If an adverse comment is received EPA will publish either (1) a withdrawal of the immediate final decision or (2) a notice containing a response to comments which either affirms that the immediate final decision takes effect or reverses the decision.

The Rhode Island program revision application is based on changes to State Regulations which were intended to make them equivalent to the analogous Federal Regulations which had been promulgated during the July 1, 1985 to June 30, 1986 period, in 40 CFR parts 260, 261, 264, 265 and 270. These changes did not include any provisions which were required as a result of the Hazardous and Solid Waste Amendments 1984 (HSWA). Specific provisions which are included in the Rhode Island program revision authorization made today are listed in Table 1 below.

TABLE 1.—PROVISIONS COVERED BY THIS PROGRAM REVISION AUTHORIZATION

Federal requirement	State authority
Financial Responsibility: Settlement Agreement 51 FR 16443-16459, May 2, 1986.	Rule 3.100, 9.00, 9.16, 10.00, 10.02, 11.00, 11.01D, 7.01E, 9.17, 8.04R, 8.04T, 7.06A, 7.05C.
Listing of Spent Pickle Liquor (KO62) 51 FR 19320, May 28, 1986 as amended September 22, 1986 (51 FR 33612).	Rule 3.25.

Rhode Island agrees to review all State hazardous waste permits which have been issued under State law prior to the effective date of this authorization. Rhode Island agrees to then modify, revoke and reissue, or reissue such permits as necessary to require compliance with the amended State program when the permit expires. The modification, revocation and reissuance, or reissuance will be scheduled in the State Grant Workplan, if necessary.

Rhode Island is not seeking authorization to operate on Indian lands.

C. Decision

I conclude that Rhode Island's application for program revision meets all of the statutory and regulatory requirements established by RCRA. Accordingly, Rhode Island is granted final authorization to operate its hazardous waste program as revised.

Rhode Island now has responsibility for permitting treatment, storage, and disposal facilities within its borders and carrying out the aspects of the RCRA program described in its revised program application and previously approved authorization, subject to the limitations of the HSWA. Rhode Island also has primary enforcement responsibilities, although EPA retains the right to conduct inspections under section 3007 of RCRA and to take enforcement actions under section 3008, 3013, and 7003 of RCRA.

Compliance With Executive Order 12291

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 4 U.S.C. 605(b), I hereby certify that this authorization will not have a significant economic impact on a substantial number of small entities. This authorization effectively suspends the applicability of certain Federal regulations in favor of Rhode Island's program, thereby eliminating duplicative requirements for handlers of hazardous waste in the State. It does not impose any new burdens on small entities. This rule, therefore, does not require a regulatory flexibility analysis.

List of Subjects in 40 CFR Part 271

Administrative practice and procedure, Confidential business information, Hazardous materials transportation, Hazardous waste, Indian lands, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Water pollution control, Water supply.

Authority: This notice is issued under the authority of Sections 2002(a), 3006, and 7004(b) of the Solid Waste Disposal Act as amended 42 U.S.C. 6912(a), 6926, 6974(b).

Dated: February 21, 1992.

GENERAL SERVICES ADMINISTRATION

41 CFR Parts 301-9 and 301-11

[FTR Amendment 25]

RIN 3090-AE47

Federal Travel Regulation; Travel Expenses of Federal Employees with Disabilities

AGENCY: Federal Supply Service, GSA.

ACTION: Final rule.

SUMMARY: This final rule amends the Federal Travel Regulation (FTR) to allow payment of certain additional travel expenses incurred by a Federal employee as a result of a disability. This change is intended to provide each employee equal opportunity to perform official business travel by reimbursing the employee for certain additional travel expenses incurred to accommodate the employee's disability.

EFFECTIVE DATE: This final rule is effective March 6, 1992, and applies for travel (including travel incident to a change of official station) performed on or after March 6, 1992.

FOR FURTHER INFORMATION CONTACT: Robert A. Clauson, Transportation Management Division (FBX), Washington, DC 20406, telephone FTS 365-5253 or commercial (703) 305-5253.

SUPPLEMENTARY INFORMATION: This final rule provides regulatory authority to reimburse certain additional travel expenses necessarily incurred by an employee as a result of the employee's disability, which had previously been paid based on numerous Comptroller General decisions. The following expenses are reimbursable: Travel and transportation of an attendant to accompany the employee with a disability; cost of specialized transportation to, from, and/or at the temporary duty location; cost of specialized services provided by a commercial carrier to accommodate the employee's disability; cost of baggage handling at a hotel or terminal (e.g., porter, redcap, skycap, etc.) incurred as a direct result of the employee's disability; and cost of transporting or renting a wheelchair.

The General Services Administration (GSA) has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

List of Subjects in 41 CFR Parts 301-9 and 301-11

Government employees, Travel, Travel allowances, Travel and transportation expenses.

For the reasons set out in the preamble, 41 CFR parts 301-9 and 301-11 are amended as follows:

PART 301-9—MISCELLANEOUS EXPENSES

1. The authority citation for part 301-9 continues to read as follows:

Authority: 5 U.S.C. 5701-5709; E.O. 11609, July 22, 1971 (36 FR 13747).

2. Part 301-9 is amended by redesignating §§ 301-9.2 and 301-9.3 as §§ 301-9.3 and 301-9.4, respectively, and by adding new § 301-9.2, to read as follows:

§ 301-9.2 Additional travel expenses incurred by an employee with a disability.

(a) *Policy, applicability, and general rules*—(1) *Policy.* In accordance with the Rehabilitation Act of 1973, as amended, 29 U.S.C. 701 *et seq.* these provisions are intended to accommodate an employee with a disability by providing for reimbursement of necessary additional travel expenses incurred in the performance of official travel.

(2) *Applicability.* This section applies to an employee with a disability as defined in paragraph (b) of this section.

(3) *General rule.* Payment is authorized for the additional travel expenses listed in paragraph (c) of this section which are necessarily incurred by an employee with a disability in the performance of official travel.

(b) *Definitions.* For purposes of this section, the following terms have the meaning indicated:

(1) *Employee with a disability.* The term "employee with a disability" means an employee who has a disability as defined in paragraph (b)(2) of this section, and is otherwise generally covered under the Rehabilitation Act of 1973, as amended, 29 U.S.C. 701 *et seq.*.

(2) *Disability.* The term "disability", with respect to an employee, means:

(i) Having a physical or mental impairment that substantially limits one or more major life activities;

(ii) Having a record of such an impairment; or

(iii) Being regarded as having such an impairment.

(3) *Physical or mental impairment*—(i) The term "physical or mental impairment" means:

(A) Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: Neurological, musculoskeletal, special sense organs, respiratory (including speech organs), cardio-vascular, reproductive, digestive, genitourinary, hemic and lymphatic, skin, and endocrine; or

(B) Any mental or psychological disorder, such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities.

(ii) The term "physical or mental impairment" includes, but is not limited to, such diseases and conditions as cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, mental retardation, emotional illness, and orthopedic, visual, speech, and hearing impairments.

(4) *Major life activities.* The term "major life activities" means functions such as caring for oneself, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.

(5) *Substantially limits.* The term "substantially limits" means the employee is unable to perform a major life activity that the average person in the general population can perform; or is significantly restricted as to the condition, manner, or duration under which he/she can perform a particular major life activity as compared to the condition, manner, or duration under which the average person in the general population can perform that same major life activity.

(6) *Has a record of such an impairment.* The term "has a record of such an impairment" means the employee has a history of, or has been classified as having, a mental or physical impairment that substantially limits one or more major life activities.

(7) *Is regarded as having such an impairment.* The term "is regarded as having such an impairment" means the employee:

(i) Has a physical or mental impairment that does not substantially limit major life activities but the impairment is treated by the agency as constituting such a limitation;

(ii) Has a physical or mental impairment that substantially limits major life activities only as a result of the attitudes of others toward such impairment; or

(iii) Has none of the impairments defined in paragraph (b)(3) of this section but is treated by the employing agency as having a substantially limiting impairment.

(c) *Allowable expenses.* The following expenses are allowable additional travel expenses payable to an employee with a disability:

(1) Transportation and subsistence expenses authorized under this chapter that are incurred by an attendant accompanying the employee, whether the attendant is or is not a member of the employee's immediate family, when the employee requires the assistance of an attendant;

(2) Cost of specialized transportation for the employee to, from, and/or at the temporary duty location;

(3) Cost of specialized services provided by a commercial carrier necessary to accommodate the employee's disability;

(4) Costs incurred as a direct result of the employee's disability for baggage handling in connection with public transportation or at lodging facilities; and

(5) Cost of renting and/or transporting a wheelchair.

PART 301-11—CLAIMS FOR REIMBURSEMENT

3. The authority citation for part 301–11 continues to read as follows:

Authority: 5 U.S.C. 5701–5709; E.O. 11609, July 22, 1971 (36 FR 13747).

4. Section 301–11.6 is amended by removing the reference "§ 301–9.1(a)" in paragraph (b)(19), and adding in its place the references "§§ 301–9.1 (a) and (e)"; by redesignating paragraphs (b)(23) through (27) as paragraphs (b)(24) through (28), respectively; by removing the reference "§ 301–9.3" in the paragraph redesignated (b)(24), and adding in its place the reference "§ 301–9.4"; and by adding new paragraph (b)(23) to read as follows:

§ 301–11.6 Administrative approvals.

* * * * *

(b) * * *

(23) Additional travel expenses incurred by an employee with a disability. (See § 301–9.2.)

* * * * *

Dated: January 24, 1992.

Richard G. Austin,

Administrator of General Services.

[FR Doc. 92–5262 Filed 3–5–92; 8:45 am]

BILLING CODE 6820–24–F

Proposed Rules

Federal Register
Vol. 57, No. 45
Friday, March 6, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 61

RIN 3150–AE00

Licensing Requirements for Land Disposal of Radioactive Wastes

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) proposes to make four specific changes to its regulations containing licensing requirements for low-level radioactive waste (LLW) disposal facilities. These changes include (1) clarifying that 10 CFR part 61 applies to above-ground disposal facilities; (2) replacing the phrase "quality control program" in 61.12(j) with the phrase "quality assurance program," tailored to LLW disposal; (3) updating the Paperwork Reduction Act Statement in § 61.8; and (4) identifying the correct NRC recipient of copies of the licensee's annual reports. The Commission has determined that these changes are needed to correct imprecise wording administrative inconsistencies in the current regulations. These amendments will serve to incorporate established and documented NRC staff positions into the regulation yet will not result in extensive changes to actual text. The proposed changes are intended to simplify LLW disposal facility licensing interactions for NRC, the NRC Agreement States, and potential applicants for LLW disposal licenses.

DATE: Comment period expires April 6, 1992. Comments received after that date will be considered if it is practical to do so, but the Commission is able to assure consideration only for comments received on or before this date.

ADDRESSES: Submit written comments to: The Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch.

Deliver comments to: 11555 Rockville Pike, Rockville, Maryland, between 7:45 a.m. and 4:15 p.m. Federal workdays.

Copies of the regulatory analysis, the environmental assessment, and the comments received on the rule may be examined at: The NRC Public Document Room at 2120 L Street NW. (Lower Level), Washington, DC.

FOR FURTHER INFORMATION CONTACT: Janet Lambert, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 492–3857.

SUPPLEMENTARY INFORMATION:

Background

The NRC issued its "Licensing Requirements for Land Disposal of Radioactive Waste," 10 CFR part 61, (hereafter referred to as "part 61" or "the regulation") in December 1982. Part 61 sets out licensing procedures and performance objectives for the licensing of any "land disposal facility" for low-level radioactive waste (LLW) containing source, special nuclear, and byproduct material. It also sets out technical requirements for "near-surface disposal facilities," a subset of land disposal facilities.

The performance objectives, which are set out in subpart C to part 61, require that any "land disposal facility" be sited, designed, operated, closed, and controlled after closure so that exposures to humans are within the specified limits. The performance objectives also address protection of inadvertent intruders and workers and minimizing the long-term care needed. Technical requirements, which are found in subpart D to part 61 help ensure that the performance objectives in subpart C will be met. Subpart D establishes the minimal technical requirements for a "near-surface disposal facility" in the areas of site suitability, site design, facility operation, waste form, waste classification, and site closure, although the option for alternative requirements is explicitly included for all areas except site suitability. Such a facility is defined in § 61.3 as a land-disposal facility constructed in or within the upper 30 meters of the earth's surface.

Part 61 was developed in response to needs and requests expressed by the public, Congress, Industry, the States, and other Federal Agencies for the codification of comprehensive national criteria to define the level of safety that should be achieved in the land disposal of LLW. Since its promulgation, Part 61 has served as the basis for the development of compatible State regulations for LLW disposal facilities and related licensing guidance documents such as NRC's "Standard Review Plan for a License Application for a LLW Disposal Facility" (NUREG–1200), and the "Standard Format and Content Guide for a License Application for a LLW Disposal Facility" (NUREG–1199).

In response to a potential national shortage of LLW disposal capacity, Congress enacted the "Low-Level Radioactive Waste Policy Act of 1980," (LLRWPA). This act was subsequently amended by the "Low-Level Radioactive Waste Policy Amendments Act of 1985," (LLRWPAA). These Acts made the individual States responsible for the management and safe disposal of all commercial LLW generated within their borders. Congress also mandated that the States, either alone or in groups called Compacts, were to develop the capability to dispose of their LLW by January 1, 1993. States that fail to meet this deadline face significant economic penalties and the potential loss of access to any available LLW disposal capacity.

Given the mandated deadlines, applications for LLW disposal licenses are already under review and additional applications will be filed in the next few years either with NRC or the appropriate NRC Agreement States (States that have assumed the NRC's regulatory responsibilities for the disposal of LLW under section 274 of the Atomic Energy Act of 1954, as amended). Part 61 or the equivalent and compatible Agreement State regulations are and will be used to determine the acceptability of the proposed LLW disposal facilities.

A review of part 61 against the backdrop of current State and Compact efforts to site and develop LLW disposal facilities has identified two places in the regulations where the current wording is imprecise and should be changed. Currently, § 61.2 defines a "land disposal facility" as a LLW disposal facility built "into the subsurface of the land." The words "into the subsurface" have been interpreted as limiting the regulatory applicability of part 61 to those facilities that are covered with

soil, so as to exclude above-ground disposal facilities like above-ground vaults, that are not covered with soil.

In the second instance, § 61.12(j) of the regulation incorrectly labels the quality assurance (QA) program developed for the facility over its entire life from planning, through site characterization, construction, operation, and closure, as a quality control (QC) program. From both the breadth of the program as described in § 61.12(j) and in staff documents related to LLW disposal, the description of the information regarding the applicants' "quality control" program to be submitted in the application and to be reviewed by the NRC as presented in NUREGs 1199, and 1200, clearly is intended to be a quality assurance program, of which quality control is a component. Further clarification was provided by the staff in NUREG–1293 "Quality Assurance Guide for a Low-Level Radioactive Waste Disposal Facility." It is clear that NRC had actually intended to require the applicant to develop a quality assurance program for the LLW disposal facilities.

(Copies of NUREG–1199, NUREG–1200, and NUREG–1293 may be purchased from the Superintendent of Documents, U.S. Government Printing Office, P.O. Box 37082, Washington, DC 20013–7082. Copies are also available from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. A copy is also available for inspection and copying for a fee in the NRC Public Document Room, 2120 L Stret, NW. (Lower Level), Washington, DC.)

In the third instance, NRC is proposing to update § 61.8— the "Information Collection Requirements—OMB approval" statement to reflect the fact that subsequent to the original issuance of part 61, NRC requested, and obtained the Office of Management and Budget (OMB) approval for the part 61 information collection requirements. Section 61.8 was to be corrected the first time other revisions were made to part 61.

NRC has also identified a fourth place in part 61 where a reporting requirement is inconsistent with the present organization of NRC.

Accordingly, the Commission has initiated this rulemaking to make the necessary changes to part 61.

Discussion of Proposed Revisions

I. Amend the definition of "land disposal facility" in § 61.2 to specify that the term refers to LLW disposal facilities which are on or protrude through the earth's surface and do not have an earthen cover, in addition to those that are in the ground and have an earthen cover. The purpose of this change is to clarify the regulatory applicability of part 61 to the licensing of "above-ground" disposal designs like the "above-ground vault," in particular, the applicability of the performance objectives of part 61 to these designs.

The change that NRC is proposing to make to the definition of "land disposal facility" in part 61 will clarify that the regulation will be used by NRC to license above-ground disposal facilities. However, at this time the NRC has no specific criteria analogous to the near-surface disposal requirements of §§ 61.50(a), 61.51(a), and 61.52(a) of subpart D for above-ground disposal because of the special technical characteristics of above-ground disposal facilities. Only those portions of the regulation that apply generically to "land disposal facilities" will be directly applicable to above-ground disposal. Specifically, this means that the overall performance objectives of subpart C will apply as well as the part 61 administrative and procedural requirements, the environmental monitoring requirements, the financial assurance requirements, the waste transfer and manifest requirements, and the general institutional requirements.

Establishing the applicability of the subpart C performance objectives to above-ground disposal is particularly important. Any applicant for a license for an above-ground disposal facility under part 61 will have to demonstrate to the NRC that the proposed facility will meet the same safety requirements and dose limits that apply to any LLW disposal facility that is built completely underground. The demonstration of compliance will have to address the unique features of the above-ground design, the special technical considerations associated with those features, their potential health and safety consequences, and reconcile these with the subpart C performance objectives.

In addition, many of the existing subpart D requirements could be useful in evaluating the technical merits and general licensability of an above-ground disposal facility, even though under part 61 they are not applicable as requirements for such facilities.

To provide further clarification regarding the applicability of part 61 to the licensing of above-ground disposal facilities, NRC also is proposing to amend the "Disposal Facility" discussion in the Concepts Section—61.7. The proposed change to § 61.7(a)(1) will clarify the distinction made by the NRC between near-surface disposal and above-ground disposal, to emphasize that near-surface LLW disposal facilities built partially or totally above -grade have protective earthen covers, while similar facilities constructed without earthen covers are considered to be "above-ground disposal facilities".

It should be noted that NRC is not providing either technical criteria or guidance for above-ground disposal designs in this rulemaking. It is expected that, should NRC receive an application for above-ground disposal, criteria will be developed on a case-by-case basis.

II. Replace the term "quality control program" in § 61.12(j) with the term "quality assurance program, tailored to LLW disposal." The purpose of this change is to clarify what steps an applicant for an LLW disposal facility license must take in order to assure that the facility will perform as intended, and also to assure that the necessary records and documentation are available for evaluation and performance assessment by NRC or an Agreement State at the time of license submittal.

III. Revise § 61.8 to indicate that the NRC has requested and obtained OMB approval for the information collection requirements in part 61. Under the OMB guidelines that were in effect when the original part 61 was issued, OMB approval of the part 61 information collection requirements was not necessary because the regulation was expected to affect less than 10 licensees. Subsequently the OMB guidelines changed, and part 61 was no longer exempt from the OMB approval requirement. Accordingly, NRC submitted part 61 for OMB review and obtained the OMB clearance that is required by the Paperwork Reduction Act. The purpose of this proposed change is to update § 61.8 to correctly reflect this approval.

IV. Revise § 61.80(i)(1) to identify the correct NRC headquarters recipient of copies of the annual report.

Open Meeting on Proposed Changes

Before proceeding with the rulemaking, the NRC staff invited the States to an open public meeting to discuss the changes that NRC was contemplating for part 61. In order to maximize State participation, the meeting was held in conjunction with the annual meeting of the Conference of Radiation Protection Control Directors (CRPCD) on May 14, 1991 in Wichita, Kansas. At the meeting, NRC staff members briefly explained the proposed changes for part 61. State representatives and other attendees were given the opportunity to provide comments, to ask questions, or participate in further discussions. A transcript was made of the meeting so the proceedings could be part of the formal record for the rulemaking. Attendees were given an additional 2 weeks to submit written comments. However, the NRC did not receive any comments in response to this opportunity.

Of the approximately forty State representatives that participated in the May 14, 1991, meeting, seven representatives (those from California, New York, Illinois, New Jersey, Washington, Pennsylvania, and Nebraska) offered comments. None of them voiced objections either to the specific revisions NRC was proposing or to the idea of revising part 61 in general. Two technical comments were offered at the Wichita meeting that were intended to address the issues for this rulemaking and both were considered in developing the proposed rule.

The representatives from Washington and Illinois expressed concern regarding the compatibility of the proposed changes with their State rules, because they are presently involved in LLW disposal facility license reviews. In order to prevent possible impacts on their licensing process, they suggested that if, as Agreement States, their States would be obligated to incorporate the resulting changes into their respective LLW regulations, they should be afforded flexibility in the manner or timing of this action. The NRC staff explained that it is NRC's policy to give Agreement States 3 years to reflect changes like those proposed for part 61 in their LLW regualtions. At the end of the three year period, if a State has not completed its licensing process, NRC staff would consider a limited extension on a case-by-case basis.

One of the commentors voiced concern about the concept of above-ground disposal. The commentor expressed doubt that an applicant for an above-ground disposal facility would be able to get a licensed engineer to certify the integrity of such a structure for 500 years unless long-term active maintenance was provided. While NRC acknowledges that there are significant engineering challenges that will have to be resolved by an applicant in order to license an above-ground disposal facility, the NRC does not want the language of part 61 to preclude an applicant from having the opportunity to meet those challenges.

The other commentor, from Nebraska, offered a comment about "above-grade" disposal facilities, the kind of facility that Nebraska is considering for its LLW disposal needs. The commentor noted that licensing an "above-grade" LLW disposal facility requires special guidance that is not provided in the current part 61. A recommendation was made for NRC to consult with the States currently developing above-grade disposal facilities for the benefit of their experience in this area.

From the NRC perspective, "above-grade disposal" and "above-ground disposal" are considered to be similar in that both rise above the land surface of the overall disposal site. However, for purposes of regulating LLW disposal under part 61, NRC makes an important distinction between the two. While "above-grade facilities" may rise above the original grade (surface) of the disposal site, they have a constructed soil cover and when completed do not actually protrude through the land surface to expose the disposal structure to the elements. NRC has determined that these types of facilities are already clearly covered under part 61 and are not of concern for this rulemaking. Although the comment did not directly apply to the proposed rulemaking, the experience gained by the States in licensing "above-grade" disposal could prove to be applicable and useful to licensing "above-ground" disposal.

Issue of Compatibility for Agreement States

Under existing NRC policy and guidelines, two of the changes proposed in this rulemaking would be matter of compatibility for the NRC Agreement States: The change to the definition of land disposal facility in § 61.2 is Division I compatibility, and the "QC" to "QA" change in § 61.12(j) is Division II. This means that if the final amendments to part 61 retain these provisions, those Agreement States which have assumed NRC's regulatory authority for the disposal of LLW under section 274 of the Atomic Energy Act (AEA) of 1954, as amended, will be required to incorporate the new definition of "land disposal facility" essentially verbatim directly into their State regulations for LLW disposal. The incorporation of the Division II change is also required, however, the Agreement States have more flexibility than for the Division I change. The language adopted need not be identical to the NRC regulations, but the effect cannot be less stringent. Based on the existing guidelines, the changes would have to be incorporated within 3 years after the final revisions to part 61 are issued.

The Commission, however, is currently considering a reevaluation of its compatibility policy and may decide to revise its requirements for the Agreement States. If a change is made to the compatibility policy that affects the above compatibility position, it may be necessary to revisit this position.

Finding of No Significant Environmental Impact: Availability

The Commission has determined under the National Environmental Policy Act of 1969 as amended, and the Commission's regulations in subpart A of 10 part 51, that this rule, if adopted, would not be a major Federal action significantly affecting the quality of the human environment and therefore, an environmental impact statement is not required. Three of the proposed changes—the "quality control" to "quality assurance" change in § 61.12(j), the update of the Paperwork Reduction Act Statement in § 61.8, and the correction of the organizational inconsistency in § 61.80(i)(1) are the types of actions described in categorical exclusion § 51.22(c)(2). As such they are considered by the Commission to be corrective and nonsubstantive in nature and will not have a impact on the environment. The remaining changes, which will expand the applicability of part 61 to the licensing of above-ground LLW disposal, also will not have an impact on the environment in that these amendments do not change the required level of overall performance of LLW disposal. Further, any environmental impact of operating such a facility would be addressed as a part of the licensing action for that specific facility under 10 CFR part 51. The environmental assessment and finding of no significant impact on which this determination is based are available for inspection at the NRC Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC. Single copies of the environmental asssessment and the finding of no significant impact are available from Janet Lambert, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 492–3857.

Paperwork Reduction Act Statement

This proposed rule does not contain a new or amended information collection requirement subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). Existing requirements were approved by the Office of Management and Budget, approval number 3150–0135.

Regulatory Analysis

The Commission has prepared a draft regulatory analysis on this proposed regulation. The analysis examines the alternatives considered by the Commission and explains the decision to revise part 61. The draft analysis is

available for inspection in the NRC Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC. Single copies of the analysis may be obtained from Janet Lambert, (301) 492–3857.

Regulatory Flexibility Certification

As required by the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Commission certifies that this rule, if adopted, will not have a significant economic impact on a substantial number of small entities. The changes to part 61 that are proposed in this rule will only affect those entities that decide to apply for a license to build and operate a LLW disposal facility. In the Low-Level Radioactive Waste Policy Act 1980 (LLRWPA) and the Low-Level Radioactive Waste Policy Amendments Act of 1985 (LLRWPAA), Congress mandated that the individual States or groups of States called compacts should provide the LLW disposal capacity for the LLW generated within each of their borders. This rule will not have significant economic impact because the changes to part 61 are trivial in nature and only a small number of licensees are likely to be affected.

Backfit Analysis

The NRC has determined that the backfit rule, 10 CFR 50.109, does not apply to this proposed rule, and therefore, that a backfit analysis is not required because these amendments do not involve any provisions which would impose backfits as defined in 10 CFR 50.109(a)(1).

List of Subjects in 10 CFR Part 61

Criminal penalty, Low-Level waste, Nuclear materials, Reporting and recordkeeping requirements, Waste treatment and disposal.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended and 5 U.S.C. 553, the NRC is proposing the following amendments to 10 CFR part 61.

PART 61—LICENSING REQUIREMENTS FOR LAND DISPOSAL OF RADIOACTIVE WASTE

1. The authority citation for part 61 continues to read as follows:

Authority: Secs. 53, 57, 62, 63, 65, 81, 161, 182, 183, 68 Stat. 930, 932, 933, 935, 948, 953, 954, as amended (42 U.S.C. 2073, 2077, 2092, 2093, 2095, 2111, 2201, 2232, 2233); secs. 202, 206, 88 Stat. 1244, 1246, (42 U.S.C. 5842, 5846); secs. 10 and 14, Public Law 95–601, 92 Stat. 2951 (42 U.S.C. 2021a and 5851).

For the purposes of Sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); Tables 1 and 2, §§ 61.3, 61.24, 61.25, 61.27(a), 61.41 through 61.43, 61.52, 61.53, 61.55, 61.56, and 61.61 through 61.63 are issued under sec. 161(b), 68, Stat. 948, as amended (42 U.S.C 2201)(b); §§ 61.9a, 61.10 through 61.16, 61.24 and 61.80 are issued under sec. 1610, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

2. In § 61.2, the definition of "land disposal facility" is revised to read as follows:

§ 61.2 Definitions.

* * * * *

Land disposal facility means the land, buildings, and equipment which are intended to be used for the disposal of radioactive wastes on the surface or into the subsurface of the land. For purposes of this Chapter, a "geologic repository" as defined in part 60 is not considered a "land disposal facility."

* * * * *

3. In § 61.7, paragraph (a)(1) is revised to read as follows:

§ 61.7 Concepts.

(a) *The Disposal Facility.* (1) Part 61 is intended to apply to land disposal of radioactive waste and not to other methods such as sea or extraterrestrial disposal. Part 61 contains procedural requirements and performance objectives applicable to any method of land disposal. It contains specific technical requirements for near-surface disposal of radioactive waste, a subset of land disposal, which involves disposal in the uppermost portion of the earth, approximately 30 meters. Near-surface disposal includes disposal in engineered facilities which may be built totally or partially above-grade provided there is a protective earthen cover. Near-surface disposal does not include disposal facilities which are partially or fully above-grade with no protective earthen cover, which are referred to as "above-ground disposal. Burial deeper than 30 meters may also be satisfactory. Technical requirements for alternative methods may be added in the future.

* * * * *

4. Section 61.8 is revised to read as follows:

§ 61.8 Information collection requirements: OMB approval.

(a) The Nuclear Regulatory Commission has submitted the information collecton requirements contained in this part to the Office of Management and Budget (OMB) for approval as required by the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). OMB has approved the information collection requirements contained in this part under control number 3150–0135.

(b) The approved information collection requirements contained in this part appear in §§ 61.3, 61.6, 61.9, 61.10, 61.11, 61.12, 61.13, 61.14, 61.15, 61.16, 61.20, 61.22, 61.24, 61.26, 61.27, 61.28, 61.30, 61.31, 61.53, 61.55, 61.57, 61.58, 61.61, 61.62, 61.63, 61.72, and 61.80.

5. In § 61.12, paragraph (j) is revised to read as follows:

§ 61.12 Specific technical information.

* * * * *

(j) A description of the quality assurance program, tailored to LLW disposal, developed and applied by the applicant for the determination of natural disposal site characteristics and for quality assurance during the design, construction, operation, and closure of the land disposal facility and the receipt, handling, and emplacement of waste.

* * * * *

6. In § 61.80, (i)(1) is revised to read as follows:

§ 61.80 Maintenance of records, reports, and transfers.

* * * * *

(i)(1) Each licensee authorized to dispose of waste materials received from other persons, pursuant to this part, shall submit annual reports to the appropriate Commission regional office shown in appendix D of part 20 of this chapter, with copies to the Director, Division of Low-Level Waste Management and Decommissioning, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Reports must be submitted by the end of the first calendar quarter of each year for the preceding year;

* * * * *

Dated at Rockville, Maryland, this 28th day of February, 1992.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

BILLING CODE 7590-01-M

FEDERAL RESERVE SYSTEM

12 CFR Part 204

[Docket No. R–0750]

Regulation D - Reserve Requirements of Depository Institutions

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Board is publishing for comment two amendments to its Regulation D to facilitate the computation and maintenance of reserves. The Board proposes to reduce the lag in the application of vault cash to reserve requirements in order to damp the seasonal variations in required reserve balances resulting from the current lag in application and thereby reduce the probability that reserve balances will drop seasonally to levels that would cause depository institutions difficulty in managing their reserve balances. The Board also proposes to increase the amount of excesses or deficiencies in reserve balances that may be carried over from one reserve maintenance period to the next from the greater of 2 percent or $25,000 to the greater of 4 percent or $50,000.

DATES: Comments should be received by April 6, 1992.

ADDRESSES: Comments, which should refer to Docket No. R–0750, may be mailed to the Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW., Washington, DC 20551, to the attention of Mr. William W. Wiles, Secretary.

Comments addressed to the attention of Mr. Wiles may be delivered to the Board's mail room between 8:45 a.m. and 5:15 p.m., and to the security control room outside of those hours. Both the mail room and the security control room are accessible from the courtyard entrance on 20th Street between Constitution Avenue and C Street NW. Comments may be inspected in room B–1122 between 9 a.m. and 5 p.m., except as provided in § 261.8 of the Board's Rules Regarding the Availability of Information, 12 CFR 261.8.

FOR FURTHER INFORMATION CONTACT: Patick J. McDivitt, Attorney (202/452–3818), or Lawranne Stewart, Attorney (202/452–3513), Legal Division; or Joshua Feinman, Economist (202/452–2841), Division of Monetary Affairs. For the hearing impaired *only*, Telecommunications Device for the Deaf ("TDD"), Dorothea Thompson (202/452–3544).

SUPPLEMENTARY INFORMATION: The Board is proposing for public comment revisions to its Regulation D, Reserve Requirements of Depository Institutions, 12 CFR part 204, concerning the computation and maintenance of reserves. The proposed changes, which concern vault cash and carryover of reserve deficiencies an excesses, are intended to improve the ability of depository institutions to manage their reserve balances.

Vault Cash

The Board proposes to amend Regulation D to reduce the lag in the application of vault cash to reserve requirements from two periods to one in order to better synchronize movements in required reserves and applied vault cash. Currently, reserve requirements for depository institutions that report weekly are assessed against transaction accounts on a contemporaneous basis,[1] but offsetting vault cash is applied to the required reserves with a two period lag. This asymmetric treatment of required reserves and applied vault cash often results in potentially disruptive movements in required balances, particularly early in the year. In the maintenance period encompassing Christmas and year-end, for example, both vault cash and required reserves tend to reach their respective seasonal peaks. Vault cash applicable for meeting the enlarged reserve requirements for this period, however, is based on the much smaller vault cash holdings from November. As a result, the required reserve balances needed to meet reserve requirements tend to peak around year-end. These balances subsequently drop precipitously, usually reaching a trough in late January and early February, when reserve requirements have typically fallen from their end-of-year crest and the enlarged vault cash holdings from year-end become available for use in meeting those requirements. This sharp drop in required balances often makes it more difficult for banks to manage their reserve accounts.

The Board believes that placing required reserves and the vault cash available for meeting those requirements in closer proximity would offset some of the volatility in required reserve balances and help temper the seasonal drop in these balances in early February without significantly impairing reserve forecasts. The Board requests comment as to whether a reduction in the lag in the application of vault cash would improve the ability of depository institutions to manage their required reserve balances or whether the proposal would have any adverse effects on their ability to predict required reserve balances. The Board also requests comment as to the costs of implementing a shift in vault cash application, and whether these costs would be considered significant in relation to the benefits of the proposed amendment to the depository institution. If depository institutions believe that the costs of implementing a shift are prohibitive so that the shift should not be implemented, the Board requests comments as to whether depository institutions will be able to manage their reserve positions effectively at the newly implemented level of reserve requirements during the seasonal lows in required reserve balances in January and February.

Carryover of Excesses or Deficiencies

The Board proposes to increase the amount of carryover to the greater of 4 percent of required reserves and clearing balances [2] or $50,000. Currently, carryover of reserve surpluses or deficiencies into the next maintenance period is permitted up to the greater of 2 percent of the sum of required reserves and required clearing balances or $25,000. In either case, the carryover is reduced by the amount of an institution's required clearing balance penalty-free band, if applicable.[3] Reductions in reserve requirements have resulted in a decline in the maximum dollar value of the carryover, reducing the ability of a depository institution to cushion a given dollar shock to its reserve position late in maintenance period. Doubling maximum carryover permitted should provide depository institutions with more flexibility in managing their reserve positions.

Additionally, the Board proposed to amend the lanaguage of the carryover provision to clarify and more accurately reflect the method used to calculate the maximum carryover permitted.

Regulatory Flexibility Act Analysis

Pursuant to section 605(b) of the Regulatory Flexibility Act (Pub. L. No. 96–354, 5 U.S.C. 601 *et seq.*), the Board certifies that the proposed amendment will not have a significant economic impact on a substantial number of small entities. The Board does not believe that the proposed amendments would impose any additional reporting or recordkeeping requirements. To the

[1] Weekly reporters generally are depository institutions with total deposits of $44.8 million or more. Required reserves for weekly reporters are assessed based on daily average balances for a period beginning on a Tuesday and ending on the second Monday thereafter. This period is known as the "computation period." Reserves against the daily average balances for the computation period must be maintained throughout the "maintenance period," which begins on the Thursday following the beginning of the computation period and ends on the second Wednesday thereafter. See 12 CFR 204.3(c).

[2] Required clearing balances are set by agreement between a depository institution and its Federal Reserve Bank, based on clearing needs of the depository and its account overdraft record. Information on clearing balance requirements may be obtained from a depository institution's local Reserve Bank.

[3] The required clearing balance penalty-free band is currently equal to the greater of $25,000 or 2 percent of the depository institution's required clearing balance.

extent changes in recordkeeping procedures may be required by the vault cash proposal, this will affect only weekly reporters, that is, depository institutions with total deposits of $44.8 million or more, and should enable these depository institutions to manage their required reserves more efficiently. Smaller institutions, which report only quarterly, will not be affected by the vault cash amendment.

List of Subjects in 12 CFR Part 204

Banks, banking, Currency, Federal Reserve System, Penalties, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, and pursuant to the Board's authority under section 19 of the Federal Reserve Act, 12 U.S.C. 461 *et seq.*, the Board is proposing to amend 12 CFR part 204 as follows:

PART 204—RESERVE REQUIREMENTS OF DEPOSITORY INSTITUTIONS

1. The authority citation for part 204 continues to read as follows:

Authority: Sections 11(a), 11(c), 19, 25, 25(a) of the Federal Reserve Act (12 U.S.C. 248(a), 248(c), 371a, 371b, 461, 601, 611); section 7 of the International Banking Act of 1978 (12 U.S.C. 3105); and section 411 of the Garn St-Germain Depository Institutions Act of 1982 (12 U.S.C. 461).

2. section 204.3 is amended by revising paragraphs (c)(3) and (h) to read as follows:

§ 204.3 Computation and maintenance.

* * * * *

(c) * * *

(3) In determining the reserve balance that is required to be maintained with the Federal Reserve, the daily average vault cash held during the computation period that ended 3 days prior to the beginning of the maintenance period is deducted from the amount of the institution's required reserves.

* * * * *

(h) *Carryover of excesses or deficiencies.* Any excess or deficiency in a depository institution's account that is held directly or indirectly with a Federal Reserve Bank shall be carried over and applied to that account in the next maintenance period as specified in this paragraph. The amount of any such excess or deficiency that is carried over shall not exceed the greater of:

(1) The amount obtained by multiplying .04 times the sum of the depository institution's required reserves and the depository institution's required clearing balance, if any, and then substracting from this product the depository institution's required clearing balance penalty-free bank, if any; or

(2) $50,000, minus the depository institution's required clearing balance penalty-free band, if any.

Any carryover not offset during the next period may not be carried over to subsequent periods.

* * * * *

By order of the Board of Governors of the Federal Reserve System, March 2, 1992.

William W. Wiles,

Secretary of the Board.

[FR Doc. 92-5219 Filed 3-5-92; 8:45 am]

BILLING CODE 6210-01-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[IA-41-91]

RIN 1545-AQ15

Information Returns of Brokers

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking and notice of public hearing.

SUMMARY: This document contains proposed regulations under section 6045 of the Internal Revenue Code of 1986, relating to information returns of brokers. Changes to the applicable law were made by the Tax Equity and Fiscal Responsibility Act of 1982. The proposed regulations affect brokers effecting certain spot or forward sales of agricultural commodities and provide them with guidance needed to comply with the law.

DATES: Written comments must be received by May 5, 1992. Requests to speak (with outlines of oral comments) at a public hearing scheduled for April 21, 1992, at 10 a.m. must be received by April 7, 1992.

ADDRESSES: Send comments, requests to appear at the public hearing, and outlines of comments to be presented to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, room 5228, Attn: CC:CORP:T:R (IA-41-91), Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: John P. Moriarty of the Office of Assistant Chief Counsel (Income Tax and Accounting), Internal Revenue Service, 202-377-9589 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments on the collection of information should be sent to the Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer T:FP, Washington, DC 20224.

The collection of information in this regulation is contained in § 1.6045-1(c)(7). This information is required by the Internal Revenue Service to ensure that persons claiming exception under the proposed regulations from the general information reporting requirements contained in section 6045 are eligible for the exception. The information will be used to validate eligibility for the exception. The likely respondents and recordkeepers are businesses or other for-profit institutions.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents/recordkeepers may require greater or less time, depending on their particular circumstances.

Estimated total annual reporting burden: 2,000,000 hours.

Estimated average annual burden per respondent: 1.0 hour.

Estimated number of respondents: 2,000,000.

Estimated frequency of responses: On occasion.

Estimated total annual recordkeeping burden: 5,000 hours.

Estimated average annual burden per recordkeeper: .25 hours.

Estimated number of recordkeepers: 20,000.

Background

This document contains a proposed amendment to the Income Tax Regulations under section 6045 relating to an exception from the reporting requirements for certain sales of agricultural commodities. Section 6045(a) provides that all persons who conduct business as a broker shall file such information returns as may be required by regulation. Section 6045(c)(1) defines the term "broker" to include a dealer, a barter exchange, or any other person who (for a consideration) regularly acts as a middleman with respect to property or services.

On March 3, 1983, the Service published in the **Federal Register** (48 FR 10304) regulations requiring reporting by brokers of sales of securities or commodities effected by them in the ordinary course of their business. These regulations generally define a broker to be a person that, in the ordinary course of business during the calendar year, stands ready to effect (as agent or principal) sales to be made by others. A commodity includes any type of personal property, or an interest therein, the trading of futures contracts in which has been approved by the Commodity Futures Trading Commission.

On January 5, 1984, the Service published the **Federal Register** (49 FR 646) proposed amendments to the regulations under section 6045 to clarify the definition of a commodity. A number of comments responding to that notice of proposed rulemaking suggested exemptions from the reporting requirement for sales of agricultural commodities. On February 19, 1991, the Service published Announcement 91-20 in 1991-7 I.R.B. 31, providing that for 1990 and prior years reporting is not required under section 6045 for spot and forward sales of agricultural commodities (but not for interests in agricultural commodities, such as regulated futures contracts or forward contracts) and sales of negotiable commodity certificates issued by the Commodity Credit Corporation ("CCC Certificates"). The rules of Announcement 91-20 were extended to sales made in 1991 by Announcement 91-177, 1991-48 I.R.B. 87.

Explanation of Provisions

These proposed regulations provide an exception to the reporting requirements of section 6045 for the spot or forward sale of an agricultural commodity if the customer certifies that the customer produced the commodity and the broker does not know that any information in the certificate is incorrect. Agricultural commodities include, but are not limited to, grain, feed, livestock, meat, oil seed, timber, or fiber. The proposed regulations define a spot sale to be a sale that results in the immediate delivery of a commodity and a forward sale to be a sale pursuant to a forward contract. Sales of agricultural commodities pursuant to regulated futures contracts and sales of derivative interests in agricultural commodities are not excepted from reporting by the proposed regulations.

A person is treated as having "produced" a commodity if the person grew, cultivated, or raised the commodity. A person engaged in the business of farming within the meaning of § 1.175-3 of the regulations will be treated as having produced all commodities produced by that particular business. Thus, for example, no information reporting is required for: (a) A sale of livestock by a farmer or rancher who raised their livestock, or (b) a sale of crops by a farmer who grew those crops.

The proposed regulations specify that a certificate must contain the name, address and taxpayer identification number of the customer and the broker; identify the type or types of agricultural commodities to which the certificate applies; state that those commodities have been or will be produced by the customer; and state whether the certificate applies to a single sale or multiple sales. If the certificate applies to a single sale, it must specify the sale date. If the certificate applies to multiple sales, it must specify the effective date of the certificate (which may not be a date earlier than the beginning of the calendar year in which the certificate is signed) and the expiration date of the certificate (which may not be a date more than one year after the effective date). Unless the broker requires a separate certificate or the customer otherwise notifies the broker, a multiple sales certificate applies to all sales of the specified agricultural commodities that the broker effects for the customer during such period. A certificate may be included as part of any business records ordinarily used to document a sale.

Under the proposed regulations, no information return is required under section 6045 for the sale of a CCC Certificate effected on behalf of a customer. This exception is provided because currently there is little opportunity to speculate using these certificates. The proposed regulations, however, provide the Internal Revenue Service may in the future publish a notice in the Internal Revenue Bulletin requiring reporting with respect to these certificates.

The proposed regulations will apply to sales effected on or after the date of publication of final regulations in the **Federal Register**. A transition rule is provided for sales effected before the date of publication of final regulations in the **Federal Register**. The transition rule applies the rules of Announcement 91-20 to these sales.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, an initial Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a final Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these proposed regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Comments and Requests To Appear at Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments that are submitted timely (preferably an original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying.

A public hearing will be held on Tuesday, April 21, 1992, at 10 a.m. in the Internal Revenue Service Auditorium, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC. The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR part 601) shall apply to the public hearing.

Persons who have submitted written comments by April 7, 1992, and who also desire to present oral comments at the hearing on the proposed regulations, should submit, not later than April 7, 1992, a request to speak and an outline of the oral comments to be presented at the hearing stating the time they wish to devote to each subject.

Each speaker (or group of speakers representing a single entity) will be limited to 10 minutes for an oral presentation exclusive of the time consumed by the questions from the panel for the government and answers thereto.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building before 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the persons testifying. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal author of these regulations is John P. Moriarty of the Office of Assistant Chief Counsel (Income Tax and Accounting). Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing

the regulations on matters of both substance and style.

List of Subjects in 26 CFR 1.6031–1 Through 1.6060–1

Income taxes, Reporting and recordkeeping requirements.

Proposed amendments to the regulations

Accordingly, the proposed amendments to 26 CFR, part 1, are as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority citation for part 1 is amended by adding the following authority citation:

Authority: Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805, 26 U.S.C. 6038 and 26 U.S.C. 6038. * * * Section 1.6045–1 also issued under 26 U.S.C. 6045. * * *

Par. 2. Section 1.6045–1 is amended by revising paragraph (c)(3) and adding paragraph (c)(7) to read as follows:

§ 1.6045–1 Returns of information of brokers and barter exchanges.

* * * * *

(c) * * *

(3) *Exceptions.* The exceptions set forth in paragraph (c)(3) of § 5f.6045–1 of this chapter apply to sales effected on or after May 29, 1984. For an exception for certain sales of agricultural commodities and cerificates issued by the Commodity Credit Corporation, see paragraph (c)(7) of this section. With respect to sales effected before May 29, 1984, the exceptions provided in § 1.6045–1(c)(3) (as contained in the CFR edition revised as of April 1, 1983) apply.

* * * * *

(7) *Exception for certain sales of agricultural commodities and commodity certificates*—(i) *Agricultural Commodities.* No return of information is required under section 6045 for a spot or forward sale of an agricultural commodity if the sale satisfies the certification requirements of paragraph (c)(7)(iii) of this section and the broker (or any employee or agent of the broker responsible for receiving or reviewing such certificate) does not know that information provided in the certificate is incorrect. This paragraph (c)(7)(i) does not except from reporting either sales of agricultural commodities pursuant to regulated futures contracts or sales of derivative interests in agricultural commodities.

(ii) *Commodity Credit Corporation certificates.* Except as otherwise provided by the Internal Revenue Service in the Internal Revenue Bulletin, no return of information is required under section 6045 with respect to a sale of a commodity certificate issued by the Commodity Credit Corporation under 7 CFR 1470.4 (1990).

(iii) *Certification Requirements.* For purposes of paragraph (c)(7)(i) of this section, a spot or forward sale of an agricultural commodity satisfies the requirements of this paragraph (c)(7)(iii) only if the customer provides or has provided to the broker a certificate, signed by the customer under penalties of perjury, that—

(A) Applies to the commodity being sold (as described in paragraph (c)(7)(iv) of this section);

(B) Identifies the type of types of agricultural commodities to which the certificate applies;

(C) Provides the name, address, and taxpayer identification number of the customer and the broker;

(D) Certifies that the agricultural commodities to which the certificate applies have been or will be produced (within the meaning of paragraph (c)(7)(v)(B) of this section) by the customer;

(E) Specifies whether the certificate applies to a single sale or multiple sales;

(F) If the certificate applies to a single sale, specifies the date of the sale; and

(G) If the certificate applies to multiple sales, specifies the date the certificate becomes effective (which may be no earlier than the beginning of the calendar year in which the certificate is provided) and the date the certificate is to expire (which may be no later than one year after the effective date).

A certificate may be included as part of any business records ordinarily used to document a sale. A broker must retain a certificate for at least four years after the end of the last calendar year for which a return of information is not required by reason of such certificate. A broker may, at its option, require a customer to provide a new certificate for any transaction.

(iv) *Commodities to which a certificate applies.* If a certificate applies to a single sale, it applies to all agricultural commodities of the type or types identified in the certificate that are sold in that transaction, unless the customer otherwise notifies the broker. If a certificate applies to multiple sales, it applies to all agricultural commodities of the type or types identified in the certificate that are sold in sales effected by the broker for the customer from the date that the certificate is effective through the date that the certificate expires, unless the customer otherwise notifies the broker or the broker requires a new certificate. A multiple sales certificate expires on the earlier of the date specified on the certificate or the date a new certificate provided by the customer becomes effective. A new certificate must be provided if any information in a current certificate changes.

(v) *Certain definitions.* For purposes of this paragraph:

(A) *Agricultural commodity.* An "Agricultural commodity" includes, but is not limited to, a commodity within the meaning of paragraph (a)(5) of this section that is a grain, feed, livestock, meat, oil seed, timber, or fiber.

(B) *Produced.* A person "produces" a commodity if that person grows, cultivates, or raises the commodity. A person engaged in the business of farming within the meaning of § 175–3 will be treated as having produced all commodities produced by that particular business.

(C) *Spot sale.* A spot sale is a sale that results in the essentially contemporaneous delivery of a commodity.

(D) *Forward sale.* A forward sale is a sale pursuant to a forward contract within the meaning of paragraph (a)(7) of this section.

(vi) *Examples.* The following examples illustrate the application of paragraph (c)(7) of this section to the reporting requirements for sales effected on or after the date of publication of final regulations in the **Federal Register.** Unless specifically provided to the contrary, the sale in each example is effected by a broker within the meaning of this section.

Example 1. A conducts auctions of livestock. B, an individual who feeds calves until they weigh approximately 500 pounds, and C an individual who feeds feeder cattle weighing approximately 500 pounds until they weigh approximately 800 pounds, are both customers of A. B and C each provide A with certificates that contain the information set forth in paragraph (c)(7)(iii) of this section. B's certificate certifies that the calves sold by B were produced by B and C's certificate certifies that the feeder cattle sold by C were produced by C. Under paragraph (c)(7)(i) of this section, A is not required to make a return of information for sales of calves by B or sales of feeder cattle by C.

Example 2. D, an individual, is in the business of operating a grain elevator and, as part of that business, enters into a forward contract to purchase wheat produced by E. E is an individual who provides D with a certificate containing the information set forth in paragraph (c)(7)(iii) of this section. E certifies that he produced the wheat. After taking delivery of the grain from E, D sells the wheat to F who is a broker under section 6045. Under paragraph (c)(7)(i) of this section, no return of information is required for the forward sale of wheat by E to D. However, D's sale of the wheat to F is not excepted under paragraph (c)(7)(i) of this section from information reporting because D did not produce the grain. Accordingly, F must make a return of information for the sale by D to F.

Example 3. G, an individual, leases land to a farmer pursuant to which G is to receive fixed rental payments, in kind, without reference to production. G does not materially participat in the operation or management of the farm and is not engaged in farming within the meaning of § 1.75–3. Accordingly, G does not produce, within the meaning of paragraph (c)(7)(v)(B) of this section, those commoditites produced in that business. If G received rental payments in kind based on a percentage of farm production, G would be engaged in farming within the meaning of section 1.173–3 and would produce, within the meaning of paragraph (c)(7)(v)(B) of this section, those commodities produced in that business.

(vii) *Effective dates.* Paragraph (c)(7) of this section applies to sales effected on or after the date of publication of final regulations in the **Federal Register.** For sales effected before the date of publication of final regulations in the **Federal Register,** the following transactions are excepted from the information reporting requirements of section 6045:

(A) Spot or forward sales of agricultural products or commodities (but not sales of interests in agricultural products or commodities, such as sales of regulated futures contracts or forward contracts), effected by any person regardless of whether that person takes title to the agricultural products of commodities; and

(B) Sales of negotiable commodity certificates issued by the Commmodity Credit Corporation.

David G. Blattner,

Acting Commissioner of Internal Revenue.

BILLING CODE 4830–01–M

Bureau of Alcohol, Tobacco and Firearms

27 CFR Ch. I

[Notice No. 736]

Review of Existing Regulations

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Department of the Treasury.

ACTION: Notice of request for public comment.

SUMMARY: The Bureau of Alcohol, Tobacco and Firearms (AFT) is soliciting public comment as to which, if any, of the regulations and programs which ATF administers impose substantial burdens on the economy. This request is being made to assist ATF in implementing the President's January 28, 1992, regulatory initiative.

DATES: Comments must be received on or before April 6, 1992.

ADDRESSES: Send written comments to: Deputy Associate Director (Compliance Operations), Bureau of Alcohol, Tobacco and Firearms, P.O. Box 50221, Washington, DC 20091–0221, Atten: Notice No. 736.

FOR FURTHER INFORMATION CONTACT: Marjorie D. Ruhf, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, 650 Massachusetts Avenue NW., Washington, DC 20226, (202–927–8230).

SUPPLEMENTARY INFORMATION:

Background

On January 28, 1992, President Bush announced a regulatory initiative. This initiative included a 90-day moratorium on issuance of proposed or final rules. The moratorium does not apply to regulations which are subject to a statutory or judicial deadline or to:

(a) Regulations that the agency determines, after consultation with the working group of the Council on Competitiveness, will foster economic growth;

(b) Regulations that respond to emergencies such as situations that pose an imminent danger to human health or safety;

(c) Regulations that the agency determines, after consultation with the working group of the council on Competitiveness, are essential to a criminal law enforcement function of the United States;

(d) Regulations issued with respect to a military or foreign affairs function of the United States;

(e) Regulations related solely to agency organization, management, or personnel; and

(f) Formal regulations required by statute to be made on the record after opportunity for an agency hearing.

The President also called for a review of all existing regulations and programs to identify any which impose substantial costs on the economy. Each agency has been instructed to determine if regulations so identified satisfy five requirements:

(a) The expected benefits to society of any regulation should clearly outweigh the expected costs it imposes on society.

(b) Regulations should be fashioned to maximize net benefits to society.

(c) To the maximum extent possible, regulatory agencies should set performance standards instead of prescriptive commend-and-control requirements, thereby allowing the regulated community to achieve regulatory goals at the lowest possible cost.

(d) Regulations should incorporate market mechanisms to the maximum extent possible.

(e) Regulations should provide clarity and certainty to the regulated community and should be designed to avoid needless litigation.

In cases where the agency's review discloses regulations or programs which do not meet these standards, the agency will, as soon as possible, propose administrative changes which will bring each of its regulations and programs into conformity with these standards. To ensure maximum public involvement in this effort, ATF is soliciting public comment as to which, if any, of its regulations and programs impose substantial burdens on the economy and do not satisfy the five requirements listed above. The Bureau requests that comments be as specific as possible.

Drafting Information

The author of this document is Marjorie D. Ruhf, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

Authority: This notice is issued under the authority in 5 U.S.C. 301, 18 U.S.C. 847 and 928, 22 U.S.C. 2778, 26 U.S.C. 7805, and 27 U.S.C. 205 and 215.

Approved: February 28, 1992.

[Docket No. S–760–B]

RIN 1218–AB27

Accreditation of Training Programs for Hazardous Waste Operations

AGENCY: Occupational Safety and Health Administration, Labor.

ACTION: Proposed rule; extension of comment period.

SUMMARY: The Occupational Safety and Health Administration (OSHA) issued a notice February 10, 1992 (57 FR 4858) reopening the record on its proposed rule on Accreditation of Training Programs for Hazardous Waste Operations. The notice requested further public comments only on the final report of a survey conducted by OSHA which

collected information on the number, type and characteristics of training programs for hazardous waste and emergency response workers.

OSHA has received requests to extend the comment period established in the February 10, 1992 notice for an additional two months to gather data relevant to the survey's findings. OSHA is granting that request and is extending the comment deadline of March 26, 1992 established in its February notice for an additional two months until May 26, 1992. OSHA is granting this extension to provide interested parties with the additional time necessary to gather data relevant to the survey and for organizations to collate individual comments received from their members. Comments are only requested on the survey and data relevant to it. See the February 10, 1992 **Federal Register** notice for further information.

DATES: Comments must be postmarked by May 26, 1992.

ADDRESSES: 1. Copies of the report are available at or upon either telephone or written request to the Docket Office, Occupational Safety and Health Administration, room N–2625, U.S. Department of Labor, 200 Constitution Ave., NW., Washington, DC 20210; Telephone: (202) 523–7894.

2. Written comments on the report should be submitted in quadruplicate to the Docket Office, Docket No. S–760–B, OSHA room N–2625, U.S. Department of Labor, 200 Constitution Ave., NW., Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Mr. James F. Foster, Office of Information and Consumer Affairs, Occupational Safety and Health Administration, room N–3647, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210, 202–523–8151.

Signed at Washington, DC this 28th day of February, 1992.

Dorothy L. Strunk,

Acting Assistant Secretary of Labor.

RIN 1219–AA55

Advance Notice of Proposed Rulemaking for Confined Spaces; Extension of Comment Period

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice to extend period for public comment.

SUMMARY: Due to requests from the public, the Mine Safety and Health Administration (MSHA) is extending the period for public comment regarding its advance notice of proposed rulemaking for confined spaces.

DATES: Written comments on the advance notice of proposed rulemaking for confined spaces must be received on or before May 1, 1992.

ADDRESSES: All comments must be sent to: Mine Safety and Health Administration, Office of Standards, Regulations, and Variances, room 631, 4015 Wilson Boulevard, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, Director, Office of Standards, Regulations, and Variances, MSHA phone (703) 235–1910.

SUPPLEMENTARY INFORMATION: On December 30, 1991, MSHA published an advance notice of proposed rulemaking (56 FR 67364) regarding hazards related to entering and working in confined spaces in mining. The comment period was scheduled to end on February 28, 1992. In response to requests from the public, MSHA is extending the time for commenting on this advance notice of proposed rulemaking to May 1, 1992. All interested parties are encouraged to submit comments prior to that date.

Dated: February 28, 1992.

William J. Tattersall,

Assistant Secretary for Mine Safety and Health.

BILLING CODE 4510–43–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 701, 780, 784, 816, and 817

RIN 1029–AB40

Surface Coal Mining and Reclamation Operations; Permanent Regulatory Program; Performance Standards; Availability of Decision; Permanent and Temporary Impoundments; Denial of Petition

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Notice of decision on petition for rulemaking.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) of the United States Department of the Interior (DOI) is making available to the public its final decision on a petition for rulemaking from Stuart A. Sanderson, Senior Counsel, and Harold P. Quinn, Jr., Vice President and Counsel, representing the Joint NCA/AMC Committee on Surface Mining Regulations, Coal Building, 1130 17th St., NW., Washington, DC. The petition suggests that OSM amend its rules to incorporate the statutory distinction between temporary and permanent impoundments as it pertains to the incorporation of standards issued under Public Law 83–566 (16 U.S.C. 1008) including Technical Release Number 60 (TR–60) published by the Soil Conservation Service (SCS).

DATES: On March 2, 1992, the Director denied the petition.

ADDRESSES: Copies of the petition, and other relevant materials comprising the Administrative Record of this petition are available for public review and copying at the Office of Surface Mining Reclamation and Enforcement, Administrative Record, Room 5131, 1100 L Street NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Robert A. Wiles, P.E., Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 1951 Constitution Avenue NW., Washington, DC 20240; Telephone: 202–343–1502 (Commercial or FTS).

SUPPLEMENTARY INFORMATION:

I. Petition for Rulemaking Process
II. The NCA Petition

I. Petition for Rulemaking Process

Pursuant to section 201(g) of the Surface Mining Control and Reclamation Act of 1977 (the Act or SMCRA), any person may petition the Director of OSM to initiate a proceeding for the issuance, amendment, or repeal of any of the regulations implementing SMCRA. The regulations governing the handling of rulemaking petitions are found at 30 CFR 700.12. Under the rules, the Director may publish a notice in the **Federal Register** seeking comments on the petition and hold a public hearing, conduct an investigation, or take other action to determine whether the petition should be granted. If the petition is granted, rulemaking proceedings will be initiated in which public comment will again be sought before a final rulemaking notice appears. If the petition is denied, the Director notifies the petitioner in writing setting forth the reasons for denial. Under 30 CFR 700.12, the Director's decision constitutes the final decision for the Department of the Interior.

II. The NCA Petition

OSM received a letter on September 12, 1991, from Stuart A. Sanderson, Senior Counsel, and Harold P. Quinn, Jr., Vice President and Counsel, representing the Joint NCA/AMC Committee on Surface Mining Regulations, Coal Building, 1130 17th Street NW., Washington, DC, as a petition for rulemaking. The petitioners requested that the agency reevaluate and propose for comment a rulemaking which will incorporate the statutory distinction between temporary and permanent impoundments as it pertains to the incorporation of standards issued under Public Law 83–566 including TR–60. In response to that petition, on October 21, 1991, OSM published a notice in the **Federal Register** of the petition's availability and requested comments. [56 FR 52494].

For the reasons discussed in the appendix to this notice, the Director has deined the petition to amend the rules to incorporate the statutory distinction between temporary and permanent impoundments. Therefore, no rulemaking will occur on this petition.

The Director's letter of response to the petitioners on this rulemaking petition appears as an appendix to this notice. This letter reports the Director's decision to the petitioners. As noted in the appendix, a full discussion of the issues in the petitioners letter will be analyzed concurrently with the comments to the proposed rule to amend portions of the permanent program regulations governing permanent and temporary impoundments published June 28, 1991. (56 FR 29774) The preamble will evaluate the issues raised by the petitioners, an analysis of the petitioners' proposed regulatory changes, and a discussion of the comments received on the petition.

Dated: March 2, 1992.

Harry M. Snyder,

Director.

Appendix

Date

Mr. Harold P. Quinn, Jr. and Mr. Stuart A. Sanderson,

Joint NCA/AMC Committee on Surface Mining Regulation Coal Building, 1130 17th Street NW., Washington, DC 20036.

Gentlemen: This letter is in response to your petition dated August 26, 1991 (received September 12, 1991), to the Office of Surface Mining Reclamation and Enforcement (OSM) requesting that the agency reevaluate and propose for comment a rulemaking which will incorporate the statutory distinction between temporary and permanent impoundments as it pertains to the incorporation of standards issued under Public Law 83–566 including Technical Release No. 60 (TR–60), "Earth Dams and Reservoirs" published by the Soil Conservation Service (SCS).

Following the receipt of your letter, OSM published on October 21, 1991, a notice in the **Federal Register** of the availability and requested comments on that petition. [56 FR 52494] The official administrative record log lists four comments entered in response to the petition. The comment period closed on November 21, 1991.

The comment period for the petition coincided with the third comment period on a proposed rule to amend portions of the permanent program regulations governing permanent and temporary impoundments published June 28, 1991. (56 FR 29774) The proposed rule of June 28, 1991, would apply certain specific technical standards found in TR–60 for both permanent and temporary impoundments. The proposed rule would adopt the SCS Class B and C criteria for dams, and the freeboard hydrograph criteria and emergency spillway hydrograph criteria in the Minimum Emergency Spillway Hydrologic Criteria table in TR–60 to both temporary and permanent impoundments. The application of design storm criteria to both permanent and temporary impoundments will be evaluated during the review of the comments.

A separate rulemaking is unnecessary to enable OSM to consider the issues you raise in the petition. The issues addressed by your petition including OSM's authority to regulate temporary impoundments will be fully considered in OSM's pending rulemaking in which OSM proposed to apply certain SCS standards to temporary impoundments. The basis for any decision we make on the distinction between permanent and temporary impoundments will be fully discussed in the preamble to rulemaking on any final rule.

In addition for hazardous structures, we see no difference between temporary or permanent impoundments since the potential harm to downstream areas is the same for either type of structure. Also, temporary sediment control structures used for large surface or underground operations may remain operational for many years blurring the practical distinction between permanent and temporary structures.

For these reasons, I am denying your request to initiate a rulemaking to amend the rules to incorporate the distinction between temporary and permanent impoundments.

As provided in 30 CFR 700.12(d), my decision constitutes the final decision for the Department of the Interior.

Sincerely,

Harry M. Snyder,

Director.

[FR Doc. 92–5292 Filed 3–5–92; 8:45 am]

BILLING CODE 4310–05–M

DEPARTMENT OF TRANSPORTATION

Saint Lawrence Seaway Development Corporation

33 CFR Part 402

Tariff of Tolls: Proposed Revision

AGENCY: Saint Lawrence Seaway Development Corporation, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Saint Lawrence Seaway Development Corporation and the St. Lawrence Seaway Authority of Canada have jointly established and presently administer the St. Lawrence Seaway Tariff of Tolls. This Tariff sets forth the level of tolls assessed on all commodities and vessels transiting the facilities operated by the Corporation and the Authority. The Authority is proposing to the Corporation that the toll for materials for recycling be changed to the lower bulk rate from the current, higher general cargo rate. These materials are relatively low valued. The Corporation and the Authority believe that making the rate for these materials more competitive will encourage use of the Seaway system for their transit. The Authority also is proposing to the Corporation that a new business incentive toll be added for passenger vessels to encourage increased use of the Seaway system by that class of vessels.

DATES: Any party wishing to present views or data on the proposed revision may file comments with the Corporation on or before April 6, 1992.

ADDRESSES: Send comments to Marc C. Owen, Chief Counsel, Saint Lawrence Seaway Development Corporation, 400 Seventh Street, SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Marc C. Owen, Chief Counsel, Saint Lawrence Seaway Development Corporation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366–0091.

SUPPLEMENTARY INFORMATION: It is proposed to amend § 402.3 by adding a new paragraph (b)(10) that will include within the definition of "bulk cargo", "material for recycling, scrap material, refuse and waste". This would change the toll for materials for recycling, materials that are relatively low valued, to the lower bulk rate from the current, higher general cargo rate. The Corporation and the Authority believe that making the rate for these materials more competitive will encourage use of the Seaway system for their transit, creating new business opportunities. It also is proposed that section 402.9 be

amended to add new paragraphs (f) through (i) to add a new business incentive toll for passenger vessels. This would be similar to the new business incentive tolls for cargoes already contained within that section. The amendment would provide a new business incentive toll for any passenger vessel that did not move through a Seaway lock during the 1988 and 1989 navigation seasons or the three navigation seasons immediately preceding the season in which a new business refund is submitted. Under this program, a qualifying passenger vessel would receive a 25% discount of the passenger per lock charge each transit it carries 20 passengers or more beginning within the Seaway after the opening of navigation and before July 1 or beginning on or after October 1 in 1992 and 1993 and ending at the closing of navigation in those years and a 50% discount for each transit it carries 20 or more passengers beginning on or after July 1 and before October 1 in 1992 and 1993. It will apply to both the Montreal-Lake Ontario and Welland Canal sections of the Seaway. Please not that this program will not result in an actual reduction of tolls for eligible vessels until it has been formally approved by both the Canadian and the United States governments through an exchange of diplomatic notes and a final rule has been published. Once that occurs, refunds will be made to those entitled to receive them.

Regulatory Evaluation

This proposed regulation involves a foreign affairs function of the United States, and therefore, Executive Order 12291 does not apply. This proposed regulation has also been evaluated under the Department of Transportation's Regulatory Policies and Procedures and the proposed regulation is not considered significant under those procedures and its economic impact is expected to be so minimal that a full economic evaluation is not warranted.

Regulatory Flexibility Act Determination

The Saint Lawrence Seaway Development Corporation certifies that this proposed regulation, if adopted, would not have a significant economic impact on a substantial number of small entities. The St. Lawrence Seaway Tariff of Tolls relates to the activities of commercial users of the Seaway, the vast majority of whom are foreign vessel operators. Therefore, any resulting costs will be borne mostly by foreign vessels.

Environmental Impact

This proposed regulation does not require an environmental impact statement under the National Environmental Policy Act (49 U.S.C. 4321, *et seq.*) because it is not a major federal action significantly affecting the quality of human environment.

List of Subjects in 33 CFR Part 402

Vessels, Waterways.

PART 402—[AMENDED]

Accordingly, the Saint Lawrence Seaway Development Corporation proposes to amend part 402—Tariff of Tolls (33 CFR part 402) as follows:

1. The authority citation for 33 CFR part 402 continues to read as follows:

Authority: 68 Stat. 93, 33 U.S.C. 981–990.

2. A new paragraph (b)(10) would be added to § 402.3 to read as follows:

§ 402.3 Interpretation.

* * * * *

(b) * * *

(10) Material for recycling, scrap material, refuse and waste;

* * * * *

3. New paragraphs (f) through (i) would be added to section 402.9 to read as follows:

§ 402.9 Incentive tolls.

* * * * *

(f) Not withstanding anything contained in this Tariff, the charge per passenger per lock charged on new business shall be reduced by:

(1) Twenty-five percent for a transit beginning within the Seaway after the opening of navigation and prior to July 1 or beginning on or after October 1 in the years 1992 and 1993 and ending at the closing of navigation in the years 1992 and 1993; or

(2) Fifty percent for a transit beginning on or after July 1 and prior to October 1 in the years 1992 and 1993.

(g) The reduction mentioned in paragraph (f) of this section shall be granted at the end of the applicable navigation season after payment of the full toll specified in the schedule under the tariff in § 402.8 of this Part if:

(1) A vessel carries 20 passengers or more during a transit qualifying as new business; and

(2) An application for a new business refund is submitted to the Authority or the Corporation for audit by the Authority or the Corporation.

(h) For the purposes of this section, "new business" means: A passenger vessel that has not moved through a Seaway lock during the navigation seasons of 1988 through 1990 or the three navigation seasons immediately preceding the season in which a new business refund is submitted.

(i) When a passenger vessel's transit qualifies as new business, at any time during 1992 or 1993, it shall continue to qualify until the end of the 1993 navigation season as long as it carries a minimum of 20 passengers.

Issued at Washington, DC on February 28, 1992.

Saint Lawrence Seaway Development Corporation.

Marc C. Owen,

Chief Counsel.

BILLING CODE 4910-61-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[OAQPS No. CA-12-11-5379; FRL-4112-3]

Approval and Promulgation of Implementation Plans California State Implementation Plan Revision; Bay Area Air Quality Management District, South Coast Air Quality Management District, and Ventura County Air Pollution Control District

AGENCY: U.S. Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: EPA is proposing to approve revisions to the California State Implementation Plan (SIP) adopted by the Bay Area Air Quality Management District (BAAQMD) on October 17, 1990, by the South Coast Air Quality Management District (SCAQMD) on December 7, 1990, and by the Ventura County Air Pollution Control District (VCAPCD) on September 11, 1990. The California Air Resources Board submitted the revisions from VCAPCD to EPA on April 5, 1991, and submitted the other revisions to EPA on May 13, 1991. The revisions addressed in this notice consist of BAAQMD rule 8–37, Natural Gas and Crude Oil Production Facilities, SCAQMD rule 465, Vacuum Producing Devises or Systems, SCAQMD rule 1123, Refinery Process Turnarounds, and VCAPCD rule 71, Crude Oil and Reactive Organic Compound Liquids. EPA has evaluated each of these rules and is proposing to approve them under sections 110(k)(3) as meeting the requirements of section 110(a) and part D of the Clean Air Act, as amended (CAA or the Act).

DATES: Comments must be received on or before April 6, 1992.

ADDRESSES: Comments may be mailed to: Daniel A. Meer, Southern California and Arizona, Rulemaking Section (A–5–3), Air and Toxics Division, Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105.

Copies of the rule revisions and EPA's evaluation report for each rule are available for public inspection at EPA's Region 9 office during normal business hours. Copies of the submitted rule revisions are also available for inspection at the following locations:

California Air Resources Board, Stationary Source Division, Rule Evaluation Section, 1219 "K" Street, Sacramento, CA 95814.
Bay Area Air Quality Management District, 939 Ellis Street, San Francisco, CA 94109.
South Coast Air Quality Management District, 9150 Flair Dr., El Monte, CA 91731.
Ventura County Air Pollution Control District, 702 County Square Dr., Ventura, CA 93003.

FOR FURTHER INFORMATION CONTACT: Doris Lo, Northern California, Nevada and Hawaii Rulemaking Section (A–5–4), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105, Telephone: (415) 744–1187, FTS: 484–1187.

SUPPLEMENTARY INFORMATION:

Background

On March 3, 1978, EPA promulgated a list of ozone nonattainment areas under the provisions of the Clean Air Act, as amended in 1977 (1977 CAA) that included the BAAQMD, SCAQMD, and VCAPCD. 43 FR 8964, 40 CFR 81.305. Because these three districts were unable to reach attainment by the statutory attainment date of December 31, 1982, California requested, and EPA approved, an extension of the attainment date for ozone for each district to December 31, 1987. 1977 CAA section 172(a)(2). The BAAQMD, SCAQMD and VCAPCD did not attain the ozone standard by the approved attainment date. On May 26, 1988, EPA notified the Governor of California that portions of the California State Implementation Plan (SIP) for these districts were inadequate to attain and maintain the ozone standard and requested that deficiencies in the existing SIP be corrected (EPA's SIP-Call). On November 15, 1990, the Clean Air Act Amendments of 1990 were enacted. Public Law 101–549, 104 Stat. 2399, codified at 42 U.S.C. 7401–7671q. In section 182(a)(2)(A) of the Clean Air Act, as amended (CAA or the Act), Congress statutorily adopted the requirement that nonattainment areas fix their deficient reasonably available control technology (RACT) rules for ozone and established a deadline of May 15, 1991 for states to submit corrections of those deficiencies.

Section 182(a)(2)(A) applies to areas classified as marginal or above and requires such areas to adopt and correct RACT rules pursuant to pre-amended section 172(b) as interpreted in pre-amendment guidance.[1] EPA's SIP-Call used that guidance to indicate the necessary corrections for specific nonattainment areas. The Bay Area is classified as moderate, San Diego is classified as severe, and South Coast is classified as extreme [2] therefore, these three areas are subject to the RACT fix-up requirement and the May 15, 1991 deadline.

The State of California submitted many rules to EPA for incorporation into its SIP, including the rules being acted on in this notice. This notice addresses EPA's proposal to approve the following four rules: BAAQMD rule 8–37, Natural Gas and Crude Oil Production Facilities, which controls VOC emissions from leaking equipment at these facilities; SCAQMD rule 465, Vacuum Producing Devices or Systems, which controls VOC emissions from vacuum producing systems usually associated with refinery processes; SCAQMD rule 1123, Refinery Process Turnarounds, which controls VOC emissions resulting from the periodic shut down and emptying of refinery process units for inspection and maintenance; and VCAPCD rule 71, Crude Oil and Reactive Organic Compound Liquids, which is a definitions rule that applies to VCAPCD rule 71.1, Crude Oil Production and Separation, rule 71.2, Storage of Reactive Organic Compound Liquids, rule 71.3, Transfer of Reactive Organic Compound Liquids, and rule 71.4, Petroleum Sumps, Pits, Ponds and Well Cellars.

VCAPCD Rule 71 was submitted to EPA on April 5, 1991, and was found to be complete, pursuant to EPA's completeness criteria set forth in 40 CFR part 51, appendix V [3], on May 21, 1991.

The other three rules were submitted to EPA on May 13, 1991, and were found to be complete on July 10, 1991. The rules address the control of VOCs, which contribute to the production of ground level ozone and smog. The rules were adopted as part of each district's efforts to achieve the National Ambient Air Quality Standard (NAAQS) for ozone, and in response to the SIP–Call and the section 182(a)(2)(A) CAAA requirement. The following is EPA's evaluation and proposed action for these four rules.

EPA Evaluation and Proposed Action

In determining the approvability of a VOC rule, EPA must evaluate the rule to determine whether it meets the requirements of the CAA and EPA regulations and is consistent with EPA's policy and guidance. These requirements are found in section 110 and part D of the CAA, 40 CFR part 51 (Requirements for Preparation, Adoption, and Submittal of Implementation Plans), and the guidance referred to in footnote 1. Among those provisions is the requirement that a VOC rule must, at a minimum, provide for the implementation of RACT for stationary sources of VOC emissions. This requirement was carried forth from the pre-amended Act.

For the purpose of assisting state and local agencies in developing RACT rules, EPA has prepared a series of Control Technique Guideline (CTG) documents which specify the minimum requirements that a rule must contain in order to be approved into the SIP. Under the amended Act, Congress ratified EPA's use of these documents, as well as other Agency policy, for requiring States to "fix-up" their RACT rules. See section 182(a)(2)(A). The CTG applicable to SCAQMD rules 465 and 1123 is entitled "Control of Refinery Vacuum Producing Systems, Wastewater Separators and Process Unit Turnarounds," EPA document No. EPA–450/2–77–025. Two CTGs are applicable to the definitions in VCAPCD rule 71; these documents are entitled "Control of Volatile Organic Emissions from Petroleum Liquid Storage in External Floating Roof Tanks," EPA document No. EPA–450/2–78–047, and "Control of Volatile Organic Emissions from Storage of Petroleum Liquids in Fixed Roof Tanks," EPA document No. EPA–450/2–77–036. There is no CTG applicable to BAAQMD rule 8–37. Further interpretation of EPA policy is found in the Blue Book. In general, these requirements have been set forth to ensure that VOC rules are fully enforceable and strengthen or maintain the SIP.

---

[1] Among other things, the pre-amendment guidance consists of those portions of the proposed Post–1987 ozone and carbon monoxide policy that concern RACT, 52 FR 45044 (November 24, 1987); "Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations, Clarification to Appendix D of November 24, 1987 **Federal Register** Notice" (Blue Book) (notice of availability was published in the **Federal Register** on May 25, 1988); and the existing Control Technique Guidelines (CTGs).

[2] The Bay Area, San Diego, and South Coast were redesignated nonattainment and classified by operation of law pursuant to sections 107(d) and 181(a) on November 15, 1990. See 56 FR 56694 (November 6, 1991).

[3] EPA has since adopted completeness criteria pursuant to section 110 (k)(1)(A) of the CAA. See 56 FR 42216 (August 26, 1991). These will replace the completeness criteria currently set forth in 40 CFR part 51, appendix V.

SCAQMD rule 465 and rule 1123, and VCAPCD rule 71 are revisions of existing SIP rules which contained deficiencies that were required to be corrected pursuant to the SIP–Call and section 182(a)(2)(A) of the CAA. BAAQMD rule 8–37 has not been previously approved into the SIP and was required to be adopted pursuant to the SIP–Call and section 182(a)(2)(A) of the CAA.

SCAQMD's submitted rule 465, Vacuum Producing Devices or Systems, was revised from the SIP approved rule to add test methods for determining control device efficiency and to delete a provision that allowed the use of equivalent control methods without EPA approval. SCAQMD's submitted rule 1123, Refinery Process Turnarounds, was revised from the SIP approved rule to add recordkeeping requirements to the rule for compliance and enforcement purposes. These changes improve the enforceability of these rules.

VCAPCD's submitted rule 71, Crude Oil and Reactive Organic Compound Liquids, was most recently revised from an earlier version of the rule that had been adopted by the District on September 26, 1989, and submitted to EPA in August, 1990. This previous version of the rule was proposed for approval by EPA on January 17, 1991 (56 FR 1754). In this notice, EPA is choosing to act on the most recent version of rule 71 rather than to finalize the previous version of the rule. Rule 71 has been substantially revised from the SIP approved rule. The rule includes the addition of twenty-four new definitions and seven revised definitions from the SIP approved rule. These additions and changes clarify the applicability and improve the enforceability of the four rules affected by these definitions.

BAAQMD's submitted rule 8–37, Natural Gas and Crude Oil Production Facilities, has not been previously approve into the SIP. This rule controls VOC emissions from leaking equipment such as valves, pumps and compressors, by prohibiting the use of this equipment if it leaks VOCs in excess of 10,000 ppm, unless the equipment is repaired in a specified time period.

EPA has evaluated the four submitted rules and has determined that they are consistent with the CAA, EPA regulations and EPA policy. Therefore, BAAQMD rule 8–37, SCAQMD rule 465 and rule 1123, and VCAPCD rule 71 are being proposed for approval under section 110(k)(3) of the CAA as meeting the requirements of section 110(a) and Part D.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Regulatory Process

Under 5 U.S.C 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

This action has been classified as a Table 2 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

[RIN 2070 AC–18]

1,4-Butanediol-Methylenebis(4-Phenylisocyanate)-Poly(Tetramethylene Glycol) Copolymer; Tolerance Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that an exemption from the requirement of a tolerance be established for residues of 1,4-butanediol-methylenebis(4-phenylisocyanate)-poly(tetramethylene glycol) copolymer (CAS Reg. No. 9018-04-6) when used as an inert ingredient (solid diluent; carrier) in pesticide formulations applied to animals. This proposed regulation was requested by the Fermenta Animal Health Co.

DATES: Comments, identified by the document control number (OPP-300245), must be received on or before April 6, 1992.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, deliver comments to: rm. 1128, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202. Information submitted as a comment concerning this document may be claimed confidential by marking any part of all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential will be included in the public docket by EPA without prior notice. The public docket is available for public inspection in rm. 1128 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Kerry B. Leifer, Registration Support Branch, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: rm. 711L, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-305-5180.

SUPPLEMENTARY INFORMATION: At the request of Fermenta Animal Health Co., 10150 North Executive Hills Blvd., Kansas City, MO 64153, the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(e)), proposes to amend 40 CFR 180.1001(e) by establishing an exemption from the requirement of a tolerance for residues of 1,4-butanediol-methylenebis(4-phenylisocyanate)-poly(tetramethylene glycol) copolymer (CAS Reg. No. 9018-04-6) when used as an inert ingredient (solid diluent; carrier) in pesticide formulations applied to animals.

Inert ingredients are all ingredients that are not active ingredients as defined in 40 CFR 153.125, and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): solvents such as alcohols and hydrocarbons; surfactants such as polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carrageenan and modified cellulose; wetting, spreading, and dispersing agents; propellants in aerosol

dispensers; microencapsulating agents; and emulsifiers. The term "inert" is not intended to imply nontoxicity; the ingredient may or may not be chemically active.

The data submitted in the petition and other relevant material have been evaluated. As part of the EPA policy statement on inert ingredients published in the **Federal Register** of April 22, 1987 (52 FR 13305), the Agency established data requirements which will be used to evaluate the risks posed by the presence of an inert ingredient in a pesticide formulation. Exemptions from some or all of the requirements may be granted if it can be determined that the inert ingredient will present minimal or no risk. The Agency has decided that the data normally required to support a proposed tolerance exemption for 1,4-butanediol-methylenebis(4-phenylisocyanate)-poly(tetramethylene glycol) copolymer will not need to be submitted. The rationale for this decision is described below.

In the case of certain chemical substances which are defined as "polymers" the Agency has established a set of criteria which identify categories of polymers that present low risk. These criteria (described in 40 CFR 723.250) limit potential risks by identifying polymers that are relatively unreactive and stable compared to other chemical substances as well as polymers that typically are not readily absorbed. These properties generally limit a polymer's ability to cause adverse effects. In addition, these criteria exclude polymers about which little is known. The Agency believes that polymers meeting the criteria noted above will present minimal or no risk. 1,4-Butanediol-methylenebis(4-phenylisocyanate)-poly(tetramethylene glycol) conforms to the definition of a polymer given in 40 CFR 723.250(b)(11) and meets the following criteria which are used to identify low-risk polymers:

1. The minimum average molecular weight of 1,4-butanediol-methylenebis(4-phenylisocyanate)-poly(tetramethylene glycol) copolymer is 158,000. Substances with molecular weights greater than 400 are generally not readily absorbed through the intact skin, and substances with molecular weights greater than 1,000 are generally not absorbed through the intact gastrointestinal (GI) tract. Chemicals not absorbed through the skin or GI tract are generally incapable of eliciting a toxic response.

2. 1,4-Butanediol-methylenebis(4-phenylisocyanate)-poly(tetramethylene glycol) copolymer is not a cationic polymer, nor is it reasonably anticipated to become a cationic polymer in a natural aquatic environment.

3. 1,4-Butanediol-methylenebis(4-phenylisocyanate)-poly(tetramethylene glycol) copolymer does not contain less than 32.0 percent by weight of the atomic element carbon.

4. 1,4-Butanediol-methylenebis(4-phenylisocyanate)-poly(tetramethylene glycol) copolymer contains as an integral part of its composition the atomic elements carbon, hydrogen, nitrogen, and oxygen.

5. 1,4-Butanediol-methylenebis(4-phenylisocyanate)-poly(tetramethylene glycol) copolymer does not contain as an integral part of its composition, except as impurities, any elements other than those listed in 40 CFR 723.250 (d)(3)(ii).

6. 1,4-Butanediol-methylenebis(4-phenylisocyanate)-poly(tetramethylene glycol) copolymer is not a biopolymer, a synthetic equivalent of a biopolymer, or a derivative or modification of a biopolymer that is substantially intact.

7. 1,4-Butanediol-methylenebis(4-phenylisocyanate)-poly(tetramethylene glycol) copolymer is not manufactured from reactants containing, other than as impurities, halogen atoms or cyano groups.

8. 1,4-Butanediol-methylenebis(4-phenylisocyanate)-poly(tetramethylene glycol) copolymer does not contain reactive functional groups that are intended or reasonably anticipated to undergo further reaction.

9. 1,4-Butanediol-methylenebis(4-phenylisocyanate)-poly(tetramethylene glycol) copolymer is not designed or reasonably anticipated to substantially degrade, decompose, or depolymerize.

Based upon the above information and review of its use, EPA has found that, when used in accordance with good agricultural practice, this ingredient is useful and does not pose a risk to human health or the environment. Therefore, EPA proposes that the exemption from the requirement of a tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the Federal Register that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [OPP-300245]. All written comments filed in response to this petition will be available in the Public Response and Program Resources Branch, at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Recording and recordkeeping requirements.

Dated: February 18, 1992.

Anne E. Lindsay,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. In subpart D, § 180.1001(e) is amended by adding and alphabetically inserting the inert ingredient, to read as follows:

§ 180.1001 Exemptions from the requirement of a tolerance.

* * * * * * *

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1141

[Ex Parte No. 507]

Revision of Procedures To Calculate Interest Rates

AGENCY: Interstate Commerce Commission.

ACTION: Extension of time to file Initial Comments in Response to Commission's Advance Notice of Proposed Rulemaking.

SUMMARY: In an Advance Notice of Proposed Rulemaking (ANPR) served February 5, 1992, and published in the **Federal Register** on February 6, 1992 (57 FR 4594), the Commission solicited public comments on various proposed modifications to the regulations for computing interest currently contained in 49 CFR 1141.1. The Association of American Railroads (AAR) has requested an extension of time until April 8, 1992, to file its comments. The request shall be granted. Additional time is necessary for AAR to prepare an adequate and coordinated response for the railroad industry. Any other party wishing to submit comments will also have until April 8, 1992, in which to respond.

DATES: Initial comments in response to the ANPR are due April 8, 1992.

ADDRESSES: Send an original and 10 copies of comments referring to Ex Parte No. 507 to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Ward L. Ginn, Jr., (202) 927-6187 (TDD for the hearing impaired: (202) 927-5721).

Dated: March 2, 1992.

By the Commission, Edward J. Philbin, Chairman.

Sidney L. Strickland, Jr.,

Secretary.

Federal Register

Vol. 57, No. 45

Friday, March 6, 1992

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Okeechobee Dairies Best Management Practices Program; Determination of Primary Purpose of Program Payments for Consideration as Excludable From Income Under Section 126 of the Internal Revenue Code of 1954

AGENCY: Office of the Secretary, USDA.

ACTION: Notice of determination.

SUMMARY: The Secretary of Agriculture has determined that all state cost-share payments made to individuals by the State of Florida under the Okeechobee Dairies Best Management Practices Program have been made primarily for the purpose of soil and water conservations, protecting or restoring the environment, and improving the quality of water entering Lake Okeechobee. This determination is made in accordance with section 126 of the Internal Revenue Code of 1954, as amended, 26 U.S.C. 126. The determination permits recipients of these cost-share payments to exclude them from gross income to the extent allowed by the Internal Revenue Service.

FOR FURTHER INFORMATION CONTACT: Bob Crawford, Commissioner of Agriculture, Florida Department of Agriculture and Consumer Services, The Capitol, Tallahassee, Florida 32399, or Director, Land Treatment Program Division, Soil Conservation Service, USDA, P.O. Box 2890, Washington, DC 20013 (202) 720-1870.

SUPPLEMENTARY INFORMATION: Section 126 of the Internal Revenue Code of 1954, as amended by the Revenue Act of 1978 and the Technical Corrections Act of 1979, 26 U.S.C. 126, provides that certain payments made to persons under state conservation programs may be excluded from the recipient's gross income for Federal income tax purposes, if the Secretary of Agriculture determines that payments are made "primarily for the purpose of soil and water conservation, protecting or restoring the environment, improving forests, or providing a habitat for wildlife." The Secretary of Agriculture evaluates the conservation programs on the basis of criteria set forth in 7 CFR part 14, and makes a "primary purpose" determination for the payments made under each program. Before there may be an exclusion, the Secretary of the Treasury must determine that payments made under these conservation programs do not substantially increase the annual income derived from the property benefited by the payments.

One of Florida's water quality improvement programs establishes treatment requirements for concentrated animal feeding operations and for dairy farms in the Lake Okeechobee Drainage Basin. The program is set forth in Chapter 17-670 of the Florida Administrative Code (F.A.C.). The rules implement and are authorized by Florida Statutes s.403.021, s.403.062, s.403.087, s.403.088, s.403.804 (1989), and by s.403.061 (Supp. 1990). Similar provisions were previously set forth in Chapter 17-6, F.A.C. The purpose of Rules 17-670.500 through 17-670.540, F.A.C. is to control pollution of waters of the state due to the discharge of wastewater and runoff from dairy farms in the Lake Okeechobee Drainage Basin to surface and ground water. The objectives of the program are met by construction of specific engineered structures on private farmland and through cost shared land treatment or management practices. The landowner or operator contracts with the Florida Department of Agriculture and Consumer Services for the cost-share assistance. The program objectives are to be achieved, and cost sharing is available for planning and installing various land treatment or management measures.

By June 3, 1989, all dairy farms in existence prior to June 3, 1987, were to submit to the Department of Environmental Regulation a management plan prepared by the Soil Conservation Service or a Florida licensed professional engineer that will bring the dairy farm into compliance with the requirements of Chapter 17-670, F.A.C. An application for a contractor or operator permit must also be submitted which shall include the ground water monitoring program required by Rule 17-670.530 F.A.C.

In addition to the foregoing, the State of Florida has determined that program objectives would also be met by the relocation of all or some of the dairies. Accordingly, the program provides compensation to dairy farmers in the Lake Okeechobee Drainage Basin who choose to close their operation and restrict the property from further use as a dairy. However, the determination of primary purpose set forth in this notice does not apply to such relocation and restricted use payments.

Procedural Matters

The authorizing legislative, regulations, and operating procedures regarding the Okeechobee Dairies Best Management Practices Program have been examined using the criteria set in 7 CFR part 14. The Department of Agriculture has concluded that the cost-share payments made for implementation of best management practices under this program are made to provide financial assistance to eligible persons primarily for the purpose of soil and water conservation, protecting or restoring the environment, and improving the quality of water entering Lake Okeechobee.

A "Record of Decision, Okeechobee Dairies Best Management Practices Program, Primary Purpose Determination for Federal Tax Purpose" has been prepared and is available upon request from the Director, Land Treatment Program Divsion, Soil Conservation Service, P.O.Box 2890, Washington DC 20013, or the Florida Commissioner of Agriculture, Florida Department of Agriculture and Consumer Services, The Capitol, Tallahassee, Florida 32399.

Determination

As required by section 126(b) of the Internal Revenue Code of 1954, as amended, I have examined the authorizing legislation, regulations, and operating procedures regarding the Okeechobee Dairies Best Management Practices Program. In accordance with the criteria set out in 7 CFR part 14, I have determined that all cost-share payments for implementation of best management practices made under this program are primarily for the purpose of soil and water conservation, protecting

or restoring the environment, and improving the quality of water entering Lake Okeechobee. However, the determination of primary purpose set forth in this notice does not apply to such relocation and restricted use payments received by dairy farmers who choose to close their operation. Subject to further determination by the Secretary of the Treasury, this determination permits payment recipients to exclude from gross income, for Federal income tax purposes, all or part of such cost-share payments made under said program.

Signed at Washington, DC on March 3, 1992.

Edward Madigan,

Secretary.

BILLING CODE 3410-16-M

Food and Nutrition Service

Child Nutrition Programs—Income Eligibility Guidelines

AGENCY: Food and Nutrition Service, USDA.

ACTION: Notice.

SUMMARY: This Notice announces the Department's annual adjustments to the Income Eligibility Guidelines to be used in determining eligibility for free and reduced price meals or free milk for the period from July 1, 1992 through June 30, 1993. These guidelines are used by schools, institutions, and centers participating in the National School Lunch Program, School Breakfast Program, Special Milk Program for Children, Child and Adult Care Food Program and Commodity School Program. The annual adjustments are required by section 9 of the National School Lunch act. The guidelines are intended to direct benefits to those children most in need and are revised annually to account for increases in the Consumer Price Index.

EFFECTIVE DATE: July 1, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Robert M. Eadie, Chief, Policy and Program Development Branch, Child Nutrition Division, FNS, USDA, Alexandria, Virginia 22302, or by phone at (703) 305-2618.

SUPPLEMENTARY INFORMATION: This Notice has been reviewed under Executive Order 12291 and has been classified not major. This Notice will not have an annual effect on the economy of $100 million or more, nor will it result in a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions. This action will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets.

These programs are listed in the Catalog of Federal Domestic Assistance under No. 10.553, No. 10.555, No. 10.556 and No. 10.558 and are subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V, and the final rule related notice published at 48 FR 29114, June 24, 1983.)

This Notice imposes no new reporting or recordkeeping provisions that are subject to OMB review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507). This action is not a rule as defined by the Regulatory Flexibility Act (5 U.S.C. 601-612) and thus is exempt from the provisions of that Act.

Background

Pursuant to sections 9(b)(1) and 17(c)(4) of the National School Lunch Act (42 U.S.C. 1758(b)(1) and 1766(c)(4)), and sections 3(a)(6) and 4(e) of the Child Nutrition Act of 1966 (42 U.S.C. 1772(a)(6) and 1773(e)), the Department annually issues the Income Eligibility Guidelines for free and reduced price meals in the National School Lunch Program (7 CFR part 210), School Breakfast Program (7 CFR part 220), Child and Adult Care Food Program (7 CFR part 226), and Commodity School Program (7 CFR part 210), and issues the guidelines for free milk in the Special Milk Program for children (7 CFR part 215). These eligibility guidelines are based on the Federal income poverty guidelines and are stated by household size.

The Department requires schools and institutions which charge for meals separately from other fees to serve free meals to all children from any household with income at or below 130 percent of the poverty guidelines. The Department also requires such schools and institutions to serve reduced-price meals to all children from any household with income higher than 130 percent of the poverty guidelines, but at or below 185 percent of the poverty guidelines. Schools and institutions participating in the Special Milk Program may, at local option, serve free milk to all children from any household with income at or below 130 percent of the poverty guidelines.

Definition of Income

"Income," as the term is used in this Notice, means income before any deductions such as income taxes, social security taxes, insurance premiums, charitable contributions and bonds. It includes the following: (1) Monetary compensation for services, including wages, salary, commissions or fees; (2) net income from nonfarm self-employment; (3) net income from farm self-employment; (4) social security; (5) dividends or interest on savings or bonds or income from estates or trusts; (6) net rental income; (7) public assistance or welfare payments; (8) unemployment compensation; (9) government civilian employee or military retirement, or pensions or veterans payments; (10) private pensions or annuities; (11) alimony or child support payments; (12) regular contributions from persons not living in the household; (13) net royalties; and (14) other cash income. Other cash income would include cash amounts received or withdrawn from any source including savings, investments, trust accounts and other resources which would be available to pay the price of a child's meal.

"Income," as the term is used in this Notice, does not include any income or benefits received under any Federal programs which are excluded from consideration as income by any legislative prohibition. Furthermore, the value of meals or milk to children shall not be considered as income to their households for other benefit programs in accordance with the prohibitions in section 12(e) of the National School Lunch Act and section 11(b) of the Child Nutrition Act of 1966 (42 U.S.C. 1760(e) and 1780(b)).

The Income Eligibility Guidelines

The following are the Income Eligibility Guidelines to be effective from July 1, 1992 through June 30, 1993. The Department's guidelines for free meals and milk and reduced-price meals were obtained by multiplying the 1992 Federal income poverty guidelines by 1.30 and 1.85, respectively, and by rounding the result upward to the next whole dollar. Weekly and monthly guidelines were computed by dividing annual income by 52 and 12, respectively, and by rounding upward to the next whole dollar.

BILLING CODE 3410-30-M

Forest Service

Southwestern Region Arizona, New Mexico, West Texas and Oklahoma Legal Notice of Appealable Decisions

AGENCY: Forest Service, USDA.

ACTION: Notice.

SUMMARY: On April 9, 1990, the Southwestern Region published a list of newspapers in which decisions would be published in accordance with 36 CFR 217.5(d). This list must be updated twice annually.

The April 9, 1990 Southwestern Region list will remain unchanged except for the Gila National Forest and Districts. Gila National Forest and District Decisions will be published in the legal notice section of the newspapers listed in the Supplemental Information Section of this notice.

FOR FURTHER INFORMATION CONTACT: Pat Jackson, Regional Appeals Coordinator, Southwestern Region, 517 Gold Avenue SW., Albuquerque, New Mexico 87102, Area Code 505-842-3305.

SUPPLEMENTARY INFORMATION: Deciding Officers in the Southwestern Region will give legal notice of decision subject to appeal under 36 CFR part 217 in the following newspapers which are listed by Forest Service administrative unit. Where more than one newspaper is listed for any unit, the first newspaper listed is the primary newspaper which shall be used to constitute legal evidence that the agency has given timely and constructive notice of decisions that are subject to administrative appeal. As provided in 36 CFR 217.5(d), the timeframe for appeal shall be based on the date of publication of a notice of decision in the primary newspaper.

Gila National Forest

Notice of Forest Supervisor Decisions

BILLING CODE 3410-11-M

North Fork of Illinois Bayou Proposed Municipal and Industrial Water Supply Dam and Reservoir

AGENCY: Forest Service, USDA.

ACTION: Cancellation of notice of intent to prepare an environmental impact statement.

SUMMARY: The City Corporation of Russellville, Arkansas, has withdrawn its request from the Ozark National Forest for an authorization to use approximately 1,400 acres of National Forest System land for the purpose of constructing a municipal supply reservoir and dam on the North Fork of Illinois Bayou.

The Notice of Intent, published in the **Federal Register** of June 8, 1989, is hereby rescinded (54 FR 24574–24575).

FOR FURTHER INFORMATION CONTACT: Direct questions about this notice to John B. Fortin, Planning Staff Officer, Ozark-St. Francis National Forests, 605 West Main, Box 1008, Russellville, AR 72801, phone 501–968–2354.

Dated: March 2 1992.

Lynn C. Neff,

Forest Supervisor.

DEPARTMENT OF COMMERCE

International Trade Administration

Exporters' Textile Advisory Committee; Open Meeting

A meeting of the Exporters' Textile Advisory Committee will be held on Thursday, March 26, 1992. The meeting will be from 2 p.m. to 4 p.m. in room 1414, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC 20230.

The Committee advises Department of Commerce officials on textile and apparel export issues.

Agenda: Report on conditions in the export market, review of Office of Textiles and Apparel export expansion activities, and other business.

The meeting will be open to the public with a limited number of seats available. For further information or copies of the minutes, contact William Dawson (202/377–5155).

Dated: March 3, 1992.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

National Oceanic and Atmospheric Administration

[Docket No. 920254–2054]

Pacific Coast Groundfish Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of intent to prepare a Supplemental Environmental Impact Statement (SEIS) and notice of scoping process.

SUMMARY: NOAA announces its intention to prepare an SEIS to assess the potential effects of controlling access to groundfish and Pacific halibut fishery resources through an individual quota program. The Pacific Fishery Management Council (Council) is considering amending the Fishery Management Plan for Pacific Coast Groundfish and recommending changes to the regulations affecting U.S. fishing for Pacific halibut off the coasts of Washington, Oregon, and California [International Pacific Halibut Commission (IPHC) Area 2A].

In addition, NOAA formally announces a public process for determining the scope of issues to be addressed and for identifying the significant issues related to controlling access to public fishery resources. Scoping sessions will be held on the dates and locations specified below. The intended effect of this notice is to alert the interested public of the commencement of a scoping process and to provide for public participation. This action is necessary to comply with Federal environmental documentation requirements.

DATES: Scoping comments are invited through April 3, 1992. Additionally, the Council will accept testimony at its March 9–13, 1992, meeting in Seattle, Washington, and at its April 7–10, 1992, meeting in San Francisco, California.

ADDRESSES: Address scoping comments and requests for additional information on times and locations of meetings to Lawrence D. Six (Executive Director, Pacific Fishery Management Council), 2000 Southwest First Avenue, suite 420, Portland, Oregon, 97201, 503–326–6352.

FOR FURTHER INFORMATION CONTACT: Rolland A. Schmitten (Director, Northwest Region, NMFS), 206–526–6150; E. Charles Fullerton (Director, Southwest Region, NMFS), 213–514–6198; or Lawrence D. Six (Executive Director, Pacific Fishery Management Council), 503–326–6352.

SUPPLEMENTARY INFORMATION:

Background

The Pacific Coast Groundfish Fishery Management Plan (FMP) was approved on January 4, 1982 (47 FR 43964; October 5, 1982), and implementing regulations appear at 50 CFR parts 611 and 663. Regulations governing the Pacific halibut fishery are found at 50 CFR part 301.

At its September 18–20, 1991, meeting, the Council voted to recommend that the Secretary of Commerce (Secretary) adopt a license limitation program for Pacific coast groundfish. If approved by the Secretary, this program would require permits for groundfish trawl, longline, and fishpot vessels to participate in the limited access segment of the commercial groundfish fishery, as of January 1, 1994. The Council also has authority to develop regulations, including limited access regulations, governing Pacific halibut in IPHC Area 2A. At its November 12–15, 1991, meeting in Millbrae, California, the Pacific Fishery Management Council adopted November 13, 1991, as a control date that may be used in determining priorities for issuance and distribution of shares of individual quotas (IQs) in a potential IQ-based limited access system for Pacific coast groundfish fisheries and the IPHC Area 2A Pacific halibut fishery (57 FR 4394–4395; February 5, 1992). At that time, the Council also initiated a public scoping process in anticipation of the drafting of an SEIS in support of an FMP amendment and regulations on IQs. Announcement of the scoping process has been distributed coastwide and is the purpose of this **Federal Register** notice.

The Problem

Because the groundfish fishery is managed under an open access system, the fleet's harvesting capacity and total effort have remain unchecked. As other fisheries grow increasingly overcrowded relative to available harvest, it becomes more likely that capacity will be redirected to the Pacific Coast groundfish fishery when downturns occur in other fisheries. Shifts in other factors, such as relative groundfish prices and harvest costs (increasing relative profits) may also attract new entrants. With most species in the Pacific Coast groundfish fishery already fully utilized, and excess capacity already present, the possibility for entrance of more vessels into the fishery threatens to exacerbate current conservation problems. In fisheries with excess effort, regulations designed to meet conservation goals generally interfere with day-to-day vessel operations and reduce vessel efficiency.

Groundfish and halibut regulations have become increasingly restrictive. In 1991, the difficulty of meeting the trip limits resulted in a compliance rate of only about 60 percent. For 1992, the Council adopted a cumulative trip limit for most species that may reduce discards but will further increase enforcement costs. Additionally, rockfish trip frequency limits will be in place for the first time in southern areas, and mesh size for roller gear will be increased to 4.5 inches coastwide. Traditional regulations have many adverse impacts in such areas as fleet costs, resource utilization, safety, and enforcement costs and effectiveness. The halibut fishery is also overcapitalized. In 1991, the fishermen exceeded their commercial quota in Area 2A during one 10-hour fishing period.

These problems are common to many fisheries managed under open access. Profits in the harvesting sector attract increased fishing effort (e.g., vessels, gear, labor). While free entry and exit of firms is common in most sectors of the economy, the fishery sector differs in that the raw materials (fish) are a public resource provided at no cost to the harvesters. As a result, the open access fishery tends to use excess inputs (e.g., fuel, vessels, gear, labor) beyond those technically necessary to produce the output of allowed levels of harvested fish, which results in the dissipation of profits (rents). This is an inefficient use of capital, that is, the excess capital would be used more productively in other sectors of the economy. Moreover, investment is directed towards increasing effort in an attempt by individual fishermen to harvest more fish more quickly than other fishermen. As a result, fishing seasons are shortened, safety risks are increased, bycatch mortality may be increased, gear conflicts occur, fishery managers are pressured to increase harvest quotas or not to reduce them, product quality is reduced, more management controls on when, where and how fish may be harvested are necessary and net benefits to the nation are reduced.

The Council has recognized these problems in the groundfish and halibut fisheries and has recommended a license limitation program for implementation in the groundfish fishery. It is anticipated that this license limitation program would begin to control capacity and generate net national benefits as a result. However, more could be done to control excessive investment in the fishery. An individual quota program may complement a license limitation program in a way that will bring more benefits than either program alone.

The public is hereby notified that NMFS, in cooperation with the Council, intends to prepare an SEIS on the potential effects of amendment of the groundfish FMP and halibut fishing regulations to provide additional control over access to the groundfish and halibut fisheries resources in the exclusive economic zone (EEZ) off the Pacific Coast. This action is not intended to prejudice a decision by the Council on whether to recommend to the Secretary any change in the FMPs or halibut regulations, but is designed to provide the Council with the best information available on which to base such a decision.

Actions and Possible Alternatives under Consideration

The Council is considering amending the Groundfish FMP and recommending changes to the halibut fishery regulations to provide authority to control access to the Pacific groundfish and halibut resources off the Pacific Coast. Some of the major alternatives under consideration include:

(1) The status quo in which open access management of these fisheries would continue, or, if approved by the Secretary, a license limitation program that controls acces to a large portion of the groundfish resource.

(2) IQs covering all or a portion of the groundfish fishery. (Under IQs the right to harvest a portion of the total quota is allocated to individual fishermen or vessels.)

(3) IQs covering all or a portion of the groundfish fishery and the halibut fishery.

Scoping Process

All persons affected by or otherwise interested in a controlled access scheme for all or part of the Pacific groundfish and Pacific halibut resources under the Council's jurisdiction through a system of individual quotas are invited to participate in determining the scope and significant issues to be analyzed in the SEIS by submitting written comments to the above address. Scope consists of the range of actions, alternatives, and impacts to be considered in the SEIS. Actions include those which may be closely related, cumulative, or similar. Alternatives include the no action alternative and other reasonable courses of action. Impacts may be direct, indirect, and cumulative. The scoping process also will identify and eliminate from detailed study issues that are not significant or that have been covered in prior environmental review. This scoping process will end on April 3, but reopen for testimony at the April Council meeting. In addition to written comment invited by this notice, opportunity will be provided for testimony at two Council meetings:

—Seattle, Washington, at the Airport Red Lion Hotel the week of March 9.

—San Francisco, California, at the Airport Clarion Hotel, the week of April 6.

More information on these meetings may be obtained from Council staff at the address and telephone number listed above.

Timing of the Analysis and Tentative Decisionmaking Schedule

After receiving public comment at its April meeting the Council is scheduled to identify alternatives for analysis and develop a timetable for development of the amendment and SEIS. The exact time schedule will depend on the scope of identified alternatives.

Dated: March 2, 1992.

Michael F. Tillman,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

[Docket No. 920245-2045]

Condition and Restriction To Be Included with Certain Permits for the Bering Sea and Aleutian Islands, Gulf of Alaska, and Pacific Coast Groundfish Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Permit condition and restriction.

SUMMARY: NMFS intends to include a condition and restriction with all foreign fishing permits that may be issued in 1992 to authorize fishing activities in the Bering Sea and Aleutian Islands (BSAI), Gulf of Alaska (GOA), and/or Pacific Coast Groundfish (PCG) fishery management areas. Vessels holding permit authorizations in these fisheries will be provided from conducting activities within the Exclusive Economic Zone (EEZ) of the United States that would support foreign fisheries prosecuted in an area of the Central Bering Sea known as the "donut hole."

This action is necessary for the fishery conservation and management of certain Alaska pollock stocks and deemed appropriate by the Secretary. It is therefore, in accord with paragraph (F) of section 204(b)(7) of Magnuson Fishery Conservation and Management Act and paragraph (e)(1)(v) of 50 CFR 611.3. The action will be implemented immediately to prevent substantial harm to Alaska pollock stocks originating in the Bogoslof Islands area of the EEZ. Comments may be submitted on this notice.

DATES: Comments must be received on or before April 6, 1992.

ADDRESSES: Send comments to the Operations Support and Analysis Division (F/CM1), Office of Fisheries Conservation and Management, National Marine Fisheries Service, 1335 East-West Highway, Silver Spring, MD 20910; or telex comments to 467856 US COMM FISH CI. Mark any envelope "1992 Permit Condition."

FOR FURTHER INFORMATION CONTACT: Alfred J. Bilik, (301) 427-2337.

SUPPLEMENTARY INFORMATION: Significant foreign fisheries have been conducted in an area of the Central Bering Sea that lies seaward of, but is fully enclosed by, the EEZ of the United States and the Economic Zone of the Russian Republic. Trawling vessels of certain nations having governing international fishery agreements with the United States, namely Japan, the Republic of Korea, the People's Republic of China, and the Republic of Poland are among those that take Alaska pollock in this fishery.

The United States believes most Alaska pollock taken in the fishery originate within the EEZ and on the Alaskan Continental Shelf, in the Area of the Bogoslof Islands. At a recently concluded meeting of delegates of the above nations with delegates from the former Soviet Union and the United States, there was agreement that substantial catch declines have occurred in the "donut hole" fishery, from a peak of 1.4 million metric tons (mt) in 1989 to only 260,000 mt as of the end of the third quarter of 1991. It was also agreed that available information indicates that the pollock population in the Central Bering Sea is most likely to decline in the coming year and that there will be a significant lag of at least 4-7 years between the development of a strong yearclass and its availability in the Central Bering Sea.

This information, together with the belief that the source of the Central Bering Sea fishery is the Bogoslof Islands Pollock stock, has raised serious and immediate concerns of the conservation and management of this resource. The North Pacific Fishery Management Council has recommended action to close U.S. fisheries conducted on the Bogoslof stock in the BSAI management areas. It is also appropriate that NMFS take any available actions to promote the conservation and management of this resource.

Foreign vessels that fish in the Central Bering Sea use the protected waters within the EEZ of the Bering Sea to transship their production from the "donut hole," as well as for other activities in support of their harvesting operations, such as bunkering. These activities can be conducted in the EEZ only under authorizations contained in foreign fishing permits issued by NMFS. Although consideration had been given in 1990 and in 1991 to denying such authorizations, the step was not taken because a number of U.S. fishing enterprises relied on that production for their markets and provided other services in support of the harvesting operations.

In view of new evidence of declining trends in the resources, NMFS has at this time reconsidered its position on that matter. It believes that reasonable action must be taken immediately to conserve the resource, and that discontinuing the privilege provided to foreign vessels to transship "donut hole" production in the EEZ and to conduct other related support activities would be an appropriate step. United States enterprises that currently depend on foreign production of Alaska pollock are advised to consider alternative sources in view of the decline in the pollock population and the projected lag of at least 4 to 7 years until the availability of a strong yearclass in the Central Bering Sea. Since this action is taken to prevent substantial harm to the resource, the established dependence of U.S. enterprises on Alaska pollock production from the "donut hole" cannot be a factor determining this decision.

Applications have been submitted by several countries for permit authorizations for 1992 fishing operations in the BSAI, GOA, and PCG management areas that may involve the transshipment of foreign production or the provision of other support for vessels harvesting fish outside the EEZ (Activity Code 8 permit authorizations). A number of these applications apparently contemplate activities in the EEZ to support the applicant country's, or another country's, "donut hole" operations. The appropriate officials of the applicant countries should, at this time, either revise the earlier applications accordingly or withdraw

such applications made for the exclusive purpose of such transshipment or support. The applications may be revised by letter to the Assistant Administrator for Fisheries but should specifically identify the affected vessels, by name and International Radio Call Sign (IRCS), and, if all vessel applications are not withdrawn, indicate the nature of the activities to be conducted in the EEZ by the remaining vessels (i.e., in lieu of "donut hole" support.) On receipt of such a letter, NMFS will initiate a refund of the permit application fees paid for vessels that are withdrawn. Applications requesting authorizations to support operations involving fish taken seaward of the EEZ that are filed after the date of publication of this notice will not be considered unless they specify where such fish will have been harvested. All 1992 permit authorizations issued for fishing activities in the three fisheries will be conditioned and restricted to prohibit any operations supporting the foreign "donut hole" fisheries.

Dated: March 2, 1992.

David S. Crestin,

Acting Director, Office of Fisheries Conservatrion and Manageament, National Marine Fisheries Service.

[FR Doc. 92-5199 Filed 3-5-92; 8:45 am]

BILLING CODE 3510-22-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List; Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed additions to procurement list.

SUMMARY: The Committee has received proposals to add to the Procurement List a commodity and a service to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: April 6, 1992.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodity and service listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity and service to the Government.

2. The action will result in authorizing small entities to furnish the commodity and service to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c) in connection with the commodity and service proposed for addition to the Procurement List.

Coments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

It is proposed to add the following commodity and service to the Procurement List:

Commodity

Line, Multi-Loop, 1670-01-062-6309

Service

Janitorial/Custodial, U.S. Army Detroit Arsenal Complex, Warren, Michigan

Beverly L. Milkman,

Executive Director.

[FR Doc. 92-5270 Filed 3-5-92; 8:45 am]

BILLING CODE 6820-33-M

Procurement List; Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed additions to procurement list.

SUMMARY: The Committee has received proposals to add to the Procurement List commodities and services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: April 6, 1992.

ADDRESSES: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodities and services listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities and services to the Government.

2. The action does not appear to have a severe economic impact on current contractors for the commodities and services.

3. The action will result in authorizing small entities to furnish the commodities and services to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c) in connection with the commodities and services proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

It is proposed to add the following commodities and services to the Procurement List:

Commodities

Strap, Webbing, 5340-00-889-5595 (Remaining Government Requirement).
Table, Folding Legs, Field, 7105-00-269-9275 (Remaining 50% of Government's requirement).
Cover, Helmet, White, 8415-01-144-1860, 8415-01-144-1861.

Services

Administrative Services, Environmental Protection Agency, remaining Washington, DC metro area locations.

Commissary Warehousing, Griffis Air Force Base, New York.
Janitorial/Custodial, Marine Corps Logistics Base, Albany, Georgia.
Janitorial/Custodial, Rattlesnake National Recreation Area, Maclay Flat and Fort Fizzle, Missoula Ranger District, Missoula, Montana.

Beverly L. Milkman,

Executive Director.

[FR Doc. 92-5271 Filed 3-5-92; 8:45 am]

BILLING CODE 6820-33-M

Procurement List; Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Addition to procurement list.

SUMMARY: This action adds to the Procurement List services to be furnished by a nonprofit agency employing persons with severe disabilities.

EFFECTIVE DATE: April 6, 1992.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557-1145.

SUPPLEMENTARY INFORMATION: On December 13, 1991 and January 17, 1992, the Committee for Purchase from the Blind and Other Severely Handicapped published notices (56 FR 65047 and 57 FR 2081) of proposed additions to the Procurement List.

After consideration of the material presented to it concerning the capability of a qualified nonprofit agency to provide the services at a fair market price and the impact of the addition on the current or most recent contractor, the Committee has determined that the services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c and 41 CFR 51-2.6.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the services to the Government.
2. The action will not have a severe economic impact on current contractors for the services.
3. The action will result in authorizing small entities to furnish the services to the Government.
4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c) in connection with the services proposed for addition to the Procurement List.

Accordingly, the following services are hereby added to the Procurement List:

Janitorial/Custodial, Beale Air Force Base, California (excluding Hospital and Commissary).
Janitorial/Custodial, U.S. Army Reserve Center, 2800 West 15th Street, Texarkana, Texas.
Janitorial/Custodial, U.S. Army Reserve Center, 6300 West 7th Street, Texarkana, Texas.
Mailroom Service, U.S. Army Information Systems Command, Aldelphi, Maryland.

This action does not affect contracts awarded prior to the effective date of this addition or options exercised under those contracts.

Beverly L. Milkman,

Executive Director.

[FR Doc. 92-5272 Filed 3-5-92; 8:45 am]

BILLING CODE 6820-33-M

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Proposed Beach Restoration Project; From Asbury Park to Manasquan, Monmouth County, NJ

February 27, 1992.

AGENCY: Corps of Engineers, Army, DOD.

ACTION: Notice of intent to prepare a Draft Environmental Impact Statement (DEIS).

SUMMARY: The New York District of the U.S. Army Corps of Engineers plans to begin preparation of a Draft Environmental Impact Statement (DEIS) for proposed measures to reduce storm damage extending from the north limit of the Borough of Asbury Park to the north jetty at Manasquan Inlet, Monmouth County, New Jersey. This project is necessary due to the continual erosion leading to a decrease in beach width and a loss of beach material during severe storms and hurricianes. Due to the erosion and the lack of a sufficiently high beach, berm or dune system, residential and commercial developments and properties have become increasingly susceptible to storm damage from flooding and wave attack. This notice was previously issued on April 7, 1988 and is now being updated to include revised and current information.

FOR FURTHER INFORMATION CONTACT: ATTN: Clifford S. Jones III, Project Manager, (212) 264-9077, ATTN: Mark H. Burlas, Project Biologist, (212) 264-2663, Planning Division, Corps of Engineers, New York District, 26 Federal Plaza, New York, New York 10278-0090.

SUPPLEMENTARY INFORMATION: This action was authorized by the River and Harbor Act of July 3, 1958 in accordance with reports printed in House Document No. 332, 85th Congress, Second Session.

1. Location and Description of Proposed Action:

The project area is located along the coast of the Atlantic Ocean and lies within Monmouth County, New Jersey, encompassing the Boroughs of Avon-By-The-Sea, Bradley Beach, Belmar, Manasquan, Ocean Grove, Sea Girt and Spring Lake and the City of Asbury Park (Figures 1 and 2). The project viability report, dated November 1989, identified a potential solution for storm damage protection consisting of constructing a 100 foot wide berm at an elevation of +8.4 feet National Geodetic Vertical Datum (NGVD), which is equivalent to +10.0 feet Mean Low Water (MLW) and a 2 foot berm cap. The project plan is designed to endure a 73 year storm event and have a 50 year economic life that would undergo renourishment of beach fill every six years. Beach nourishment would be accomplished by mechanically transporting sand from proposed offshore borrow areas for placement onto a beach to widen the dry beach and restore and stabilize the nearshore profile. In addition to beach nourishment, the plan includes modification of some existing groins to allow transport of littoral material.

2. Reasonable Alternative Actions:

The viability report's optimal plan has a design berm height of +8.4 feet NGVD, berm width of 100 with a 2 foot berm cap and the modification of some existing groins. The "No Action" alternative failed to meet the needs and objectives of the subject project. The construction of groins, seawalls, revetments and breakwaters independently or in combination with beach nourishment failed to meet optimal cost-benefit justification.

3. Scoping Process

A. Public Involvement

A copy of the DEIS will be distributed to all appropriate public and private agencies and organizations with the intent of receiving opinions from interested agencies, organizations and/or individuals. A Public Notice, indicating availability of the DEIS for review, will be issued to public and private agencies that are on the Corps of Engineers Operation Division's mailing list. Additions to this mailing list can be made by notifying the project EIS coordinator. Coordination is being conducted with federal and state agencies to identify significant environmental concerns and plan beneficial mitigation.

B. Significant Issues Requiring In-Depth Analysis

1. Water Quality Impacts.
2. Archaeological and Cultural Resources Impacts.
3. Aquatic and Terrestrial Resource Impacts.
4. Shorebird Populations.
5. Recreational Impacts.
6. Longshore Sand Transport.

C. Environmental Review and Consultation

Review will be conducted as outlined in the Council on Environmental Quality regulations dated November 29, 1983 (40 CFR parts 1500-1508) and U.S. Army Corps of Engineers regulation ER 200-2-2 dated March 4, 1988.

4. Scoping Meeting

Scoping meeting will not be scheduled.

5. Estimated Date of DEIS Availability

September 1992.

Joseph R. Vietri,

Assistant Chief, Planning Division.

[FR Doc. 92-5179 Filed 3-5-92; 8:45 am]

BILLING CODE 3710-06-M

DEPARTMENT OF EDUCATION

Indian Education National Advisory Council; Meeting

AGENCY: National Advisory Council on Indian Education, Education.

ACTION: Notice of partially closed meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Advisory Council on Indian Education. This notice also describes the functions of the Council. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act.

DATES AND TIME: March 17-20, 1992, from 9 a.m. to approximately 5 p.m. each day. The open portion of the meeting will be held on March 20, 1992 from 2 p.m. to 5 p.m.

ADDRESSES: The closed portion of the meeting will be held at the Vista International Hotel, 1400 M St. NW., Washington, DC 20005, (202) 429-1700. The open portion of the meeting will be held at the National Advisory Council on Indian Education conference room, located at 330 C St. SW., room 4099C, Washington, DC 20202-7556, (202) 732-1353.

FOR FURTHER INFORMATION CONTACT: Robert K. Chiago, Executive Director, National Advisory Council on Indian Education, 330 C Street, SW., room 4072, Switzer Building, Washington, DC 20202-7556. Telephone: 202/732-1353.

SUPPLEMENTARY INFORMATION: The National Advisory Council on Indian Education is established under section 5342 of the Indian Education Act of 1988 (25 U.S.C. 2642). The Council is established to, among other things, assist the Secretary of Education in carrying out responsibilities under the Indian Education Act of 1988 (Part C, title V. Pub. L. 100-297) and to advise Congress and the Secretary of Education with regard to federal education programs in which Indian children or adults participate or from which they can benefit.

Under section 5342(b)(2) of the Indian Education Act, the Council is directed to review applications for assistance and to make recommendations to the Secretary of Education with respect to their approval. The duly authorized Proposal Review Committee of the Council will meet in closed session starting at approximately 9 a.m. and will end at approximately 5 p.m. during both proposal review sessions. The March 17-18 agenda includes reviewing grant applications for assistance under programs authorized by subparts 1, 2, and 3 of the Indian Education Act, including applications for (1) Discretionary Grants to Indian Controlled Schools; (2) Educational Services for Indian Children; and (3) Educational Services for Indian Adults. The March 19-20 agenda will include reviewing grant applications from individuals for assistance under the fellowship program authorized by subpart 2 of the Indian Education Act.

The discussion during the review process may disclose sensitive information about applicants, qualifications of proposed staff, funding levels and requests, and the names and comments of expert reviewers. Such discussion would disclose commercial or financial information obtained from a person or organization which is privileged or confidential and would disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy if conducted in open session. Such matters are protected by exemptions (4) and (6) of section 552b(c) of the Government in the Sunshine Act (Pub. L. 94-409; 5 U.S.C. 552b(c)).

In addition to the proposal review, the Annual Report Committee of the National Advisory Council on Indian Education will meet in open session on March 20, 1992 from 2 p.m. to 5 p.m. at 330 C St. SW., in room 4099C, Washington, DC to review the Annual Report to the U.S. Congress for fiscal year 1991.

The public is being given less than 15 days notice due to problems in scheduling these meetings. A summary of activities of the closed meeting which are informative to the public consistent with the policy of title 5 U.S.C. 552b and proceedings from the open portion of the meeting shall be available for public inspection within 14 days of the meeting at the office of the National Advisory Council on Indian Education located at 330 C Street SW., room 4072, Washington, DC 20202-7556.

Dated: March 3, 1992.

Robert K. Chiago,

Executive Director, National Advisory Council on Indian Education.

[FR Doc. 92-5324 Filed 3-5-92; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Energy Information Administration

Forms CE-63A/B, "Annual Solar Thermal Collector Manufacturers Survey" and "Annual Photovoltaic Module/Cell Manufacturers Survey"

AGENCY: Energy Information Administration, Department of Energy.

ACTION: Notice of the proposed extension of the Forms CE-63A/B, "Annual Solar Thermal Collector Manufacturers Survey" and "Annual Photovoltaic Module/Cell Manufacturers Survey," and solicitation of comments.

SUMMARY: The Energy Information Administration (EIA), as part of its continuing effort to reduce paperwork and respondent burden (required by the Paperwork Reduction Act of 1980, Public Law 96-511, 44 U.S.C. 3501 *et seq.*), conducts a presurvey consultation program to provide the general public and other Federal agencies the opportunity to comment on continuing or proposed new data collection forms. This program helps to ensure that requested data can be provided in the desired format, reporting burden is

minimized, data collection forms are clearly understood, and that the impact of collection requirements on respondents can be properly assessed. Currently, EIA is soliciting comments concerning the proposed extension of the Forms CE–63A/B, "Annual Solar Thermal Collector Manufacturers Survey" and "Annual Photovoltaic Module/Cell Manufacturers Survey."

DATES: Written comments must be submitted on or before April 6, 1992. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact person listed below of your intention to do so as soon as possible.

ADDRESSES: Send comments to Doug Bonnar, EI–522, Energy Information Administration, U.S. Department of Energy, Washington, DC 20585. Phone: (202) 254–5560.

FOR FURTHER INFORMATION OR TO OBTAIN COPIES OF THE PROPOSED FORMS AND INSTRUCTIONS: Requests for additional information or copies of the forms and instructions should be directed to Doug Bonnar at the address listed above.

SUPPLEMENTARY INFORMATION:

I. Backgound.
II. Current Actions.
III. Request for Comments.

I. Background

In order to fulfill its responsibilities under the Federal Energy Administration Act of 1974 (Pub. L. 93–275) and the Department of Energy Organization Act (Pub. L. 95–91), the Energy Information Administration is obliged to carry out a comprehensive and integrated energy data and information program for the collection, evaluation, assembly, analysis, and dissemination of data and information relating to energy resource reserves, production, demand, technology and relevant economic and statistical information relating to the adequacy of energy resources to meet demands in the near and longer term future for the Nation's economic and social needs.

Form CE–63A collects data on solar thermal collector shipments, solar thermal systems, and solar-related manufacturing, marketing, and geographic information from companies in the United States that are engaged in manufacturing or importing solar thermal collectors. Solar thermal shipments are in terms of square feet.

Form CE–63B collects data on photovoltaic cell and module shipments, photovoltaic systems, and photovoltaic-related manufacturing and marketing information from companies in the United States that are engaged in manufacturing or importing photovoltaic cells and modules. Photovoltaic cell and module shipments are in terms of electrical capacity expressed in peak kilowatts.

II. Current Actions

At this time, the EIA is proposing a three-year extension of Forms CE–63A/B. The EIA is planning to meet with solar industry companies and associations, DOE personnel, and other interested parties to discuss Forms CE–63A/B. If changes are made to Forms CE–63A and/or CE–63B as a result of this notice, the meeting, or other activities, the changes will be highlighted in the **Federal Register** notice announcing the submission of the forms to the Office of Management and Budget later this year.

III. Request for Comments

Prospective respondents and other interested parties should comment on the proposed extension of the Forms CE–63A/B. The following general guidelines are provided to assist in the preparation of responses. When commenting, please indicate to which form your comments apply.

As a potential respondent:

A. Are the instructions and definitions clear and sufficient? If not, which instructions require clarification?

B. Can the data be submitted using the definitions included in the instructions?

C. Can data be submitted in accordance with the response time specified in the instructions?

D. Public reporting burden for this collection is estimated to average 3 hours per response. How much time, including time for reviewing instructions, searching existing data sources, gathering and maintaining the date needed, and completing and reviewing the collection of information, do you estimate it will require you to complete and submit the required form?

E. What is the estimated cost of completing this form, including the direct and indirect costs associated with the data collection? Direct costs should include all costs, such as administrative costs, directly attributable to providing this information.

F. How can the form be improved?

G. Do you know of any other Federal, State, or local agency that collects similar data? If you do, specify the agency, the data element(s), and the means of collection.

As a potential user:

A. Can you use data at the levels of detail indicated on the form?

B. For what purpose would you use the data? Be specific.

C. How could the form be improved to better meet your specific needs?

D. Are there alternate sources of data and do you use them? What are their deficiencies and/or strengths?

EIA is also interested in receiving comments from persons regarding their views on the need for the information contained in the "Annual Solar Thermal Collector Manufacturers Survey" and "Annual Photovoltaic Module/Cell Manufacturers Survey."

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of the forms; they also will become a matter of public record.

Statutory Authorities: Section 5(a), 5(b), 13(b), and 52 of Publ. L. 93–275, Federal Energy Administration Act of 1974, 15 U.S.C. 764(a), 764(b), 772(b) and 790a.

Issued in Washington, DC March 3, 1992.

Douglas R. Hale,

Acting Director, Statistical Standards, Energy Information Administration.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Project No. 5090–005]

Idaho Falls, ID; Intent To Hold a Public Meeting in Shelley, ID, To Discuss Staff's Draft Environmental Impact Statement (DEIS) for the Proposed Shelley Hydroelectric Project

March 2, 1992

On February 27, 1992, the Commission staff mailed the Shelley DEIS to the Environmental Protection Agency, resource and land managment agencies, parties to the proceeding, and interested organizations and individuals. This document evaluates the environmental consequences of: (1) Constructing and operating the applicant's proposed project on the Snake River in Bingham County, Idaho; (2) implementing applicant's proposal supplemented with staff's recommended mitigative measures; (3) constructing and operating an alternative project configuration that would include a dam at RM 786.6, approximately 1.0 mile upstream of the diversion damsite proposed by the applicant, and an adjacent powerhouse; and (4) the no-action alternative (license denial).

The public meeting on the Shelley Project, which will be recorded by an official stenographer, is scheduled from 7 to 10 p.m. on Tuesday, March 17, 1992, at the Senior Citizens Center, located at 192 West Pine Street in Shelley, Idaho 83274. At this meeting, resource agency personnel and other interested persons will have the opportunity to provide oral and written comments and recommendations regarding the Shelley DEIS for the Commission's public record.

For further information, please contact the FERC environmental coordinator, Jim Haimes, at (202) 219–2780.

Lois D. Cashell,

Secretary.

Office of Civilian Radioactive Waste Management

Nuclear Waste Policy Act of 1982, as Amended; Section 180(c) Draft Strategy for OCRWM To Provide Training Assistance to State, Tribal, and Local Governments

AGENCY: Department of Energy.

ACTION: Announcement of availability.

SUMMARY: The Department of Energy (DOE), Office of Civilian Radioactive Waste Management (OCRWM), announces the availability of the Draft "Strategy" for OCRWM to Provide Training Assistance to State, Tribal, and Local Governments." The Draft describes DOE's proposed process to fulfill OCRWM's requirement to provide technical assistance and funding to States for training for public safety officials of appropriate units of local government and Indian Tribes through whose jurisdictions the Secretary of Energy plans to transport spent nuclear fuel and high-level radioactive waste, as stated in section 180(c) of the Nuclear Waste Policy Act, as amended (42 U.S.C. 10101 et seq.).

DATES: Comments must be received on or before May 5, 1992.

ADDRESSES: Written comments (3 copies) should be sent to Ronald Milner, Office of Civilian Radioactive Waste Management, RW–40, U.S. Department of Energy, 1000 Independence Avenue SW., Washington DC 20585. Copies of documents referred to in this notice are available for public review at DOE Headquarters reading room, 1000 Independence Avenue SW., room 1E–190, Washington, DC 20585, (202) 586–6020; Nevada Operations Office reading room, 2753 S. Highland, Las Vegas, NV 89109, (702) 295–1274; and the Richland Operations Office reading room, 825 Jadwin Avenue, Richland, WA 99352, (509) 376–8583.

FOR FURTHER INFORMATION CONTACT: Elissa Turner, Transportaiton Branch, Office of Storage and Transportation, Office of Civilian Radioactive Waste Management, U.S. Department of Energy, Washington, DC 20585, (202) 586–1710.

John W. Bartlett, Director,

Office of Civilian Radioactive Waste Management.

BILLING CODE 6450–01–M

Office of Fossil Energy

[FE Docket No. 91–88–NG]

Michigan Consolidated Gas Co.; Order Extending Authorization To Import Natural Gas From Canada, Revoking Emergency Interim Order, and Granting Intervention

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of order extending authorization to import natural gas, revoking emergency interim order, and granting intervention.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting Michigan Consolidated Gas Company authorization to import up to 50,000 Mcf of Canadian natural gas per day through January 22, 1995. The order also revokes the emergency interim authority granted to Michigan Consolidated Gas Company in DOE Order No. 575 and grants intervention to Great Lakes Gas Transmission Limited Partnership.

A copy of this order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F–056, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, February 28, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

ENVIRONMENTAL PROTECTION AGENCY

[ECAO–CD–86–082; FRL–4112–4]

Air Quality Criteria for Oxides of Nitrogen

AGENCY: Environmental Protection Agency.

ACTION: Notice of extension of public comment period.

SUMMARY: This notice announces the extension of the public comment period for the external review draft of "Air Quality Cirteria for Oxides of Nitrogen," prepared by EPA's Environmental Criteria and Assessment Office of the Office of Health and Environmental Assessment.

DATES: In the November 25, 1991, **Federal Register** (56 FR 59285), EPA announced that November 25, 1991, through February 28, 1992, was the public comment period for the external review draft of this document. The Agency is now extending the public comment period to March 30, 1992. Comments must be in writing and postmarked by the March date.

ADDRESSES: To obtain a copy of the external review draft, interested parties should write the ORD Publications Center, CERI–FRN, U.S. Environmental Protection Agency, 26 West Martin Luther King Drive, Cincinnati, OH 45268, or telephone (513) 569–7562, FTS 684–7562, (FAX) (513) 569–7566, or (FAX) FTS 684–7566 and request the external review draft of the "Air Quality Criteria for Oxides of Nitrogen." Please provide your name, mailing address, and the EPA document number, EPA/600/8–91/049A.

The external review draft will also be available for public inspection and copying at the EPA Library, EPA Headquarters, Waterside Mall, 401 M Street SW., Washington, DC.

Comments on the external review draft should be sent in writing to the Project Manager for Air Quality Criteria for Oxides of Nitrogen, Enviromental Criteria and Assessment Office (MD–52), U.S. Environmental Protection Agency, Research Triangle Park, NC 27711.

FOR FURTHER INFORMATION CONTACT: Ms. Diane Ray, Environmental Criteria and Assessment Office (MD–52), U.S. Environmental Protection Agency, Research Triangle Park, NC 27711; (919) 541–3637, FTS 629–3637, (FAX) (919) 541–5078, or [FAX] FTS 629–5078.

Dated: March 2, 1992.

Erich Bretthauer,

Assistant Administrator for Research and Development.

BILLING CODE 6560–50–M

[FRL–4112–7]

Prevention of Significant Deterioration of Air Quality (PSD); Multitrade Limited Partnership, Inc., Pittsylvania County, VA

AGENCY: United States Environmental Protection Agency.

ACTION: Notice of final action.

SUMMARY: The purpose of this Notice is to announce that the Administrator of the United States Environmental Protection Agency issued a final decision, pursuant to the Prevention of Significant Deterioration of Air Quality (PSD) regulations codified at 40 CFR 52.21 and the Procedures for Decisionmaking codified at 40 CFR part 124, regarding Multitrade Limited Partnership, Inc. in Pittsylvania County, Virginia.

DATES: The effective date of the Administrator's decision was January 21, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Denis M. Lohman, Chief, New Source Review Section, Air Enforcement Branch, Air, Radiation and Toxics Division, U.S. Environmental Protection Agency, Region III, Mail Code 3AT22, 841 Chestnut Building, Philadelphia, Pennsylvania, 19107, (215) 597–3024

SUPPLEMENTARY INFORMATION: In a petition filed May 13, 1991, the Southern Environmental Law Center (SELC), on behalf of itself and other organizations, requested review of a Prevention of Significant Deterioration (PSD) permit issued on April 8, 1991, to Multitrade Limited Partnership, (Multitrade) for construction of a wood and coal fired electric power production facility near Hurt, Virginia. Petitions for review were also filed by the Superintendent of Shenandoah National Park (SNP) and numerous individual citizens who are residents of the area in which the plant is proposed to be built. The permit was issued by the Virginia Department of Air Pollution Control (DAPC) pursuant to a delegation of authority from the U.S. Environmental Protection Agency (EPA), Region III, Philadelphia, Pennsylvania 19107. Because of the delegation, the State's permit determination is subject to the review provisions of 40 CFR 124.19 before becoming final, and any PSD permit the DAPC issues will be an EPA-issued permit for purposes of federal law. 40 CFR 124.41; 45 FR 33413 (May 19, 1980). PSD permits issued by the DAPC are subject to the review provisions of the applicable EPA regulations 40 CFR 124.19 (1989).

On July 26, 1991, Multitrade, SELC, the Natural Resources Defense Council, and the U.S. Department of the Interior (on behalf of SNP) entered into an agreement to settle their differences. In pertinent part, the agreement calls upon Multitrade to request the State to change the permit as follows: facility will be 100% wood fueled power plant; to reduce SO_2 emissions from 623 tons per year (TPY) to 78.5 TPY; to reduce NO_x emissions from 623 TPY to 491 TPY; and to offset its SO_2 and NO_x emissions by entering into a federally enforceable agreement with Aqualon Company whereby Aqualon will permanently shut down four boilers.

Based on the events that have transpired since the pending petitions were filed, it is clear that Multitrade does not intend to construct the Hurt, Virginia facility under the same terms and conditions as are set forth in the PSD permit issued by the DAPC on April 8, 1991. Rather, Multitrade intends to seek changes in the permit pursuant to the terms of its settlement agreements with SELC, the Natural Resources Defense Council, and the U.S. Department of the Interior, and to ensure that the Aqualon boilers are permanently shut down to offset Multitrade's emissions. Hence, regardless of the Administrator's disposition of the pending petitions, a new final permit is now under consideration, thus making it highly unlikely that any such disposition would constitute final agency action within the meaning of 40 CFR 124.19(f)(1). In addition, as noted above, the boilers at the Aqualon facility have in fact been permanently shut down. In light of this development, and if Multitrade obtains the permit changes it seeks, it now appears that most or all of the issues presented in the pending petitions for review may be resolved and rendered moot. It is unlikely, therefore, that the conclusion of this proceeding would be hastened by addressing these issues at this juncture.

CONCLUSION: Multitrade's stated intent to seek changes in the permit issued on April 8, 1991, renders unripe the petitions pending before the Administrator. For this reason, the pending petitions have been dismissed without prejudice. Because "permit conditions should be finally determined at the Regional (State) level," 45 FR 33413, the Multitrade permit has been remanded to the State for whatever proceedings it deems appropriate (consistent with 40 CFR part 124 and applicable State permitting procedures) in response to Multitrade's request for permit changes.

Dated: February 27, 1992.

Edwin B. Erickson,

Regional Administrator.

BILLING CODE 6560–50–M

[ER–FRL–4112–9]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared February 17, 1992 Through February 21, 1992 pursuant to the

Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 260–5076.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 05, 1991 (56 FR 14096).

Draft EISs

ERP No. D–AFS–L65159–OR Rating EC2, Canyon Integrated Resource Project, Resource Management Plan, Implementation, Siskiyou National Forest, Illinois Valley Ranger District, Josephine County, OR.

Summary: EPA expressed environmental concerns regarding the action alternatives potential impacts on water quality, fisheries, and air quality. Additional information is needed on water and air quality effects and monitoring.

ERP No. D–UAF–G11019–NM Rating LO, Cannon Air Force Base Realignment, F/EF–111 Basing, Implementation, Curry County, NM.

Summary: EPA has no objection to the proposed alternative. ERP No. DS–COE–D39022–WW Rating LO, Winfield Locks and Dam Project, Lock Replacement, Alignment Modifications and Land Purchase, Implementation, near Eleanor, Putman County, WV.

Summary: EPA recommends the SEIS provide additional information on: 1) Wetlands impacts and 2) details on the planting mitigation plan on monitoring and maintaining the area. EPA also recommended that wetland mitigation efforts be initiated as soon as possible to offset the existing wetlands loss to construction.

Final EISs

ERP No. F–AFS–L65155–00 Northern Spotted Owl Management Plan in the National Forests, Implementation, CA, OR, and WA.

Summary: EPA believes that the final EIS adequately responded to its concerns with respect to impacts to the spotted owl. Subsequent changes to proposed owl protection measures on adjacent lands will require additional NEPA analysis.

ERP No. F–APH–A82120–00 National Boll Weevil Cooperative Control Program, Implementation and Funding, AL, AZ, AR, CA, FL, GA, KS, LA, MS, MO, NM, NC, OK, SC, TN, TX, VA.

Summary: EPA continues to have environmental objections to the proposed project. These objections would be eliminated if the program would rely less on the use of pesticides to control the boll weevil and if additional mitigation measures would be developed. Several factual errors were identified.

ERP No. F–COE–E36169–FL Central and Southern Florida Flood Control Project, Restoration of the Upper Kissimmee River Basin through the Headwater Revitalization Project and the Lower Kissimmee River Basin through the Level II Backfilling Plan, Implementation, Glades, Osceola, Highlands, Polk, Okeechobee and Orange Counties, FL.

Summary: EPA expressed continued concerns with navigation and cultural resource impacts.

ERP No. F–FHW–G40128–AR Siloam Springs Highway Construction, US 71/US 412 Siloam Springs to Springdale, Funding, Section 404 Permit, Benton and Washington Counties, AR.

Summary: EPA has no objection to the selection of alternative D2.

Other

ERP No. LD–UAF–A100064–00 Rating LO, Strategic Arms Reduction Treaty (START), Agreement between the United States (US) and Union of Soviet Socialist Republics (USSR), Reduction and Limitation, Deployed Strategic Offensive Arms, Ratification/Nonratification.

Summary: EPA agrees with the Department of Defense's decision to pursue a tiered NEPA Act approach for site-specific, Strategic Arms Reduction Treaty implementation actions.

Dated: March 3, 1992.

[FRL–4110–2]

Reports on Male Rat Kidney Tumors

AGENCY: U.S. Environmental Protection Agency.

ACTION: Notice of Availability.

SUMMARY: This notice announces the availability of two reports through the Center for Environmental Research Information (CERI), U.S. Environmental Protection Agency (EPA). One report, "Alpha$_{2\mu}$-globulin: Association with Chemically Induced Renal Toxicity and Neoplasia in the Male Rat" (EPA/625/3–91/019F) was prepared by EPA's Risk Assessment Forum and provides Agency-wide guidance for evaluating renal tubule tumors and nephrotoxicity in the male rat. The second publication, "The Report of the EPA Peer Review Workshop on Alpha$_{2\mu}$-globulin: Association with Renal Toxicity and Neoplasia in the Male Rat" (EPA/625/3–91/021) describes major scientific issues discussed at the peer review meeting.

ADDRESSES: To obtain a single copy of either report, interested parties should contact the ORD Publications Office, CERI–FRN, U.S. Environmental Protection Agency, 26 West Martin Luther King Drive, Cincinnati, OH 45268, Telephone: (513) 569–7562 or FTS: 684–7562. Please provide your name and mailing address and request the document by the title and EPA number.

The reports will also be available for public inspection and copying in the Public Information Reference Unit of the EPA Headquarters Library, Waterside Mall, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: For further information on this **Federal Register** notice, contact Ms. Clare Stine, Technical Liaison, Risk Assessment Forum, U.S. Environmental Protection Agency (RD–689), 401 M Street SW., Washington, DC 20460, Telephone: (202) 260–6743 (FTS: 260–6743).

SUPPLEMENTARY INFORMATION: The Risk Assessment Forum report, "Alpha$_{2\mu}$-globulin: Association with Chemically Induced Renal Toxicity and Neoplasia in the Male Rat" (EPA/625/3–91/019F) provides Agency-wide guidance for evaluating renal tubule tumors in the male rat. According to the Forum report, risk assessment approaches generally assume that a chemical producing tumors in laboratory animals is a potential cancer hazard to humans. For most chemicals, including many rodent kidney carcinogens, this extrapolation remains appropriate. The report describes specific conditions, however, under which the Risk Assessment Forum advises EPA risk assessors against using information on certain renal tubule tumors or nephrotoxicity to assess human risk. In this situation, the chemical induces accumulation of the protein alpha$_{2\mu}$-globulin ($\alpha_{2\mu}$-g) in the proximal tubule of the male rat kidney, initiating a sequence of events, specific to the male rat, that appears to lead to renal tubule tumor formation. This EPA policy against use of a particular animal tumor under certain circumstances for risk assessment purposes is an important departure from EPA's general approach to cancer risk assessment.

The Forum report stresses the need for full scrutiny of a substantial set of data to determine when it is reasonable to presume that renal tumors in male rats are linked to a process involving $\alpha_{2\mu}$-g accumulation and to select appropriate procedures for estimating human risks under such circumstances. Details of the analysis can be found by referring to the Risk Assessment Forum report.

On November 13 and 14, 1990, EPA's Risk Assessment Forum assembled a peer review panel of scientifically qualified persons to discuss four major topics analyzed in a draft of the report, "Alpha$_{2\mu}$-globulin: Association with Chemically Induced Renal Toxicity and Neoplasia in the Male Rat." These subjects included $\alpha_{2\mu}$-g and nephrotoxicity, renal cancer, criteria for distinguishing renal carcinogens that induce $\alpha_{2\mu}$-g accumulation from other renal carcinogens, and risk characterization. The workshop report, entitled "The Report of the EPA Peer Review Workshop on "Alpha$_{2\mu}$-globulin: Association with Renal Toxicity and Neoplasia in the Male Rat" (EPA/625/3–91/021), highlights major scientific issues discussed at the meeting and the recommendations made to EPA by the peer reviewers. The workshop report includes EPA's premeeting statement of issues, a summary by the workshop chair, remarks by opening session speakers, reports by each of the four subcommittees, and a list of participants at the meeting.

Dated: January 17, 1992.

Erich W. Bretthauer,

Assistant Administrator for Research and Development.

National Council of Senior Citizens; Access to Trade Secret Information

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has authorized the National Council of Senior Citizens (grantees under the Senior Environmental Employment Program) for access to information submitted to EPA pursuant to sections 303, 311, 312, 313, and 322 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA), also known as Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA). Some of the information may be claimed or determined to be trade secret information.

DATES: Access to the trade secret information submitted to EPA will occur no sooner than March 16, 1992.

FOR FURTHER INFORMATION CONTACT: Steven D. Newburg-Rinn, Chief, Public Data Branch, Information Management Division, Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. NE-G008, Mail Stop TS–793, 401 M St., SW., Washington DC 20460, Telephone: 202–260–3757.

SUPPLEMENTARY INFORMATION: Under section 322 of EPCRA, facilities may assert trade secrecy claims regarding the chemical identities reported in their section 303, 311, 312, and 313 submittals to EPA. Under grant number CQ–819705, the National Council of Senior Citizens (NCSC), 1331 F St., NW., Washington, DC, 20004, as an enrollee in the Senior Environmental Program, will assist EPA in enforcement of EPCRA, including conducting inspections of facilities on behalf of EPA for purposes of determining compliance with EPCRA. EPA has determined that in order to successfully carry out their duties under the grant, NCSC may be required to review or receive information on behalf of EPA that is claimed or determined to be trade secret. Therefore, EPA has determined that NCSC requires access to trade secret information under EPCRA. NCSC employees will sign nondisclosure agreements and follow all required security procedures.

EPA is issuing this notice to inform all submitters of trade secret information under the aforementioned EPCRA sections that EPA will provide NCSC employees access to trade secret information on a need-to-know basis. Access to EPCRA trade secret information may take place at facility sites, EPA Regions or headquarters

offices, or the EPCRA Reporting Center. Upon termination of their grant, or prior to termination of their grant at EPA's request, NCSC will return all material to EPA.

Clearance to access to EPCRA trade secret information under this grant is scheduled to expire February 11, 1995.

Dated: February 27, 1992.

George A. Bonina,

Acting Director, Information Management Division, Office of Pollution Prevention and Toxics.

DATES: Access to the trade secret information submitted to EPA will occur no sooner than March 16, 1992.

FOR FURTHER INFORMATION CONTACT: Steven D. Newburg-Rinn, Chief, Public Data Branch, Information Management Division, Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. NE-G008, Mail Stop TS-793, 401 M St., SW., Washington, DC 20460, Telephone: 202-260-3757.

SUPPLEMENTARY INFORMATION: Under EPCRA, industry must report information on the presence, use, production, and manufacture of certain chemicals to EPA. Under section 322 of EPCRA, facilities must send trade secrecy claims regarding their section 303, 311, 312, and 313 submittals to EPA.

Under contract number 68-D0-0020, International Technology Environmental Programs (ITEP), 1133 21st St., NW., Suite 401, Washington, DC 20036, as subcontractor to ABT Associates, Inc., 4800 Montgomery Lane, suite 500, Bethesda, Md 20814, assists the Office of Pollution Prevention and Toxics in processing the information submitted by industry in response to the requirements of sections 303, 311, 312, 313, and 322 of EPCRA. ITEP staff conduct reviews of EPCRA submissions at the EPCRA Reporting Center where submissions are received and processed. ITEP reviews selected submissions for technical accuracy and contacts submitters regarding potential discrepancies.

ITEP performed these same duties in the past under a different contract number, 68-D8-0112. EPA announced clearance for access to EPCRA trade secret information by ITEP under this prior contract in a notice published in the **Federal Register** of September 23, 1991 (56 FR 47960).

EPA has determined that ITEP, as subcontractor to ABT Associates, Inc., requires continued access to EPCRA trade secret information while performing the same duties under the new contract number 68-D0-0020. ITEP personnel will continue to sign nondisclosure agreements and follow all required security procedures.

EPA is issuing this notice to inform all submitters of trade secret information under the aforementioned EPCRA sections that EPA will continue to provide ITEP personnel access to trade secret information on a need-to-know basis. All access to EPCRA trade secret information will take place at the EPCRA Reporting Center. Upon termination of their contract, or prior to termination of their contract at EPA's request, ITEP will return all material to EPA.

Clearance for access to EPCRA trade secret information by ITEP under contract number 68-D0-0020 is expected to expire on September 30, 1992. Clearance for access under this notice will be extended for so long as ITEP continues to perform the duties described above pursuant to any contract renewal or other existing contract.

Dated: February 27, 1992.

George A. Bonina,

Acting Director, Information Management Division, Office of Pollution Prevention and Toxics.

BILLING CODE 6712-01-M

Applications for Consolidated Proceeding

1. The Commission has before it the following mutually exclusive applications for a new FM station:

Applicant	City/State	File No.	MM Docket No.
A. Southwest Allen County Schools	Lafayette Township, Indiana	BPED-900215MC	92-27
B. Faith Christian Academy	Berne, Indiana	BPED-901203MN	

Issue heading	Applicants
1. Environmental	B
2. 307(b)—Noncommercial, educational.	Both
3. Contingent Comparative—Noncommercial, Educational FM.	Both
4. Ultimate	Both

2. Pursuant to section 309(e) of the Communications Act of 1934, as amended, the above applications have been designated for hearing in a consolidated proceeding upon the issues whose headings are set forth below. The text of each of these issues has been standardized and is set forth in its entirety under the corresponding headings at 51 FR 19347, May 29, 1986. The letter shown before each applicant's name, above, is used below to signify whether the issue in question applies to that particular applicant.

3. If there is any non-standardized issue(s) in this proceeding, the full text of the issue and the applicant(s) to which it applies are set forth in an Appendix to this Notice. A copy of the complete HDO in this proceeding is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text may also be purchased from the Commission's duplicating contractor, Downtown Copy Center, 1114 21st Street, NW., Washington, DC 20036 (Telephone No. (202) 452-1422).

W. Jan Gay,

Assistant Chief, Audio Services Division, Mass Media Bureau.

FEDERAL DEPOSIT INSURANCE CORPORATION

Information Collection Submitted to OMB for Review

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of information collection submitted to OMB for review and approval under the Paperwork Reduction Act of 1980.

SUMMARY: In accordance with requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the FDIC hereby gives notice that it has submitted to the Office of Management and Budget a request for OMB review of the information collection system described below.

Type of Review: Revision of a currently approved collection.

Title: Criminal Referral Reporting.

Form Number: FDIC 6710/08, FDIC 6710/08A.

OMB Number: 3064-0077.

Expiration Date of OMB Clearance: April 30, 1994.

Respondents: Insured state nonmember banks wishing to report apparent internal crimes and violations affecting the banks' assets and affairs.

Frequency of Response: On occasion.

Number of Respondents: 6,500.

Number of Responses Per Respondent: 1.

Total Annual Responses: 6,500.

Average Number of Hours Per Response: 0.6.

Total Annual Burden Hours: 3,900.

OMB Reviewer: Gary Waxman, (202) 395-7340, Office of Management and Budget, Paperwork Reduction Project 3064-0017, Washington, DC 20503.

FDIC Contact: Steven F. Hanft, (202) 898-3907, Office of the Executive Secretary, room F-400, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.

Comments: Comments on this collection of information are welcome and should be submitted before January 15, 1992.

ADDRESSES: A copy of the submission may be obtained by calling or writing the FDIC contact listed above. Comments regarding the submission should be addressed to both the OMB reviewer and the FDIC contact listed above.

SUPPLEMENTARY INFORMATION: Insured state nonmember banks must report apparent internal crimes and violations affecting their assets and affairs to the appropriate investigatory and prosecuting authorities, as well as to the FDIC. This submission to the OMB seeks to streamline the reporting requirements.

Dated: March 2, 1992.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714-01-M

FEDERAL MARITIME COMMISSION

Items Submitted for OMB Review

The Federal Maritime Commission hereby gives notice that the following items have been submitted to the Office of Management and Budget (OMB) for review pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3601, *et seq.*), as amended. Requests for information, including copies of the collection of information and supporting documentation, may be obtained from Norman W. Littlejohn, Director, Bureau of Administration, Federal Maritime Commission, 1100 L Street, NW., room 12211, Washington, DC 20573, telephone

number (202) 523–5866. Comments may be submitted to the agency and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, attention: Desk Officer for the Federal Maritime Commission, within 15 days after the date of the **Federal Register** in which this notice appears.

Summary of Items Submitted for OMB Review, 46 CFR Part 540 and Related Application Form FMC–131

FMC requests an extension of clearance for 46 CFR part 540 which implements sections 2 and 3 of Public Law 89–777 (46 U.S.C. 817 (d) and (e) and related application Form FMC–131. Public Law 89–777 requires vessel owners, charterers, and operators of American and foreign passenger vessels having 50 or more berth or stateroom accommodations and embarking passengers at United States ports, to establish their financial responsibility to meet liability incurred for death or injury and to indemnify passengers in the event of nonperformance of a voyage or cruise. The Commission estimates an annual respondent universe of 60 cruise line operators who possess Certificates (Performance and Casualty) for 125 vessels. Total estimated respondent burden is 868 manhours: 580 manhours for complying with the regulation and 288 manhours for completion of the form. Total cost to the Federal Government is estimated at $88,000; total cost to respondents is estimated at $41,300.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

Port of New York and New Jersey/ Ecuadorian Line et al., Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–003158–008.

Title: Port of New York and New Jersey/ Ecuadorian Line Terminal Agreement.

Parties: The Port Authority of New York and New Jersey Ecuadorian Line, Inc.

Synopsis: The proposed amendment would extend the term of the Agreement until the effectiveness of a new Supplement 8 to the Agreement or until April 30, 1992, whichever is earlier.

Agreement No.: 224–004177–007.

Title: Port of Seattle/Stevedoring Services of America Lease Agreement.

Parties: Port of Seattle Stevedoring Services of America ("SSA").

Synopsis: This Agreement, filed February 27, 1992, documents the relocation of Hyundai Merchant Marine, Inc. from terminal 42 to Terminal 18 at the Port of Seattle pursuant to termination of the Terminal 42 lease with SSA. The basic lease on Terminal 18 is amended to designate a portion of the Terminal 18 premises for Hyundai operations, although SSA continues to lease the entire terminal. SSA's rental billing will now reflect a reduced acreage billing and the addition of per container billing for the Hyundai-related portion of the lease.

Agreement No.: 224–200624.

Title: Tampa Port Authority/Starlite Cruises Terminal Agreement.

Parties: Tampa Port Authority Starlite Cruises, Inc. ("Starlite").

Synopsis: The proposed Agreement would grant Starlite non-exclusive, preferential use of a passenger terminal facility in Tampa, Florida.

Agreement No.: 224–200625.

Title: L.A. Cruise Ship Terminals/ Norwegian Cruise Line Customer Agreement.

Parties: L.A. Cruise Ship Terminals, Inc. ("L.A. Cruise") Norwegian Cruise Line.

Synopsis: The proposed Agreement would permit Norwegian Cruise Line to utilize terminal facilities and services provided by L.A. Cruise in the Port of Los Angeles.

Agreement No.: 224–200627.

Title: L.A. Cruise Ship Terminals, Inc./Royal Caribbean Cruises, Ltd. Terminal Use Agreement.

Parties: L.A. Cruise Ship Terminals, Inc. ("LACST") Royal Caribbean Cruises, Ltd. ("RCC").

Synopsis: This Agreement, filed February 27, 1992, provides that LACST will furnish various facilities and services to RCC for and with respect to passenger vessels owned and operated by RCC. The facilities being furnished are located in Los Angeles Harbor (as described in Permit Nos. 506 and 684.

Dated: March 3, 1992.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

FEDERAL TRADE COMMISSION

Request for Comment on Proposed Cooperative Program for Federal-State Cooperation in Merger Enforcement

AGENCY: Federal Trade Commission.

ACTION: Notice, with request for public comment, of proposed program for federal-state cooperation in merger enforcement.

DATES: Comments will be received until April 6, 1992.

ADDRESSES: Comments should be addressed to the Secretary, Federal Trade Commisson, 6th & Pennsylvania Avenue, NW., Washington, DC 20580. Comments will be entered on the public record of the Commission and will be available for public inspection in room 130 during the hours of 9 a.m. until 5 p.m.

FOR FURTHER INFORMATION CONTACT: Geoffrey M. Green, Assistant to the Director, Bureau of Competition, (202) 326–2641.

SUPPLEMENTARY INFORMATION: The Commission is considering a proposed program for federal-state cooperation in merger enforcement. The proposed program is designed to complement the National Association of Attorneys General Voluntary Pre-Merger Disclosure Compact ("Compact"). The Compact applies when a proposed merger, acquisition or other transaction is subject to the reporting requirements under section 7A of the Clayton Act, 15 U.S.C. 18a, as added by title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976 ("HSR Act"). The HSR Act requires that the parties to most significant acquisitions of voting securities or assets notify the Commission (and the Department of Justice) in advance, and delay consummation of the transaction until certain waiting periods specified in the Act have elapsed.

Under the Compact, participating states agree that they will not serve compulsory demands for information during the HSR waiting period and prior to instituting a judicial proceeding to enjoin a proposed transaction, if the parties to the proposed transaction ("submitters") provide the "liaison state" (as defined in the Compact) with information specified by the Compact. This information includes (1) a copy of the submitter's HSR filing; (2) a copy of any second requests for additional information issued by Federal antitrust enforcement authorities pursuant to section 7A(e)(1) of the HSR Act, 15 U.S.C. 18a(e)(1), or other information requests directed to submitters by such authorities; and (3) on request by a participating state, materials provided by submitters in response to such Federal information requests.

The proposal under consideration by the Commission contemplates that the Commission would provide certain additional types of information to interested states. States that participate in the Compact and that wish to participate in the proposed program would be required to submit a certification of confidentiality to the General Counsel of the Commission ("General Counsel").

The program would apply in a particular matter only if a submitter (1) provides a copy of its HSR filing to the liaison state under the Compact and (2) provides a letter to the Commission waiving confidentiality protections under Federal law insofar as those protections constrain disclosures by the Commission to members of the Compact. If waiver letters are received from submitters, the Commission would thereafter respond to requests for assistance from the participating liaison state. Specifically, Commission staff would provide the liaison state with the following information:

(a) Staff would provide copies of second requests, and copies of third party subpoenas with the identities of the subpoena recipients redacted. (If redaction of identities is insufficient to protect confidential information bout subpoena recipients, individual specifications might be deleted or entire subpoenas might be withheld.)

(b) Staff would identify the expiration dates of HSR waiting periods.

(c) Staff would provide limited assistance in analyzing the merger. However, staff would not disclose specific recommendations made to agency decisionmakers and would limit disclosures as necessary to protect confidential information, including information supplied by third parties.

Under the proposed program, the Commission would not provide states with documents submitted by merging parties under the HSR Act. The HSR submitters themselves, at their own discretion, would provide that information to the states.

The proposed program also contains safeguards to protect the confidentiality of the limited information that the Commission would itself provide to states. First, a state that obtains information under this program would be able to share such information only with other states that have completed a confidentiality certification.

Second, a participating state would be required to advise the Commission's General Counsel if it receives a discovery request or public access request for information obtained under the cooperative program. The state would be required to assert vigorously any privilege or exemption claimed by the General Counsel, or to assist the General Counsel in intervening in a proceeding to assert the exemption or privilege.

(Authority: 15 U.S.C. 46)

By direction of the Commission.

Donald S. Clark,

Secretary.

[FR Doc. 92–5273 Filed 3–5–92; 8:45 am]

BILLING CODE 6750–01–M

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notifications Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register**.

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney

General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period.

BILLING CODE 6750–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Request for Nominations for Members on Public Advisory Committees; Food Advisory Committee

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is requesting nominations for 20 voting members to serve on the Food Advisory Committee (the committee) in FDA's Center for Food Safety and Applied Nutrition. The agency is also requesting nominations for four nonvoting representatives of industry interests. Elsewhere in this issue of the **Federal Register**, FDA is publishing a final rule announcing the establishment of this committee.

DATES: Nominations should be received by April 6, 1992.

ADDRESSES: All nominations for membership, except for consumer-nominated members, should be sent to Patricia Thompson (address below). All nominations for the consumer-nominated members should be sent to Phyllis Weller (address below).

FOR FURTHER INFORMATION CONTACT: *Regarding all nominations for membership, except for consumer-nominated members:* Patricia Thompson, Center for Food Safety and Applied Nutrition (HFF–29), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–245–1564.

Regarding all nominations for consumer-nominated members: Phyllis Weller, Office of Consumer Affairs (HFE–20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–5006.

SUPPLEMENTARY INFORMATION: FDA is requesting nominations for 24 members to serve on the committee. The function of the committee is to provide advice primarily to the Director, Center for Food Safety and Applied Nutrition, and as needed, to the Commissioner of Food and Drugs and other appropriate officials, on emerging food safety, food science, and nutrition issues that FDA considers of primary importance in the next decade. The committee will also provide advice and make recommendations on ways of communicating to the public the potential risks associated with these issues and recommend approaches to be considered in addressing them.

Persons nominated for membership shall be knowledgeable in the fields of life sciences, food science, risk assessment, and other relevant scientific disciplines. The committee may include technically qualified members who are identified with consumer interests and are recommended by either a consortium of consumer-oriented organizations or other interested persons. Representatives of industry interests will serve as nonvoting liaisons. The term of office is 4 years, except that initial appointments will be staggered to permit an orderly rotation of membership.

Interested persons may nominate one or more qualified persons for membership on the committee. Nominations shall state that the nominee is willing to serve as a member of the committee and appears to have no conflict of interest that would preclude committee membership. Potential candidates will be asked by FDA to provide detailed information concerning such matters as financial holdings, consultancies, and research grants or contracts to permit evaluation of possible sources of conflict of interest.

Selection of representatives of consumer interests will be conducted through procedures that include use of a consortium of consumer organizations which has the responsibility for screening, interviewing, and recommending candidates for the agency's selection. Candidates, like all other candidates for membership on the committee, should possess appropriate qualifications to understand and contribute to the committee's work.

Regarding nominations for nonvoting members representing industry interests, a letter will be sent to each person who has made a nomination and to those organizations that have expressed an interest in participating in the selection process, together with a complete list of all such organizations and the nominees. The letter will state that it is the responsibility of each nominator or organization that has expressed an interest in participating in the selection process to consult with the others in selecting members representing industry interests within 60 days after receipt of the letter. If no individuals are selected within 60 days, the agency will select the nonvoting members representing industry interests.

FDA has special interest in assuring that women, minority groups, and the physically handicapped are adequately represented on advisory committees and therefore extends particular encouragement to nominations for appropriately qualified female, minority, or physically handicapped candidates.

This notice is issued under the Federal Advisory Committee Act (5 U.S.C. app. 2) and 21 CFR part 14, relating to advisory committees.

Dated: March 2, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

[FR Doc. 92–5223 Filed 3–5–92; 8:45 am]

BILLING CODE 4160–01–M

[Docket No. 92P–0038]

Cottage Cheese Deviating From Identity Standard; Temporary Permit for Market Testing

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a temporary permit has been issued to Alta-Dena Certified Dairy, to market test a product designated as "nonfat cottage cheese" that deviates from the U.S. standards of identity for cottage cheese (21 CFR 133.128), dry curd cottage cheese (21 CFR 133.129), and lowfat cottage cheese (21 CFR 133.131). The purpose of the temporary permit is to allow the applicant to measure consumer acceptance of the product, identify mass production problems, and assess commercial feasibility.

DATES: This permit is effective for 15 months, beginning on the date the food is introduced or caused to be introduced into interstate commerce, but not later than June 4, 1992.

FOR FURTHER INFORMATION CONTACT: Michelle A. Smith, Center for Food Safety and Applied Nutrition (HFF–414), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–485–0106.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 130.17 concerning temporary permits to facilitate market testing of foods deviating from the requirements of the standards of identity promulgated under section 401 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 341), FDA is giving notice that a temporary permit has been issued to Alta-Dena Certified Dairy, 17637 E. Valley Blvd., P.O. Box 388, City of Industry, CA 91744.

The permit covers limited interstate marketing tests of a nonfat cottage cheese, formulated from dry curd cottage cheese and a dressing. The test product deviates from the U.S. standards of identity for cottage cheese (21 CFR 133.128) and lowfat cottage cheese (21 CFR 133.131) in that the product contains less than 0.5 gram total fat per serving, and the milkfat content of the test product is 0.44 percent, compared to not less than 4 percent milkfat in cottage cheese and 0.5 to 2.0 percent in lowfat cottage cheese. The test product also deviated from the U.S. standard of identity for dry curd cottage cheese (21 CFR 133.129) because of the added dressing. The product meets all requirements of the standards with the exception of these deviations. The purpose of this variation is to offer the consumer a product that is nutritionally equivalent to cottage cheese products with dressing but contains less fat.

For the purpose of this permit, the name of the product is "nonfat cottage cheese." The information panel of the label will bear nutrition labeling in accordance with 21 CFR 101.9.

The permit provides for the temporary marketing of a total 436,000 kilograms (960,000 pounds) of the test product. The product will be manufactured at Alta-Dena Certified Dairy, 17637 East Valley Blvd., City of Industry, CA 91747, Plant No. 06–2238, and distributed nationally.

Each of the ingredients used in the food must be declared on the label as required by the applicable sections of 21 CFR part 101. This permit is effective for 15 months, beginning on the date the food is introduced or caused to be introduced into interstate commerce, but not later than June 4, 1992.

Dated: February 25, 1992.

Fred R. Shank,

Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160–01–M

Health Resources and Services Administration

Rural Health Research Centers

AGENCY: Health Resources and Services Administration (HRSA), HHS.

ACTION: Notice of availability of funds.

SUMMARY: The Office of Rural Health Policy (ORHP), Health Resources and Services Administration, announces that applications are being accepted for a program of grants to develop and operate Rural Health Research Centers. This program is authorized by section 301, title III, of the Public Health Service Act. These centers will conduct policy relevant research on rural health issues of multi-state and national significance, and disseminate the findings of their research.

Awards will be made from funds appropriated under Public Law 102–170 (HHS Appropriations Act for FY 1992). It is anticipated that approximately $2.1 million will be available to support new and competing continuation awards in this grant program in FY 1992.

DATES: To receive consideration, applications must be received by the close of business, on May 15, 1992 by the Grants Management Officer at the address below.

Applications shall be considered as meeting the deadline if they are either (1) received on or before the deadline date; or (2) postmarked on or before the deadline date and received in time for submission to the review committee. A legibly dated receipt from a commercial carrier or U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks will not be acceptable as proof of timely mailing. Applications not meeting the deadline will be returned to the applicant.

ADDRESSES: Requests for grant application packages should be addressed to: Grants Management Office, Bureau of Health Care Delivery and Assistance, HRSA, 12100 Parklawn Drive, Rockville, Maryland 20857, (301) 443–5414.

FOR FURTHER INFORMATION: For information on program aspects, contact: Patricia Taylor, Ph.D., Office of

Rural Health Policy, HRSA, 5600 Fishers Lane, room 14–22, Rockville, MD 20857, (301) 443–0835.

For information on grants and business management aspects, contact: Grants Management Office, Bureau of Health Care Delivery and Assistance, HRSA, 12100 Parklawn Drive, Rockville, Maryland 20857, (301) 443–5414.

The Standard application form and general instructions for completing applications, Form PHS 398 Public Health Service Grant have been approved by the Office of Management and Budget (OMB No. 0925–0001). The narrative description of the project may not exceed 30 pages in length.

SUPPLEMENTARY INFORMATION:

Program Objectives

The purpose of this grant program is to enable institutions to plan and establish new research centers, and to operate existing and new research centers to conduct policy relevant research on rural health. Awards will be made for approximately five to seven Rural Health Research Centers across the country for project periods not to exceed 4 years. Within the limits of these resources, these centers will: (1) Conduct policy relevant rural health research and (2) Disseminate their research findings to the rural health policy audience.

Eligible Applicants

All public and private entities, both non-profit and for-profit, are eligible to apply.

Background

The objective of the Rural Health Research Centers grant program is to increase the amount of high quality, policy relevant rural health research being conducted in the nation. It is intended that the research and dissemination activities of these centers will inform policy to improve the availability, affordability and accessibility of health care services for rural residents.

The centers must be responsive to the diverse information needs of rural health policy makers in their multi-state regions and at the national level. Individual projects may include but are not limited to collection and analysis of new data, secondary analysis of existing data, comparative case studies, and evaluation of demonstration projects.

Grant projects should focus on at least one and preferably two areas of rural health and health services research. Examples of focus areas include:

Rural Health Professions Supply

—Financing
—Training
—Recruitment
—Retention
—Effective use of mid-level health care practitioners

Rural Health Care Financing

—Rural considerations in health insurance reform
—Rural impact of Medicare and Medicaid payment policies

Appropriateness and Effectiveness of Rural Health Care Services and Procedures

—Quality of care
—Relationship of service volume to patient outcome
—Impact of health networks on access and quality of care
—Integration of mental health services with rural primary health care services

Rural Systems Building

—Alternative models for delivering health services
—Health service networks
—Consortia/cooperative

Meeting the Needs of Special Populations

—Poverty populations
—Racial and cultural groups
—Age groups (e.g., adolescents
—Occupational groups (e.g., farm families)

The Public Health Service urges applicants to submit work plans that address specific objectives of "Healthy People 2000." Potential applicants may obtain a copy of "Health People 2000" (Full Report; Stock No. 017–001–00474–0) or "Healthy People 2000" (Summary Report; Stock No. 017–001–00473–1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402–9325 (telephone 202–783–3238).

Center Structure and Mechanism of Support

The ORHP funds are intended to provide basic support for each center. Through the center award, the recipient is reimbursed for such expenses as center administration, development and implementation of the center's research agenda, administrative and research staff support, researcher time (although not necessarily 100% of researcher time), and dissemination mechanisms such as center-sponsored bulletins, in-house publications, and journal articles targeted at the rural health policy audience.

The principal investigator must be an experienced rural health services researcher who can provide administrative and research leadership. The principal investigator will be responsible for the organization and operation of the center, and will provide leadership in the development and realization of the center's research agenda. Personnel and institutional resources capable of developing and maintaining a substantial commitment to rural health services research must be available. At a minimum, the center should consist of core staff with significant time commitments to the center and affiliate staff with lesser time commitments. The center's research team should include multiple disciplines, possess a wide range of skills and have experience in rural health research. Each center is generally expected to share common resources with other components of the applicant institution, including technical, clerical and administrative personnel, and library and computer resources.

Review Procedure

Applications will be assessed by ORHP for responsiveness to this notice. Any applications judged nonresponsive because they are incomplete, inadequately developed, in an improper format, exceed the specified page limit, or otherwise unsuitable for peer review and funding consideration, will be returned without further consideration. All responsive applications will undergo objective review for scientific merit.

Review Criteria

Grant applications will be evaluated on the basis of the following criteria:

• The qualifications and achievements, including level of productivity and quality of research on general health services and rural health, and administrative experience of the principal investigator;

• The qualifications and achievements, including level of productivity and quality of research on general health services, rural health, and the proposed research focus area(s), of the proposed center's senior researchers;

• The appropriateness of the time commitments or the principal investigator and the proposed center's senior researchers;

• The degree to which the center's proposed research agenda, products, and dissemination activities reflect a realistic and well-conceived program in view of available skills, funding resources and health care issues pertinent to rural populations;

• The relevance of the proposed research agenda to rural health policy issues of multi-state and national concern, and the appropriateness of the planned products and dissemination activities for informing the rural health policy audience;

• The likely effectiveness of the organizational arrangements to operate the proposed center, including the extent to which the applicant has a well-developed plan for quality control of all stages of research projects and a well-developed plan to assure continuing interaction and participation among the center's researchers;

• The appropriateness of the proposed budget;

• The actual and planned level of commitment of the applicant institution to the proposed center, including its specific plans to support the organizational and management structure of the center;

• The past success and future potential of the center's staff in receiving research and organizational funding support from sources other than the core ORHP grant;

• The strength of the relationship(s) of the proposed center with health care providers, relevant departments of state government(s), and other health policy makers in its state and multi-state region.

For Centers Filing a Competing Continuation Application Only

• The level of research productivity and quality demonstrated in the center's record of performance achieved with its ORHP center grant.

Other Information

Applicants may request up to $300,000 per year in total costs (direct plus interest) for the project period which is not to exceed 4 years.

Applicants preparing budget requests for the establishment and operation of new rural health research centers are reminded that the reasonableness of proposed budgets is among the criteria to be used in the review of applications. An applicant for a new rural health research center should seriously consider whether the scope of the proposal calls for the full $300,000 funding amount during the start-up phase of the center. For example, such applicants may need time to fully develop an organizational structure, and design and implement major research projects.

In awarding grants, ORHP will include geographic distribution of centers and diversity of program emphases (e.g., minority health) in its considerations.

Executive Order 12372

The Rural Health Research Centers Grant Program has been determined to be a program which is not subject to the provisions of Executive Order 12372 concerning intergovernmental review of Federal programs.

The OMB Catalog of Federal Domestic Assistance number is 93.155.

Dated: January 7, 1992

Robert G. Harmon,

Administrator.

BILLING CODE 4160–15–M

National Institutes of Health

Establishment; President's Cancer Panel Special Commission on Breast Cancer

Pursuant to the Federal Advisory Committee Act of October 6, 1972, (Pub. L. 92–463, 86 Stat. 770–776), and section 413(b)(7) of the Public Health Service Act, as amended (42 U.S. Code 285a–2(b)(7)), the National Institutes of Health, announces the establishment by the Director, National Cancer Institute, of the President's Cancer Panel Special Commission on Breast Cancer.

The President's Cancer Panel Special Commission on Breast Cancer shall assist and advise the Vice President of the United States, the Director, National Cancer Institute, and the Chair of the President's Cancer Panel on the state of breast cancer research, detection and treatment in the United States and around the world and make recommendations for improvements.

Unless renewed by appropriate action, the President's Cancer Panel Special Commission on Breast Cancer shall terminate two years from the date the charter was approved.

Dated: March 2, 1992.

BILLING CODE 4140–01–M

Social Security Administration

[Social Security Ruling SSR 92–1p]

Request Under the Privacy Act or the Freedom of Information Act for Access to Records and for Disclosure of Material Maintained by the Office of Hearings and Appeals

AGENCY: Social Security Administration, HHS.

ACTION: Notice to Social Security Ruling.

SUMMARY: In accordance with 20 CFR 422.406(b)(1), the Commissioner of Social Security gives notice of Social Security Ruling 92–1p. This Ruling explains the policy which the Social Security Administration applies in deciding what materials it will release and withhold when, pursuant to the Privacy Act and/or Freedom of Information Act, claimants or their authorized representatives request information or records that may be contained within working files maintained by the Social Security Administration's Hearing Offices and the Appeals Council.

EFFECTIVE DATE: March 6, 1992.

FOR FURTHER INFORMATION CONTACT: Joanne K. Castello, Office of Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, MD 21235, (410) 965–1711.

SUPPLEMENTARY INFORMATION: Although not required to do so pursuant to 5 U.S.C. 552(a)(1) and (a)(2), we are publishing this Social Security Ruling in accordance with 20 CFR 422.406(b)(1).

Social Security Rulings make available to the public precedential decisions relating to the Federal old-age, survivors, disability, supplemental security income, and black lung benefits programs. Social Security Rulings may be based on case decisions made at all administrative levels of adjudication, Federal court decisions, Commissioner's decisions, opinions of the Office of the General Counsel, and other policy interpretations of the law and regulations.

Although Social Security Rulings do not have the force and effect of law or regulations, they are binding on all components of the Social Security Administration, in accordance with 20 CFR 422.406(b)(1).

If this Social Security Ruling is later superseded, modified, or rescinded, we will publish a notice in the **Federal Register** to that effect.

(Catalog of Federal Domestic Assistance Programs Nos. 93.802 Social Security—Disability Insurance; 93.803 Social Security—Retirement Insurance; 93.805 Social Security—Survivor's Insurance; 93.806 Special Benefits for Disabled Coal Miners; 93.807 Supplemental Security Income.)

Dated: February 19, 1992.

Gwendolyn S. King

Commissioner of Social Security.

Policy Interpretation Ruling—Request Under the Privacy Act or the Freedom of Information Act for Access to Records and for Disclosure of Material Maintained by the Office of Hearings and Appeals

Purpose: To explain the policy which the Social Security Administration (SSA) applies in deciding what

materials it will release and withhold, when, pursuant to the Privacy Act (PA) and/or Freedom of Information Act (FOIA), claimants or their authorized representatives request information or records that may be contained within working files maintained by SSA's Hearing Offices and the Appeals Council (AC).

It is SSA's policy to withhold documents or portions of documents when the materials requested have been compiled in reasonable anticipation of a civil action or proceeding and also are exempt from mandatory disclosure under the FOIA. Under this policy, documents, or portions of documents contained in the working files mentioned above that relate to routine trivial matters, such as routing slips and cover notes, or that are inter-agency or intra-agency memoranda or communications which would not be routinely discoverable in civil litigation, will be withheld when they are requested under the PA and/or the FOIA.

Citations (Authority): Section 1106(a) of the Social Security Act; 5 U.S.C. 552 (a)(3), (b)(2), and (b)(5); 5 U.S.C. 552a (d)(1), (d)(5), (t)(1) and (t)(2); Regulations No. 1, Part 401, Subpart D; Regulations No. 4, section 404.1710, Regulations No. 16, section 416.1510, Regulations No. 22, section 422.416.

Introduction: Claimants or their authorized representatives sometimes seek access to documents prepared in connection with proceedings before an Administrative Law Judge (ALJ), or actions which the AC takes on review of an ALJ decision following the ALJ's disposition of a claim.

Under titles II and XVI of the Social Security Act, a party who has received a partly or wholly unfavorable determination on a claim for benefits has a right to a hearing before an ALJ. The ALJ's decision becomes the final decision of the Secretary unless the AC reviews the matter upon request of a party or on its own motion. Decisions issued by the AC are the final decisions of the Secretary.

Evidentiary documents and information relevant and material to the issues presented in a claim for benefits are made part of the record upon which the ALJ bases a decision. During the course of adjudicating a claim at the hearing level, however, an ALJ may make notes regarding the evidence, testimony, or other factors involved in the case. In addition, the ALJ and staff assigned to assist in case processing may exchange communications expressing opinions and advice regarding the evidence, the merits of the case, and other matters involving the issues presented by the claim. Also, the ALJ usually issues instructions to the staff attorney and other personnel who draft decisions and make corrections or amendments to the drafts prior to issuance.

During an AC review of an ALJ decision, the Administrative Appeals Judges, assisted by its staff, review the decision to verify compliance with the procedural and substantive requirements of the law and regulations, and the accuracy of the ALJ's ultimate findings and conclusions. Communications between Administrative Appeals Judges and staff are common and include instructions, advice and opinions on disposing of the matters at issue.

Communications between both the ALJs and staff and the Administrative Appeals Judges and staff are often reduced to writing and may be maintained in the following Privacy Act systems of records: The Claims Folder System, Administrative Law Judge Working File on Claimant Cases, and Working File of the Appeals Council.

Writings commonly found in ALJ working files include ALJ notes taken during oral hearings, written instructions and opinions, memoranda and draft decisions or orders. AC working files may contain written instructions and opinions, memoranda, case analyses, physician opinions from the AC's Medical Support Staff (MSS), and draft decisions or orders. Both the ALJ working file and the AC working file may contain advisory opinions and other communications prepared by other components of SSA, attorneys in the Office of the General Counsel (OGC) of the Department of Health and Human Services, and attorneys in the Department of Justice.

The above-described writings reflect mental impressions, evaluations, opinions, recommendations, and legal theories, and are commonly known as ALJ or AC working papers. They are used by the ALJs and Administrative Appeals Judges and their staffs during the process of disposing of cases on administrative appeal.

Working papers are used by ALJs and the AC following final disposition of a case to reconstruct the thought processes which led to the final decision if the matter is returned on remand to the deciding official (by the AC in the case of an ALJ, or a court in the case of the AC). The working papers are not evidentiary materials and are not made part of the record upon which a decision is based.

Policy Interpretation: In the past, we usually furnished to claimants and their representatives upon request materials located within our records, including the claim file, ALJ working file and AC working file. We have found, however, that ALJ and AC working papers are increasingly sought for discovery purposes in potential or actual litigation involving review of the agency's decisions. In recent years, therefore, release of ALJ and AC working papers has become a significant issue in view of the potentially harmful consequences to the integrity of the agency's decision-making process and litigation activities. In view of these considerations, we have reconsidered and changed our practice on disclosure of such records.

Every decision to release or withhold working papers covered by this Ruling must comply with the requirements of the PA and the FOIA. The PA states that, subject to certain exemptions, an individual may, "* * * gain access to his record or to any information pertaining to him which is contained in * * * [a system of records and] review the record and have a copy made of all or any portion thereof in a form comprehensible to him * * *" 5 U.S.C. 552a(d)(1). In accordance with this requirement, SSA generally provides, and will continue to provide, information which individuals request about themselves. 20 CFR 401.400. We also generally provide such information to an individual's authorized representative. 20 CFR 404.1710 and 416.1510.

The FOIA states that "* * * each agency upon any request for records which (A) reasonably describes such records and (B) is made in accordance with published rules * * * shall make the records promptly available to any person." 5 U.S.C. 552(a)(3). Social Security regulations stipulate that the FOIA "* * * requires us to disclose any information in our records upon request from the public, unless one of several exemptions in the FOIA applies." 20 CFR 401.215. See also 20 CFR 422.416.

The PA and the FOIA must be considered together. An agency cannot rely on a FOIA exemption to withhold a document "which is otherwise accessible to [an] individual" under the PA, nor may it rely on a PA exemption to withhold records "otherwise accessible" under the FOIA. 5 U.S.C. 552a(t) (1) and (2). Thus, we may withhold only that material which is covered by both a PA exemption and a FOIA exemption.

PA Exemption (d)(5)

PA exemption (d)(5), which excludes access to "information compiled in reasonable anticipation of a civil action or proceeding," applies to the working papers described above. 5 U.S.C. 552a(d)(5). See 20 CFR 401.400(c).

Before a claim may be reviewed in Federal court under 42 U.S.C. 405(g), the claimant must exhaust all administrative remedies, including ALJ hearing and requesting AC review of the ALJ's decision. See 20 CFR 404.981 and 416.1481. Therefore, a claimant who does not receive a fully favorable decision at the hearing level must seek further review of the claim by the AC before the claim may be reviewed by a Federal court. Since claimants who are unsuccessful before the AC subsequently may appeal to the courts, working papers are maintained not only to address the issues raised at the particular adjudicative level, but also in anticipation that the case may be later appealed to the Federal courts and may be remanded for further administrative action.

The internal communications included within the working papers described above reflect this awareness of potential litigation and contain analyses, predecisional recommendations and strategies for effectively satisfying legal requirements. ALJs and Administrative Appeals Judges take into consideration the sensitivity of such cases and often include in their working papers opinions, recommendations, theories, and mental impressions to ensure an accurate, well reasoned rationale for the decision ultimately made on the matter at issue. In addition, material contained in the working papers is usually consulted in assessing the agency's options and defenses in civil actions challenging an ALJ or AC decision.

Courts have recognized that exemption (d)(5) is applicable to materials compiled in anticipation of quasi-judicial proceedings conducted in an administrative forum as well as materials compiled in anticipation of civil actions conducted in a court. *See Martin* v. *Office of Special Counsel, MSPB*, 819 F.2d 1181 (D.C. Cir. 1987); *Hernandez* v. *Alexander*, 671 F.2d 402 (10th Cir. 1982); *Smiertka* v. *United States Department of the Treasury, etc.*, 447 F. Supp. 221 (D.D.C. 1978). The Social Security regulations governing disclosure of official records and information also interpret the (d)(5) exemption to apply to administrative proceedings by exempting from disclosure "[r]ecords compiled in reasonable anticipation of a court action or formal administrative proceeding." 20 CFR 401.400(c).

Accordingly, exemption (d)(5) is applicable to ALJ and AC working papers maintained in reasonable anticipation of further administrative or court proceedings in the form of AC and Federal court review. If these materials are also exempt from disclosure under the FOIA, as discussed below, they will be withheld.

FOIA Exemptions (b)(2) and (b)(5)

PA exemptions cannot prevent release of information which would otherwise be accessible under the FOIA. The FOIA mandates that an agency provide information in its files upon request from any person, but the FOIA does exempt certain information from disclosure.

Exemption (b)(2) permits the withholding of records "related solely to the internal personnel rules and practices of an agency." 5 U.S.C. 552(b)(2). Routine administrative notes and memoranda, filing and routing instructions, and other trivial administrative materials are exempt from disclosure based on the rationale that the public would have no significant interest in them and the very process of releasing such materials would be an unwarranted administrative burden. Thus, routine administrative materials contained within ALJ and AC working papers are exempted from access by claimants and their representatives to the extent that the materials meet the requirements of PA exemption (d)(5) and FOIA exemption (b)(2).

FOIA exemption (b)(5) exempts from disclosure "inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency." 5 U.S.C. 552(b)(5). This exemption protects materials which would not be routinely discoverable in civil litigation. Portions of ALJ and AC working files containing such inter-agency or intra-agency communications are covered under this exemption.

With few exceptions, the materials in ALJ working files and AC working files contain inter-agency and intra-agency communications, such as instructions to staff, analyses, recommendations, draft decisions, and other matter exchanged during the deliberative stages of the decision-making process between deciding officials and their respective support, technical or professional staffs, and among staff members. These files may also contain communications with OGC and the Department of Justice. Thus, the working files contain materials which satisfy the description of "inter-agency or intra-agency memorandums or letters."

The (b)(5) exemption encompasses several traditional privileges commonly invoked to protect documents from discovery in litigation, including the deliberative process privilege, the attorney-client privilege and the work product privilege. It is well established that predecisional communications between Federal employees or officials that are part of the deliberative process leading to governmental decisions are protected under the deliberative process privilege. See, *e.g., N.L.R.B.* v. *Sears, Roebuck & Co.*, 421 U.S. 132 (1975); *Russell* v. *Department of the Air Force*, 682 F.2d 1045 (D.C. Cir. 1982). Documents are covered by the privilege to the extent that they contain advisory opinions, recommendations, deliberations, evaluations, drafts, and similar predecisional exchanges between government employees and officials engaged in the decision-making process. This privilege is intended to: (1) Encourage frank and open discussion among decision makers and persons assisting them on the matters at issue; (2) protect against disclosure of proposed decisions before they are adopted; and (3) protect against the confusion and misunderstanding that might result from disclosure of reasons or rationales that were not ultimately the grounds for an agency's action.

The ALJ hearing process and the AC review are both deliberative processes which result in final agency decisions. An ALJ's decision on a claim becomes final if the AC does not review the decision. When the AC does accept a case for review, its decision becomes the agency's final decision. The working papers exchanged during the deliberative stages of an ALJ's or the AC's decision-making process are by definition predecisional communications which are part of a deliberative process protected by the privilege.

Release of predecisional communications would be an unwarranted intrusion into the agency's deliberative process. There is a need for full and uninhibited discussion of the issues involved in Social Security cases between the decision makers and their staffs because of the complex factual situations and the sensitive nature of the process involved in weighing evidence, determining credibility and satisfying criteria established by statute, regulation, and judicial precedent. Likewise, there is a real danger that disclosure of discussions, reasons, and rationale which did not in fact constitute the basis for the agency's ultimate decision would cause confusion and misunderstanding. The purposes of the

deliberative process privilege are served by protecting this type of material.

Therefore, we will invoke the deliberative process privilege when we receive requests for such predecisional communications. As required by the FOIA and judicial interpretations of that statute, however, factual material presented in these communications shall be released unless it is inextricably intertwined with exempt material and would reveal the opinions, recommendations, deliberations, and evaluations protected by the exemption.

The attorney-client and work product privileges are other traditional privileges incorporated into exemption (b)(5). The attorney-client privilege functions to protect the confidential communications of the client, including a Federal agency, and its attorney relating to a matter on which the client seeks advice. The attorney-client privilege is not limited to situations involving litigation. The communications of a client seeking legal advice and the resulting opinion provided by the attorney are generally protected. The underlying purpose of the privilege is to preserve the confidentiality of client communications and encourage full and frank attorney-client discussions.

The work product privilege covers materials created or prepared by a party's attorney or another representative of a party in anticipation of litigation. In particular, the work product privilege protects mental impressions, conclusions, opinions, legal theories and strategies.

We will invoke the attorney-client and work product privileges as appropriate when we receive requests under the FOIA and PA for confidential communications between the Agency and its attorneys, materials which set forth mental impressions, case theories or strategies and materials which request or provide legal advice.

Conclusion: ALJ and AC working papers, in whole or in part, may be withheld by the Social Security Administration under exemption (d)(5) of the Privacy Act and exemptions (b)(2) and (b)(5) of the Freedom of Information Act. We have determined to withhold such exempt materials from claimants and their authorized representatives because withholding serves valid and important governmental and public policy interests.

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

ADDRESSES: For further information, contact James N. Forsberg, room 7262, Department of Housing and Urban Development, 451 Seventh Street SW, Washington, DC 20410; telephone (202) 708-4300; TDD number for the hearing- and speech-impaired (202) 708-2565 (these telephone numbers are not toll-free), or call the toll-free title V information line at 1-800-927-7588.

SUPPLEMENTARY INFORMATION: In accordance with 56 FR 23789 (May 24, 1991) and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless* v. *Veterans Administration*, No. 88-2503-OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Judy Breitman, Division of Health Facilities Planning, U.S. Public Health Service, HHS, room 17A-10, 5600 Fishers Lane, Rockville, MD 20857; (301) 443-2265. (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 56 FR 23789 (May 24, 1991).

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1-800-7588 for detailed instructions or write a letter to James N. Forsberg at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: Corps of Engineers: Bob Swieconek, Army Corps of Engineers, Civilian Facilities, rm. 5136, 20 Massachusetts Ave. NW., Washington, DC 20314-1000; (202) 272-1750; U.S. Navy: John J. Kane, Deputy Division Director, Dept. of Navy, Real Estate Operations, Naval Facilities Engineering Command, 200 Stovall Street, Alexandria, VA 22332-2300; (202) 325-0474; (Three are not toll-free numbers).

Correction: The Dry Hill Family Housing properties in Watertown, New York, that were published in the February 14, 1992 notice are not available for homeless assistance use.

Dated: February 27, 1992.

Paul Roitman Bardack,

Deputy Assistant Secretary for Economic Development.

TITLE V, FEDERAL SURPLUS PROPERTY PROGRAM FEDERAL REGISTER REPORT FOR 03/06/92

Suitable/Available Properties

Buildings (by State)

Alabama

Bldg. TU-43
Millers Ferry Lock and Dam

California

Santa Fe Flood Control Basin
Irwindale Co: Los Angeles, CA 91706-
Landholding Agency: COE
Property Number: 319011298
Status: Unutilized
Comment: 1400 sq. ft.; 1 story stucco; needs rehab; termite damage; secured area with alternative access.

Colorado

Kendall House, Bear Creek Lake
Hwy 8 or Morrison Rd.
Lakewood Co: Jefferson, CO 80201-
Location: 2 mi. west of Kipling Intersection
Landholding Agency: COE
Property Number: 319140001
Status: Excess
Comment: 2400 sq. ft., 2 story with basement, needs rehab, presence of asbestos, off-site use only.

Florida

Bldg. CN-3
1651 S. Franklin Lock Road
Alva Co: Lee, FL 33920-
Landholding Agency: COE
Property Number: 319130006
Status: Unutilized
Comment: 1500 sq. ft., 1 story concrete block residence, off-site use only.

Idaho

Bldg.
Albeni Falls Dam
U.S. Highway 2, Priest River
Bonner Co: Bonner, ID 83856-
Location: 3½ miles west of Priest River.
Landholding Agency: COE
Property Number: 319110028
Status: Unutilized
Comment: 2989 sq. ft.; 3 story log construction with wood frame; off-site removal only; needs rehab.

Indiana

Bldgs. 01, 02—Monroe Lake
Monroe Cty. Rd. 37 North to Monroe Dam Rd.
Bloomington Co: Monroe, IN 47401-8772
Landholding Agency: COE
Property Number: 319140002-319140003
Status: Unutilized
Comment: 1312 sq. ft., 1 story brick residence, off-site use only.

Kentucky

Green River Lock & Dam #3
Rochester Co: Butler, KY 42273-
Location: SR 70 west from Morgantown, KY., approximately 7 miles to site.
Landholding Agency: COE
Property Number: 319010022
Status: Unutilized
Comment: 980 sq. ft.; 2 story wood frame; two story residence; potential utilities; needs major rehab.

Maine

Naval Air Station
Transmitter Site
Old Bath Road
Brunswick Co: Cumberland, ME 04053-
Landholding Agency: Navy
Property Number: 779010110
Status: Underutilized
Comment: 7,270 sq. ft., 1 story bldg. most recent use—storage, structural deficiencies.

Minnesota

Orwell Dam Reservoir
RFD #4, Box 100
Fergus Falls Co: Ottertail, MN 56537-
Location: Off highway 210, 12 miles from Fergus Falls.

Road Closure; Caballo Resource Area, NM

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: In order to protect public health and safety, this order closes a road located on public land in T. 15 S., R. 7 W., Sec. 36, New Mexico Principal Meridian, in Sierra County, New Mexico.

DATES: This closure goes into effect on March 6, 1992, and shall remain in effect until revoked or modified by the authorized officer.

FOR FURTHER INFORMATION CONTACT: Dwayne Sykes, Acting Multi-Resources Staff Chief, Caballo Resource Area, 1800 Marquess, Las Cruces, New Mexico 88005, (505) 525–8228.

SUPPLEMENTARY INFORMATION: The authority for this closure is 43 CFR, part 8364. Any person who fails to comply with this order is subject to arrest and a fine of up to $1,000 and/or imprisonment not to exceed 12 months. This closure applies to all members of the public except authorized personnel from the Department of the Interior on official business, private landowners, or other persons specifically authorized access by the authorized officer.

Dated: February 28, 1992.

Richard T. Watts,
Acting District Manager.

Realty Action: Exchange of Public Lands, Maricopa, La Paz, Mohave, Pinal and Pima Counties, AZ

BLM proposes to exchange public lands in order to achieve more efficient management of the public land through consolidation of ownership.

Portions or all of public lands within the following townships, ranges and sections are being considered for disposal by exchange pursuant to section 206 of the Federal Land Policy and Management Act of October 21, 1976, 43 U.S.C. 1716. Approximately 5,211.04 acres are identified.

Gila and Salt River Meridian, Arizona

T. 2 N., R. 6 E.,
Sec. 24.
T. 4 N., R. 19 W.,
Secs. 4 and 9.
T. 22 N., R. 19 W.,
Secs. 12, 14, 20, 30.
T. 5 S., R. 4 E.,
Sec. 13.
T. 5 S., R. 5 E.,
Secs. 16 and 17.
T. 17 S., R. 15 E.,
Secs. 5, 7 and 8.

Detailed information concerning this exchange may be obtained from Barbara Ahearn, realty specialist, at (602) 863–4464.

Final determination on disposal will await completion of an environmental assessment.

In accordance with the regulations of 43 CFR 2201.1(b), publication of this Notice will segregate the affected public lands and minerals from appropriation under the public land laws and the mining laws, but not the mineral leasing laws or Geothermal Steam Act.

The segregation of the above-described lands shall terminate upon issuance of a document conveying such lands or upon publication in the **Federal Register** of a notice of termination of the segregation; or the expiration of two years from the date of publication, whichever occurs first.

For a period of forty-five (45) days from the date of publication of this Notice in the **Federal Register**, interested parties may submit comments to the District Manager, Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027.

Dated: February 26, 1992.

Sandra R. Nelson,
Acting District Manager.

BILLING CODE 4310–32–M

Bureau of Reclamation

[INT DES 92–9]

Los Vaqueros Project, Contra Costa County., CA

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of availability and notice of public hearings.

SUMMARY: Pursuant to section 102(s)(C) of the National Environmental Policy Act (NEPA) of 1969, as amended, and section 21002 of the California Environmental Quality Act (CEQA), the Bureau of Reclamation (Reclamation), and Contra Costa Water District (CCWD) have prepared a Stage 2 draft environmental impact report/draft environmental impact statement (DEIR/DEIS) for the Los Vaqueros Project in California. Since Clean Water Act permits are required, the Corps of Engineers (COE) is a cooperating agency. The Stage 2 DEIR/DEIS describes and presents the environmental effects of five alternatives, including no action, to improve the quality of water supplied to CCWD customers, minimize seasonal quality changes, and improve the reliability of the CCWD supply by providing emergency storage.

DATES: A 60-day public review period commences with the publication of EPA's Notice of Availability. Within that review period, written comments on the DEIR/DEIS may be submitted to CCWD at the address provided below.

Public hearings on the Stage 2 DEIR/DEIS will be held:

Hearing 1—April 7, 1992, 7:30 p.m., Granada High School, Student Union Building, 400 Wall Street, Livermore, California.
Hearing 2—April 9, 1992, 7:30 p.m., City of Antioch, City Council Chambers Third and "H" Streets, Antioch, California.
Hearing 3—April 13, 1992, 7:30 p.m., Contra Costa Water District, Board Room, 1331 Concord Avenue, Concord, California.

ADDRESSES: Copies of the Stage 2 DEIR/DEIS may be requested from CCWD or Reclamation at the following addresses:

- Regional Director, Bureau of Reclamation, Mid-Pacific Regional Office, 2800 Cottage Way, Sacramento CA 95825–1898; telephone: (916) 978–5130.
- Mr. John S. Gregg, Assistant General Manager, Contra Costa Water District, P.O. Box H20, Concord CA 94524; telephone: (510) 674–8000.

Copies of the Stage 2 DEIR/DEIS are available for inspection at the addresses above and at the following locations:

- Office of the Commissioner, Bureau of Reclamation, Technical Liaison Division, 18th and C Streets, NW, room 7456, Washington DC 20240; telephone: (202) 208–4662.
- Denver Office, Bureau of Reclamation, Library, room 167, Building 67, Denver Federal Center, Denver, CO 80225; telephone: (303) 236–6963.

Libraries

- California State Library, Government Publications Section, 2000 Jed Smith Drive, Sacramento CA 95819.
- City of Livermore Public Library-Springtown, 998 Bluebell Drive, Livermore CA 94550.
- City of Livermore Public Library, 1000 S. Livermore, Livermore CA 94550.
- Contra Costa County Public Library, 501 W. 18th Street, Antioch CA 94509.
- Contra Costa County Public Library, 210 O'Hara Avenue, Oakley CA 94561.
- Contra Costa County Public Library, 751 Third Street, Brentwood CA 94513.
- Contra Costa County Public Library, 2900 Salvio Street, Concord CA 94520.
- Contra Costa County Public Library, 80 Power Avenue, Pittsburgh CA 94586.
- Contra Costa County Public Library, 740 Court Street, Martinez CA 94553.
- Contra Costa County Public Library, 1644 North Broadway, Walnut Creek CA 94596.
- Contra Costa County Public Library, 1750 Oak Park Boulevard, Pleasant Hill CA 94523.
- U.S. Geological Survey Library, 345 Middlefield Road, Menlo Park CA 94025.
- University of California, Water Resources Library, 410 O'Brien Hall, Berkeley CA 94720.

FOR FURTHER INFORMATION CONTACT: Mr. Gary Darling or Ms. Janice Hutton, Contra Costa Water District, P.O. Box H20, Concord CA 94524; telephone: (510) 674–8130; or Mr. Douglas Kleinsmith, Bureau of Reclamation, Mid-Pacific Region, 2800 Cottage Way, Sacramento CA 95825–1898; telephone: (916) 978–5121.

SUPPLEMENTARY INFORMATION: The preferred alternative would consist of constructing a dam and reservoir on Kellogg Creek, south of the city of Brentwood in southeastern Contra Costa County; a new point of diversion in the Sacramento-San Joaquin Delta; associated water conveyance and delivery facilities; pumping plants; and other facilities. The project would require the realignment of Vasco Road, an important county arterial roadway that would be inundated by the project, and relocation of several buried pipelines and electrical power transmission lines. The reservoir would have about 100,000 acre-feet of storage and would cover about 1,500 acres.

The Los Vaqueros Project would be funded, built, and operated by CCWD. The total cost for the project is estimated at $350 million in 1988 dollars. CCWD is seeking an amendment to its existing Water Service Contract (I75r–3401) Amended, with Reclamation to accommodate operation of the Los Vaqueros Project and certain repayment conditions. Accordingly, Reclamation is serving as the lead Federal agency responsible for NEPA compliance on the proposed project. Permits are required for the discharge of dredged or fill material into waters of the United States under section 404 of the Clean Water Act and for work in navigable waters under section 10 of the Rivers and Harbors Act. As a result, the Corps of Engineers is a cooperating agency.

Other alternatives evaluated in the Stage 2 DEIR/EIS are a Kellogg Reservoir at a site adjacent to the Los Vaqueros site; a desalination plant combined with an intertie with East Bay Municipal Utility District's (EBMUD) water supply system; a new supplemental intake along Middle River combined with an intertie with EBMUD; and no action.

CCWD has followed a staged approach to its environmental documentation for the Los Vaqueros Project as provided by CEQA. In 1986, CCWD completed and certified the Stage 1 EIR for the Los Vaqueros Project to evaluate a full range of alternative options for meeting project objectives and to identify impacts of watershed acquisition and management. At the conclusion of the State 1 EIR, CCWD narrowed the range of options to reservoir concepts within the Kellogg Creek watershed as the only alternative capable of achieving all project objectives. CCWD also prepared the Vasco Road and Utility Relocation Project EIR, pursuant to State CEQA Guidelines, to assess impacts of relocating Vasco Road and several major utility facilities located in the project area.

The Stage 2 DEIR/DEIS is the second stage (Stage 2) of the Los Vaqueros environmental documentation. It incorporates significant findings from the Stage 1 EIR and the Vasco Road and Utility Relocation EIR, as well as detailed and comprehensive evaluations of the Los Vaqueros Project and alternatives to the project.

Hearing Process Information

Organizations and individuals wishing to present statements at the hearing should contact CCWD's office at the above address to announce their intention to participate. Requests for scheduled presentations will be accepted through 4 p.m. on April 6, 1992, and may also be made at each hearing. Requests should indicate at which hearing the speaker wishes to appear. Speakers will be called upon to present their comments in the order in which requests were received. Advance requests will be called before requests made at the hearings. Oral comments will be limited to 5 minutes per individual. Speakers not present when called will lose their privilege in the scheduled order and will be recalled at the end of the scheduled speakers.

Written comments from those unable to attend or those wishing to supplement their oral presentations at the hearings should be received by CCWD's office at the above address by April 23, 1992, for inclusion in the hearing record. Comments received after that day but prior to the end of the 60-day public comment period will be addressed in the final environmental impact report/final environmental impact statement.

Note: If special assistance is required, contact Janice Hutton at (510) 674-8130. Please notify Ms. Hutton as far in advance of the hearings as possible and no later than April 1, 1992, to enable CCWD to secure the needed services. If a request cannot be honored, the requester will be notified. A telephone device for the hearing impaired (TDD) is available at (916) 978-4417.

Dated: February 28, 1992.

Joe D. Hall,

Deputy Commissioner.

BILLING CODE 7035-01-M

[Finance Docket No. 31999]

Arkansas Midland Railroad Co., Inc.; Acquisition and Operation Exemption; Missouri Pacific Railroad Co.

Arkansas Midland Railroad Company, Inc. (AMR), a noncarrier, wholly owned subsidiary of Pinsly Railroad Company, Inc. (Pinsly), has filed a notice of exemption to acquire and operate 131.1 miles of rail line in Arkansas owned by Missouri Pacific Railroad Company. The line segments are as follows: (1) Between milepost 102.28, near Carlisle, and milepost 130.33, near North Little Rock; (2) between milepost 326.57, near Wycamp, and milepost 338.6, at Helena; (3) between milepost 388.96, at Malvern, and the end of the line at milepost 422.3+1, Mountain Pine; and (4) between milepost 426.86, at Gurdon, and milepost 479.2, at Birds Mill. The transaction was to have been consummated on or about February 23, 1992.

This transaction is related to a verified notice concurrently filed in Finance Docket No. 32001, *Pinsly Railroad Company, Inc.—Continuance in Control Exemption—Arkansas Midland Railroad Company, Inc.*, to exempt Pinsly's continuance in control of AMR on its becoming a class III carrier.

Any comments must be filed with the Commission and served on: Robert L. Calhoun, Sullivan & Worcester, suite 806, 1025 Connecticut Avenue, NW., Washington, DC 20036.

This notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: March 2, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[FR Doc. 91-5240 Filed 3-5-91; 8:45 am]

BILLING CODE 7035-01-M

[Finance Docket No. 32001]

Pinsly Railroad Co., Inc.; Continuance in Control Exemption; Arkansas Midland Railroad Co., Inc.

Pinsly Railroad Company, Inc. (Pinsly), has filed a verified notice for an exemption to continue to control Arkansas Midland Railroad Company, Inc. (AMR), a noncarrier, on AMR's becoming a class III carrier. Pinsly now controls five class III railroads: Greenville & Northern Railway Company, Pioneer Valley Railroad Company, Inc., Florida Central Railroad Company, Inc., Florida Midland Railroad Company, Inc., and Florida Northern Railroad Company, Inc.[1]

AMR, a wholly owned subsidiary of Pinsly, has concurrently filed a verified notice in Finance Docket No. 31999, *Arkansas Midland Railroad Company, Inc.—Acquisition and Operation Exemption—Missouri Pacific Railroad Company*, for an exemption to acquire and operate 131.1 miles of rail line in Arkansas owned by Missouri Pacific Railroad Company.

Pinsly indicates that: (1) The properties of the named carriers will not connect with each other or any other railroad in their corporate family; (2) the continuance in control is not part of a series of anticipated transactions that would connect the railroads with each other or any other railroad in their corporate family; and, (3) the transaction does not involve a class I carrier.

Therefore, this transaction involves the continuance in control of nonconnecting carriers and is exempt from the prior review requirements of 49 U.S.C. 11343. See 49 CFR 1180.2(d)(2).

As a condition to use of this exemption, any employees adversely affected by the transaction will be protected by the conditions set forth in *New York Dock Ry.—Control—Brooklyn Eastern Dist.*, 360 I.C.C. 60 (1979).

Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction. Pleadings must be filed with the Commission and served on: Robert L. Calhoun, Sullivan & Worcester, suite 806, 1025 Connecticut Avenue, NW., Washington, DC 20036.

Decided: March 2, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035-01-M

[1] Pinsly's control of these carriers was approved or exempted in Finance Docket Nos. 19776, 30802, 31152, 31360, and 30960.

JOINT BOARD FOR THE ENROLLMENT OF ACTUARIES

Advisory Committee on Actuarial Examinations; Meeting

Notice is hereby given that the Advisory Committee on Actuarial Examinations will meet at the 6th floor conference room, Public Ledger Building, 6th and Chestnut Streets, Philadelphia, Pennsylvania, on April 2, 1992, beginning at 8:30 a.m.

The purpose of the meeting is to discuss topics and questions which may be recommended for inclusion on future Joint Board examinations in actuarial mathematics and methodology referred to in title 29 U.S. Code, section 1242(a)(1)(B).

A determination as required by section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) has been made that the subject of the meeting falls within the exception to the open meeting requirement set forth in title 5 U.S. Code, section 552b(c)(9)(B), and that the public interest requires that such meeting be closed to public participation.

Dated: March 2, 1992.

Leslie S. Shapiro,

Advisory Committee Management Officer, Joint Board for the Enrollment of Actuaries.

BILLING CODE 4810-25-M

DEPARTMENT OF LABOR

Labor Advisory Committee for Trade Negotiations and Trade Policy; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463 as amended), notice is hereby given of a meeting of the Labor Advisory Committee for Trade Negotiations and Trade Policy.

Date, time and place: April 3, 1992, 2 pm-4, rm. N-3437 A&B, Department of Labor Building, 200 Constitution Ave., NW., Washington, DC 20210.

Purpose: To discuss trade negotiations and trade policy of the United States.

This meeting will be closed under the authority of section 10(d) of the Federal Advisory Committee Act and 5 U.S.C. 552(c)(1). The Committee will hear and discuss sensitive and confidential matters concerning U.S. trade negotiations and trade policy.

FOR FURTHER INFORMATION CONTACT: Fernand Lavallee, Director, Trade Advisory Group, Phone: (202) 523-2752.

Signed at Washington, DC this 28th day of February 1992.

Shellyn G. McCaffrey,

Deputy Under Secretary, International Affairs.

All Items Consumer Price Index for All Urban Consumers, United States City Average

Pursuant to section 112 of th 1976 amendments to the Federal Election Campaign Act (Pub. L. 94-283, 2 U.S.C. 441a), the Secretary of Labor has certified to the Chairman of the Federal Election Commission and publishes this notice in the **Federal Register** that the United States City Average All Items Consumer Price Index for All Urban Consumers (1967=100) increased 176.2 percent from its 1974 annual average of 147.7 to its 1991 annual average of 408.0. Using 1974 as a base (1974=100), I certify that the United States City Average All Items Consumer Price Index for All Urban Consumers thus increased 176.2 percent from its 1974 annual average of 100 to its 1991 annual average of 276.2.

Signed at Washington, DC., on the 27th day of February 1992.

Lynn Martin,

Secretary of Labor.

BILLING CODE 4510-24-M

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedes decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue NW., room S-3014, Washington, DC 20210.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from:

Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC this 28th day of February 1992.

Alan L. Moss,

Director, Division of Wage Determinations.

BILLING CODE 4510-27-M

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under title II, chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than March 16, 1992.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not late than March 16, 1992.

The petition filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

Signed at Washington, DC this 24th day of February 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

C.A.D. Fashions, Inc., Newark, NJ; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on January 6, 1992 in response to a worker petition which was filed on January 6, 1992 on behalf of workers at C.A.D. Fashions, Incorporated, Newark, New Jersey.

The petitioner has requested that the petition be withdrawn. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, DC this 25th day of February 1992.

[TA-W-26,405]

Construction Specialties, Inc. Cranford, NJ; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on December 13, 1991, applicable to all workers of Construction Specialties, Inc., Cranford, New Jersey. The Notice was published in the **Federal Register** on December 27, 1991 (56 FR 4648).

The Department is amending the certification to include manufacturing workers who will become unemployed after the originally scheduled date that served as the basis for the termination date in the original certification.

It is the intention of the Department's certification to include all manufacturing workers of Construction Specialties, Inc. who were adversely affected by increased imports.

The amended notice applicable to TA-W-26,405 is hereby issued as follows:

All workers of Construction Specialties, Inc., Cranford, New Jersey, except administrative and office staff engaged in corporate activities, who became totally or partially separated from employment on or after September 10, 1991 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed in Washington, DC this 27th day of February 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[TA-W-26,517]

Harkins and Co., Alice, TX, Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to apply for Worker Adjustment Assistance on December 19, 1991, applicable to all workers of Harkins and Company, Alice, Texas. The notice was published in the **Federal Register** on January 9, 1992 (57 FR 932).

At the request of the Texas Employment Commission the Department reviewed the subject certification. New information shows that workers of Harkins and Company were not limited to the Alice, Texas location, but employed throughout South Texas, including the Gulf Coast Region.

It is the intention of the Department's certification to include all employees of Harkins and Company who were adversely affected by increased imports.

The amended notice applicable to TA-W-26,517 is hereby issued as follows:

All workers of Harkins and Company headquartered in Alice, Texas, with locations throughout South Texas and the Gulf Coast region who became totally or partially separated from employment on or after January 1, 1991, are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed in Washington, DC, this 28th day of February 1992.

[TA-W-26,648]

Marine Drilling Companies, Inc., Sugarland, TX; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) as amended by the Omnibus Trade and Competitiveness Act of 1988 (Pub. L. 100-418), the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is determined in this case that all of the requirements have been met.

The investigation was initiated in response to a petition received on December 9, 1991, and filed on behalf of workers at Marine Drilling Companies, Inc., Sugarland, Texas. The workers are engaged in activities related to exploration and drilling for unaffiliated firms in the oil and gas industry.

Workers were not separately identifiable by product.

Work on natural gas wells represents an important portion of activity related to exploration and drilling by the subject firm.

United States imports of dry natural gas increased absolutely and relative to domestic shipments in 1990 compared to 1989 and in the first seven months of 1991 compared to the same period in 1990. The exploration and drilling end of the crude oil and natural gas industry is sensitive to the level of imports and changes in the price level of dry natural gas. The impact of dry natural gas imports and reduced price levels has resulted in declining U.S. exploration and drilling activity. The total number of rigs in operation, the total number of wells completed, and the number of gas wells drilled declined in the first eight months of 1991 compared to the same period in 1990.

The declines in revenues and employment in 1991 at the subject firm resulted from a decreased demand for exploration and drilling activities from oil and gas industry clients due to the 25 percent increase in U.S. dry natural gas imports from 1986 through the first seven months of 1991.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with dry natural gas contributed importantly to the decline in sales or production and to the total or partial separation of workers at Marine Drilling Companies, Inc., Sugarland, Texas. In accordance with the provisions of the Act, I make the following certification:

All workers of Marine Drilling Companies, Inc., Sugarland, Texas (including offshore drilling and related workers), who became totally or partially separated from employment on or after January 1, 1991, and before January 1, 1992, are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 27th day of February 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 92-5209 Filed 3-5-92; 8:45 am]
BILLING CODE 4510-30-M

Determinations Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period of February 1992.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-26,709; Rand & Rand, Inc., Philadelphia, PA

TA-W-26,686; Martin Blouse Co., Inc., Shenandoah, PA

TA-W-26,640; Custom Optics, Inc., Saddlebrook, NJ

TA-W-26,601; Holt-Williamson Mfg Co., Fayetteville, NC

TA-W-26,557; West Point Pepperell, Inc., Scottsboro, AL

TA-W-26,672; Meilink Industries, Inc., Whitehouse, OH

TA-W-26,538; New York Bronze Powder Co., Inc., Manton Cork Div., Cranford, NJ

In the following cases, the investigation revealed that the criteria for eligibility has not been met for the reasons specified.

TA-W-26,693; Bethlehem Steel Corp., Coke Operation, Sparrows Point, MD

Increased imports did not contribute importantly to worker separations at the firm.

TA-W-26,838; Ford Motor Co., Cleveland District Sales Office Brecksville, OH

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-26,530; Cole Hersee Co., South Boston, MA

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA-W-26,815; Pan American Airway, Miami, FL

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-26,721; Adobe Resources Corp., Midland, TX

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA-W-26,788; Swift-Eckrich, Inc., Detroit Lakes, MN

U.S. imports of slaughtered and processed poultry were negligible in 1991.

TA-W-26,701, TA-W-26,702 & TA-W-26,703; Harris Semiconductor Products Division, Mountaintop, PA, Somerville, NJ and Findlay, OH

Increased imports did not contribute importantly to worker separations at the firm.

TA-W-26,704 & TA-W-26,705; Harris Semiconductor Products Division Melbourne, FL and Santa Clara, CA

Increased imports did not contribute importantly to worker separations at the firm.

Affirmative Determinations

TA-W-26,697; Briggs & Stratton Corp., Technology Div., Glendale, WI

A certification was issued covering all workers separated on or after December 13, 1990.

TA-W-26,681; Avison Lumber Co., Molalla, OR

A certification was issued covering all workers separated on or after December 13, 1990.

TA-W-26,807; J.D. Operating Co., Inc., Cairnbrook, PA

A certification was issued covering all workers separated on or after January 14, 1991.

TA-W-26,716; Northwest Alloys, Inc., Addy, WA

A certification was issued covering all workers separated on or after December 18, 1990.

TA-W-26,586; Western Atlas Int'l, Inc., Atlas Wireline Service Houston, TX & Operating at Various Locations in The Following States: A; TX, B; AK, C; CA, D; CO, E; IL, F; KS, G; LA, H; MI, I; MS, J; NV, K; NM, L; OK, M; WV, N; WY

A certification was issued covering all workers in the above cited states separated on or after November 12, 1990.

A certification was issued covering all workers of Atlas Wireline Services, Pampa, TX separated on or after September 1, 1991.

A certification was issued covering all workers of Atlas Wireline Services, Anchorage, AK and Ventura, CA separated on or after November 17, 1991.

A certification was issued covering all workers of Atlas Wireline Services,

Cody, Casper and Gillette, WY separated on or after June 30, 1991.

I hereby certify that the aforementioned determinations were issued during the month of February 1992. Copies of these determinations are available for inspection in room C-4318, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210 during normal business hours or will be mailed to persons to write to the above address.

Dated: March 2, 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

[TA-W-26,740]

Scott Paper Co., Winslow, ME; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on January 13, 1992 in response to a worker petition which was filed on behalf of workers at Scott Paper Company, Winslow, Maine.

The petitioner has requested that the petition be withdrawn. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, DC this 27th day of February, 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 92-5210 Filed 3-5-92; 8:45 am]

BILLING CODE 4510-30-M

[TA-W-26, 615]

Tri-State Oil Tools, Inc., Bossier City, LA; Negative Determination Regarding Application for Reconsideration

By an application dated February 3, 1992, a company official requested administrative reconsideration of the subject petition for trade adjustment assistance. The denial notice was signed on January 24, 1992 and was published in the **Federal Register** on February 14, 1992 (57 FR 5471).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

The Department's denial was based on the fact that the workers do not produce an article within the meaning of section 223(3) of the Trade Act.

The company official states that over 50 percent of Tri-State's business deals with "open-hole" work which is work performed during the drilling process. Its also stated that the workers perform the same work now as they did earlier when they were certified for trade adjustment assistance.

Investigation findings show that the Bossier City facility produced specialized tools for recovery operations which are used exclusively by Tri-State and are not marketed for resale or rented. Tri-State uses its tools to perform the service of open-hole and cased-hole fishing and recovery operations to retrieve broken, damaged or loose parts from well bores during the drilling process. The Department concludes that the workers of Tri-State are not directly involved in the drilling or exploring for gas and oil and as such do not meet the provisions of Section 1421(a)(1)(A) of the Omnibus Trade and Competitiveness Act of 1988 for workers from a firm or appropriate subdivision engaged in exploration and drilling for oil and natural gas.

Investigation findings also show that workers at Tri-State's Bossier City facility were certified earlier under TA-W-21,988 issued on January 31, 1989. It appears that TA-W-21,988 was inadvertently issued and, as such, would not serve as a precedent for workers filing under TA-W-26,615.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC, this 25th day of February 1992.

Stephen A. Wandner,

Deputy Director, Office of Legislation and Actuarial Services, Unemployment Insurance Service.

NATIONAL COMMISSION ON SEVERELY DISTRESSED PUBLIC HOUSING

Meeting

AGENCY: National Commission on Severely Distressed Public Housing.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92-463, as amended, the National Commission on Severely Distressed Public Housing announces a forthcoming meeting of the Commission.

DATE: March 9, 1992, 9 a.m.-6 p.m.

ADDRESS: The Henley Park Hotel, 926 Massachusetts Avenue, NW., Washington, DC 20001, Conference Room: Eton.

FOR FURTHER INFORMATION CONTACT: Carmelita Pratt, Administrative Officer, The National Commission on Severely Distressed Public Housing, 1100 L Street, NW., #7121 Washington, DC 20005 (202) 275-6933.

TYPE OF MEETING: Executive Session-Close, 9 a.m.-12 Noon

By authority of section 10(d) of the Federal Advisory Committee Act this portion of the meeting being held on March 9, 1992, will be closed to public participation. Section 552b(c)(6) of the title 5, United States.

Reopen, 1 p.m.-6 p.m.

Due to scheduling difficulties, this notice could not be published 15 days prior to this meeting as required by Federal Advisory Committee Act.

Carmelita R. Pratt,

Administrative Officer.

BILLING CODE 6820-07-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-322; License No. NPF-82]

In the Matter of Long Island Lighting Co. and Long Island Power Authority (Shoreham Nuclear Power Station).

Approving Transfer of License (Effective Immediately)

I

Long Island Lighting Company (LILCO) is the holder of Facility Operating License No. NPF-82 issued by the U.S. Nuclear Regulatory Commission (the NRC) pursuant to 10 CFR part 50 on April 21, 1989. The license was amended on June 14, 1991, to remove the authority to operate the Shoreham Nuclear Power Station (SNPS) in accordance with conditions specified therein. The facility is located on the licensee's site in the Town of Brookhaven, Suffolk County, New York.

II

On February 28, 1989, LILCO entered into an agreement with the State of New York to transfer its Shoreham assets to an entity of the State for decommissioning. LILCO, however, continued to pursue with the NRC its request for a full-power license to operate its Shoreham plant. On April 21, 1989, the NRC issued to LILCO a Facility Operating License No. NPF-82, which allows full-power operation of the Shoreham plant. On June 28, 1989, LILCO's shareholders ratified LILCO's agreement with the State. Consistent with the terms of the settlement agreement, which prohibits further operation of the Shoreham facility, LILCO defueled the reactor and reduced its staff. Transfer of the Shoreham license to the State entity, the Long Island Power Authority (LIPA), requires NRC authorization. LILCO and LIPA submitted a joint request to transfer the SNPS license from LILCO to LIPA in their letter of June 28, 1990. They supplemented this request in letters dated June 13, June 27, October 31, and December 5, 1991.

III

In CLI-92-04 (dated February 28, 1992), the Commission determined that Facility Operating License No. NPF-82 may be transferred from LILCO to LIPA and made immediately effective based on the following conditions: (1) The license would revert to LILCO if LIPA ceases to exist or is otherwise found to be unqualified to hold the license, and (2) LILCO provides certification to the NRC that it will retain and maintain adequate capability and qualification to take over the license promptly in the event that either LIPA ceases to exist or is otherwise found to be unqualified to hold the license.

IV

On February 27, 1992, LILCO submitted a letter in which it certified the following:

> LILCO will retain and maintain adequate capability and qualifications to take over the License promptly in the event that LIPA, following receipt of the License, ceases to exist or is otherwise found to be unqualified to hold the license. This also certifies that LILCO understands and accepts that in the event of either of these contingencies, the License would revert to LILCO.

LILCO's certification, as set forth in its letter of February 27, 1992, is acceptable on an interim basis. This Order approving transfer of the license has been conditioned to reflect that the Shoreham license will revert to LILCO if LIPA ceases to exist or is otherwise found to be unqualified to hold a license. Additional details are required, however, concerning the licensee's certification, specifically details concerning the establishment of contingency plans to be utilized in the event that the Shoreham License should revert to LILCO. A joint contingency plan, approved by both LILCO and LIPA officials, must be submitted and approved by the staff which describes measures to be taken to adequately ensure such matters as appropriate employee and contractor arrangements, maintenance of staff and management qualifications, indemnification coverage, and technical specifications applicability.

Therefore, the conditions of CLI-92-04 have been satisfied on an interim basis, and the transfer of Facility Operating License NPF-82 from LILCO to LIPA may be approved by this Order and made immediately effective subject to the conditions set forth herein. Further, the staff has determined the proposed transferee is qualified to be a holder of the license and the transfer of the license is otherwise consistent with applicable provisions of law, regulations and orders issued by the Commission.

V

Accordingly, pursuant to section 103, 161b, and 161i, of the Atomic Energy Act of 1954, as amended, 10 CFR 50.80, and the Commission's Memorandum and Order CLI-92-04, *It is Hereby Ordered, Effective Immediately*, that transfer of Facility Operating License No. NPF-82 from LILCO to LIPA is approved, and LIPA is authorized to undertake the activities and obligations of the Shoreham license in accordance with the Commission's Memorandum and Order CLI-92-04, subject to the following: (1) The license will revert to LILCO in the event LIPA ceases to exist or is otherwise found to be unqualified to hold the license; (2) LILCO will maintain adequate capability and qualifications to take over the plant in such event; (3a) a joint LIPA/LILCO contingency plan as described above shall be submitted to the Director, Office of Nuclear Reactor Regulation by March 30, 1992; (3b) unless such plan is approved by the Director, Office of Nuclear Reactor Regulation by April 30, 1992, or other date to be determined by the Director, Office of Nuclear Reactor Regulation, the Shoreham license will revert to LILCO; and (4) until otherwise authorized by the Director, Office of Nuclear Reactor Regulation, the facility Technical Specifications currently in effect shall be followed by LIPA.

Dated at Rockville, Maryland this 29th day of February, 1992.

For the Nuclear Regulatory Commission.

Thomas E. Murley,

Director, Office of Nuclear Reactor Regulation.

[FR Doc. 92-5246 Filed 3-5-92; 8:45 am]

BILLING CODE 7590-01-M

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

AGENCY: Railroad Retirement Board.

ACTION: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the Railroad Retirement Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

SUMMARY OF PROPOSAL(S):

(1) *Collective title:* Annual Earnings Monitoring.

(2) *Form(s) submitted:* G-19(I), (II), (III), (IV) and (V).

(3) *OMB Number:* 3220-0073.

(4) *Expiration date of current OMB clearance:* Three years from date of OMB approval.

(5) *Type of request:* Revision of a currently approved collection.

(6) *Frequency of response:* On occasion and annually.

(7) *Respondents:* Individuals or households, Businesses or other for-profit.

(8) *Estimated annual number of respondents:* 3,000.

(9) *Total annual responses:* 3,000.

(10) *Average time per response:* .05 hours.

(11) *Total annual reporting hours:* 150.

(12) *Collection description:* The report obtains the information about an annuitant's employment and earnings. Under the RRA, an annuity can be reduced or not paid, depending on the amount of earnings and type of work performed.

ADDITIONAL INFORMATION OR COMMENTS: Copies of the proposed forms and supporting documents can be obtained from Dennis Eagan, the agency clearance officer (312-751-4693). Comments regarding the information collection should be addressed to Ronald J. Hodapp, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611 and the OMB reviewer, Laura Oliven (202-395-7316), Office of

Management and Budget, room 3002, New Executive Office Building, Washington, DC 20503.

Dennis Eagan,

Clearance Officer.

BILLING CODE 7905-01-M

SECURITIES AND EXCHANGE COMMISSION

(Release No. 34-30424; File No. SR-OCC-92-06)

Self-Regulatory Organizations; The Options Clearing Corporation; Notice of Filing and Order Granting Accelerated Approval on a Temporary Basis of a Proposed Rule Change Relating to Revisions to the Standard Form of Letter of Credit

February 28, 1992.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on February 6, 1992, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. February 18, 1992, OCC filed Amendment No. 1 to the proposal.[2] The Commission is publishing this notice and order to solicit comments on the proposed rule change from interested persons and to grant accelerated approval on a temporary basis through May 31, 1992.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change extends the Commission's previous temporary approval of OCC's modifications to its rules respecting letters of credit as a form of margin.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

On August 16, 1991, OCC filed with the Commission a proposed rule change (SR-OCC-91-13), which proposed to modify the standards for letters of credit used as a form of margin. On August 21, 1991, and on August 30, 1991, OCC filed Amendment No. 1 and Amendment No. 2, respectively, to the proposed rule change. On August 30, 1991, the Commission issued an order granting accelerated approval of the proposed rule change on a temporary basis through February 28, 1992. [3]

That order temporarily approved several modifications to OCC's rules governing the terms of letters of credit deposited as margin with OCC. First, in order to conform to the Uniform Commercial Code and to avoid any ambiguity as to the latest time for honoring demands upon letters of credit, letters of credit must state expresaly that payment must be made prior to the close of business on the third banking day following demand. Second, letters of credit must be irrevocable. Third, letters of credit must expire on a quarterly basis. Fourth, OCC included language in its rules to make explicit its authority to draw upon letters of credit at any time, whether or not the Clearing Member that deposited the letter of credit has been suspended or is in default if OCC determines that such draws are advisable to protect OCC, other Clearing Members, or the general public.[4]

Accelerated approval was granted in order to permit OCC to implement the new standards for letters of credit used as margin prior to the expiration and renewal, on September 1, 1991, of letters of credit issued under the prior standards. Temporary approval through February 28, 1992, was granted in order to permit OCC, the Commission, and other interested parties to assess, prior to permanent Commission approval of such standards, any effects these revised standards might have on letter of credit issuance and on margin deposits at OCC. In the interim, OCC has received no complaints from any of its Clearing Members, banks issuing such letters of credit, or any other interested parties with respect to the implementation of the revised letter of credit standards.

OCC believes the proposed rule change is consistent with the requirements of Section 17A of the Act. Specifically, OCC believes the proposaed rule change promotes the protection of investors by enhancing OCC's ability to safeguard the securities and funds in its possession or subject to its control.

B. Self-Regulatory Organization's Statement on Burden on Competition

OCC does not believe that the proposed rule change will impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Comments were not and are not intended to be solicited with respect to the proposed rule change, and none were received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Commission believes that the proposal is consistent with section 17A of the Act and specifically with section 17A(b)(3)(F) of the Act.[5] That section requires that the rules of a clearing agency be designed to assure the safeguarding of securities and funds which are in the custody or control of the clearing agency or for which the clearing agency is responsible. The revised standards should make such letters of credit more liquid instruments and, consequently, should permit OCC to more safely rely upon letters of credit as deposited margin. Because the revised standards will induce letter of credit issuers to reexamine Clearing Members' financial conditions every three months rather than annually, as under the prior standards, the financial condition of Clearing Members electing to deposit letters of credit as margin may be assessed more frequently thereby facilitating the discovery of any adverse developments in a more timely manner. In addition, since the letters of credit will be irrevocable, issuers of letters of credit will no longer be able to revoke letters of credit at times when the Clearing Members most need credit facilities (*e.g.*, when a Clearing Member is experiencing financial difficulties or

during times of market volatility). By approving the proposed rule change on a temporary basis through May 31, 1992, OCC, the Commission, and other interested parties will be able to assess further, prior to permanent Commission approval, any effects these revised standards have on letter of credit issuance and on margin deposited at OCC.

OCC has requested that the Commission find good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of the filing. The Commission finds good cause for so approving because the Commission believes it desirable that the proposed rule change be approved before the expiration of the Commission's previous order that temporarily approved these changes to the standard form of letter of credit. By approving before expiration of the prior temporary approval order, the changes that have been implemented pursuant to the temporary approval order may remain in place pending permanent approval.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549.

Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to File Number SR-OCC-92-06 and should be submitted by March 27, 1992.

V. Conclusion

On the basis of the foregoing, the Commission finds that OCC's proposed rule change is consistent with the Act and in particular with section 17A of the Act.

It is therefore ordered, under section 19(b)(2) of the Act, that the proposal (File No. SR-OCC-92-06) be, and hereby is, approved temporarily through May 31, 1992.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

Application for Exemption; C.M. Life Insurance Company, et al.

February 28, 1992.

AGENCY: Securities and Exchange Commission ("SEC" or the "Commission").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 (the "1940 Act").

APPLICANTS: C.M. Life Insurance Company ("C.M. Life"); Panorama Plus Separate Account ("Account"); and G.R. Phelps & Co., Inc. ("Phelps").

RELEVANT 1940 ACT SECTIONS: Exemption requested under section 6(c) from sections 26(a)(2) and 27(c)(2) of the 1940 Act.

SUMMARY OF APPLICATION: Applicants seek an order to permit the assessment of a daily charge for mortality and expense risks against the assets of the Account.

FILING DATE: The application was filed on January 16, 1992 and an amended and restated application was filed on February 21, 1992.

HEARING OR NOTIFICATION OF HEARING: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on March 24, 1992. Request a hearing in writing, giving the nature of your interest, the reason for the request and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for attorneys, by certificate. Request notifications of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicants: Everett E. Clark, Esq., C.M. Life Insurance Company, 140 Garden Street, Hartford, Connecticut 06154.

FOR FURTHER INFORMATION CONTACT: Barbara J. Whisler, Attorney, on (202) 272-5415, or Wendell Faria, Deputy Chief, on (202) 272-2060, Office of Insurance Products (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from the SEC's Public Reference Branch.

Applicants' Representations

1. C.M. Life is a life insurance company chartered under Connecticut law in 1980. C.M. Life is a wholly-owned subsidiary of Connecticut Mutual Life Insurance Company.

2. The Account was established by C.M. Life as a separate account under Connecticut law on September 25, 1991, as a funding medium for certain flexible premium deferred annuity contracts (the "Contracts"). The Account is registered with the Commission under the 1940 Act as a unit investment trust. The application incorporates by reference the registration statement for the Account. Phelps will serve as the distributor and principal underwriter of the Contracts. Phelps is a wholly-owned subsidiary of DHC, Inc., which is a wholly-owned subsidiary of Connecticut Mutual Life Insurance Company.

3. The Account will invest in shares of the Connecticut Mutual Financial Services Series Fund I, Inc. (the "Fund"). The Account currently has six sub-accounts each of which invests solely in a specific corresponding portfolio of the Fund. The Fund is registered under the 1940 Act as an open-end, diversified management investment company of the series type.

4. The Contracts require a minimum initial purchase payment of at least $500. Subsequent purchase payments must be at least $100. The Contract owner may allocate payments to one or more sub-accounts of the Account or to C.M. Life's general account. The Contract owner also may allocate payments to a combination of the sub-accounts and the general account. The Contract balance is the sum of the Account balance and the general account balance.

5. The Contracts provide for a series of annuity payments beginning on the annuity income date. The Contract owner may select from six annuity payment options. The Contract owner may choose periodic fixed and/or variable payments under any one of the annuity options contained in the Contracts. The Contracts also contain death benefit options. If the annuitant or the Contract owner dies prior to the annuity income date, a death benefit is calculated and is payable upon receipt of proof of death, including proof that

the death occurred prior to the annuity income date, as well as an election of the death benefit option and return of the Contract. Payment under a death benefit option shall be based on the Contract balance at the time of payment. No contingent deferred sales charge or Contract maintenance fee shall apply with respect to any death benefit option.

6. C.M. Life will deduct an annual Contract maintenance fee. This fee is currently $30 per year and is guaranteed not to exceed $60 a year. The fee will be deducted from the Contract balance on the last day of each Contract year during the accumulation period and upon a full surrender of the Contract to compensate C.M. Life for the administrative services provided to Contract owners. C.M. Life also deducts a daily administrative expense charge from the assets of each sub-account of the Account currently at the rate of 0.07% of the average net assets of the Account. C.M. Life does not anticipate any profit from these charges. C.M. Life will deduct the administrative charges in reliance upon and in compliance with Rule 26a–1 under the 1940 Act.

7. C.M. Life may incur premium taxes relating to the Contracts. C.M. Life will deduct any premium taxes related to a particular Contract from premiums, upon surrender or annuitization.

8. C.M. Life imposes a contingent deferred sales charge of up to 5% of the amount withdrawn on certain partial surrenders or full surrenders of the Contract balance during the first five Contract years. C.M. Life guarantees that the aggregate sales charges applicable to the Contract balance will not exceed 8.5% of the total purchase payments. Beginning with the second Contract year a free surrender amount equal to 10% of the Contract balance as of the end of the immediately preceding Contract year will be exempt from any contingent deferred sales charge. No contingent deferred sales charge is imposed on partial or full surrenders during the last thirty days of each five year period.

9. C.M. Life imposes a charge to compensate it for bearing certain mortality and expense risks under the Contracts. This charge is currently equal to an annual rate of 1.10% of the value of the net assets in the Account. Of that amount, approximately 0.15% is attributable to mortality risk and approximately 0.95% is attributable to expense risks. C.M. Life guarantees that this charge will never exceed 1.25%. If the mortality and expense risk charge is insufficient to cover actual costs and assumed risks, the loss will fall on C.M. Life. Conversely, if the charge is more than sufficient to cover costs, any excess will be profit to C.M. Life. C.M. Life currently anticipates a profit from this charge.

10. C.M. Life guarantees that the aggregate of the mortality and expense risk charge and the daily administrative expense charge will not exceed 1.50% annually. If the mortality and expense risk charge were to be eliminated, the daily administrative expense charge could be increased to a maximum of 1.50% annually (assuming the charge to be "cost based" in accordance with Rule 26a-1 of the 1940 Act); however, if the daily administrative expense charge were to be eliminated, then the mortality and expense risk charge could not exceed the maximum of 1.25% annually.

11. The mortality risk borne by C.M. Life arises from its contractual obligation to make monthly annuity payments (determined in accordance with the annuity tables and other provisions contained in the Contract) regardless of how long annuitants or an individual annuitant may live. This undertaking assures that neither an annuitant's longevity nor an improvement in general life expectancy, will adversely affect the monthly annuity payments that the annuitant will receive under the Contract. C.M. Life also incurs a risk in connection with the payment of death benefits. Payments under a death benefit option are based on the Contract balance at the time of payment. No contingent deferred sales charge is imposed upon amounts received as a death benefit by Contract owners. The expense risk assumed by C.M. Life is the risk that C.M. Life's actual administration costs will exceed the amount recovered through the Contract maintenance fee and administrative expense charge.

12. C.M. Life does not anticipate that the contingent deferred sales charges will generate sufficient funds to pay the cost of distributing the Contracts. If these charges are insufficient to cover the expenses of distribution, the deficiency will be met from C.M. Life's general account funds, which may include amounts derived from the charge for mortality and expense risks.

13. Applicants request that the Commission, pursuant to section 6(c) of the 1940 Act, grant the exemptions from sections 26(a)(2) and 27(c)(2) in connection with Applicants' assessment of the daily charge for mortality and expense risks. Applicants believe that the requested exemptions are appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

14. Applicants argue that the mortality and expense risk charge is a reasonable charge to compensate C.M. Life for guaranteeing certain risks in the Contracts: The risk that annuitants under the Contracts will live longer as a group than has been anticipated in setting the annuity rates guaranteed in the Contracts; the risk created by the inapplicability of a contingent deferred sales charge to amounts received as a death benefit; and the risk that administrative expenses will be greater than amounts derived from the administrative charges.

15. C.M. Life represents that the mortality and expense risk charge, not to exceed 1.25%, is within the range of industry practice with respect to comparable annuity products. This representation is based upon C.M. Life's analysis of publicly available information about similar industry products, taking into consideration such factors as current charge levels, the existence of charge level guarantees, and guaranteed annuity rates. C.M. Life will maintain at its administrative offices, available to the Commission, a memorandum setting forth in detail the products analyzed in the course of, and the methodology and results of, its comparative survey.

16. Applicants acknowledge that the proceeds from the contingent deferred sales charges may be insufficient to cover all costs relating to the distribution of the Contracts. Applicants also acknowledge that if a profit is realized from the mortality and expense risk charge, all or a portion of such profit may be viewed by the Commission as being offset by distribution expenses not reimbursed by the sales charges. C.M. Life has concluded that there is a reasonable likelihood that the proposed distribution financing arrangements will benefit the Account and the Contract Owners. The basis for such conclusion is set forth in a memorandum which will be maintained by C.M. Life at its administrative offices and will be available to the Commission.

17. C.M. Life also represents that the Account will only invest in management investment companies which undertake, in the event such company adopts a plan under Rule 12b-1 of the 1940 Act to finance distribution expenses, to have a board of directors (or trustees), a majority of whom are not interested persons of the company, formulate and approve any such plan under Rule 12b-1.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[File No. 1–10615]

Issuer Delisting; Application To Withdraw From Listing and Registration; (Emisphere Technologies, Inc., Common Shares, $0.01 Par Value)

March 2, 1992.

Emisphere Technologies, Inc. ("Company") has filed an application with the Securities and Exchange Commission, pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2–2(d) promulgated thereunder, to withdraw the above specified security from listing and registration on the Boston Stock Exchange, Inc. ("BSE" or "Exchange").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

In making the decision to voluntarily withdraw its Stock from listing on the BSE, a decision made by the management of the Company and approved by its Board of Directors, the company believes that its stock would be more actively traded by listing with another organization.

Any interested person may, on or before March 23, 1992 submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the exchanges and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 92–5192 Filed 3–5–92; 8:45 am]

BILLING CODE 8010–01–M

[File No. 1–9396]

Issuer Delisting; Application To Withdraw From Listing and Registration; (Fidelity National Financial, Inc., Common Stock, $.0001 Par Value)

March 2, 1992.

Fidelity National Financial, Inc. ("Company") has filed an application with the Securities and Exchange Commission ("Commission"), pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2–2(d) promulgated thereunder, to withdraw the above specified security from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

In addition to being listed on the Amex, the Company's common stock is listed on the New York Stock Exchange, Inc. ("NYSE"). The Company's stock commenced trading on the NYSE at the opening of business on March 2, 1992 and concurrently therewith such stock was suspended from trading on the Amex.

In making the decision to withdraw its common stock from listing on the Amex, the Company considered the direct and indirect costs and expenses attendant on maintaining the dual listing of its common stock on the NYSE and on the Amex. The Company does not see any particular advantage in the dual trading of its stock and believes that dual listing would fragment the market for its common stock.

Any interested person may, on or before March 23, 1992 submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the exchanges and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[Release No. 35–25479]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

February 28, 1992.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by March 23, 1992 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Valley Resources, Inc. (70–7897)

Valley Resources, Inc. ("Valley"), 1595 Mendon Road, Cumberland, Rhode Island 02864, a Rhode Island public-utility holding company exempt from registration under section 3(a)(1) of the Act pursuant to rule 2, has filed an application under sections 9(a)(2) and 10 of the Act. Valley proposes to acquire all of the issued and outstanding shares of common stock of Bristol and Warren Gas Company ("Bristol"), a Rhode Island public-utility company.

Valley Gas Company ("Valley Gas"), Valley's public-utility subsidiary company, provides natural gas and transportation services to approximately 53,000 customers in northeastern Rhode Island.

Bristol provides natural gas and transportation services to approximately 6,500 customers in the towns of Bristol and Warren in southeastern Rhode Island.

As of August 31, 1991 Bristol reported total assets of $444,600. At that date, Bristol had issued and outstanding 10,000 shares of common stock ("Bristol Common Stock").

Pursuant to a Stock Purchase Agreement dated October 29, 1991 among Valley and the five shareholders of Bristol, Valley will acquire all of the Bristol Common Stock for a total consideration of $2,723,100 in the form of notes. Following the acquisition, Bristol will be a wholly owned subsidiary of Valley.

Consolidated Natural Gas Company 70–7922

Consolidated Natural Gas Company ("Consolidated"), CNG Tower, Pittsburgh, Pennsylvania 15222–3199, a registered holding company, has filed a declaration under sections 6(a) and 7 of the Act.

According to the terms of the employee savings programs of Consolidated and its subsidiary companies other than Virginia Natural Gas, Inc. ("VNG"), ("Thrift Plans") and of the employee savings plans offered by VNG ("Savings Plans"), shares of Consolidated's common stock ("Common Stock") may be purchased by the trustees ("Trustees") administrating the Thrift Plans and the Savings Plans (collectively, "Plans") directly from Consolidated or on the open market. If the Common Stock is acquired directly from Consolidated, the price of such shares is equal to the mean of the high and low transaction prices of the Common Stock on the New York Stock Exchange on the date of acquisition. Common Stock purchased is registered in the name of the Trustees and allocated to appropriate Plan participant accounts. The Trustees are currently acquiring approximately 70,000 shares of Common Stock per month for the Plans.

Consolidated proposes to issue and sell, through December 31, 2001, up to a maximum of ten million shares of Common Stock to the Trustees of the Plans for purposes of the Plans.

Entergy Corporation (70–7938)

Entergy Corporation ("Entergy"), 225 Baronne Street, New Orleans, Louisiana 70112, a registered holding company, has filed an application-declaration under Sections 6(a), 7, 9(a), 10 and 12(e) of the Act and rules 42, 50(a)(5), 62 and 65 thereunder.

Entergy proposes to solicit proxies and obtain a vote of its shareholders in connection with a proposed amendment to its Restated Articles of Incorporation ("Charter"). The amendment would respond to a change in Florida law. As revised, Florida law mandates that, unless otherwise provided in a corporation's charter, reacquired shares of a corporation's common stock are restored to the status of authorized but unissued shares of such class. Since Entergy's Charter does not currently address the subject of treasury shares under revised Florida law, shares of Common Stock acquired by Entergy are returned to the status of authorized but unissued shares and cannot be held as treasury shares for later reissuance.

Entergy also proposes to acquire and reissue as treasury shares from time-to-time through December 31, 1994, up to 3 million shares of its common stock, $5 par value ("Common Stock"), to meet the requirements of Entergy system stock benefit plans. Entergy requests an exception from the competitive bidding requirements of rule 50 pursuant to subsection (a)(5) thereof for the reissuance of the Common Stock.

The proposed amendments to the Charter ("Proposal") will be submitted for consideration and approval by Entergy shareholders at its annual meeting to be held on May 15, 1992. The adoption of the Proposal will require the affirmative vote, in person or by proxy, of the holders of at least ⅔ of the outstanding shares of Entergy's common stock and the presence, in person or by proxy, at the Annual Meeting of the holders of at least a majority of the outstanding shares of Entergy's common stock. Entergy proposes to solicit proxies from its stockholders for use at the Annual Meeting with respect to the approval of the Proposal and has requested an order pursuant to rule 62(d) under the Act to engage in such solicitation. In addition to using Entergy personnel and personnel of Entergy's wholly owned nonutility subsidiary, Entergy Service, Inc., Entergy proposes to use Morrow & Co., Inc., a proxy solicitation firm, to assist in the solicitation of proxies for the Annual Meeting.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

DEPARTMENT OF TRANSPORTATION

Aviation Proceedings; Agreements Filed During the Week Ended February 28, 1992

The following Agreements were filed with the Department of Transportation under the provisions of 49 U.S.C. 412 and 414. Answers may be filed within 21 days of date of filing.

Docket Number: 48003.
Date filed: February 24, 1992.
Parties: Members of the International Air Transport Association.
Subject: Mail Vote 541 (GIT fares from Europe to Japan/Korea).
Proposed Effective Date: April 1, 1992.

Docket Number: 48010.
Date filed: February 26, 1992.
Parties: Members of the International Air Transport Association.
Subject: TC23 Reso/P 0492 dated January 28, 1992. Europe-Japan/Korea Resos, R–1 To R–38, TC23 Reso/P 0499 dated February 13, 1992, Europe-Japan/Korea Reso 003z.
Proposed Effective Date: April 1, 1992.

Docket Number: 48015.
Date filed: February 28, 1992
Parties: Members of the International Air Transport Association.
Subject: Mail Vote 544 (Algeria airport tax increase).
Proposed Effective Date: March 15, 1992.

Docket Number: 48016.
Date filed: February 28, 1992.
Parties: Members of the International Air Transport Association
Subject: Mail Vote 542 (Establish all fares from Angola in US Dollars). Mail Vote 543 (Establish all rates from Angola in US Dollars).
Proposed Effective Date: April 1, 1992.

Docket Number: 48017.
Date filed: February 28, 1992.
Parties: Members of the International Air Transport Association
Subject: Mail Vote 537 (Italy international embarkation tax increase).
Proposed Effective Date: May 1, 1992.

Docket Number: 48018.
Date filed: February 28, 1992.
Parties: Members of the International Air Transport Association.
Subject: Mail Vote 546 (Special Creative Fares within Europe).
Proposed Effective Date: April 1, 1992.

Docket Number: 48019.
Date filed: February 28, 1992.
Parties: Members of the International Air Transport Association.
Subject: TC12 MV/P 0335 dated February 7, 1992. Mail Vote 540 (Readopt & Revalidate USA-Europe fares).
Proposed Effective Date: April 1, 1992.

Phyllis T. Kaylor,

Chief, Documentary Services Division.

BILLING CODE 4910–62–M

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended February 28, 1992

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 *et. seq.*). The due date for Answers, Conforming Applications, or Motions to Modify Scope are set forth below for each application. Following the Answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: 48002.
Date filed: February 24, 1992.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: March 23, 1992.
Description: Application of Continental Airlines, Inc., pursuant to section 401 of the Act and subpart Q of the Regulations, applies for renewal of the San Antonio, Texas-Mexico City authority in its certificate for Route 529 for a period of five years.

Docket Number: 48007.
Date filed: February 25, 1992.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: March 24, 1992.
Description: Application of Ryan International Airlines, Inc., pursuant to section 401 of the Act and subpart Q of the Regulations requests authority to conduct interstate and overseas scheduled air transportation of persons, property and mail.

Docket Number: 48008.
Date filed: February 26, 1992.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: March 25, 1992.
Description: Application of United Air Lines, Inc., pursuant to section 401 of the Act and subpart Q of the Regulations requests a certificate of public convenience and necessity to authorize service between a point or points in the United States and a point or points in Colombia.

Docket Number: 48013.
Date filed: February 27, 1992.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: March 26, 1992.
Description: Application of Cathay Pacific Airways Limited, pursuant to section 402 of the Act and subpart Q of the Regulations applies for an amendment to its foreign air carrier permit to authorize all-cargo operations on United Kingdom Route 13 of the Air Services Agreement between the Government of the United Kingdom of Great Britain and Northern Ireland ("Bermuda 2"): Guam/Honolulu/Los Angeles/San Francisco/Seattle-Hong Kong.

Docket Number: 48564.
Date filed: February 25, 1992.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: March 24, 1992.
Description: Application of Ryan International Airlines, Inc., pursuant to section 401 of the Act, and subpart Q of the Regulations requests an amendment to remove conditions in its section 418 and section 401 charter certificates to permit Ryan to conduct charter air transportation of passengers, property and mail without limitation.

Phyllis T. Kaylor,

Chief, Documentary Services Division.

BILLING CODE 4910–62–M

Office of the Secretary

Fitness Determination of Arizona Airways, Inc.

AGENCY: Department of Transportation.

ACTION: Notice of Commuter Air Carrier Fitness Determination—Order 92–3–1, Order to Show Cause.

SUMMARY: The Department of Transportation is proposing to find Arizona Airways, Inc., fit, willing, and able to provide commuter air service under section 419(e) of the Federal Aviation Act.

RESPONSES: All interested persons wishing to respond to the Department of Transportation's tentative fitness determination should file their responses with the Air Carrier Fitness Division, P–56, room 6401, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590, and serve them on all persons listed in Attachment A to the order.

Responses shall be filed no later than March 17, 1992.

FOR FURTHER INFORMATION CONTACT: Ms. Delores King, Air Carrier Fitness Division (P–56, room 6401), U.S. Department of Transportation, 400 Seventh Street SW., Washington, DC 20590, (202) 366–2343.

Dated: March 2, 1992.

Patrick V. Murphy,

Deputy Assistant Secretary for Policy and International Affairs.

BILLING CODE 4910–62–M

Applications of Patriot Airlines, Inc. for Certificate Authority

AGENCY: Department of Transportation.

ACTION: Notice of order to show cause (order 92–3–6) Docket 47912.

SUMMARY: The Department of Transportation is directing all interested persons to show cause why it should not issue an order finding Patriot Airlines, Inc., fit, willing, and able, and awarding it a certificate of public convenience and necessity to engage in interstate and overseas charter air transportation of property and mail.

DATES: Persons wishing to file objections should do so no later than March 13, 1992.

ADDRESSES: Objections and answers to objections should be filed in Docket 47912 and addressed to the Documentary Services Division (C–55, room 4107), U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC. 20590, and should be served upon the parties listed in Attachment A to the order.

FOR FURTHER INFORMATION CONTACT: Ms. Carol A. Woods, Air Carrier Fitness Division (P–56, room 6401), U.S. Department of Transportation, 400 Seventh Street, S.W., Washington, DC 20590. (202) 366–2340.

Dated: March 3, 1992.

Patrick V. Murphy, Jr.,

Deputy Assistant Secretary for Policy and International Affairs.

BILLING CODE 4910–62–M

Coast Guard

[CGD8 90–02]

Houston/Galveston Navigation Safety Advisory Committee; Solicitation for Membership

SUMMARY: The U.S. Coast Guard is seeking applications for appointment to membership on the Houston/Galveston Navigation Safety Advisory Committee. Present appointments will expire October 1, 1992.

The Committee shall consist of eighteen members, who have particular expertise, knowledge, and experience regarding the transportation, equipment,

and techniques that are used to ship cargo and to navigate vessels in the inshore and the offshore waters of the Gulf of Mexico:

(1) Two members who are employed by the Port of Houston Authority or have been selected by that entity to represent them.

(2) Two members who are employed by the Port of Galveston or the Texas City Port Complex or have been selected by those entities to represent them.

(3) Two members from organizations that represent shipowners, stevedores, shipyards, or shipping organizations domiciled in the State of Texas.

(4) Two members representing organizations that operate tugs or barges that utilize the port facilities at Galveston, Houston, and Texas City Port Complex.

(5) Two members representing shipping companies that transport cargo from the Ports of Galveston and Houston on liners, break bulk, or tramp steamer vessels.

(6) Two members representing those who pilot or command vessels that utilize the Ports of Galveston and Houston.

(7) Two at-large members who may represent a particular interest group but who utilize the port facilities at Galveston, Houston, and Texas City.

(8) One member representing labor organizations which load and unload cargo at the Ports of Galveston and Houston.

(9) One member representing licensed merchant mariners other than pilots, who perform shipboard duties on vessels which utilize the port facilities of Galveston and Houston.

(10) One member representing environmental interests.

(11) One member representing the general public.

To achieve the balance of membership required by the Federal Advisory Committee Act, the Coast Guard is especially interested in receiving applications from minorities and women.

The purpose of the committee is to provide local expertise on such matters as communications, surveillance, traffic control, anchorages, aids to navigation, and other related topics dealing with navigation safety in the Houston/Galveston area as required by the Coast Guard. The committee normally meets three times a year at various locations in the Houston/Galveston area. Members serve voluntarily, without compensation from the Federal Government for salary, travel, or per diem. Term of membership will not exceed the expiration of the charter, October 1, 1994.

DATES: Requests for applications should be received no later than April 15, 1992. Completed applications should be returned no later than May 15, 1992.

ADDRESSES: Persons interested in applying should write to Commander, Eighth Coast Guard District (oan), Hale Boggs Federal Building, 501 Magazine Street, New Orleans, LA 70130–3396.

FOR FURTHER INFORMATION CONTACT: Mr. Monty Ledet, USCG, Recording Secretary, Houston/Galveston Navigation Safety Advisory Committee, c/o Commander Eighth Coast Guard (oan) room 1209, Hale Boggs Federal Building, 501 Magazine Street, New Orleans, LA 70130–3396, telephone number (504) 589-4686.

Dated: February 25, 1992.

J.M. Loy,

Rear Admiral, U.S. Coast Guard, Commander, Eighth Coast Guard District.

[FR Doc. 92–5249 Filed 3–5–92; 8:45 am]

BILLING CODE 4910-14-M

Federal Highway Administration

National Motor Carrier Advisory Committee; Charter Renewal

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of charter renewal.

SUMMARY: The charter for the National Motor carrier Advisory Committee (NMCAC) has been renewed for the period of time from 1992 through 1994, effective on January 29, 1992. The Committee acts in an advisory capacity to the FHWA Administrator. It makes recommendation intended to improve the safety and productivity of the motor carrier industry and the effectiveness of the FHWA's programs and policies. The Committee reviews research projects, regulations and programs including commercial motor vehicle licensing and taxation, uniformity and safety. Meetings of the Committee are open to the public and must be announced in the **Federal Register**. Copies of the Committee charter are available upon request.

FOR FURTHER INFORMATION CONTACT: Mr. Douglas J. McKelvey, HIA–20, room 3104, 400 Seventh Street SW., Washington, DC 20590, (202)366–1861. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except for legal Federal holidays.

(23 U.S.C. 315; 49 CFR 1.48)

Issued on: February 26, 1992.

T.D. Larson,

Administrator.

BILLING CODE 4910-22-M

Environmental Impact Statement: Salt Lake County, UT

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement (EIS) will be prepared for a proposed highway project in Salt Lake County, Utah.

FOR FURTHER INFORMATION CONTACT: Bill Gedris, Environmental Coordinator, Federal Highway Administration, 2520 West 4700 South, suite 9A, Salt Lake City, Utah 84118, Telephone: (801) 524–5141; Larry Kirby, Special Projects Engineer, Utah Department of Transportation, District Two, 2060 South 2400 West, Salt Lake City, Utah 84104, Telephone: (801) 975–8426; or George Ramjoue, Development Planning Manager, Wasatch Front Regional Council, 420 West 1500 South, suite 100, Bountiful, Utah 84010, Telephone: (801) 292–4469.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Utah Department of Transportation (UDOT), the Wasatch Front Regional Council (WFRC), Salt Lake City, West Valley City, West Jordan, and Salt Lake County, will prepare an EIS on a proposal to develop the planned 5600 West Highway facility of approximately 12 miles in length from I–80 to the Old Bingham Highway (about 9600 South) in Salt Lake County, Utah. The proposed facility would provide increased traffic capacity for the west side of the Salt Lake City metropolitan area.

The alternatives to be considered for the 5600 West Highway facility include: (1) No action alternative; and (2) constructing the section on one of several alternative alignments. Incorporated into and analyzed with the various build alternatives will be design variations of grade and alignment.

Letters describing the proposed action and soliciting comments will be sent to appropriate federal, state, and local agencies, and to private organizations and citizens who have previously expressed or are known to have an interest in this proposal. A series of informational public meetings will be held as necessary during the project development process. A formal scoping meeting and an official public hearing will also be held. Public notice of the time and place of the meetings and hearing will be given. The draft EIS will be available for public and agency review and comment prior to the public hearing.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues are identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA, UDOT or the WFRC at the addresses provided above. (Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on federal programs and activities apply to this program).

Issued on: February 24, 1992.

Donald P. Steinke,

Division Administrator, Salt Lake City, Utah.

[FR Doc. 92–5160 Filed 3–5–92; 8:45 am]

BILLING CODE 4910-22-M

Intermodal Surface Transportation Efficiency Act of 1991 Amendments to 23 U.S.C. 131, Control of Outdoor Advertising

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice.

SUMMARY: On December 18, 1991, the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA), Public Law 102–240, 105 Stat. 1914, was signed into law. Section 1046 of the ISTEA amended 23 U.S.C. 131 which deals with outdoor advertising control. This notice describes the impact of section 1046 on how States can provide for effective control of outdoor advertising in accord with regulations previously issued by the Federal Highway Administration (FHWA) in 23 CFR 750.705. This document is being issued to advise States that the ISTEA may require them to consider changes in their laws and administrative practices in order to remain eligible for full Federal-aid funding. The ISTEA itself provides no lead time for the States to come into compliance with these new provisions. A discussion of initiatives that will be considered in evaluating how "effective control" is maintained under the new requirements is a part of this notice.

Under section 1046, 23 U.S.C. 131 will continue to apply to the Interstate System and the Federal-aid primary system as they existed on June 1, 1991, and, when designated, all portions of the approved National Highway System. The three major amendments made to 23 U.S.C. 131 by section 1046 of ISTEA are: (1) An amendment prohibiting the erection of most new signs adjacent to an Interstate or Federal-aid primary designated a Scenic Byway under a State Program; (2) a specific requirement that illegal signs be removed; and (3) a provision authorizing for the first time the use of Federal-aid highway funding to purchase signs that do not conform to outdoor advertising controls.

DATES: The ISTEA was signed into law on December 18, 1991, with the provision of new sections 131(s) and 131(r)(1) of title 23, U.S.C., effective as of that date.

FOR FURTHER INFORMATION CONTACT: Mr. Marlin E. Meese, Chief, Special Programs and Evaluation Branch, Office of Right-of-Way, HRW–12, (202) 366–2017; or Mr. Robert Black, Attorney, Office of Chief Counsel, HCC–31, (202) 366–1359, Federal Highway Administration, 400 Seventh Street SW., Washington, DC 20590. Office hours are from 7:30 a.m. to 4 p.m., e.t., Monday through Friday, except legal Federal holidays.

SUPPLEMENTARY INFORMATION: Section 131 is the implementing authority within title 23, U.S.C., for the Highway Beautification Act of 1965, as amended. The basic principles of outdoor advertising control are in section 131. The original Act provided specific controls on the erection and maintenance of outdoor advertising signs and devices along the Interstate and Federal-aid primary highway systems. The Interstate and primary highway systems comprise only 306,000 miles of the 3.9 million miles of public roads and streets in the United States. Therefore, the outdoor advertising controls apply to less than 8 percent of the total national public road mileage. Statutory controls in section 131(c) limit signs which a State can permit to directional and official signs, sale or lease signs, on-premise signs, landmark signs, and free coffee signs. In addition, under section 131(d), States can permit signs in zoned or unzoned commercial or industrial areas adjacent to the controlled systems. Section 131(d) provides for an agreement between each State and the Secretary of Transportation regarding size, lighting, and spacing standards of signs in commercial and industrial areas.

Scenic Byway Prohibition

The ISTEA in section 1046(c) amended title 23, U.S.C., by adding section 131(s). The new section limits the erection of new advertising displays to those permitted under section 131(c) along road segments that are designated Scenic Byways which are on the Interstate System, the Federal-aid primary system (as it existed on June 1, 1991), or on the National Highway System, when designated. These routes, collectively, are referred to as the controlled systems for Highway Beautification Act purposes. Thus new signs which would have been permitted in commercial and industrial areas under section 131(d) are no longer permitted on scenic byway portions of the controlled system.

Based on the 1990 Scenic Byways Study (U.S. DOT/FHWA Publication No. PD–91–010, January 1991), all but 15 States have some form of scenic byways program. About 35,000 miles of roads had been designated as scenic as of December 1990, when the study was conducted. The study projected that only about 50,000 total miles would be designated. Of the total projected mileage, about 50 percent is located on the Interstate and Federal-aid primary systems. Almost all of the mileage already designated as scenic along a controlled highway system is on two lane roadways. Most scenic byways are two lane roadways in rural areas where commercial and industrial areas are fewer in number. Thus, while the scope of this new control is limited to only about 25,000 miles, it complements the actions already taken by the States in determining that these routes have particular scenic importance.

Removal of Illegal Signs

The ISTEA in section 1046(b) also added section 131(r) to title 23, U.S.C. This new section requires all owners of illegal signs to remove their illegal signs within 90 days. The section further states that in the event owners do not remove their illegal signs, the State, to exercise effective control, shall remove the signs. The section provides that States recover removal costs of unremoved illegal signs from the sign owner. This cost recovery provision is not part of "effective control" for purposes of the sanction provisions of the Highway Beautification Act (23 U.S.C. 131(b)).

The FHWA recognizes that most States have already caused the removal of a substantial number of the illegal signs within their boundaries. Some States, however, have significant numbers of illegal signs remaining. Based on State reports, a total of about 22,000 remaining illegal signs have been identified. The law gave sign owners only 90 days from the effective date of ISTEA on December 18, 1991, to remove their illegal signs. The short period given to the owners is an indication of the emphasis to be applied to remove illegal signs. In consideration of the period granted to the owners, and the specific

mandate to the States to conclude removals when the sign owner has not performed, the FHWA has set a goal of an additional 90 days through June 18, 1992, for the States to act on the removal of illegal signs as required by 23 U.S.C. 131(r)(2). The FHWA recognizes that State law or procedural impediments may have to be overcome before a State can fully comply with this objective. However, considering the short time frame stated in the legislation for the removal of illegal signs by the sign owners, and the specific tie of this action to effective control requirements, States must take immediate steps after March 18, 1992, to demonstrate reasonable progress in meeting the effective control responsibilities required by this amendment. Good faith efforts by a State, including efforts to seek legislative authority, to comply with the provisions quickly will be considered by the FHWA in deciding how to deal with a failure to achieve effective control. Cumbersome administrative or procedural requirements that do not provide for prompt removal of illegal signs are not consistent with the intent of this section.

Funding for Removal of Nonconforming Signs

A new funding source for outdoor advertising control was provided in section 1046(a) of the ISTEA. By amending 23 U.S.C. 131(m), highway trust funds apportioned under 23 U.S.C. 104 are now available for the removal of nonconforming signs (i.e., lawfully erected signs which do not conform to the control requirements of section 131 or stricter State laws). In addition, in section 1007 of the ISTEA, control and removal of outdoor advertising is identified as one of several eligible "transportation enhancement activities" under the new Surface Transportation Program (STP). This major new program requires that at least 10 percent of apportioned funds for the program must be directed toward "transportation enhancement activities."

Initially, Federal funds for the control of outdoor advertising came from the General Fund. Now, funds made available from the Highway Trust Fund for highway projects may be used for outdoor advertising control. This will have a profound impact on the ability and responsibility of States to remove outdoor advertising signs. Under section 131(n), the States are not required to remove nonconforming signs unless Federal funds are available to participate in the acquisition costs associated with their removal. In the years immediately following the passage of the Highway Beautification Act, considerable sums were made available to inventory and remove nonconforming signs. However, funding was never sufficient to complete the acquisition process and no General Funds have been appropriated since 1983.

With this amendment made by the ISTEA, the States should have sufficient funds to remove nonconforming signs much more expeditiously. The change in the funding provided by the ISTEA, making available significant funds for the Federal share of just compensation payments and other control costs, will enable States to complete the removal of nonconforming signs in order to maintain effective control under Section 131(b). The timely removal of nonconforming outdoor advertising signs has always been part of "effective control." Failure to exercise effective control subjects a State to a 10 percent reduction of its Federal-aid highway apportionment, pursuant to 23 U.S.C. 131(b).

The FHWA estimates that about 92,000 nonconforming signs remain to be acquired. Most of these signs have been in place for over 20 years. Removal has been delayed, but now with increased Federal funding available to complete acquisition activities and ensure effective control, the law requires expedient removal.

The ISTEA authorizes $121 billion over the next six years for highway programs, including the STP which is a block grant program designed to fund a wide range of transportation related projects. For Fiscal Year (FY) 1992 alone, over $11 billion in Federal-aid under 23 U.S.C. 104 is being distributed to the States for highway construction and maintenance, and other transportation activities, including removal of outdoor advertising signs. The estimated total Federal share of the cost to acquire the remaining nonconforming signs is $428 million. This amount represents just 4 percent of the total eligible Federal-aid funds available to the States in FY 1992. Thus, the FHWA considered requiring States to remove all nonconforming signs along controlled highways in the first year ISTEA funding is available.

However, the FHWA recognizes that while the ISTEA represents a dramatic increase in Federal-aid funding, the non-Federal share must come from State or local sources. Moreover, the impact on individual States in providing for immediate removal would vary. For example, a State with an inventory of just a few hundred nonconforming signs would have a more manageable acquisition task than a State with over 2,000 such signs.

In addition, the FHWA recognizes that other problems might hamper the immediate removal of all remaining nonconforming signs. First, many States have been inactive regarding a sign acquisition program, and might need to update their administrative tools and sign acquisition procedures. Second, we do not believe that the Congress intended that the removal of signs take precedence over all other title 23 projects and programs.

For these reasons, we believe the ISTEA requires States to begin immediate removal of nonconforming signs, and to make reasonable progress in completing their removal program expeditiously. The FHWA, however, has set a two year goal for complete removal of remaining nonconforming signs. The FHWA believes that 2 years provides States with adequate time to remove all nonconforming signs without unduly constricting Federally-funded highway construction and other projects. States should be prepared to justify any reason for concluding that this period would impose an undue hardship on their priorities and programs.

During the next two years period, more than $24 billion Federal-aid dollars can be expected to be made available to the States for 23 U.S.C. 104 programs and projects. Considering the number of nonconforming signs remaining in the various States, most States could conclude their removal program using less than 2 percent of their 23 U.S.C. 104 funds within the two year period. Therefore, full acquisition and removal of the remaining nonconforming signs over the next two years would seem to be an achievable goal. By meeting this goal States will have removed all nonconforming signs on controlled Federal-aid highways by December 18, 1993.

The elements of removal programs will necessarily vary from State to State, and States should confer with the FHWA as to how best structure a removal program. In implementing removal programs, the States will have to review their existing priorities and formulate programs and processes that will maintain effective control. The States may wish to involve interested parties and affected entities such as other state and local agencies, sign owners, environmental groups and the business community, and establish priorities for sign removal.

This notice provides States and other interested parties a discussion of FHWA's goals and objectives to assure effective control is maintained to achieve the full implementation of the objectives expressed in the 1965 Highway Beautification Act, as amended, and to prevent interruption of Federal-aid funding. Each State should advise the FHWA by June 18, 1992, of its process, program, and timetable to ensure effective control is achieved and maintained. The FHWA intends to monitor and evaluate each State's progress in providing for the prompt removal of illegal and nonconforming signs on controlled systems.

(23 U.S.C. 315; 49 CFR 1.48)

Issued on: March 2, 1992.

T.D. Larson,

Administrator.

BILLING CODE 4910-22-M

DEPARTMENT OF VETERANS AFFAIRS

Cooperative Studies Evaluation Committee; Meeting

The Department of Veterans Affairs gives notice under Public Law 92-463 (Federal Advisory Committee Act) as amended by section 5(c) of Public Law 94-409 that a meeting of the Cooperative Studies Evaluation Committee will be held at the Ramada Renaissance Hotel, 999 9th Street NW., Washington, DC, on April 28, 1992. The session is scheduled to begin at 7:30 a.m. and end at 6 p.m. The meeting will be for the purpose of reviewing the progress of one on-going cooperative study in immunization in the prevention of infection, and three new clinical trials, one in the treatment of alcoholic cirrhosis, one in diabetes mellitus, and one in unstable angina.

The Committee advises the Director, Medical Research Service, through the Chief of the Cooperative Studies Program, on the relevance and feasibility of studies, the adequacy of the protocols, and the scientific validity and propriety of technical details, including protection of human subjects.

The meeting will be open to the public up to the seating capacity of the room, from 7:30 a.m. to 8 a.m., to discuss the general status of the program. To assure adequate accommodations, those who plan to attend should contact Dr. Ping Huang, Coordinator, Cooperative Studies Evaluation Committee, Department of Veterans Affairs, Washington, DC, (202-535-7154), prior to April 14, 1992.

The meeting will be closed from 8 a.m. to 6 p.m., for consideration of specific proposals in accordance with provisions set forth in section 10(d) of Public Law 92-463, as amended by section 5(c) of Public Law 94-409, and 5 U.S.C. 552b(c)(6). During this portion of the meeting, discussions and recommendations will deal with qualifications of personnel conducting the studies, staff and consultant critiques of research protocols, and similar documents, and the medical records of patients who are study subjects, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dated: February 26, 1992.

By Direction of the Secretary.

Diane H. Landis,

Committee Management Officer.

Part II

Department of Health and Human Services

Food and Drug Administration

21 CFR Part 101

Food Labeling: Nutrition Labeling; Guidelines for Voluntary Nutrition Labeling; and Identification of the 20 Most Frequently Consumed Raw Fruit, Vegetables, and Fish; Definition of Substantial Compliance; Corrections; Final Rule

21 CFR Part 101, et al.

Food Labeling; General Provisions; Nutrition Labeling; Nutrient Content Claims; Ingredient Labeling; State and Local Requirements; and Exemptions; Corrections; Proposed Rules

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 101

[Docket No. 91N-0122]

RIN 0905-AB68

Food Labeling: Nutrition Labeling of Raw Fruit, Vegetables, and Fish; Guidelines for Voluntary Nutrition Labeling of Raw Fruit, Vegetables, and Fish; Identification of the 20 Most Frequently Consumed Raw Fruit, Vegetables, and Fish; Definition of Substantial Compliance; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a final rule that appeared in the **Federal Register** of November 27, 1991 (56 FR 60880), that: (1) Identified the 20 most frequently consumed raw fruit, vegetables, and fish in the United States; (2) established guidelines for the voluntary nutrition labeling of these foods; and (3) defined "substantial compliance" with respect to the adherence by food retailers to those guidelines. The document was published with some editorial errors. This document corrects those errors.

EFFECTIVE DATE: November 8, 1991.

FOR FURTHER INFORMATION CONTACT: Jean A.T. Pennington, Center for Food Safety and Applied Nutrition (HFF-260), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-245-1064.

SUPPLEMENTARY INFORMATION: In FR Doc. 91-27149 appearing on page 60880, in the **Federal Register** of Wednesday, November 27, 1991, certain inadvertent editorial errors were made in the appendices. For the convenience of the reader, FDA is republishing, with corrections, the charts that appeared in the appendices of that document. Accordingly, on pages 60888 through 60890, the following corrections to Appendix A and Appendix B are made:

1. On pages 60888, in Appendix A, in the bracketed heading, the word "accepted" is corrected to read "provided"; in the "Percent U.S. RDA" column, "(1)" is removed wherever it appears and asterisks are added in their place; in the "Carbohydrates" column, "Carbohydrates" is corrected to read "Carbohydrate"; and on page 60889, in the footnote, superscript "1" is removed and an asterisk is added in its place.

2. On page 60889, in Appendix B, in the heading, the word "accepted" is corrected to read "provided"; in the "Carbohydrates" column, "Carbohydrates" is corrected to read "Carbohydrate"; in the "Saturated Fatty Acid" column, "Fatty Acid" is corrected to read "Fat"; in the 1st column, the 1st entry is moved up as part of the heading to the 1st column, and superscript "2" is corrected to read superscript "1"; in the third entry, "Pollack" is corrected to read "Pollock"; in the 5th entry, in the "Protein (g)" column, "28" is corrected to read "29"; in the 5th, 9th, 15th, and 20th entries, in the "Carbohydrates (g)" column, "0" is corrected to read "2," "7," "4," and "1," respectively; in the 10th entry, in the "Kilocalories" column, "130" is corrected to read "70", and in the "Fat (g)" column, "7" is corrected to read "1"; in the footnote, superscript "1" is removed and an asterisk is added in its place; and a new footnote is added after the 1st footnote to read as follows: "(*) Assumed less than 2% U.S. RDA (no data available)."

3. On the same page, in Appendix B, in the "Percent U.S. RDA" column, in the subordinate "Vitamin A" column, the 1st–8th, 12th, 16th, 18th, and 20th entries; in the subordinate "Vitamin C" column, in the 4th and 11th entries; in the subordinate "Calcium" column, in the 2d, 3d, 6th, 11th, and 13th entries, and in the subordinate "Iron" column, in the 3d, 5th, and 10th entries, "(1)" is removed and replaced with asterisks (without parentheses); and in the subordinate "Vitamin A" column, in the 9th, 10th, 17th entries, in the subordinate "Vitamin C" column, in the 3d, 7th–10th, 12th–17th, 19th, and 20th entries, and in the subordinate "Calcium" column, in the 10th entry, "(1)" is removed and replaced with asterisks (with parentheses).

4. On page 60890, in the first column, in the 1st paragraph, in the 3d line, the parenthetical statement is corrected to read "(all values except kilocalories and fat for orange roughy and carbohydrate, vitamin A, vitamin C, calcium, and iron for all fish)"; and in the 2d paragraph, in the 5th line, the 2d parenthetical statement is corrected to read "(kilocalories and fat for orange roughy and carbohydrate, vitamin A, vitamin C, calcium, and iron for all fish)"; and in the 3d paragraph, "(1) = assumed less than 2 U.S. RDA (no data available)." is removed.

Appendices A and B are republished with the corrections set forth above to read as follows:

VII. Appendix A

NUTRITIONAL LABELING PROVIDED BY FDA FOR THE 20 MOST FREQUENTLY CONSUMED RAW FRUIT AND VEGETABLES (AUGUST (1991)

Fruit (edible portion weight)	Calories	Protein (g)	Carbohydrate (g)	Fat (g)	Dietary fiber (g)	Sodium (mg)	Percent U.S. RDA

Notes

Data sources:

Produce Marketing Association (all data except as noted below).

USDA Revised Agriculture Handbook No. 8-9 (Fruits and Fruit Juices, 1982) and 8-11 (Vegetables and Vegetable Products, 1984) for grape, peach, pear, nectarine, plum, tangerine, lime, sweet corn, sweet potato, and green onion; dietary fiber for pineapple, tomato, and carrot; dietary fiber for grape and plum based on similar foods.

Dietary fiber for nectarine, tangerine, lime, and green onion from McCance and Widdowson's The Composition of Foods by A.A. Paul and D.A.T. Southgate, 4th revised ed., Elsevier/North-Holland Biomedical Press, NY, 1978 or Nutrient Content of Food Portions by J. Davies and J. Dickerson, The Royal Society of Chemistry, Cambridge, U.K., 1991.

Serving portion weights in oz from PMA were multiplied by 28 to obtain g weights; 55 g were used for 2 oz, and 85 g were used for 3 oz. Ounces were rounded to the nearest 0.5 oz for the chart. Serving portions weights in g from USDA were divided by 28 to obtain oz; oz were rounded to the nearest 0.5 oz.

Values were rounded in accordance with 21 CFR 101.9. Percent U.S. RDA was based on 5,000 IU for vitamin A, 60 milligrams (mg) for vitamin C, 1,000 mg for calcium, and 18 mg for iron.

Avocado data were derived from two data sets and are based on California varieties.

* Less than 2% U.S. RDA.
(*) Assumed less than 2% U.S. RDA (no data available).
[1] Cooked without fat or seasoning.

Notes

Data sources:

Seafood Nutri-Facts by the Food Marketing Institute and the National Fisheries Institute, 1988 (all values except kilocalories and fat for orange roughy and carbohydrate, vitamin A, vitamin C, calcium, and iron for all fish).

USDA Agriculture Handbook No. 8-15 (Finfish and Shellfish Products, 1987) and NOAA (National Oceanic and Atmospheric Administration) Technical Memo NMFS F/SEC-11, (1981) (kilocalories and fat for orange roughy and carbohydrate, vitamin A, vitamin C, calcium, and iron for all fish).

Atlantic/coho salmon was selected for labeling because most pink salmon is canned, and most sockeye salmon is exported to Japan. Atlantic/Pacific and jack mackerel were selected for labeling because consumption of Spanish mackerel is low. Personal communication with L. Weddig of National Fisheries Institute, August 15, 1991.

Nutrient values were averaged for Atlantic and coho salmon and for Atlantic and Pacific and jack mackerel.

Atlantic cod was used for cholesterol and sodium; Pacific cod would be 40 mg cholesterol and 75 mg sodium.

Values were rounded in accordance with 21 CFR 101.9. Percent U.S. RDA was based on 5,000 IU for vitamin A, 60 mg for vitamin C, 1,000 mg for calcium, and 18 mg for iron

Dated: February 21, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

[Docket No. 84N-153A]

RIN 0905-AD08

Food Labeling: "Cholesterol Free," "Low Cholesterol," and "____Percent Fat Free" Claims; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting the document that proposed to amend the food labeling regulations to define "cholesterol free" and "low cholesterol" and to provide for the proper use of these terms and the term "____ percent fat free" that appeared in the **Federal Register** of November 27, 1991 (56 FR 60507). This document corrects various editorial errors.

DATES: Written comments by January 27, 1992. The agency is proposing that any final rule that may issue based upon this proposal become effective 30 days following its publication.

ADDRESSES: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Virginia L. Wilkening, Center for Food Safety and Applied Nutrition (HFF-204), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-245-1561.

In FR Doc. 91-27156, appearing at page 60507 in the **Federal Register** of Wednesday, November 27, 1991, the following corrections are made:

1. On page 60511, in the third column, in reference "8.", the name "Park, Youngmeek" is corrected to read "Park, Youngmee K."

2. On page 60512, in the first column, in amendment "2.", the fifth line, "and (g) and (h)" is corrected to read "and (g)".

Dated: February 21, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

Food Labeling: Definitions of Nutrient Content Claims for the Fat, Fatty Acid, and Cholesterol Content of Food; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting the document that appeared in the **Federal Register** of November 27, 1991 (56 FR 60478) that proposed to amend the food labeling regulations to define, and to provide for the proper use of, the terms "fat free," "low fat," "reduced fat," "low in saturated fat," "reduced saturated fat," "cholesterol free," "low cholesterol," and "reduced cholesterol" in the labeling of foods and to provide for the use of other truthful and nonmisleading statements about a food's fat, fatty acid, and cholesterol content in food labeling. This document corrects various editorial errors.

DATES: Written comments by February 25, 1992. The agency is proposing that any final rule that may be issued based upon this proposal become effective 6 months following its publication in accordance with requirements of the Nutrition Labeling and Education Act of 1990.

ADDRESSES: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Virginia L. Wilkening, Center for Food Safety and Applied Nutrition (HFF-204), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-245-1561.

In FR Doc. 91-27159, appearing at page 60478 in the **Federal Register** of Wednesday, November 27, 1991, the following corrections are made:

1. On page 60485, in the third column, in the third line, the phrase "of a the nutrient" is corrected to read "of a nutrient".

2. On page 60485, in the third column, in the first complete paragraph, next to the last line, "some" is removed.

3. On page 60502, in the third column, Reference "7.", in the last line, the phrase "June 19-24, 1990" is corrected to read "June 24-28, 1990".

§ 101.62 [Corrected]

4. On page 60503, in the third column, in § 101.62 *Nutrient content claims for fat, fatty acid, and cholesterol content of foods,* the last line in the introductory text of paragraph (b)(3) is corrected by adding "provided" after "§ 101.13(1)"; and on page 60506, in the third column in paragraph (d)(5)(ii)(D), in lines 11 through 15, the two sentences reading "This pound cake contains 30 percent less cholesterol than our regular pound cake. Cholesterol lowered from 45 milligrams to 30 milligrams per serving." is corrected to read "This pound cake contains 45 percent less cholesterol than our regular pound cake. Cholesterol lowered from 55 to 30 milligrams per serving."

Food Labeling; General Requirements for Health Claims for Food; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting the document that proposed rules on general requirements for health claims for food that appeared in the **Federal Register** of November 27, 1991 (56 FR 60537). This document corrects various editorial errors.

DATES: Written comments by February 25, 1992. The agency is proposing that any final rule that may issue based upon this proposal become effective 6 months following publication of a final regulation pertaining to health claims in food labeling in accordance with requirements of the Nutrition Labeling and Education Act of 1990.

ADDRESSES: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857, 301-443-1751.

FOR FURTHER INFORMATION CONTACT: Victor P. Frattali, Center for Food Safety and Applied Nutrition (HFF-261), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-245-1064.

In FR Doc. 91-27151 appearing on page 60537 in the **Federal Register** of Wednesday, November 27, 1991, the following corrections are made:

1. On the same page, in column 2, in the fourth line in the heading, the word "Food" is added before the word "Labeling".

2. On page 60539, in column 3, in the third complete paragraph, the last line is corrected to read "(Congressional Record, October 28, 1990)".

3. On page 60548, in column 1, the parenthetical phrase following the quoted paragraph "(H. Rept. 301-538, 101st Cong., 2nd sess., 19)" is corrected to read "(H. Rept. 101-538, 101st Cong., 2d sess., 21)".

4. On page 60553, in column 3, in the third paragraph, in the ninth line, "303(a)" is corrected to read "343(a)".

5. On page 60554, in column 2, in the third complete paragraph, in the sixth line, the phrase "SSFR 29516" is corrected to read "55 Fr 29516"; in the fourth paragraph, in the first line, the phrase "what to be done" is corrected to read "what should be done".

6. On page 60555, in column 1, in the first complete paragraph, in the last line "be drawn?" is corrected to read "be drawn."

7. On page 60557, in column 1, in the third complete paragraph, the seventh line, "ac' " is corrected to read "act"; and in column 2, in the third complete paragraph in the third and fifth lines, "§ 101.13(g)" and "§ 101.13", are corrected to read "§ 101.14(g)" and "101.14", respectively.

8. On page 60560, in column 2, in the 12th line from the bottom, "§ 101.17" is corrected to read "§ 101.71".

9. On page 60561, in column 3, in the last paragraph, in the fifth line, the word "Foods" is corrected to read "Food".

§ 101.14 [Corrected]

10. On page 60563, in § 101.14 *Health claims: general requirements*, in paragraph (a)(1), in the ninth line, the word "that" is removed; and in column 2, in the third line, the word "or" is corrected to read "a"; in paragraph (a)(4), in the sixth line the word "substance" is corrected to read "component"; in paragraph (c)(1), in line 3, the word "welldesigned" is corrected to read "well-designed"; and on page 60564, in paragraph (d)(2)(iv), in the 12th line, the word "healthrelated" is corrected to read "health-related".

§ 101.70 [Corrected]

11. On page 60565, in column 3, in § 101.70 *Petitions for health claims*, in paragraph (j)(3)(ii), in the third line, the word "request" is corrected to read "requested".

Dated: February 21, 1992.

Food Labeling; Reference Daily Intakes and Daily Reference Values; Mandatory Status of Nutrition Labeling and Nutrient Content Revision; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a proposed rule that appeared in the **Federal Register** of November 27, 1991 (56 FR 60366). The document supplemented and republished in modified form, FDA's proposals entitled "Food Labeling; Mandatory Status of Nutrition Labeling and Nutrient Content Revision" (55 FR 29487, July 19, 1990) and "Food Labeling; Reference Daily Intakes and Daily Reference Values" (55 FR 29476, July 19, 1990). The document was published with some editorial errors. This document corrects those errors.

DATES: Written comments by February 25, 1992. The agency is proposing that any final rule that may issue based upon this proposal become effective 6 months following its publication in accordance with requirements of the Nutrition Labeling and Education Act of 1990.

ADDRESSES: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Virginia L. Wilkening, Center for Food Safety and Applied Nutrition (HFF-204), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202-245-1561.

In FR Doc. 91-27155, appearing on page 60366, in the **Federal Register** of Wednesday, November 27, 1991, the following corrections are made:

1. On page 60367, in the second column, in the second full paragraph, line 10, the phrase "intends to address this subject in a subsequent document" is corrected to read "is addressing this subject elsewhere in this issue of the **Federal Register**"

2. On page 60374, in the first column, line 1, "standards" is corrected to read "standard".

3. On page 60375, in the second column, the second table is corrected to read as follows:

NUTRITION INFORMATION PER SERVING

Serving size:	1 tbsp (14 g)
Servings per container:	64
Calories	130
Calories from total fat	130
Total fat	14 g
Saturated fat	2 g
Polyunsaturated fat	4 g
Monounsaturated fat	6 g
Total carbohydrate	0 g
Protein	0 g
Sodium	0 mg

Not a significant source of cholesterol, complex carbohydrate, sugars, dietary fiber, vitamin A, vitamin C, calcium, or iron.

4. On page 60379, in the second column, in the paragraph numbered "(1)", line 10, "¼" is added before "gram" and in line 11, "1" is corrected to read "0.25".

5. On page 60381, in the second column, in the second full paragraph, in the fourth line from the bottom, the word "Amendnent" is corrected to read "Amendment".

6. On page 60384, in the hypothetical label for B-vitamins, the entry for "Sugars, g" is corrected by indenting it 2 spaces under the entry "Total Carbohydrate, g".

7. On page 60386, in the first column, Reference 20 is corrected by removing "(1988-1991)".

§ 101.9 [Corrected]

8. On page 60387, in the third column, in § 101.9 *Nutrition labeling of food*, in paragraph (c)(4)(ii), "Unsaturated fatty acid," is corrected to read "Unsaturated fat," the first time it appears; on page 60389, in paragraph (c)(8)(iii), the phrase "and 14 grams of protein for infants" is corrected to read "14 grams of protein for infants, 60 grams of protein for pregnant women, and 65 grams for lactating women"; and in the third column, in paragraph (c)(11)(iii), "percentages hall" is corrected to read "percentages shall".

§ 101.36 [Corrected]

9. On page 60393, in the second column, in § 101.36 *Nutrition labeling of dietary supplements of vitamins and minerals*, in paragraph (b)(1), "practicably" is corrected to read "practicable".

Dated: February 21, 1992.

Food Labeling; Serving Sizes; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Reproposed rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a proposed rule on serving sizes that appeared in the **Federal Register** of November 27, 1991 (56 FR 60394). The document was published with some typographical and editorial errors. This document corrects those errors.

DATES: Written comments by February 25, 1992. The agency is proposing that any final rule that may issue based upon this proposal become effective 6 months following its publication in accordance with requirements of the Nutrition Labeling and Education Act of 1990.

ADDRESSES: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Youngmee K. Park, Center for Food Safety and Applied Nutrition (HFF-265), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-485-0089.

In FR Doc. 91-27157, appearing on page 60394 in the **Federal Register** of Wednesday, November 27, 1991, the following corrections are made:

1. On the same page in the "Action" line, "Proposed rule" is corrected to read "Reproposed rule".

2. On page 60400, in the first column, in the second full paragraph, line 1, the phrase "FDA acknowledges that the 1987-1988 NFCS data" is corrected to read "FDA acknowledges that NFCS data".

3. On page 60402, in the first column, in the second paragraph, the first sentence is corrected to read "Fish sticks are included in the category of 'Fish, Shellfish, and Meat or Poultry Substitutes: Entrees (cooked) without sauce'."

4. On page 60403, in the third column, in the second paragraph, line 7, the parenthetical statement "(e.g., consumption increased or decreased substantially)" is corrected to read "(e.g., CSS values increased or decreased substantially)".

5. On page 60405, in the second column, in paragraph A, line 3, "and the sample sizes for both surveys were equally adequate" is removed and the word "then" is added in its place; in the third column, paragraph C, line 4, the word "recipies" is corrected to read "recipes".

6. On page 60410, in the third column, in the second full paragraph, line 8, the phrase "Compliance Act and for compliance" is corrected to read "Competitiveness Act and for compliance".

7. On page 60415, in the third column, Reference 7, line 5, "Population Strategies for Blood Cholesterol Reduction, NIH Publication No. 90-3047," is corrected to read "Blood Cholesterol Levels in Children and Adolescents', NIH Publication No. 91-2732,".

8. On page 60416, in the first column, Reference 28, line 2, the words "Nonresponse of" are corrected to read "Nonresponse on", and in Reference 29, line 2, the words "for women 10-50" is corrected to read "for women 19-50,".

9. On page 60418, in the second column, Table 2, under the heading "Product category", eight lines from the bottom, the entry "Grains, e.g., rice, barley, plain or seasoned" is corrected to read "Grains, e.g., rice, barley, plain."

10. On page 60418, in the third column, Table 2, for the entry "Sour cream" the reference amount "25 g." is corrected to read "30 g."

11. On page 60419, the third column, for the entry "Confectioner's sugar" the reference amount "2 tbsp." is corrected to read "¼ cup."

Dated: February 21, 1992.

State Petitions Requesting Exemption from Federal Preemption; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a proposed rule that provided for petitions requesting exemption from preemption for certain State or local food standards and other labeling requirements that are preempted under the provisions of the Nutrition Labeling and Education Act of 1990 that appeared in the **Federal Register** of November 27, 1991 (56 FR 60528). The proposed rule published with typographical and editorial errors. This document corrects those errors.

DATES: Written comments by February 25, 1992. The agency is proposing that any final rule that may issue based upon this proposal become effective November 6, 1992, or 30 days after date of publication in the **Federal Register**, if earlier.

ADDRESSES: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857, 301-443-1751.

Food Labeling: Health Claims; Calcium and Osteoporosis; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a proposed rule that appeared in the **Federal Register** of November 27, 1991 (56 FR 60689). The document proposed

to authorize the use on food labels and in labeling of health claims relating to the association between calcium and osteoporosis. The document was published with some editorial errors. This document corrects those errors.

DATES: Written comments by February 25, 1992. The agency is proposing that any final rule that may issue based upon this proposal become effective 6 months following its publication in accordance with requirements of the Nutrition Labeling and Education Act of 1990.

ADDRESSES: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Mona S. Calvo, Center for Food Safety and Applied Nutrition (HFF–265), Food and Drug Administration, 200 C Street, SW., Washington, DC 20204, 202–485–9564.

In FR Doc. 91–27160, appearing on page 60689, in the **Federal Register** of Wednesday, November 27, 1991, the following corrections are made:

1. On page 60689, in the first column in the "**SUMMARY**" caption, in the third line from the bottom, the word "Recommended" is corrected to read "Reference".

2. On page 60693, in the third column, in the third paragraph, in the third line, the word "Assessment" is corrected to read "Comment".

3. On page 60695, in the first column, in the second full paragraph, in the fifth line, the words "or different skeletal sites" are added after the word "bone".

4. On page 60697, in the third column in the first full paragraph, in the fourth line from the bottom, the word "to" is corrected to read "of".

5. On page 60698, in the second column, in the first full paragraph, in the 12th line from the bottom, the word "because" is removed and the words "more to increase intake" are added in its place; in the third column, in the third full paragraph, in the second line from the bottom the word "quantitative" is corrected to read "quantitate".

§ 101.72 [Corrected]

6. On page 60705, in the second column, in § 101.72 *Health claims: calcium and osteoporosis*, paragraph (a), in the fifth line, the word "numerous" is corrected to read "of"; on page 60706, in paragraph (d)(5), in the third line, the word "recommended" is corrected to read "reference".

7. On page 60707, in Table 1, in the "Base Diet" column, in the second entry, "intake: 7" is corrected to read "intake"; in the "Additional Treatments" column, in the second entry, in the second to the last line, "no" is corrected to read "not"; in the "Comments" column, in the second entry, "decreased the incidence" is corrected to read "decrease the incidence".

8. On page 60708, in table 1, in the "Number and Description of Subjects" column, "of" is removed from the entry.

9. On page 60709, in Table 1, the "Source and Identity of Test Material" column, "Placebo micro crystalline cellulose calcium carbonate Calcium citratemalate (CCM)" is corrected to read "Placebo: micro crystalline cellulose; Calcium carbonate; Calcium citrate malate (CCM)."; in the "Dosage of Test Material Used" column, the entry is corrected to read "Placebo: 500 mg/day; Calcium carbonate: 500 mg/day elemental calcium; CCM: 500 mg/day elemental calcium"; in the "Other Factors Affecting Interpretation of Data" column, "of bone loss" is corrected to read "of bone loss"; in the "Results" column, in the 10th line, a period is added after the word "source"; and in the 32d line, a period is added after the word "CCM".

10. On page 60711, in Table 1, in the "Source and Identity of Test Material" column, "(L500 mg/day)" is corrected to read "(<500 mg/day)" and "(>500 mg" is corrected to read "(≥500 mg/day".

11–12. On page 60713, in Table 1, in the "Additional Treatments" column, "Range: 286 to 2,128" is removed.

13. On page 60715, in Table 1, in the "Number and Description of Subjects" column, in the first entry, "Mothers" is corrected to read "Mothers:".

14. On page 60718, in Table 1, in the "Additional Treatments" column, "Exercise, high dietary calcium n=9" is added after the first time "n=9" appears.

15. On page 60720, in Table 1, in the "Source and Identity of Test Material," "Dosage of Test Material Used," and "Base Diet" columns, a ":" is added after "Untreated controls".

16. On page 60724, in Table 1, in the "Additional Treatments" column, "hyperparathyroidis m" is corrected to read "hyperparathyroidism".

17. On page 60725, in Table 1, in the "Source and Identity of Test Material" column, "(n=28)" is corrected to read "(n=28);" "600 to 135" is corrected to read "800 to 1350"; and "(n=95)" is corrected to read "(n=95);".

Dated: February 21, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a proposed rule that appeared in the **Federal Register** of November 27, 1991 (56 FR 60825). The document was published with some editorial errors. This document corrects those errors.

DATES: Written comments by February 25, 1992. The agency is proposing that any final rule that may issue based upon this proposal become effective 6 months following its publication in accordance with requirements of the Nutrition Labeling and Education Act of 1990.

ADDRESSES: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Ellen M. Anderson, Center for Food Safety and Applied Nutrition (HFF–266), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5375.

In FR Doc. 91–27168, appearing at page 60825 in the **Federal Register** of Wednesday, November 27, 1991, the following corrections are made:

1. On page 60826, in the first column, in the first full paragraph, in the sixth line from the bottom, the phrase "descriptive terms for 'low sodium' and 'reduced sodium' foods" is corrected to read "descriptive terms for 'sodium free,' 'very low sodium,' 'low sodium,' and 'reduced sodium' foods"; and in the third column, second paragraph, in the third line from the bottom, the phrase "four clinical trials (Refs. 44, 70, 79, and 109), and three meta-analyses (Refs. 100, 106, and 107)" is corrected to read "and associated studies (Refs. 50, 51, 52, 53, 54, 58, 59, and 64); fifteen clinical trials (Refs. 41, 42, 44, 45, 55, 70, 71, 76, 79, 80, 109, 121, 122, 123, and 124); and five meta-analyses (Refs. 94, 97, 100, 106, 107)".

2. On page 60827, in the first column, in the third paragraph, line 14, the phrase "from the substance" is corrected to read "from reducing the substance".

3. On page 60829, in the third column, the heading for the section "3. 'Dietary Sodium Chloride and Blood Pressure,' 1991" is correctly revised to read: "3. 'Sodium and Hypertension,' 1991".

4. On page 60833, in the second column, line 6, the word "and" is corrected to read "of"; and in the second full paragraph, lines 12–14, the phrase "17 clinical trials (Refs. 41, 42, 44, 45, 55, 70, 71, 76, 79, 80, 94, 97, 109, 121 through 124)" is corrected to read "15 clinical trials (Refs. 41, 42, 44, 45, 55, 70, 71, 76, 79, 80, 109, and 121 through 124)".

5. On page 60836, in the third column, in the first full paragraph, lines 5 and 6, "HG" is corrected to read "Hg" the two places it appears.

6. On page 60837, in the second column, in the first full paragraph, line 6, add after § 101.14 "and the general requirements for sodium content and 'low sodium' claims set forth in proposed § 101.61"; and in line 19, "and" is corrected to read "or"; and in line 29, "§ 101.74(c)(2)" is corrected to read "§ 101.74(c)(1)".

7. On page 60838, in the second column, in the second full paragraph, line 14, "(Ref. 1982)" is corrected to read "(Ref. 12)".

8. On page 60841, in the third column, in Reference 17, the word "*Archieves*" is corrected to read "*Archives*".

9. On page 60842, in the first column, in Reference 34, "*Journal of*" is removed; in Reference 35, "*Journal of*" is removed and the word "*Sciences*" is corrected to read "*Science*"; and in the third column, in Reference 61, "(Sunpl)" is corrected to read "(Suppl.)".

10. On page 60843, in the first column, in Reference 68, "(Sunpl. I)" is corrected to read "(Suppl. I)"; in Reference 74, "DriHS" is corrected to read "DHHS"; in Reference 81, "DHRIS" is corrected to read "DHHS"; in the second column, in Reference 88, the title reading "The Biology and Medicine of Signal Transduction in *The Biology and Medicine of Signal Transduction*" is corrected to read "*The Biology and Medicine of Signal Transduction*"; in Reference 94, the author's name reading "Il Suh" is corrected to read "I. Suh"; and in the third column, Reference 108 is correctly revised to read as follows:

108. LSRO, Kotchen, T., "Evaluation of Publicly Available Scientific Evidence Regarding Certain Nutrient-Disease Relationships: 4. Sodium and Hypertension" prepared for the Center for Food Safety and Applied Nutrition, FDA, DHHS, FDA Contract No. 223–88–2124, Task Order No. 9, FASEB, November, 1991.

11. On page 60844, in the first column, in Reference 121, the word "Cororan" is corrected to read "Corcoran"; and in Reference 122, the word "estriction" is corrected to read "Restriction".

§ 101.74 [Corrected]

12. On page 60844, in § 101.74 *Health claims: sodium and high blood pressure*, paragraph (b), in the 19th line from the bottom of the second column, the phrase "males because they develop hypertension earlier in life" is corrected to read "males because they develop hypertension earlier in life than females"; in the third column, paragraph (c)(1), line 3, the phrase "§ 101.14 for health claims" is corrected to read "§ 101.14 for health claims" is corrected to read "§ 101.14 for health claims and of § 101.61 for 'low sodium' content claims"; and in paragraph (d) introductory text, line 1, the phrase "Sodium/hypertension in health claims" is corrected to read "Sodium/hypertension health claims".

13. On page 60850, in Table 2, under the heading "Results," in the fifth line from the bottom, "DPB" is corrected to read "DBP".

Dated: February 21, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

Food Labeling: Health Messages; Dietary Lipids and Cancer; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a proposed rule that appeared in the **Federal Register** of November 27, 1991 (56 FR 60764). The document proposed to authorize health claims on foods and food labeling that state that diets low in total fat may reduce the risk of some types of cancer, particularly colon, breast, and prostate, in the general population. The document was published with some editorial errors. This document corrects those errors.

DATES: Written comments by February 25, 1992. The agency is proposing that any final rule that may issue based upon this proposal become effective 6 months following its publication in accordance with requirements of the Nutrition Labeling and Education Act of 1990.

ADDRESSES: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: He-Chong C. Lee, Center for Food Safety and Applied Nutrition (HFF–265), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–485–0358.

In FR Doc. 91–27162, appearing at page 60764 in the **Federal Register** of Wednesday, November 27, 1991, the following corrections are made:

1. On page 60769, in the third column, in the fourth full paragraph, in the second line from the bottom, the word "an" is removed.

2. On page 60771, in the first column, in the fourth full paragraph, in line 7, the phrase "saturated fat component" is corrected to read "other fat components"; and in the third column, in the first full paragraph, in the second line from the bottom, the word "of" the first time it appears is removed, and the word "the" is added in its place.

3. On page 60778, in the third column, in Reference 62, in line 5, the word "*National*" is corrected to read "*New*".

4. On page 60779, in the first column, in Reference 82, the author's name "Vecchia, C. L." is corrected to read "LaVecchia, C."

5. On page 60785, in Table 1, in the "Results" column, the following statement was inadvertently omitted and is added to the end of the entry, beginning with a new line: "Gall bladder and common duct tumor: Incidence of polyps in common duct was significantly higher in beef tallow group than corn oil group; fat type did not significantly affect the incidence. Fat level did not consistently affect tumorigenesis in gall bladder or common duct. Overall survival rate was significantly higher in high beef tallow and high mixed groups than low beef tallow and corn oil group"; and in the "Assessment" column, the following statement was inadvertently omitted and is added to the end of the entry, "rates of carcinoma incidence (2 percent in gall bladder and no report in common duct)".

6. On page 60786, in the "Diet" column, "High fat" is corrected to read "Corn oil"; the entry "linoleic 50.2 51.9" is corrected to read "linolic 50.2 51.9"; the entry "linoleic 4.6 1.6" is corrected to read "linoleic [sic] 4.6 1.6"; and in the "Assessment" column, beginning in line 12, the words "and we do not know the adequacy of linoleic acid in test diets" are removed.

7. On page 60788, in the "Additional Treatment" column, in lines 1 through 3, the chemical name "12–0–tetradecanoylphorbol-13-acetate (DMBA)" is corrected to read "7,12-dimethylbenz(a)anthracene (DMBA)".

8. On page 60790, in the "Results" column, in line 12, the phrase "of metastatic fish oil" is corrected to read "metastatic foci"; and in line 14, "inhibit" is corrected to read "inhibited".

9. On page 60797, in the "Results" column, in line 3, the word "of" is corrected to read "and"; and in line 6, the phrase "but not as w" is corrected to read "but not as weight".

10. On page 60799, in the "Results" column, line 5, "(n=0.5)" is corrected to read "(r=0.51)".

11. On page 60801, in the "Results" column, in line 6, the word "HIGHEST" is corrected to read "confidence interval".

12. On Page 60804, in the "Assessment" column, in line 2, "calcium" is corrected to read "cancer".

13. On page 60806, in the "Study Design and Population" column, in the second entry, in line 6, "30 year" is corrected to read "30 years of age"; and in line 8, "48" is corrected to read "148".

14. On page 60807, in the "Results" column, in the first entry, in line 8, "development" is corrected to read "involvement".

Dated: February 21, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

Food Labeling; Health Claims; Dietary Fiber and Cancer; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting the proposed rule that appeared in the Federal Register of November 27, 1991 (56 FR 60560) on dietary fiber and cancer. The document was published with some editorial errors. This document corrects those errors.

DATES: Written comments by February 25, 1992. The agency is proposing that any final rule that may issue based upon this proposal become effective 6 months following its publication in accordance with requirements of the Nutrition Labeling and Education Act of 1990.

ADDRESSES: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Joyce J. Saltsman, Center for Food Safety and Applied Nutrition (HFF-265), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-485-0316.

In FR Doc. 91-27164, appearing at page 60566 in the **Federal Register** of Wednesday, November 27, 1991, the following corrections are made:

1. On page 60566, in the third column, in the first full paragraph, in the fourth line, the parenthetical "(DHHS/PHS, 1990)" is corrected to read "(Ref. 46)".

2. On page 60568, in the second column, in the fourth full paragraph, in the seventh line; and on page 60569, in the first column, in the third full paragraph, in the first line, the words "The Surgeon General's Report Nutrition and Health" is corrected to read "The Surgeon General's Report on Nutrition and Health".

Dated: February 21, 1992.

Food Labeling: Health Claims and Label Statements; Folic Acid and Neural Tube Defects; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting the proposed rule that published in the Federal Register of November 27, 1991 (56 FR 60610). The document proposed not to authorize the use on the label and labeling of foods, including dietary supplements, of health claims relating to an association between folic acid and reduction in risk of neural tube defects. The document was published with some editorial errors. This document corrects those errors.

DATE: Submit written comments by February 25, 1992. The agency is proposing that any final rule that may issue based upon this proposal become effective 6 months following its publication in accordance with requirements of the Nutrition Labeling and Education Act of 1990.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857

FOR FURTHER INFORMATION CONTACT: Jeanne I. Rader, Center for Food Safety and Applied Nutrition (HFF-268), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202-472-6867.

In FR Doc. 91-27167, appearing at page 60610 in the **Federal Register** of Wednesday, November 27, 1991, the following corrections are made:

1. On page 60610, in the first column, in the "DATES" paragraph, in the first line, "(January 27, 1992" is corrected to read "February 25, 1992".

2. On page 60611, in the first column, in the third paragraph, in the third line, the word "with" is added after "vary".

3. On page 60614, in the third column, in the fourth full paragraph, in the fifth line, "casecontrol" is corrected to read "case-control".

4. On page 60616, in Table 2, in the "Results" column, in the fourth entry, the words "than for those whose diets provided <100 μg folate per day" is added after the phrase "folate per day" at the end of the entry.

5. On page 60618, in the first column, in the first full paragraph, in the 14th line, "360 mg" is corrected to read "360 μg".

6. On page 60619, in the third column, under paragraph "a.", in the second line, the word "Dericonceptional" is corrected to read "Periconceptional".

7. On page 60621, in the first column, in the second complete paragraph, in the sixth line, the word "kingdom" is removed.

8. On page 60623, in the first column, under item VI., in the second line, "January 27, 1992" is corrected to read "February 25, 1992"; in the second column, in Reference 5, the title "*British Journal of Obstetrics and the Gynaecology*', is corrected to read "*British Journal of Obstetrics and Gynaecology*"; in Reference 9, the word "*Enidemiologic*" is corrected to read, "*Epidemiologic*".

9. On page 60624, in the first column, in Reference 33, the word "*Diaanosis*" is corrected to read "*Diagnosis*".

Dated: February 21, 1992.

Food Labeling: Health Claims and Label Statements; Omega-3 Fatty Acids and Coronary Heart Disease; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a proposed rule that appeared in the Federal Register of November 27, 1991 (56 FR 60663). The document proposed not to authorize the use on foods, including dietary supplements, of health claims relating to the association between omega-3 fatty acids and coronary heart disease. The document was published with some editorial errors. This document corrects those errors.

DATES: Written comments by February 25, 1992. The agency is proposing that any final rule that may issue based upon this proposal become effective 6 months following its publication in accordance with requirements of the Nutrition Labeling and Education Act of 1990.

ADDRESSES: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: John C. Wallingford, Center for Food Safety and Applied Nutrition (HFF–265), Food and Drug Administration, 200 C Street, SW., Washington, DC 20204, 202–245–0835.

In FR Doc. 91–27166, appearing on page 60663 in the **Federal Register** of Wednesday, November 27, 1991, the following corrections are made:

1. On page 60663, in the third column, under the **SUPPLEMENTARY INFORMATION** caption, in the first paragraph, in the second line from the bottom, "403(r)(i)(B)" is corrected to read "403(r)(1)(B)"; and in the third paragraph, line 3, "(b)(1)(a)(x)" is corrected to read "(b)(1)(A)(x)".

2. On page 60665, in the first column, in the third full paragraph, in the second line from the bottom, the word "specific" is removed; and in the second column, in the first full paragraph, lines 27–29, "on 'Cardiovascular Effects from Omega-3 Fatty Acids' " is removed, and " 'Evaluation of Publicly Available Scientific Evidence Regarding Certain Nutrition-Disease Relationships: 7. Omega-3 Fatty Acids and Heart Disease' " is added in its place.

3. On page 60666, in the first column, line 17, the period after the word "comment" is removed, and the words "except for the submitted book, 'Health Effects of ω3 Polyunsaturated Fatty Acids in Seafoods.' " are added in its place; in the second column, under the heading "B. *Other Reports*", in the eighth line, "(Ref. 115)" is added after the word "documented"; and in the third column, in the last paragraph, line 1, "(Ref. 100)" is added after the word "report".

4. On page 60667, in the first column, in the first full paragraph, in the third line from the bottom, "(Ref. 100)" is added after the word "report"; in the third full paragraph, line 13, "placebocontrolled" is corrected to read "placebo-controlled"; and in the second column, in the second full paragraph, line 3, the word "Assessment" is corrected to read "Comments".

5. On page 60672, in the first column, in the second full paragraph, line 1, "(Ref. 100)" is added after the word "report".

6. On page 60673, in the first column, in Reference 7, "W–3" is corrected to read "ω–3"; in the second column, in Reference 20, "N–3" is corrected to read "ω–3"; in Reference 27, third column, line 2, "*Arterio Sclerosis,*" is corrected to read "*Arteriosclerosis,*"; and in Reference 41, "N–3" is corrected to read "ω–3".

7. On page 60674, in the first column, in References 42 and 54, "N–3" is corrected to read "ω–3"; in the second column, in Reference 61, "W–3" is corrected to read "ω–3"; References 68 and 69 are corrected to read as follows:

68. Hirai, A., T. Terano, H. Saito, Y. Tamura, S. Yoshida, "Clinical and Epidemiological Studies of Eicosapentaenoic Acid in Japan," in *Proceedings of the AOCS Short Course on Polyunsaturated Fatty Acids and Eicosanoids*, W. E. M. Lands, Ed. AOCS, Champaign, IL.

69. Hollander, W., S. Hong, B. J. Kirkpatrick, A. Lee, M. Colombo, S. Prusty, "Differential Effects of Fish Oil Supplements on Atherosclerosis," *Circulation*, 76:IV–313, 1987.

8. On the same page, in the third column, in Reference 79, line 1, the author's name "Kusion, S. E." is corrected to read "Kasim, S. E."; and in Reference 86, "N–3" is corrected to read "ω–3".

9. On page 60675, in the first column, in References 88 and 89, "N–3" is corrected to read "ω–3"; also in Reference 89, line 4, the word "*Intern*" is corrected to read "*Internal*"; in Reference 91, "N–3" is corrected to read "ω–3"; in Reference 100, the title "Cardiovascular Effects from Omega-3 Fatty Acids" is corrected to read "Evaluation of Publicly Available Scientific Evidence Regarding Certain Nutrition-Disease Relationships: 7. Omega-3 Fatty Acids and Heart Disease"; in the second column, in Reference 111, "N–3" is corrected to read "ω–3"; in Reference 114, "W–3" is corrected to read "ω–3"; and in the third column, Reference 122 is corrected to read as follows:

122. Weiner, B. H., I. S. Ockene, P. H. Levine, et al., "Inhibition of Atherosclerosis by Cod-Lover Oil in a Hyperlipidemic Swine Model," *New England Journal of Medicine*, 315:841–846, 1986.

10. On page 60676, in the first column, in Reference 133, "N–3" is corrected to read "ω–3".

11. On page 60677, in Table 1, in the "Reference" column, the fifth entry is corrected to read as follows: "Harai et al. 1980 in *Proceedings of the AOCS Short Course on Polyunsaturated Fatty Acids and Eicosanoids*, W. E. M. Land, editor, AOCS, Champaign, IL."

12. On page 60679, in Table 2, in the "Comments" column, in the second entry, line 6, the word "can" is removed.

13. On page 60682, in Table 2, in the "Subjects" column, in the eighth entry, "insulin-dependent" is corrected to read "noninsulin-dependent".

14. On page 60685, in Table 2, in the "Reference" column, in the eighth entry, "9:352" is added after the word "*Nutrition*"; and in the "Amount" column, in the ninth entry, "n–3" is corrected to read "ω–3".

15. On page 60686, in Table 2, in the "Reference" column, in the sixth entry, "Suppl." is removed, and "48:469" is added in its place; and in the last entry, "77:53" is added after the word "*Atherosclerosis*"; in the "Amount" column, in the seventh entry, "n–3" is corrected to read "ω–3".

16. On page 60687, in Table 2, in the "Amount" column, in the first entry, "n–3" is corrected to read "ω–3".

17. On page 60688, in Table 2, in the "Findings" column, in the second entry, "Tgs" is corrected to read "TGs"; in the fourth entry, the word "angine" is corrected to read "angina"; and in the "Comments" column, in the sixth entry, lines 3 and 4, the phrase "from n–3 fatty acids, large amt of n–3s" is corrected to read "from ω–3 fatty acids, large unit of ω–3s".

18. On page 60689, in the paragraph following Table 2, at the end of line 4, the words "RBC, red blood cell; IDDM, insulin-dependent diabetes mellitus; NIDDM, Noninsulin-dependent diabetes mellitus; MI myocardial infarction (heart attack); AMA, American Medical Association; GI, gastrointestinal; HbA, hemoglobin A", which were inadvertently omitted, are added.

Dated: February 21, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

21 CFR Part 130

[Docket No. 91N–0317 et al.]

RIN 0905–AD08

Food Standards: Requirements for Substitute Foods Named by use of a Nutrient Content Claim and a Standardized Term; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a proposed rule that appeared in the **Federal Register** of November 27, 1991 (56 FR 60512). The document proposed to amend the General Provisions for food standards to prescribe a general definition and standard of identity for substitute foods named by use of a nutrient content claim defined in 21 CFR part 101 (such as "fat free," "low calorie," and "light") in conjunction with a traditional standardized name (for example "reduced-fat sour cream"). The document was published with some editorial errors. This document corrects those errors.

DATES: Written comments by February 25, 1992. The agency is proposing that any final rule that may issue based upon this proposal become effective 6 months following its publication in accordance with requirements of the Nutrition Labeling and Education Act of 1990.

ADDRESSES: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Shellee A. Davis, Center for Food Safety and Applied Nutrition (HFF–414), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–485–0112.

In FR Doc. 91–27170, appearing on page 60512 in the **Federal Register** of Wednesday, November 27, 1991, the following corrections are made:

1. On page 60517, in the third column, in the second full paragraph, in the eighth line from the bottom, "403(r)(5)(CC)" is corrected to read "403(r)(5)(C)".

2. On page 60518, in the second column, in the third full paragraph, in the last line, "§ 101.62(b)(2)(ii)" is corrected to read "§ 101.13(j)(2)(ii)".

3. On page 60520, in the second column, in the second full paragraph, in the fifth line, "21 CFR 133.134" is corrected to read "21 CFR 133.133".

§ 130.10 [Corrected]

4. On page 60523, in the first column, in § 130.10 *Requirements for substitute foods named by use of a nutrient content claim and a standardized term*, in paragraph (c), in the third line from the bottom, "onehalf" is corrected to read "one-half".

Dated: February 21, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

[Docket No. 91N–0096]

RIN 0905–AB67

Food Labeling: Health Claims and Label Statements; Lipids and Cardiovascular Disease; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a proposed rule that appeared in the **Federal Register** of November 27, 1991 (56 FR 60727), that proposed to authorize the use on foods and food labeling of health claims relating to the association between reduction in dietary intake of lipids (particularly saturated fats and cholesterol), decreased blood cholesterol, and decreased risk of cardiovascular disease, particularly coronary heart disease. The document was published with some editorial errors. This document corrects those errors.

DATES: Written comments by February 25, 1992. The agency is proposing that any final rule they may issue based upon this proposal become effective 6 months following its publication in accordance with requirements of the Nutrition Labeling and Education Act of 1990.

ADDRESSES: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Paddy Wiesenfeld, Center for Food Safety and Applied Nutrition (HFF–268), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–245–1492.

In FR Doc. 91–27169 appearing on page 60727, in the **Federal Register** of Wednesday, November 27, 1991, the following corrections are made:

1. On page 60728, in the first column, in the first full paragraph, line 14, "(omega-6-fatty acids)" is corrected to read "(omega-3-fatty acids)"; and in line 15, (omega-3-fatty acids)" is corrected to read "(omega-6-fatty acids)".

2. On page 60731, in the first column, in the first full paragraph, in the fifth line from the bottom, the word "fat" is corrected to read "products"; in the last line "Ref. 150" is corrected to read "Ref. 29"; and in the third column, after the first full paragraph, the following paragraph was inadvertently omitted and is added to read as follows:

Many recent studies have demonstrated a positive link between dietary saturated fatty acids and serum cholesterol levels within populations. These results strengthen the previous conclusions based on between populations studies which showed a clear correlation of saturated fatty acid and CHD. Unanswered questions, however, still persist about the mechanisms by which saturated fatty acids raise total cholesterol and variability of individual response to saturated fatty acids. Some recent data suggest that variability of response to saturated fatty acid is congruent with that of dietary cholesterol.

3. On page 60733, in the first column, in the third full paragraph, line 9 "(5.65 mmol/L; 218 mg/dL) (5.65 mmal/L: 218 mg/dL)" is corrected to read "(5.56 mmol/L; 218 mg/dL)"; and in line 15, "5.45 mmal/L" is corrected to read "5.45 mmol/L"; and in the third column, in the second full paragraph, the last line, "220" is corrected to read "200".

4. On page 60734, in the first column, in the last paragraph, line 2, the word "*cholesterol* " is added to the heading, after the word "serum"; in the third column, before paragraph "(2)", the following paragraph, which was inadvertently omitted, is added to read as follows:

The effectiveness of dietary counseling on the appearance of new coronary lesions was reported by Blankenhorn et al. (Ref. 7). Eighty-two placebo controls out of 162 subjects of the (randomized, blinded, controlled; Cholesterol Lowering Atherosclerosis Study (CLAS)) trial were examined. Dietary goals for the placebo controlled subjects were to reduce total dietary fat and saturated fat to 26 and 5 percent of calories, respectively. In those subjects with no new coronary lesions, calories from total and staturated fat was 27.5 and 7.4 percent, respectively. In those subjects with new coronary lesions, the percent of calories from total fat and saturated fat was 34.1 and 9.2 percent, respectively. Dietary assessment was determined from 24-hour dietary recall data.

5. On page 60735, in the first column, in the first full paragraph, line 1, the word "of" is added after the word "number"; and in line 2, "and clinical trials" is removed; in the fourth full paragraph, line 6, "(Ref. 66)" is added after the word "levels"; in the second column, line 13, "2–" is corrected to read "25"; in the first full paragraph, line 1, "(Ref. 41)" is added after the word "study"; and in the third column, in the third full paragraph, line 9, the word "and" is added before the word "salad"

6. On page 60736, in the first column, in the first full paragraph, line 3, "1885" is corrected to read "1985"; and the last sentence is removed.

7. On page 60738, in the first column, in the first paragraph, line 10, "40" is corrected to read "400".

8. On page 60739, in the first column, in the second full paragraph, in the seventh line from the bottom "(Ref.)" is corrected to read "(55 FR 29487)"; in the fourth line from the bottom "(Ref.)" is corrected to read "(56 FR 12932)"; in the third column, in the second full paragraph, line 14, the words "The issue of" are removed and the words "Another major issue, the relationship of" are added in their place, and in line 15, a comma is added after the word "cancer".

9. On page 60740, in the first column, in the second full paragraph, line 15, the words "be made" are added after the word "must".

10. On page 60742, in the third column, in Reference 3, "Hypertension" is corrected to read "*Hypertension*"; in Reference 11, line 3, the word "Apolipoprotein" is removed; and in line 4, "Apol ipoprote in" is corrected to read "Apolipoprotein".

11. On page 60743, in the third column, Reference 54, is corrected to read as follows:

54. Grundy, S. and G. L. Vega, "Plasma Cholesterol Responsivenes to Saturated Fatty Acids," *American Journal of Clinical Nutrition*, 47:822–824, 1988.

12. On the same page, in Reference 61, the author's name "Hegsted, M. D." is corrected to read "Hegested, D. M."; in Reference 62, the author's name "J. S. Charnoci" is corrected to read "J. S. Charnock".

13. On page 60744, in the second column, in Reference 86, "Intervention Metabolism" is corrected to read "Intervention, *Metabolism*.

14. On page 60745, in the first column, in Reference 104, "Cholesterol Physiological Reviews" is corrected to read "Cholesterol, *Physiological Reviews*,"; in the third column, in Reference 145, "325:462–6" is corrected to read "325:461–466".

15. On page 60746, in the first column, Reference 152 was inadvertently omitted and is added to read as follows:

152. Crâne, N., "Lipids and Cardiovascular Disease—Food that Would and Would Not Qualify for a Health Claim," Memo to FDA File, References for Food Labeling: Health Claims; Lipids and Cardiovascular Disease: Proposed Rule, October 23, 1991.

16. On page 60748, in Table 1, in the "Results" column in the second entry, line 9, the word "reduction" is corrected to read "increase".

17. On page 60749, in Table 1, in the "Duration" column, in the first entry, "Cross-sectional" is corrected to read "N/A".

18. On page 60750, in Table 1, in the "Study Design" column, in the second entry, line 3, the word "werum" is corrected to read "serum"; and in the "Results" column, in the first entery, line 11, "(<5.16 mml/l)" is corrected to read "(<5.16 mmol/l)".

19. On page 60751, in Table 1, in the "Results" column, in the first entry, line 10, "1090" is corrected to read "1909".

20. On page 60753, in Table 2, in the "Assessment/comments" column, in the first entry, lines 2–3, "ND/DIDDM" is corrected to read "ND/NIDDM groups".

21. On page 60754, in Table 2, in the "Method/test/dose" column, a sentence was inadvertently omitted and is added to the end of the first entry to read as follows: "Diets enriched in MUFA and PUFA compared; 17% of calories derived from either MUFA or PUFA; SFA concentration identical in two diets."; and an entry for Blankenhorn, which was inadvertently omitted, is added after the firt entry to read as follows:

BILLING CODE 4160-01-M

Reference	Study design	Study population	Duration	Method/test/dose	Results	Assessment/comments
Blankenhorn et al. 1990 (Ref. 7)	Prospective analysis of random, blind controlled angiographic clinical trial.	162 (82 placebo) subjects of cholesterol lowering atherosclerosis study (CLAS); men 40-59 years old with progressive atherosclerosis non-smokers, diet counseled.	N/A	Angiographic analyses of atherosclerotic designs.	Increased consumption of total fat and PUFA was associated with an increase in new lesions. Increase intake of lauric, oleic and linoleic, significantly increased risk. Those with no new lesions consumed more low fat meats, low fat dairy products. Authors suggested substitutions of protein and carbo for total fat, SFA and not PUFA and MUFA. In addition, transport and metab of UFA are different in early stages of atherogenesis as compared with late stages because diet FA can influence a variety of arterial wall processes.	Angiographic examination done well with 2 experts viewing simultaneously, blind, duplicated samples.

BILLING CODE 4160-01-C

57 ISS 45 MR 6 19 92 UMI

22. On the same page, in Table 2, in the "Method/test/dose" column, in the fourth entry, lines 8–9, "American Heart Association" is added before the word "diet," and the following text, which was inadvertently omitted, is added after the word "diet" to read as follows: "Actual dietary SFA consumed was between 9 and 11% of calories and cholesterol was between 211 and 288 mg/day. Diets assessed by 3-day food records prior to study and at 12 months."; in the "Results" column, in the third entry, in line 10, "APO I" is corrected to read "apo I"; and in lines 15–16, the words "LPL decreased 23% HL decreased 17%" is corrected to read "Lipoprotein lipase (LPL) decreased 23% and hepatic lipase (HL) decreased 17%".

23. On page 60755, in Table 2, in the "Method/test/dose" column, in the third entry, "High Fat diet vs Low Fat diet Lovastatin (40 mg/day) (drug)." is corrected to read "High fat diet (total fat 43% and SFA 18.9% of calories) and low fat diet (total fat 25% and SFA 8% of calories); Lovastatin (40 mg/day) (drug).".

24. On page 60756, in Table 2, in the "Method/test/dose" column, in the first entry, line 2, the words "1. PUFA enriched" is corrected to "1. PUFA enriched (Saf oil); in line 3, "2. MUFA enriched PUFA Saf oil MUFA O oil." is corrected to read "2. MUFA enriched (O. oil). SFA was 8.3% and cholesterol was 152 mg/day in both diets. MUFA concentration in PUFA enriched diet was 8.9% and 14% in MUFA enriched diet."; in the second entry, after the last line, the following text, which was inadvertently omitted, is added to read as follows: "Total fat was 29%, MUFA was 7.5% of calories, respectively; ratio of PUFA to SFA was 1.5."; in the "Results" column, in the third entry, line 13, the word "increase" is corrected to read "decrease".

25. On page 60757, in Table 2, in the "Reference" column, in the second entry, "(Ref. 53)" is corrected to read "(Ref. 54)"; in the third entry, "(Ref. 54)" is corrected to read "(Ref. 53)"; in the "Method/test/dose" column, the third entry is corrected to read as follows: "Solid Food diets. Diet 1. High SFA-high cholesterol (Fat 40%, SFA 19%, MUFA 15%, PUFA 6% of calories, cholesterol 900 mg/day). Diet 2. High MUFA/low cholesterol (Fat 40%, SFA 7%, MUFA 27%; PUFA 6% of calories, cholesterol 200 mg/day). Diet 3. High carbo-low fat (Fat 20%, SFA 7%, MUFA 7%, PUFA 6%, cholesterol 200 mg/day)."; and in the "Results" column, in the third entry, line 8, "col" is corrected to read "chol".

26. On page 60758, in Table 2, in the "method/test/dose" column, in the second entry, line 5, "chol' eggs" is corrected to read "chol=eggs"; in the "Results" column, in the second entry, line 3, "apo 8" is corrected to read "apo B".

27. On page 60760, in Table 2, in the "Method/test/dose" column, in the third entry, the following text, which was inadvertently omitted, is added after the last item: "Pre and post test diets, fat provided by mixture of fats (MF). Fat composition of diets as follows: Diet 1 (Canola >MUFA): SFA 5%, MUFA 20%, and PUFA 10% of calories. Diet 2 (Sunflower >PUFA): SFA 7%, MUFA 7%, and PUFA 22% of calories. Diet 3. MF: SFA 14%, MUFA 15% and PUFA 7% of calories."

28. On page 60762, in Table 2, in the "Study design" column, in the third entry, line 3, "lips" is corrected to read "lipids"; in the "Method/test/dose" column, in the second entry, the following text, which was inadvertently omitted, is added after the word "legumes": "Fat was 33.3% of calories, PUFA/SFA ratio was 0.45, and cholesterol was 300 mg/day."; and in the "Results" column, in the third entry, line 10, "ad" is corrected to read "and".

29. On page 60783, in Table 2, in the "Reference" column, in the first and second entries, "199" is corrected to read "1990" and in the second entry, "Rifail" is corrected to read "Rifai"; in the "Assessment/comments" column, in the first entry, line 5, the word "profession" is corrected to read "progression"; in the same column, in the third entry, line 11, "A–1" is corrected to read "A1".

30. On page 60764, in Table 2, in the "Method/test/dose" column, in the first entry, the following text, which was inadvertently omitted, is added after the word "Sun-MUFA": "Fat was 37 to 43% of calories in all diets. Fat composition of diets was as follows: Diet 1. SFA 21%, MUFA 14%, and PUFA 5% of calories; Diet 2. SFA 7%, MUFA 28%, and PUFA 19% of calories; and Diet 3. SFA 8%, MUFA 14%, and PUFA 19% of calories."

Dated: February 21, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

RIN 0905-AD08

Regulatory Impact Analysis of the Proposed Rules To Amend the Food Labeling Regulations; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Regulatory impact analysis statement; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting the regulatory impact analysis statement that appeared in the **Federal Register** of November 27, 1991 (56 FR 60856), which presented the regulatory impact analysis (RIA) that FDA had prepared under Executive Order 12291 and the Regulatory Flexibility Act (Pub. L. 96–354) on the costs and benefits of the food labeling regulations that the agency is currently proposing to amend. The document was published with some editorial errors. This document corrects those errors.

DATES: Written comments by February 25, 1992.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Richard A. Williams, Jr., Center for Food Safety and Applied Nutrition (HFF–303), Food and Drug Administration, 200 C Street, SW., Washington, DC 20204, 202–485–0271.

In FR Doc. 91–27171, appearing on page 60856 in the **Federal Register** of Wednesday, November 27, 1991, the following corrections are made:

1. On page 60860, Table 1 is corrected by revising the last entry and adding two additional entries to read as follows:

TABLE 1.—INDUSTRIES AFFECTED BY LABELING REGULATIONS

SIC	Industry name	(Phase I regulations) Standard foods, ingredients, and colors labeling	(Phase I regulations) Percent juice labeling	(Phase I regulations) Raw fruit, vegetables, and fish labeling	(Phase II regulations) Mandatory nutrition labeling, format, nutrient content claims
2099	Food preparations, nec [1]	X		X	X
2834	Dietary supplements				X
5411–99	Grocery stores			X	

[1] Not elsewhere classified.

2. On page 60871, Table 13, is corrected to read as follows:

TABLE 13.—ESTIMATED HEALTH EFFECTS [1] (OVER 20 YEARS)

	Cases avoided or life-years gained	Total annual cases
Cancer	35,179	500,000
CHD	4,028	514,000
Deaths avoided	12,902	
Life-years gained	80,930	

[1] Uses lagtimes of 2 and 10 years for the occurrence of CHD and cancer, respectively following a diet change.

3. On page 60871, in column 2, Table 14, the entry "Prostate cancer" is corrected to read "Prostate/breast cancer".

4. On page 60876, in column 2, in the last paragraph, line 5, "3.6 billion" is corrected to read "between $3.6 billion and $21 billion".

Dated: February 21, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

RIN 0905-AD08

Food Labeling; Use of Nutrient Content Claims for Butter; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; correction

SUMMARY: The Food and Drug Administration (FDA) is correcting a proposed rule that would permit the use of nutrient content claims ("descriptors") that are defined by regulations in 21 CFR part 101 to be made for butter (November 27, 1991, 56 FR 60523). The document was published with some editorial errors. This document corrects those errors.

DATES: Written comments by February 25, 1992. The agency is proposing that any final rule that may issue based upon this proposal become effective 6 months following its publication in accordance with requirements of the Nutrition Labeling and Education Act of 1990.

ADDRESSES: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

In FR Doc. 91–27150, appearing at page 60421, in the **Federal Register** of Wednesday, November 27, 1991, the following corrections are made:

1. On page 60424, in the second column, in line 21, "§ 101.13(a)" is corrected to read "§ 101.13(b)(3)".

2. On page 60425, in the first column, in the second full paragraph, in the third line from the bottom, "§ 101.13(a)(1)" is corrected to read "§ 101.13(g)(1)".

3. On page 60428, in the first column, in the fifth paragraph, the last sentence in the quoted material is corrected to read "In addition, section 403(a) of the act will continue to prohibit brand names that constitute false and misleading labeling, irrespective of whether the brand name was exempt under this provision."

4. On page 60429, in the first column, in line 4, the word " 'low." is corrected to read " 'low' "; in the second column, in the third full paragraph, in line 1, "section IV" is corrected to read "section V".

5. On page 60431, in the second column, in line 10, "0.5 g" is corrected to read "0.3 g"; and in the first full paragraph, line 11, "§ 101.62(d)(1)(i)(8))" is corrected to read "§ 101.62(d)(1)(i)(B))".

6. On page 60433, in the first column, in the third full paragraph, in line 11, "§ 101.60(b)(1)(ii)" is corrected to read "§ 101.61(b)(1)(iii)"; and in the second column, in the second full paragraph, in line 2, the words "to allow" are removed.

7. On page 60436, in the second column, in the second full paragraph, in line 11, "§ 101.60(c)" is corrected to read "§ 101.60(c)(1)".

8. On page 60437, in the first column, in the second full paragraph, in line 6, "§ 101.60(c)(1)(i)" is corrected to read "§ 101.60(c)(1)(ii)"; in the second column, in the third full paragraph, in line 11, the words " 'sugar free,' " are corrected to read "'sugars free'"; in the third column, in the first full paragraph, the second and third sentences are removed; and in the second full paragraph, lines 3 and 4 are corrected to read "stated its position concerning the term 'no sucrose,' saying that its".

9. On page 60439, in the first column, in the second full paragraph, in line 9, "(Ref. 33)" is corrected to read "Ref. 26)".

10. On page 60441, in the first column, in line 1, "§ 101.61(b)(4)(iii)" is corrected to read "§ 101.61(b)(4)(ii)"; in line 17, "§ 101.61(b)(2)(iii)" is corrected to read "§ 101.61(b)(2)(ii)"; in the third column, in the third full paragraph, in line 2, "§ 101.61(b)(2)(ii)" is corrected to read "§ 101.61(b)(2)(i)"; and in line 6, "§ 101.61(b)(4)(ii)" is corrected to read "§ 101.61(b)(4)(i)".

11. On page 60442, in the first column, in the second full paragraph, in line 15, "§ 105.66(c)(1)(i)" is corrected to read "§ 105.66(c)(1)(ii)".

12. On page 60447, in the first column, in the first full paragraph, in line 5, the word "changes" is corrected to read "claims"; in the third full paragraph, in line 2, "§ 101.13(j)(2)(iii)" is corrected to read "§ 101.13(j)(3)"; and in the second column, in the second full paragraph, in the second line from the bottom, the words "of the 1990 amendments" are added before the word "requires".

13. On page 60452, in the third column, in the fourth paragraph, in line 8, the word "sugar" is corrected to "sugars".

14. On page 60454, in the third column, in the second full paragraph, beginning in line 5, the words "that .reduced' and 'light." are corrected to read "that 'reduced' and 'light' "; and in the fourth full paragraph, in the last line, "201(a)" is corrected to read "201(n)".

15. On page 60457, in the first column, in the first paragraph, in the last line, the calculation reading "4.75×2.8=13.5 g.)" is corrected to read "4.75 (19 percent of the DRV) × 2.8=13.5 g.)".

16. On page 60459, in the third column, in the second full paragraph, in line 2, the words "in pursuing this end" are removed; and in line 12, "3(b)(2)(A)(iii)" is corrected "3(b)(1)(A)(iii)".

17. On page 60460, in the second column, in the fifth full paragraph, in line 2, the words "of the act" are added before the word "requires"; and in the third column, in the first full paragraph, in line 14, the word "etitioner" is corrected to read "petitioner".

18. On page 60461, in the third column, in the first full paragraph, in line 7, the word "nsleading" is corrected to read "misleading".

19. On page 60466, in the second column, in the first full paragraph, in line 1, the word "foods" is added after "ESL".

20. On page 60468, in the third column, in Reference 9, add "*Journal of Nutrition Education*" before "p. 51"; and in Reference 16, "Virginia Wilkening, February 12, 1991" is corrected to read "J. S. Benson, July 11, 1990."

21. On page 60469, in the first column, Reference 26 is corrected to read as follows:

26. Joint Food and Agriculture Organization/World Health Organization Food Standards Program, "Codex Standards For Foods For Special Dietary Uses Including Foods For Infants And Children And Related Code of Hygienic Practice," Codex Alimentarius Commission, Vol. IX, 1st ed., p.3, Rome, 1982.

22. On the same page, in the first column, in Reference 36, in line 3, the word "Service" is corrected to read "Serving"; in the second column, in Reference 46, in line 1, "0708" is corrected to read "070B"; and in Reference 52, in line 1, the word "Ledding" is corrected to read "Lidding".

§ 101.13 [Corrected]

23. On page 60470, in § 101.13 *Nutrient content claims—general principles*, in paragraph (j)(2)(i), in line 4, the word "labeling" is corrected to read "label" the first time it appears; in paragraph (j)(2)(iii), in line 1, "(iii)" is corrected to read "(3)"; on page 60471, in column 1, in paragraph (n), in line 2, the word "claim" is corrected to read "claims" and in line 4, the word "the" is added before the word "analytical"; and in paragraph (o)(7), in the last line, "§ 101.50(h)" is corrected to read "§ 101.69(o)".

§ 101.54 [Corrected]

24. On page 60471, in § 101.54 *Nutrient content claims for "source," "high," and "more"*, in paragraph (c)(1), beginning on line 7, the phrase "of the (RDI) or the (DRV)" is corrected to read "of the RDI or the DRV".

§ 101.60 [Corrected]

25. On page 60473, in § 101.60 *Nutrient content claims for the calorie content of foods*, in paragraph (b)(2) introductory text, in the last line, "§ 101.13(1)" is corrected to read "§ 101.13(l)"; in paragraph (b)(3) introductory text, in line 4, "§ 101.13(1)" is corrected to read "§ 101.13(l)"; in paragraph (b)(4), beginning in line 3, the phrase "to describe a food, except mealtype products as defined in § 101.13(1)" is corrected to read "on the label or labeling of a food, except meal-type products as defined in § 101.13(l)"; in paragraph (b)(5), the phrase "including meal type products as defined in § 101.13(1)," is corrected to read "except meal-type products as defined in § 101.13(l),"; and paragraph (b)(6), which was inadvertently omitted is added to read as follows:

(6) A comparative claim using the term "fewer" may be used on the label or labeling of meal-type products as defined in § 101.13(l), provided that:

(i) The product contains at least 25 percent fewer calories, with a minimum reduction of more than 105 calories per

reference amount customarily consumed, where appropriate, and per labeled serving size, than the reference food that it resembles and for which it substitutes as defined in §101.13(j)(1)(i), (j)(1)(ii), and (j)(1)(iii); and

(ii) Meets the requirements of paragraph (b)(5)(ii) of this section.

26. On the same page, the heading for paragraph (c)(1) is corrected to read as follows:

(c) * * * (1) *Use of terms such as "sugars free," "free of sugars," "no sugars," "zero sugars," "trivial source of sugars," "negligible source of sugars," or "dietarily insignificant source of sugars."*

27. On the same page, in paragraph (c)(4), in line 3, the word "meal type" is corrected to read "meal-type".

§ 101.61 [Corrected]

28. On page 60474, in § 101.61 *Nutrient content claims for the sodium content of foods*, in paragraph (b)(1)(ii), the word "sodium" is corrected to read "salt" the first time it appears; in paragraph (b)(2) introductory text, in line 4, the word "mealtype" is corrected to read "meal-type".

§ 101.69 [Corrected]

29. On page 60475, in § 101.69 *Petitions for nutrient content claims*, in paragraph (m)(3), in the second line from the bottom, "paragraph (e)" is corrected to read "paragraph (g)"; and on page 60476, in paragraph (n)(1), in paragraph "B.", in line 5, the word "indequate" is corrected to read "inadequate".

30. On page 60477, in the first column, in paragraph (o)(2)(ii), lines 2 and 3 are corrected to read "e.g., it lacks any of the data required by this part, it presents"; in paragraph (o)(3), in the second line from the bottom, "paragraph (e)" is corrected to read "paragraph (g)".

§ 101.95 [Corrected]

31. On page 60477, the section heading for § 101.95 is corrected to read as follows:

§ 101.95 "Fresh," "freshly ," "fresh frozen," "frozen fresh".

Dated: February 21, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

[Docket No. 91N–0099]

RIN 0905–AB57

Food Labeling: Health Claims; Dietary Fiber and Cardiovascular Disease; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a proposed rule that appeared in the **Federal Register** of November 27, 1991 (56 FR 60582). The document proposed not to authorize the use on foods, including dietary supplements, of health claims relating to the association between dietary fiber and cardiovascular disease. The document was published with some editorial errors. This document corrects those errors.

DATES: Written comments by February 25, 1992. The agency is proposing that any final rule that may issue based upon this proposal become effective 6 months following its publication in accordance with requirements of the Nutrition Labeling and Education Act of 1990.

ADDRESSES: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Joyce J. Saltzman, Center for Food Safety and Applied Nutrition (HFF–265), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–485–0316.

In FR Doc. 91–27165, appearing on page 60582 in the **Federal Register** of Wednesday, November 27, 1991, the following corrections are made:

1. On page 60586, in the second column, in the first paragraph, in the third line from the bottom, "per 1,000 kcal" is corrected to read "g per 1,000 kcal"; and in the second paragraph, in the second line, "Implication" is corrected to read "Implications".

2. On page 60588, in the first column, in the second full paragraph, in the sixth line, "3 soluble" is corrected to read "3 g soluble"; and in the fourth full paragraph, in the seventh line, "(27" is corrected to read "(ages 27".

3. On page 60589, in the second column, in the third full paragraph, in the fourth line from the bottom, the word "was" is corrected to read "were".

4. On page 60590, in the first column, in the third full paragraph, in the third line, the word "isaqbol" is corrected to read "isagbol".

5. On page 60591, in the first column, in the second paragraph, in the fourth line, "Ref. 75" is corrected to read "Ref. 74"; in third paragraph, in the 17th line, "Ref. 74" is corrected to read "Ref. 73"; in the fourth paragraph, in the second line, "Ref. 73" is corrected to read "Ref. 72"; in the second column, in the second line, "Ref. 73" is corrected to read "Ref. 72"; and in the first full paragraph, in the eighth line from the bottom, "Ref. 72" is corrected to read "Ref. 51".

6. On page 60594, in the third column, in Reference 38, "Stamler, J.," should appear after "38." and "Population Studies in" should appear before the word "Nutrition".

7. On page 60595, in the third column, Reference 72 is removed and References 73, 74, and 75 are correctly redesignated as References 72, 73, 74, respectively.

Dated: February 21, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

Medicare and Medicaid Programs; Advance Directives

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Interim final rule with comment period.

SUMMARY: This interim final rule amends the Medicare and Medicaid regulations governing provider agreements and contracts to establish requirements for States, hospitals, nursing facilities, skilled nursing facilities, providers of home health care or personal care services, hospice programs and prepaid health plans concerning advance directives. An advance directive is a written instruction, such as a living will or durable power of attorney for health care, recognized under State law, relating to the provision of health care when an individual's condition makes him or her unable to express his or her wishes. The intent of these provisions is to enhance an individual's control over medical treatment decisions.

This rule implements sections 4206 and 4751 of the Omnibus Budget Reconciliation Act of 1990 (OBRA '90), Public Law 101-508.

DATES: *Effective date:* This interim final rule is effective on April 6, 1992. However, statutory requirements at sections 1819(c)(1)(E), 1833(r), 1866(a)(1)(Q), 1876(c)(8), and 1891(a)(6) of the Social Security Act (the Act) have an effective date of December 1, 1991, and are effective on that date regardless of the effective date of this interim final rule.

Comment date: Written comments will be considered if we receive them at the appropriate address, as provided below, no later than 5 p.m. on May 5, 1992.

ADDRESSES: Mail comments to the following address:

Health Care Financing Administration,
Department of Health and Human Services,
Attention: BPD-716-IFC,
P.O. Box 26676,
Baltimore, Maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309-G, Hubert H. Humphrey Building,
200 Independence Avenue, SW.,
Washington, DC 20201; or
Room 132, East High Rise Building,
6325 Security Boulevard,
Baltimore, Maryland 21207.

Due to staffing and resource limitations, we cannot accept audio, video or facsimile (FAX) copies of comments. In commenting, please refer to file code BPD-716-IFC. Written comments received timely will be available for public inspection as they are received, beginning approximately three weeks after publication of this document, in room 309-G of the Department's offices at 200 Independence Avenue, SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (phone: 202-245-7890).

Organizations and individuals desiring to submit comments on the reporting requirements discussed under the section on "Collection of Information Requirements" of this preamble should direct them to the Health Care Financing Administration at one of the addresses cited above, and to the Office of Information and Regulatory Affairs, Attention: Laura Oliven, Office of Management and Budget, New Budget, New Executive Office Building (Room 3002), Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Thomas Hoyer, (301) 966-4607.

SUPPLEMENTARY INFORMATION:

I. Background

Advances in medical treatment that permit life to be prolonged through the use of progressive medical equipment have raised complex legal and ethical issues relating to the rights of patients in making decisions as to whether such treatments should be used or, if used, should be continued. The issues raised generally fall within two categories: (1) What is the range of choices available to a patient with respect to treatment modalities; and (2) How can these choices be exercised, for example, in advance by means of a directive prepared by the individual before the need for treatment arises, or by another person on the individual's behalf when the individual no longer can make such determinations.

Because of the rising concern surrounding these issues, more and more attention is being focused on increasing the individual's control over his or her decisions concerning medical treatment through the use of advance directives.

Advance directives are written instructions recognized under State law relating to the provision of health care when individuals are unable to communicate their wishes regarding medical treatment. The advance directive may be a written document authorizing an agent or surrogate to make decisions on an individual's behalf (a durable power of attorney for health care), a written statement (a living will), or some other form of instruction recognized under State law specifically addressing the provisions of health care. The various legal devices that exist serve to enhance the ability of individuals to have their desires carried out in the event that they become unable to make their own medical treatment decisions.

Most States have enacted legislation defining a patient's rights to make decisions regarding medical care, including the right to accept or refuse medical or surgical treatment and the right to formulate advance directives. However, prior to the enactment of the Omnibus Budget Reconciliation Act of 1990 (OBRA '90), Public Law 101-508, there were no requirements relating to advance directives under Federal Medicare or Medicaid laws.

II. Legislative Amendments

A. Medicare Provisions

Section 1866 of the Act requires that providers of services under Medicare enter into an agreement (i.e., provider agreements) with the Secretary and comply with the requirements specified in that section. Section 4206(a) of OBRA '90 amended section 1866(a)(1) of the Act relating to Medicare provider agreements by adding a new subparagraph (Q), which specifies that to participate in the Medicare program, hospitals, skilled nursing facilities, home health agencies, and hospice programs must file an agreement with the Secretary to comply with the statutory requirements in new subsection 1866(f) of the Act concerning advance directives. Section 1866(f)(3) of the Act defines an advance directive as a written instruction, such as a living will or durable power of attorney for health care, recognized under State law, relating to the provision of health care when an individual is incapacitated. The State law may either be established by statute or as recognized by the courts of the State.

Section 1866(f)(1) of the Act specifies that a provider of services or prepaid or eligible organization (i.e., a health maintenace organization (HMO), competitive medical plan (CMP) as defined in section 1876(b) of the Act, or a health care prepayment plan (HCPP) as defined in section 1833(a)(1)(A) of the Act) must maintain written policies and procedures on advance directives with

respect to all adult individuals receiving medical care through the provider or organization. The provider or organization must provide written information to each individual concerning an individual's rights under State law to make decisions concerning medical care, including the right to accept or refuse medical or surgical treatment and the right to formulate, at the individual's option, advance directives. The provider or organization must also furnish each individual with the written policies of the provider or organization with respect to the implementation of advance directives.

Section 1866(f)(2) of the Act requires that this written information must be provided at the time an individual is admitted as an inpatient to a hospital, at the time of admission to a skilled nursing facility, before an individual comes under the care of a home health agency, at the time of initial receipt of hospice care, or at the time of enrollment of the individual with an eligible prepaid health care organization or HCPP.

Section 1866(f)(1) of the Act contains provisions that require the provider or organization to document in the individual's medical record whether or not the individual has executed an advance directive, not to discriminate against individuals based on whether or not they have executed an advance directive, to ensure compliance with State law, and to provide for education of staff and community on issues concerning advance directives.

Section 4206(b) of OBRA '90 amended section 1876(c) of the Act by adding a new paragraph (8), which provides that the contract between the Secretary and an eligible organization must provide that the organization meets the advance directives requirements specified in section 1866(f) of the Act.

Section 4206(b) of OBRA '90 also amended section 1833 of the Act by adding a new subsection (r), which specifies that the Secretary may not provide for payment under the Medicare program to an organization unless the organization provides assurances satisfactory to the Secretary that the organization meets the requirements relating to the maintenance of written policies and procedures regarding advance directives in section 1866(f) of the Act.

Section 4206(c) of OBRA '90 provides that sections 4206 (a) and (b) do not prohibit the application of a State law that allows for an objection on the basis of conscience for any health care provider or any agent of such provider which, as a matter of conscience, cannot implement an advance directive. If this is the case, we are requiring that the provider include a clear and precise explanation of this conscientious objection in its written policies and procedures that must be furnished to all adult individuals.

Section 4206(d) makes conforming amendments to sections 1819(c)(1) and 1891(a) of the Act, requiring that skilled nursing facilities and home health agencies, respectively, comply with the advance directives requirements in section 1866(f) of the Act. Enforcement procedures are explained in section D of this preamble.

B. Medicaid Provisions

Section 1902 of the Act sets forth State plan requirements for medical assistance that must be submitted to the Secretary for approval. Section 4751 of OBRA '90 amended section 1902 of the Act relating to requirements for State plans by adding provisions concerning advance directives comparable to the Medicare provisions in section 4206 of OBRA '90. Specifically, section 4751 of OBRA '90 amended section 1902 of the Act by adding new paragraph (57) to subsection (a) and a new subsection (w), which requires all hospitals, nursing facilities, providers of home health care and personal care services, hospices, or health maintenance organizations (as defined in section 1903(m)(1)(A) of the Act) that are receiving funds under a State plan to maintain written policies and procedures to inform, educate, and distribute written information on advance directives to all adult individuals receiving medical care by or through the provider or organization, in the manner described in the law.

Section 4751 also amended section 1902 of the Act by adding paragraph (58) to subsection (a) which requires that the State, acting through a State agency, association, or other private non-profit entity, develop a written description of the State law concerning advance directives to be distributed to Medicaid providers and health maintenance organizations.

Section 4751(b) makes conforming amendments to sections 1903(m)(1)(A) and 1919(c)(2) of the Act. These requirements are to be enforced under applicable State plan provisions.

C. Public Information Requirements

Section 4751(d) of OBRA '90 imposes an additional requirement on the Secretary to conduct a public education campaign on advance directives. This requirement is being pursued separately by HCFA.

D. Enforcement Procedures

For hospitals and hospices, Medicare enforcement procedures will be conducted in the same way provider agreements are enforced. That is, the provider agreement obligates a provider to comply with the applicable requirements of title XVIII and includes specific provisions. The Secretary may refuse to enter into a provider agreement or may refuse to renew or may terminate an agreement after the Secretary: (1) Determines that the provider fails to comply substantially with the provisions of the agreement or with the provisions of title XVIII and the implementing regulations; (2) Determines that the provider fails substantially to meet the applicable provisions of section 1861 of the Act (definition of services, institutions, etc.,); or (3) Has excluded the provider from participation under sections 1128 or 1128A of the Act (exclusion and civil monetary penalty provisions).

On-site surveys of providers are performed by State agency or Federal surveyors (generally on an annual basis) to determine compliance with the requirements or conditions of participation. However, providers are assumed to be in compliance with the other requirements of the provider agreement. HCFA does not routinely seek information to confirm that the provider is complying with the other requirements of the provider agreement. If information concerning a provider's compliance with the agreement of the provisions of title XVIII is needed, it may be obtained in several ways, including the performance of an on-site survey.

Each hospital and hospice provider will be informed of its obligation to comply with the advance directive provisions and that these provisions are required as a part of its provider agreement with HCFA. Compliance with these provisions is necessary for continued participation in the Medicare and Medicaid programs. These providers will be required to inform HCFA, in writing, of the date they achieve compliance. For hospices, and hospitals not accredited by the Joint Commission on Accreditation of Healthcare Organizations (Joint Commission) and/or the American Osteopathic Association (AOA), compliance will be verified as part of the routine survey process.

Periodic Federal recertification surveys are not conducted in hospitals that are accredited by the Joint Commission and/or AOA because such hospitals are "deemed" to meet

Medicare's certification requirements. However, since accredited hospitals are not "deemed" to meet the utilization review requirements and the advance directive requirements, we do investigate complaints and conduct sample validation surveys at these hospitals. We will verify compliance with the advance directive provisions at accredited hospitals in response to complaints and at the time of these sample validation surveys.

For skilled nursing facilities and home health agencies, enforcement procedures will employ the Federal on-site survey process. State agency or Federal surveyors are responsible for evaluating compliance with the Medicare requirements or conditions of participation. These surveys are generally conducted on an annual basis. Therefore, State agency or Federal surveyors would be able to evaluate on-site compliance with the advance directive requirements through the use of the survey protocol for skilled nursing facilities and home health agencies.

A facility found out of compliance with the provider agreement may be terminated by HCFA. HCFA must give the provider notice of termination at least 15 days before the effective date of termination of the provider agreement. This notice must state the reasons for, and effective date of termination and explain the extent to which services may continue after that date. A provider may appeal the termination of its provider agreement in accordance with part 498.

Under Medicaid, a provider must enter into an agreement with the State Medicaid agency. State agency surveyors or Federal surveyors (during a validation or "look-behind" survey) perform a function similar to that under Medicare. However, the State Medicaid agency is responsible for assuring compliance with the Medicaid provider agreement and the advance directive requirements contained therein.

For eligible organizations, this provision will be enforced as a contract requirement. Organizations must comply with the advance directives requirements in order to receive a contract. Failure to continue compliance with these requirements, as determined by HCFA during routine monitoring reviews, may result in termination of the contract.

Health care prepayment plans also must comply with the advance directives requirements and must provide us with satisfactory assurances that they are in compliance with these requirements in order to receive payment. Failure to continue compliance with these requirements, as determined by HCFA during routine monitoring reviews, may result in termination of a health care prepayment plan's agreement with HCFA.

E. Effective Dates

The amendments made by sections 4206 (a) and (d) of OBRA '90 pertaining to Medicare providers are effective with respect to services furnished on or after December 1, 1991.

The amendments made by section 4206(b) of OBRA '90 pertaining to prepaid and eligible organizations participating in the Medicare program (i.e., contracts with HMOs and CMPs under section 1876(b), and Medicare payments to organizations under section 1833(a)(1)(A) of the Act) are effective December 1, 1991.

The amendments made by section 4751 of OBRA '90 pertaining to the Medicaid program are effective with respect to services furnished on or after December 1, 1991.

III. Provisions of the Proposed Regulations

To implement the provisions of sections 4206 and 4751 of OBRA '90, we are requiring that all hospitals, skilled nursing facilities, nursing facilities, providers of home health care or personal care services, hospices, and prepaid health plans provide written information to each adult individual receiving medical care through the provider or organization concerning his or her rights under State law to make decisions concerning medical care, including the right to accept or refuse medical or surgical treatment and the right to formulate, at the individual's option, advance directives. Under these regulations, the term "advance directive" is defined as a written instruction, such as a living will or durable power of attorney for health care, recognized under State law, relating to the provision of health care when the individual is incapacitated. These regulations do not require an individual to execute an advance directive prior to the provision of treatment and services. Furthermore, we note that these requirements do not apply to providers of outpatient hospital services.

The provider or organization must inform the individual, in writing, of State laws regarding advance directives; inform the individual, in writing, of the policies of the provider or organization regarding the implementation of advance directives, including a clear and precise explanation of a conscientious objection for any health care provider or any agent of such provider which, as a matter of conscience, cannot implement an advance directive; document in the individual's medical record whether or not the individual has executed an advance directive; educate staff on issues concerning advance directives; and provide for community education regarding advance directives.

Nothing in either the statute or this interim final rule addresses patient or provider rights or obligations concerning either notification or decisions regarding medical or non-medical care, except when the patient has left written instructions which become effective only after the individual becomes incapacitated. For example, this regulation neither creates nor affects requirements with respect to informed consent to medical care, determination of mental capacity, provision of medical care to minors, wills leaving property, or organ donation. These and many other significant subjects are not addressed under OBRA '90. The law has a narrow and explicit focus solely of the handling of written directives for medical care made by persons who later become incapacitated.

We do not intend, in these regulations, to prescribe the content and format of the written information to be provided to each adult individual. However, in connection with our technical assistance responsibilities to States in meeting the Medicaid requirements of the law, HCFA's Administrator sent a letter to each State Medicaid Director to which was attached a sample public information document for use in informing adult individuals about advance directives. This sample public information document is suggestive of what we believe an acceptable document should include. Providers choosing to use this sample should include information regarding an individual's rights under State law to make decisions concerning medical care, including the right to accept or refuse medical or surgical treatment and the right to formulate, at the individual's option, an advance directive.

Alternatively, it would be consistent with the statute to develop considerably shorter discussion than that contained in the sample document. It would also be possible to use a short summary notice, several paragraphs rather than pages long, which notified the patient that a longer and more specific document was available upon request. However, the summary notice would have to cover the legally-required elements (e.g. describe the purpose and the concept of an advance directive, describe State law, and describe the provider's policy and procedures).

The material contained in the HCFA Administrator's information package, including the sample public information document, may be found in Appendix I of this preamble.

We are aware that State law on this issue is not always clear. For example, some States may have no statute regarding advance directives, or State law may be a matter of common law or institutional practice rather than a State statute. Additionally, pending litigation may affect the status of existing statutes or legal precedents in other States. A State statute may also be silent on a particular issue, such as whether a provider may decline to follow a directive to which it conscientiously objects. Such silence may not necessarily mean that the omitted action is prohibited. Providers should be careful not to reach such a conclusion absent authoritative interpretation of a particular State's written and unwritten law.

Nonetheless, Congress has mandated that, as of December 1, 1991, providers and organizations participating in Medicare and Medicaid must distribute the required materials that inform an individual of his or her right under State law to accept or refuse medical treatment. Providers and organizations should be aware that this requirement relates to current State law. Therefore, changes in State law, by statute or court case, must be incorporated into subsequent provider information packages. We specifically seek public comments on what would be a reasonable period of time within which such changes should be made.

Written information on advance directives must be provided to an individual upon each admission to a medical facility and each time an individual comes under the care of a home health agency or hospice. For example, if a person is admitted first as an inpatient to a hospital and then to a nursing home, both the hospital and the nursing home would be required to provide information on advance directives to the individual. If an individual is being transferred from a hospital to a nursing home, the hospital discharge planner may provide the information (including the nursing home's policies regarding the implementation of advance directives) on behalf of the nursing home in the course of coordinating the smooth transfer of the patient. However, the nursing home will still be responsible for documenting in the individual's medical record whether or not the individual has executed an advance directive.

If a patient is incapacitated at the time of admission and is unable to receive information (due to the incapacitating condition or a mental disorder) or articulate whether or not he or she has executed an advance directive, then the facility should give advance directive information to the patient's family or surrogate to the extent that it issues other materials about policies and procedures to the family of the incapacitated patient or to a surrogate or other concerned persons in accordance with State law. This does not, however, relieve the facility of its obligation to provide this information to the patient once he or she is no longer incapacitated or unable to receive such information.

As a part of the Medicaid requirements contained in section 4751 of OBRA '90, we are requiring in these regulations that each State, acting through a State agency, association, or other private nonprofit entity, develop a written description of the State law (i.e., statutory or otherwise recognized in the courts) concerning advance directives to be distributed by providers or organizations under the requirements of this section. Given the requirements in the Federal law, States have a wide range of options in describing State law and in prescribing informational materials for use by providers and organizations. For example, the State materials describing an individual's rights to accept or refuse medical treatment and the right to formulate an advance directive could include lengthy or extended requirements for executing an advance directive, or they could be a short, simple statement expressing the individual's rights concerning advance directives.

The following discussion reflects some possible approaches that States, providers, and organizations may choose to take in providing the required information and which we believe would produce results consistent with the statutory requirements. In accordance with the requirements of section 4751 of OBRA '90, States could require that Medicaid providers use the State-developed description of State law only. Alternatively, States could allow providers to incorporate the general information contained in the State-developed description of State law into the providers' own package of materials that include the providers' written policies regarding the implementation of an individual's rights. Although the statute does not specifically require that Medicare providers use the State-developed description of State law, we encourage States, providers, and organizations to work together to ensure that a complete and accurate description of State law is distributed consistently to all adult patients or residents.

As mentioned earlier, HCFA has provided technical assistance to the States, including the technical assistance information package released by HCFA's Administrator in September. Also in September, HCFA released a State Medicaid Manual issuance (HCFA-Pub. 45-2, Transmittal #73) concerning advance directive requirements to inform the States of their responsibilities in this area. Copies can be obtained by the general public by contacting the National Technical Information Service (NTIS), ORDER #PB88-952390. You may call to order at (703) 487-4630 or send a request to NTIS Subscription Department, 5285 Port Royal Road, Springfield, VA 22161.

Finally, we note that a number of other private entities have prepared pertinent documents that States may find helpful. HCFA's Administrator issued a press package that included a bibliography of these publications, as well as a list of organizations that have addressed the statutory requirement that providers disseminate information to adult individuals regarding their rights under State law to accept or refuse medical treatment and the right to formulate advance directives. These materials may be found at appendix II of this preamble.

The law requires that the existence of an advance directive be documented in an individual's medical record. We recognize, particularly in the case of prepaid health care organizations, that such documentation will occur when the medical record is created. Although the statute does not specifically require providers or organizations to have direct dialogue with each adult individual to ascertain whether he or she has executed an advance directive, we believe that this type of interaction is an acceptable method for obtaining this information.

Although it is acceptable that the patient be asked and respond to a specific question, we recognize that these procedures are not the only appropriate methods for obtaining the information needed to document medical records. Alternatives, such as community education campaigns, also may prove acceptable for obtaining this information. It is also acceptable for providers to include in preadmission materials a form, to be completed by the patient, that sets forth whether or not the patient has executed an advance directive. Such form, when completed and returned by the patient at the time of admission, would supply the provider the information needed to document the

medical record, or the form itself could be attached to such record. There are, however, issues with respect to whether these methods may impose too great a burden on the patient or may not result in eliciting the desired information from a sufficient number of patients. Therefore, we request comments on these and other methods of obtaining the information needed to document the medical record.

Concerning the requirement that a provider or organization provide for community education, there are several options available in order to accomplish this. For example, the provider or organization may use its community relations office as its vehicle to educate the community by incorporating the provisions of provider information and applicable State laws on advance directives in its existing publications. Alternatively, providers may simply opt to distribute to the community the same pamphlet developed specifically for its adult patients. The educational materials must inform the public of their rights under State law to make decisions concerning the receipt of medical care by or through the provider or organization; the right to formulate advance directives; and the provider or organization's implementation policies concerning advance directives. Whatever method is used, it must be in writing and subject to survey review for compliance with Federal requirements.

Under these regulations, the provider or organization cannot condition the provision of care or discriminate against an individual based on whether or not the individual has executed an advance directive. For example, all patients are generally entitled to the medically necessary care ordered by a physician which a provider, under normal procedures, would be required to furnish, and the care cannot be delayed or withheld because the individual has not executed an advance directive or the provider is waiting for an advance directive to be executed. However, once it is documented that an advance directive has been executed, then the directive takes precedence over the provision of the facility's normal procedures, to the extent required by State law.

As specified in the statute, we are requiring prepaid health care organizations to provide information on advance directives to enrollees at the time of enrollment. Organizations must give enrollees the advance directive material prior to the effective date of coverage. However, we encourage organizations to give enrollees the material as early as possible after the application for enrollment is received. We are clarifying this issue to avoid misunderstanding and confusion about the time when prepaid health care organizations must provide the required written information regarding advance directives to an adult individual.

We recognize that a prepaid health care organization may have contracts with a variety of providers (in order to assure widespread access to care), and that some of these providers may have policies with respect to advance directives that are more limited than others (e.g., a hospital exercising a reservation of conscience consistent with State law). In such cases, the prepaid health care organization could adopt a policy that embraces the variety of practices of its providers, and disseminate the information regarding those various practices to its enrollees as prescribed by this interim final rule. This information would be provided along with the written description of State law. On the other hand, the prepaid health care organization could simply note, in the material regarding State law and provider practices, that its providers have, in accordance with State law, varying practices regarding the implementation of an individual's advance directive. In this case, such varying practices must be made available to each adult individual selecting or receiving care from such providers.

Specifically, this regulation—

- Changes the title of part 489 to Provider and Supplier Agreements and adds a new subpart I to part 489 to include the requirements of section 1866(f) of the Act for Medicare and Medicaid providers pertaining to advance directives.
- Adds a new paragraph (d) to § 417.436, Membership rules for enrollees, to include the requirements of section 1866(f) of the Act for prepaid health care organizations, and cross-references these requirements in § 417.801, which specifies requirements for agreements between HCFA and health care prepayment plans.
- Adds a new § 431.20 to specify States' responsibility for developing a written description of the State law concerning advance directives to be distributed by providers and organizations under the requirements of part 489, subpart I and § 417.428(b).
- Cross-references the requirements in part 489, subpart I in § 417.472, which specifies the basic Medicare contract requirements; § 431.107, which specifies requirements for Medicaid provider agreements; § 483.10, which specifies resident rights as a requirement for long-term care facilities; § 484.10, which specifies patient rights as a condition of participation for home health agencies; and § 489.10, which specifies the basic requirements for Medicare provider agreements.
- Adds a new § 434.28 to subpart C of 42 CFR part 434, Contracts with HMOs and PHPs: Contract Requirements, to specify that a risk comprehensive contract with an HMO must comply with the requirements in part 489, subpart I.
- Adds a new paragraph (11) to § 498.3, which includes advance directives in the initial determinations that HCFA makes for appeals that affect participation in the Medicare program.

IV. Waiver of Notice of Proposed Rulemaking

We ordinarily publish a notice of proposed rulemaking for a regulation to provide a period for public comment. However, we may waive that procedure if we find good cause that prior notice and comment are impractical, unnecessary, or contrary to public interest. In addition, section 4207(j) of OBRA '90 gives the Secretary authority to issue interim final regulations to implement the provisions of OBRA '90 as he deems necessary.

In order to establish our rules as quickly as possible to allow the provider community the greatest lead time to undertake this activity, and because of the statutory effective date for implementation of these provisions, we are asserting our privilege under section 4207(j) of OBRA '90 to issue these regulations as interim final rules with comment period. We are providing a 60-day comment period for public comment on the rules, and will respond to issues raised by commenters in any subsequent final rules.

V. Regulatory Impact Statement

Executive Order 12291 (E.O. 12291) requires us to prepare and publish a regulatory impact analysis for any final rule that meets one of the E.O. 12291 criteria for a "major rule"; that is, that would be likely to result in—

- An annual effect on the economy of $100 million or more;
- A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or
- Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

In addition, we generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that a final rule will not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, we do not consider States or individuals to be small entities.

These interim final rules amend the Medicare and Medicaid regulations governing priovider agreements and contracts by implementing certain changes made by OBRA '90. The changes establish requirements for States, hospitals, nursing facilities, skilled nursing facilities, providers of home health care or personal care services, hospice programs and prepaid health plans concerning advance directives.

Based on the discussions presented in this preamble, we have concluded that performing the functions necessary to meet the minimal requirements of this interim final rule, as required by the statute, would not cause a consequential expenditure of time and effort. Therefore, we have concluded that this is not a major rule and have not prepared a final regulatory impact statement under E.O. 12291 or a regulatory flexibility analysis under the RFA.

Section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if a final rule will have a significant impact on the operations of a substantial number of small rural hospitals. Such an analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that has fewer than 50 beds and is located outside a Metropolitan Statistical Area.

We have determined, and the Secretary certifies, that these interim final rules with comment period will not have a significant economic impact on the operations of a substantial number of small rural hospitals, and therefore have not prepared a rural hospital impact statement.

VI. Collection of Information Requirements

Sections 417.436(d)(iii), 489.102(a)(2), 417.801(b)(5), 431.107(b)(4), 434.28, 483.10(b)(8), and 484.10(c)(2)(ii) of this interim final rule contain information collection requirements that are subject to the Office of Management and Budget review under the Paperwork Reduction Act of 1980. These information collections require hospitals, nursing facilities, skilled nursing facilities, providers of home health care or personal care services, hospice programs and prepaid health plans to document in the medical record whether or not an advance directive. We estimate the collection burden for each provider or organization employee to be approximately three minutes per medical record. We estimate an overall total of 32,800 providers and organizations (approximately 6,740 hospitals; 990 hospices; 15,830 SNFs/NFs; 5,830 home health agencies; 3,100 personal care providers; and 310 prepaid health plans) to be affected by these information collections. We project that for fiscal year 1992, approximately 15 million individuals will use the services of these providers and organizations. Therefore, we estimate the overall collection burden to be 750,000 hours (15 million individuals × 3 minutes/record = 750,000 hours).

Section 431.20(b) requires States to submit State plan preprint amendments that contain a written description of its law(s) concerning advance directives. We estimate the information collection burden for the 50 States and 4 U.S. territories to be approximately 3 hours per amendment, with an overall burden of 162 hours (54 States and territories × 3 hours/amendment = 162 hours).

There are no reporting requirements associated with these information collections. A notice will be published in the **Federal Register** when approval is obtained. Other organizations and individuals desiring to submit comments regarding the estimate or any other aspect of this collection of information, including suggestions for reducing this burden, should address their comments to the OMB official whose name appears in the "ADDRESSES" section of this preamble.

VII. Response to Public Comments

Because of the large volume of public comments that we usually receive on rules, we cannot acknowledge or respond to them individually. However, we will address all public comments received on this document by the date and time specified in the "DATES" section of this preamble in any subsequent final regulations.

Appendix I to the Preamble

September 5, 1991.

Under provisions of the Omnibus Budget Reconciliation Act of 1990, States are responsible for developing written descriptions of State law regarding an adult individual's right to make decisions concerning medical care. This includes the right to formulate advance directives, such as a living will or a durable power of attorney for health care.

A State, acting through a State agency, association, or other private, nonprofit entity, is required to develop a written description of the State law concerning advance directives. Beginning December 1, 1991, Medicare- and Medicaid-certified hospitals, nursing facilities, and other affected providers and organizations must give adults information on advance directives (see summary of the Federal statute enclosed).

Many States have already convened meetings between provider and consumer representatives and State officials to discuss ways in which to clearly and succinctly write a description of State law on advance directives. Some States already have drafts of those statements completed.

I would like to offer assistance to those States that have not begun the drafting process or that would like some technical assistance in this process. Enclosed is a paper on advance directives that will be part of our public education materials that the Health Care Financing Administration (HCFA) in coordination with the Social Security Administration and the Administration on Aging, will distribute to national news media and consumer publications, and through State and local area Agencies on Aging.

The paper answers basic questions about advance directives and raises the issue in a balanced way that makes clear several points. First, the law does *not* require an individual to execute an advance directive. Second, people can use advance directives to say "yes" to treatment that they want or to say "no" to any treatment that they do not want.

As your State develops its written description on advance directives, I hope that you keep in mind the need for individuals not only to be given basic definitions of terms used, but also to understand the range of options available to them, if they decide to execute an advance directive.

HCFA will also soon send you State Medicaid Manual instructions that will provide you guidelines in implementing the advance directive statutory provisions. If you need additional assistance on this important project in the coming weeks, please contact your HCFA Regional Administrator.

Sincerely,

Gail R. Wilensky,

Administrator.

Enclosures.

(Sample Public Information Document)

Advance Directives—The Patient's Right to Decide

All adult individuals in hospitals, nursing homes, and other health care settings have certain rights. For example, you have a right to confidentiality of your personal and medical records and to know what treatment you will receive.

You also have another right. You have the right to fill out a paper, known as an "advance directive." The paper says in advance what kind of treatment you want or do not want under special, serious medical conditions—conditions that would prevent you from telling your doctor how you want to be treated. For example, if you were taken to a hospital in a coma, would you want the

hospital's medical staff to know your specific wishes about decisions affecting your treatment?

This article answers some questions related to a new federal law taking effect December 1, 1991 that requires most hospitals, nursing facilities, hospices, home health care programs and health maintenance organizations (HMOs) to give you information about advance directives and your legal choices in making decisions about medical care. The law is intended to increase your control over medical treatment decisions.

The information in this article can help you make decisions in advance of treatment. Because this is an important matter, however, you may wish to talk to family, close friends, and your doctor *before* deciding whether you want an advance directive.

Finally, it is important to remember that state laws differ about the legal choices available to individuals for treatment options that can be honored by hospitals and other health care providers and organizations. Beginning December 1, 1991 these health care professionals should have information for you on your state's advance directive law.

What Is an Advance Directive?

Generally, an advance directive is a written statement, which you complete in advance of serious illness, about how you want medical decisions made. The two most common forms of advance directive are:

- a "Living Will"; and
- a "Durable Power of Attorney for Health Care."

An advance directive allows you to state your choices for health care or to name someone to make those choices for you, if you become unable to make decisions about your medical treatment. In short, an advance directive can enable you to make decisions about your future medical treatment. You can say "yes" to treatment you want, or say "no" to treatment you don't want.

What Is a Living Will?

A Living Will generally states the kind of medical care you want (or do not want) if you become unable to make your own decision. It is called a "living will" because it takes effect while you are still living.

Most states have their own living will forms, each somewhat different. It may also be possible to complete and sign a pre-printed living will form available in your own community, draw up your own form, or simply write a statement of your preferences for treatment. You may also wish to speak to an attorney or your physician to be certain you have completed the living will in a way that your wishes will be understood and followed.

What Is a Durable Power of Attorney for Health Care?

In many states, a "Durable Power of Attorney for Health Care" is a signed, dated, and witnessed paper naming another person, such as a husband, wife, daughter, son, or close friend, as your "agent" or "proxy" to make medical decisions for you if you should become unable to make them for yourself. You can include instructions about any treatment you want or wish to avoid. Some states have specific laws allowing a health care power of attorney and provide printed forms.

Which Is Better: A Living Will or a Durable Power of Attorney for Health Care?

In some states, laws may make it better to have one or the other. It may also be possible to have both, or to combine them in a single document that describes treatment choices in a variety of situations (ask your doctor about these) and name someone (called your "agent" or "proxy") to make decisions for you, should you be unable to make decisions for yourself.

Do I Have to Write an Advance Directive Under the New Law?

No. It is entirely up to you.

Can I Change My Mind After I Write a Living Will or Health Care Power of Attorney?

Yes. You may change or cancel these documents at any time in accordance with state law. Any change or cancellation should be written, signed, and dated in accordance with state law, and copies should be given to your doctor, or to others to whom you may have given copies of the original. In addition, some states allow you to change an advance directive by oral statement.

If you wish to cancel an advance directive while you are in the hospital, you should notify your doctor, your family, and others who may need to know.

Even without a change in writing, your wishes stated in person directly to your doctor generally carry more weight than a living will or durable power of attorney, as long as you can decide for yourself and can communicate your wishes. But be sure to state your wishes clearly and be sure that they are understood.

What if I Fill Out an Advance Directive in One State and am Hospitalized in a Different State?

The law on honoring an advance directive from another state is unclear. Because an advance directive tells your wishes regarding medical care, however, it may be honored wherever you are, if it is made known. But if you spend a great deal of time in more than one state, you may wish to consider having your advance directive meet the laws of both states, as much as possible.

What Should I Do With My Advance Directive if I Choose to Have One?

Make sure that someone, such as your lawyer or family member, knows that you have an advance directive and knows where it is located. You might also consider the following:

- If you have a durable power of attorney, give a copy or the original to your "agent" or "proxy."
- Ask your physician to make your advance directive part of your permanent medical record.
- Keep a second copy of your advance directive in a safe place where it can be found easily, if it is needed.
- Keep a small card in your purse or wallet, which states that you have an advance directive and where it is located and who your "agent" or "proxy" is, if you have named one.

Under the new law, when you enter a Medicare or Medicaid hospital or nursing facility, receive home health or hospice care from a Medicare or Medicaid provider, or enroll in a Medicare or Medicaid certified HMO, you should be asked whether you have an advance directive.

For further information, please ask those who are in charge of your care.

Appendix II to the Preamble

National Resources on Advance Directives
